LODGE DIRECTORY.

F. & A. M.

THE STATED MEETINGS OF INYO LODGE, No. 22?, F. & A. M., will be held at the Masonic Hall, Independence, at 7 o'clock P. M., during the ensuing Masonic year as follows:

Saturday	January 16th
"	February 13th
"	March 13th
"	April 17th
"	May 15th
"	June 12th
"	July 10th
"	August 14th
"	September 11th
"	October 9th
"	November 6th
"	December 11th

Members and visiting brethren are cordially invited to attend.

A. R. CONKLIN, W. M

J. J. MOORE Sec.

I. O. O. F.

REGULAR MEETINGS OF INYO Lodge, No. 301, I. O. O. F., are held at the Masonic Hall every Thursday evening at 7 o'clock. All members of the Order in good standing are invited to attend.

A. R. CONKLIN, N. G.

D. CROUGH, R. S.

TRAVELING.

Railroad Time Table.

CARSON & COLORADO R.R.

TAKING EFFECT

Thursday - - - April 1, 1886

STATIONS.	From Mound House. No. 1.	To Mound House. No. 2.
	Leave—	Arrive—
Mound House	9:15 a. m.	5:50 p. m.
Dayton	9:45 a. m.	5:10 p. m.
Wabuska	11:55 a. m.	3:15 p. m.
Hawthorne	3:40 p. m.	11:40 a. m.
Luning	5:10 p. m.	9:50 a. m.
Soda Springs	6:10 p. m.	9:10 a. m.
Belleville	7:45 p. m.	7:55 a. m.
Candelaria	Ar. 8:20 p. m.	Lv. 7:05 a. m.
	No. 3.	No. 4.
	Leave—	Arrive—
Belleville	7:45 a. m.	5:00 p. m.
Benton	11:25 a. m.	1:15 p. m.
Bishop Creek	1:40 p. m.	11:20 p. m.
Alvord	2:30 p. m.	10:10 a. m.
Independence	4:10 p. m.	8:30 a. m.
Lone Pine	5:00 p. m.	7:40 a. m.
Keeler	5:40 p. m.	7:00 a. m.

Trains 1 and 2 run daily.
Train 3 runs Mondays, Wednesdays and Fridays.
Train 4 runs Tuesdays, Thursdays and Saturdays.

Passenger trains make close connection at Mound House with express trains of V. & T. R. R., which connect at Reno with east and west-bound trains of Central Pacific Railroad.

Stage Connections:

At HAWTHORNE with United States Stage Company's coaches for Aurora (26 miles); Bodie (37 miles); Lundy and Bridgeport.

At LUNING (125 miles from Mound House) with Gilmer, Salsbury & Co's. tri-weekly stages (leaving Mondays, Wednesdays and Fridays) for Downeyville, Grantsville and Belmont.

At CANDELARIA with U. S. Stage Co's. stages for Columbia (8 miles), Silver Peak, Montezuma Alida Valley, Gold Mountain, etc.

H. M. YERINGTON.
General Superintendent.

R. J. LAWS, Assistant Superintendent.

D. A. BENDER,
General Freight and Passenger Agent.

BUSINESS CARDS.

JUSTICE OF PEACE,
C. MULHOLLAND.

Office in the "Independent" Building, Independence, Inyo County, Cal.

SHERIFF.

W. L. HUNTER,
COUNTY CLERK,
—AND—
Ex-officio Auditor and Recorder,
INYO CO., Cal.

Office at the Court House .....Independence.

JOHN W. P. LAIRD,
District Attorney,
INDEPENDENCE, INYO CO., CAL.,
Office at the Court House .....Up stairs.

☞ Special attention given to obtaining U. S. Patents to mineral lands.

W. H. GEORGE, M. D.,
PHYSICIAN AND SURGEON,
Bishop Creek, Cal.,

Offers his professional services to the people of Bishop Creek and vicinity. Office and residence opposite Andrew Clark's.

A. R CONKLIN
Attorney-at-Law,
Independence, Cal.

Will practice in all the Courts of the States of California and Nevada.

B. E. STEVENSON, M. D.,
INDEPENDENCE .....CAL.

Office at the Blaney House.

L CELLEAU, M. D.,
PHYSICIAN AND SURGEON,
Lone Pine, Cal.

Also, has Hospital Accommodation for patients coming from a distance.

SHORTHAND.

The art of Shorthand thoroughly taught by mail. Instructions continued until the art is fully mastered Terms reasonable. Address

W. A. HARRIS, Stenographer,
Dayton, Nevada.

AN OOD ANIMAL.

Curious Facts About Sponges That Are Not Generally Known.

Sponges, like other every-day things, we take for granted, and the idea that we are washing our faces with dead animals is, when first realized, rather startling. When alive, the fibrous network we are so accustomed to is clothed within and without by a thin, gelatinous substance very like the white of an egg. This lines all the passages and covers the outside, but it drains off when the sponge is removed from the water. In this substance the life of the sponge resides, and manifests itself not only by the slow but regular growth of the mass, but by a curious circulation of fluid which is constantly taking place within it.

When a sponge is examined in its living state beneath the water a current is always seen to issue from its vents, while a constant flow of water takes place inward through the pores, and these currents evidently have for their object the conveyance of the nutritive matter in the water into the sponge and also the carrying off of the particles which are to be excreted. The position of the pores and vents differs very much in the different kinds of sponges. Sometimes all the pores are on one side and all the vents on the other, and sometimes the vents are placed on top of little cones which look like the crater of a volcano.

The sponges themselves grow in different ways. Some are inhabitants of the deep sea, and are supported by ropes of long, twisted fibers which sink in the mud of the sea bottom. Other "anchoring sponges" are moored to the mud by a beard of long, delicate spikes. An inferior kind of sponge lives in fresh water, but the best ones are obtained from the Grecian archipelago and the Bahama islands, and are usually found attached to some solid object in deep water. They are beaten and soaked in muriatic acid before being brought to market.

"There's been a corner on sponges for the past year," remarked an affable drug-store clerk the other day. "Some of the New York dealers are controlling the market, and we have to pay twice as much as we used to. This one, for instance," picking up a firm, golden ball about three inches in diameter, "we should get two dollars for now, and two years ago it wouldn't have sold for more than half that sum. It's what they call a 'sheep-wool' sponge, and comes from the Mediterranean. These little surgeon sponges bring from $1.50 to $4, but of course they are very fine.

"A Florida sponge, now," and he pointed contemptuously to a tray of dingy-brown skeletons, "sells for fifteen cents an ounce, and a two-ounce sponge is a pretty large one, I can tell you."

The demand for sponges in Chicago has increased enormously in the last two or three years. Numbers of people who, in 1882, were content with with the old-time American "wash-rag" now indulge in bath sponges as large as the most rabid Anglo-maniac. On the hypothesis that cleanliness is next to godliness, and godliness next to culture, according to the doctrines of Mr. Matthew Arnold and his disciples, then the increasing demand for sponges ought to satisfy the yearning of the most aspiring mortal.—*Chicago News.*

SOCIETY OF JESUS.

Number, Organization and Present Condition of Its Members.

The *Gaulois* gives some interesting particulars in regard to the number, organization and present condition of the members of the Society of Jesus. The Jesuits were 40,000 strong in the whole world in 1750; there were scarcely a thousand in 1800, all secularized; to-day they are from seven to eight thousand in number. They were expelled from France, from Switzerland, Italy, Germany, Russia, Holland, the whole of Central America and a portion of South America. They are tolerated in Spain, in England, Austria and Belgium. They enjoy full liberty as simple citizens of the United States and in the English colonies. Nowhere, we believe, are they recognized by a State as the Society of Jesus, if not in some Republics of South America. The Jesuit Society is divided into two classes of individuals, those who belong to the order, but who can be expelled by a decision of the General from one day to another, and those in respect to whom the order is bound by a solemn engagement. All the professed fathers are not in this latter category and a Jesuit does not become a professed father until after the priesthood, which he does not receive until thirty-four years of age, and after the pledge of strong vows. He then undergoes a final examination, the result of which decides his future in the order. He afterward learns, individually and secretly, if he is to be admitted to pass, some day or other, what is called "the third year," and it is only after the last year of study that the order is bound in this particular. The Pope alone can expel him from the society and for considerations of exceptional gravity. A Jesuit of Louvain, a partisan of the doctrines of M. Charcot, wrote, recently, a book to prove that the miracles of St. Theresa were all in the domain of the natural, and that the temperament of the saint sufficed to explain them. The book was condemned, but the writer was not evicted from the order. The fact is that each Jesuit enjoys full liberty in his philosophical judgments and one would never finish the attempt to enumerate all the bizarre works written by members of the society at different epoches. It is this independence of mind and freedom in the choice of their studies which have constituted the whole force in all times past of the disciples of Loyola.—*Public Opinion.*

—What the friend of the family says: "It is, indeed, a lovely child, Mrs. Yungkuple." "Who does it look like?" "Well, its eyes resemble yours; but its mouth reminds me more of," etc., etc. What he means: "Great Cæsar! What a pug-nosed, flat-faced little beast! It looks more like one of the monkeys in the park than any thing else I can think of!"—*Puck.*

THE SOLDIER'S REST.

One of the Most Unique Institutions Brought Into Existence by the War.

Among the many institutions which were brought into existence by the war in this city was the Soldier's Rest and Retreat. Many citizens are now entirely ignorant of this institution. Thousands of those who were refreshed therein by food and lodging when on the way to the front have now forgotten even the location. The institution was located near the north end of the Baltimore & Ohio depot, on the line of North Capitol street, between C and D streets, and was established immediately after the first battle of Bull Run, July 21, 1861. The building taken possession of as a retreat is still standing, although in a dilapidated condition, and is now used as a store house. It had previously been used by Mr. J. P. Crutchett as the Mount Vernon cane factory, where mementos from the resting place of the father of his country were prepared for the market. It covered a space of about 40 by 160 feet of ground and was made into a dining hall, where often as many as 500 of the boys in blue took meals standing. At the time it came into existence the city was full of soldiers, many having been stampeded from Bull Run. The terms of service of many had expired, while others had just arrived on their way to the front. It was given the name of "Soldiers' Rest—Receiving and Forwarding Depot for Troops" by Captain Beckwith, Commissary of Subsistence, who appointed as Superintendent Mr. James H. Searle, now living at No. 9 Sixth street, northeast. Mr. Searle continued during the entire war. A force of cooks and waiters were employed, and in kitchens erected outside the preparations for the meals were made. In these kitchens were the cauldrons for soups, etc., two of a capacity of 140 gallons each, and twenty-five others ranging from 30 to 60 gallons. The bread was at first obtained from the Capitol bakery, located in the rooms on the west front of the Capitol basement, and afterwards near the observatory.

It was not long before it was found necessary to enlarge the depot, and General (then Colonel) Rucker caused to be erected frame barracks east of the "Rest" from the timber from the old Lincoln inauguration ball building in Judiciary square. Then Captain Ed. M. Camp (afterwards Major) was placed in charged of the depot.

The capacity of this depot was simply wonderful, for on one occasion, with but a few hours' notice, 20,000 men were fed within twenty-four hours, soup, bread, coffee, ham pork, tongue, beef and hard-tack being on the bill of fare. This was done without any friction whatever, for, as near as possible, 500 were marched ta the tables at a time. The serving of meals and lodging soldiers was not all that was done, for the exigencies of the service often required cooked rations to be furnished, and to fill these orders the force had to be augmented often so as to work night and day. It is estimated, from the reports made by Major Camp, that during the four years' existence of the depot 20,000,000 meals were served to soldiers during the war.

Sometimes sailors and exchanged prisoners were regaled here, and towards the close of the war when Confederate prisoners were sent here, they were also entertained. Near the end of hostilities a number of Confederates had deserted and come within the Federal lines, and when they reached the "Rest" they were so pleased with their entertainment that they asked the privilege of complimenting the officers under whom the Rest was established. This request was granted, and Major Camp, General Rucker, Secretary Stanton and the President were serenaded by a band made up of deserting musicians.—*Washington Star.*

Farming in America.

Farming in America is to a great extent carried on by machinery, the farm laborers are often the farmer's own sons and daughters, and it is by no means uncommon to see a male agriculturist in a "claw-hammer" coat and a "stove-pipe" hat guiding the plow, while several young ladies with "Langtry" bangs to their hair and dress-improvers to their skirts are shucking peas in the barn, or churning cream, or squeezing curds for cheese in the dairy. These damsels would, as a rule, spurn the bare idea of going into domestic service; and when they lack the capacity to become "school-marms," they contentedly stay in their country home, where they work ten times harder than the farmer's daughter does in England. They cook, they wash and iron, they do domestic "chores;" but they are all young ladies, they all have parasols, and own carte-de-visite albums and birthday books.—*London Telegraph.*

Sale of Public Lands.

Commissioner Sparks has made his report showing the sale of public lands for the fiscal year ending June 30. It exhibits considerable activity in public lands yet, the entries amounting, during the year, to 20,991,967 acres, for which was received $7,412,967. The greatest number of acres of land were taken up in Kansas, 5,636,324, or 17,615 farms of 320 acres each. Next comes Nebraska, where the entries were 3,511,518 acres, or 10,973 farms of 320 acres. Dakota follows, with entries amounting to 3,075,085 acres, or 9,609 farms of 320 acres. In Colorado the entries were 1,282,674 acres, and in California 1,348,678 acres. In the rest of the States and Territories the entries were less than 1,000,000 acres, the greatest number being 911,554 acres in Montana.—*Prairie Farmer.*

—When we came to this country twenty years ago S. F. Cross was postmaster here, and when the mail arrived a very large crowd would gather in the office and the postmaster would call off all the letters, and the bystanders would pass them over heads to the owners. Everybody knew then who was getting a letter and various were the remarks made when certain names were called. The box system was almost unknown then.—*Sturgeon (Mo.) Leader.*

LINCOLN'S ALMANAC.

The True Inwardness of a Story Which Has Been Told Time and Again.

Duff Armstrong, the defendant in the celebrated murder trial in which Mr. Lincoln scored a great legal triumph at Beardstown, is one of the notable characters at Petersburg. The fatal affray occurred at a camp-meeting. Press Metzger became involved in a quarrel, and received a beating, from the effects of which he died. One of the assailants was sent to the penitentiary for eight years. Duff was under indictment, and feeling was quite strong against him. He was a son of Jack Armstrong, who had been Lincoln's great crony in early times. Jack was dead, but "old Hannah," his wife, on her affliction, wrote to Mr. Lincoln, who had then been living in Springfield many years. In reply came prompt instructions to take the case on a change of venue to Beardstown, and to rely on him for the defense. In 1858 the trial occurred. That was a year and a half or so after the trouble at the camp-meeting. Mr. Lincoln conducted the case with great care, cross-examining the witnesses closely. There were one or two men who claimed to have seen the fight, and they described most minutely all the circumstances. They said that Armstrong gave the fatal blow, and that he used a slung-shot. Mr. Lincoln pressed them to know how they could testify so positively, and they said that there was nearly a full moon, and that it was as high as the sun is at ten o'clock in the morning; this moon shining down upon the combatants made every movement plain.

When it came Mr. Lincoln's turn to present the defense, he put into the hands of the jury an almanac, and asked them to see for themselves what kind of a night it was. The jurors looked and saw that there was no moon at all. Court, lawyers, witnesses, and all except Mr. Lincoln were thunderstruck. This evidence was followed by a speech, in which Mr. Lincoln made the most of the almanac. The prosecution couldn't rally from the impeachment of its witnesses. Armstrong was acquitted.

After the trial there was a good deal of talk. The defendant's friends were not the least puzzled, for some of them remembered positively that there was a moon that night. There was a consultation of old almanacs, and it was found that the general recollection was correct: the affray had taken place on a moon-light night. Then the almanac which Mr. Lincoln had used was in request; it could not be found. There is no doubt in the minds of Petersburg people that Mr. Lincoln's almanac was not genuine. Some hold that it was gotten up for the occasion. Others think that for the proper almanac Mr. Lincoln substituted one of the previous year, and that the error in date was overlooked in the confusion caused by such startling evidence. Now and then a warm admirer of Mr. Lincoln has urged that the lawyer himself was not aware that he was palming off on the court the wrong almanac.

Duff Armstrong said to the writer quite warmly: "It's all nonsense to talk about Mr. Lincoln having had that almanac made for the occasion. I recollect he called for an almanac, and there was none in the court-room. Then he sent my cousin Jake out to get one, and he went out and got the book that was shown to the jury. The almanac was all right."

"Lincoln made a speech to the jury," said Duff, in which he told them how he had held me when I was a baby while mother got his meals for him. He told mother he wouldn't charge a cent for defending me, and he never did. He was a mighty smart man, and a good one, too."

While Duff Armstrong lives there will be one man in Petersburg to defend Mr. Lincoln's memory upon the almanac episode.—*Petersburg (Ill.) Cor. St. Louis Globe-Democrat.*

CATCHING WORMS.

How Some Poor New Yorkers Make an Easy Though Uncertain Living.

"There are quite a number of men in New York who make a living at catching meal-worms and selling them to our trade," said the proprietor of a bird store to a reporter.

"You laugh, but it is a fact. There is a man who has furnished me with these worms for the past five years. Step this way and I'll show you how they come to us."

The reporter followed the bird dealer into a back room, where on a shelf stood a row of small tin boxes. The dealer took down a box and opened the lid. The can was half full of small crustaceous worms of yellow and brown color. They measured about an eighth of an inch in thickness and an inch and a half in length.

"These boxes," said the proprietor, "hold about a thousand worms and cost one dollar per box. Most of the meal worms are caught in the big grain warehouses on the river front, in flour mills and old feed stores. A good man at the business can make ten dollars per week. They catch them with their hands or use a sieve. A great many worms are consumed in the course of a year. Mocking birds and nearly all birds with soft bills are very partial to them. Besides, they are healthy. It is said that meal-worms are good eating and taste like shrimp, but I have never tried them."—*N. Y. Mail and Express.*

All the Same to Her.

"Something to eat?" echoed the woman as she faced the tramp on the doorstep: "Yes, if you will earn it."

"I shall be glad to, ma'am."

"Well, there's the wood pile, and I'll bring out the saw and ax."

"Exactly, ma'am, but perhaps you'd prefer to hear me play something on the piano? Really, ma'am, while sawing wood does not disagree with me, the piano is more in my line."

"O, well, come in," she said as she held the door open. "There's so very little difference that we won't stop to argue. There's the piano, and while you jingle I'll have the girl set out a luncheon."—*Detroit Free Press.*

—The sponge fishery at Apalachicola, Fla., has yielded less than one-fourth the usual amount this season, owing to high and constant winds.

NYE ON HIS TRAVELS.

He Describes a Hostelry Called the Fifth Avenue Hotel.

I am writing this at an imitation hotel where the roads fork. I will call it the Fifth Avenue hotel because the hotel at a railroad junction is generally called the Fifth Avenue, or the Gem City house, or the Palace hotel. I stopped at an inn some years since called the Palace, and I can truly say that if it had ever been a palace it was very much run down when I visited it.

Just as the fond parent of a white-eyed, two-legged freak of nature loves to name his mentally diluted son Napoleon, and for the same reason that a prominent horse owner in Illinois last year socked my name on a tall, buckskin-colored colt that did not resemble me, intellectually or physically, a colt that did not know enough to go around a barbed wire fence, but sought to sift himself through it into an untimely grave, so this man has named his sway backed wigwam the Fifth Avenue hotel.

It is different from the Fifth Avenue in many ways. In the first place there is not so much travel and business in its neighborhood. As I said before, this is where two railroads fork. In fact that is the leading industry here. The growth of the town is naturally slow, but it is a healthy growth. There is nothing in the nature of dangerous or wildcat speculation in the advancement of this place, and while there has been no noticeable or rapid advance in the principal business, there has been no falling off at all, and these roads are forking as much to-day as they did before the war, while the same three men who were present for the first glad moment are still here to witness its operation.

Sometimes a train is derailed, as the papers call it, and two or three people have to remain over, as we did all night. It is at such a time that the Fifth Avenue hotel is the scene of great excitement. A large codfish, with a broad and sunny smile and his bosom full of rock salt, is tied in the creek to freshen and fit himself for the responsible position of floor manager of the codfish ball.

A pale chambermaid, wearing a black jersey with large pores in it through which she is gently percolating, now goes joyously up the stairs to make the little postoffice lock-box rooms look ten times worse than they ever did before. She warbles a low refrain as she nimbly knocks loose the venerable dust of centuries and sets it afloat throughout the rooms. All is bustle about the house. Especially the chambermaid. We were put in the guest's chamber here. It has an atrophied bed made up of pains and counterpanes.

In the guest's chamber.

This last remark conveys to the reader the presence of a light, joyous feeling which is wholly assumed on my part.

The door of our room is full of holes where locks have been wrenched off in order to let the coroner in. Last night I could imagine that I was in the act of meeting, personally, the famous people who have tried to sleep here and who moaned through the night and who died while waiting for the dawn.

The chambermaid is very versatile, and waits on the table while not engaged in agitating the overworked mattresses and puny pillows upstairs. In this way she imparts the odor of fried pork to the pillow cases and kerosene to the pie.

She has a wild, nervous and apprehensive look in her eye as though she feared that some herculean guest might seize her in his great, strong arms and bear her away to a justice of the peace and marry her. She certainly cannot fully realize how thoroughly secure she is from such a calamity. She is just as safe as she was forty years ago, when she promised her aged mother that she would never elope with any one.

Still, she is sociable at times and converses freely with me at table, as she leans over my shoulder, pensively brushing the crumbs into my lap with a general utility towel, which accompanies her in her various rambles through the house, and she asks which we would rather have—"tea or eggs?"

This afternoon we will pay our bill, in accordance with a life-long custom of ours, and go away to permeate the busy haunts of men. It will be sad to tear ourselves away from the Fifth Avenue hotel at this place; still, there is no great loss without some small gain, and at our next hotel we may not have to chop our own wood and bring it up stairs when we want to rest. The landlord of a hotel who goes away to a political meeting and leaves his guests to chop their own wood, and then charges them full price for the rent of a boisterous and tempest-tossed bed, will never endear himself to those with whom he is thrown in contact.

We leave at 2:30 this afternoon, hoping that the two railroads may continue to fork here just the same as though we had remained.—Bill Nye in Boston Globe.

An Easy Solution of the Question.

When the Wisconsin Central road was building its line to Chicago, in passing through one of the small Wisconsin towns the tracks were laid directly behind a Methodist church. The Methodists grumbled, but took no definite action in the matter until a tank was built so close to the church as to keep the light from the windows. Then they drew up a petition setting forth the damage that had been done, and requesting $500 with which to remove the church. The president of the road was himself a Baptist, but he was sorry for the Methodists, and when he received the petition he thought he would see if he could do something for them. In consequence he forwarded the petition to F. N. Finney, with the request that he look into the matter and see what could be done. A few days later he was startled by having the petition returned to him with the following suggestions indorsed upon the back: "They had better sell out to the Baptists, and they can use our tank."—Chicago Mail.

An Evident Lack of Confidence.

Gentleman—There you are, Uncle Rastus. You just hand that order to Mr. Smith and he will pay you the money.

Uncle Rastus (scanning the order)—Am dis a verbul order, sah?

Gentleman—No. If I gave you a verbal order he wouldn't pay it.

Uncle Rastus (relieved)—Yas, dat's 'zactly wot Mister Smif sayed. He sayed ef I brought a verbul order dat he wudden't pay it. I reckon he hain't got much confidence in yo', sah.—Grip.

THE HAT BUSINESS.

Profits of a Trade in Which Changes in Style Play an Important Part.

A reporter desirous of information asked a Brooklyn gentleman formerly engaged in the retail hat business in this city whether exceptional profits were made in that line of trade. He said:

"The profit in the hat business ranges from 25 to 50 per cent. There is more money in cheap hats than high-priced ones. For instance, when I was in the business I sold a five-dollar hat (Derby) on which I made a little over a dollar profit. For the quality of hat named I paid $45 per dozen. I also sold a hat for $3 50 which by the dozen cost me $24. While on a cheap hat I made a profit of $1.50, on a better quality I realized much less money. I would rather sell three one-dollar hats than one three-dollar one. Why? Because there is more money in the cheaper quality of hats. Wool Derbies which sell for one dollar each cost from five to eight dollars per dozen. For a time a wool hat will make as good an appearance as a felt one, but when the rain strikes the wool the hat loses its glossy appearance. Probably you don't notice it, but silk hats are not worn so much now as formerly. Certain sets of Americans or Anglo-maniacs have discovered that Englishmen in a measure have tabooed the high or silk hat. This fact may have some thing to do with its present unpopularity. Of course, for dress occasions, the silk hat is the thing, but I think a fine quality of Derby makes almost as good an appearance. In comparison with former years but few high white hats have been worn during the past summer. High hats are unwieldy for business, and should only be worn by elderly men in the day time. What can be more ridiculous to a man of taste than to see a high silk hat worn with a short coat or a Norfolk jacket? Yet men who pretend to know how to dress often commit this breach of good form."

"What is the prevailing style in hats?" was asked."

"The style differs but little from last year. The brims are, perhaps, curled a little more, and in many cases the crowns are made lower. Still, a man who bought a hat late last spring might wear it through the winter, that is, if he doesn't wish to follow the style in the minutest particular. The public have an erroneous idea that a hat becomes a man and not that a man becomes a hat. It is all nonsense that certain men can't wear different shaped hats simply because their physiognomies are peculiarly formed. When you go home take down a hat, if you have preserved it, that you wore say four years ago, put it on and look in the glass. In your own eyes and those of others you cut a ridiculous figure, but still you wore that hat four years ago and no one remarked any thing odd in your appearance. Why this sudden change in your appearance, you ask? Simply because the old hat which you put on is out of style, and the styles since you bought it have been so different that it appears old fashioned in your sight. If you observe closely the hats worn by your friends you will find that it is not the hat which becomes the man, but the man who becomes the hat. Do you remember some years ago when the English curled brim hat was so much worn? The style the previous year was not nearly so much curl, and hatters who had stock left over simply curled their hats to the prevailing style. It is seldom that hatters can dispose of their over stock in the manner named."

"What becomes of the hats left over in stock each season?"

"They are sold or given away. Farmers who are on to the trick will on entering a store ask for the last season's style. They don't care if the hat is just a trifle out of style if they can buy it fifty per cent. cheaper. Irresponsible hatters who do a transient business often sell a countryman off-season styles at the same prices obtained for prevailing ones. Hats which can't be sold are sent to male institutions. Hatters often sustain heavy losses in stock left over. Stock left over and big rents have much to do with the high price of hats. If I should leave the country for ten years and hold no communication with those at home, I could find out whether times were good or bad by a visit to a hat factory. When times are flush manufacturers make fine qualities of hats, and when they are dull the poorer qualities have the largest sale."

"Do not manufacturers change their styles for the purpose of compelling fashionable men to purchase new hats yearly?"

"In a measure, yes. If the styles were not changed each season the factories could not be kept running. Soft felt hats are popular with many men. They are costly, and are worth from five to twelve dollars each according to quality."—*Brooklyn Eagle.*

Minerals in New South Wales.

New South Wales abounds in minerals of commercial value. The aggregate value of mineral raised in New South Wales up to the end of 1885 was £66,637,698, made up of the following amounts: Gold £36,102,834, silver £382,884, coal £17,049,504, kerosene shale £895,437, tin £6,934,803, copper £4,796,585, iron £231,853, antimony £62,217, silver lead £357,026, asbestos £488, bismuth £10,010, and other minerals £20,106. During 1885 19,216 miners were engaged in mining for the following minerals: Gold 5,911 miners, coal and shale 7,197, tin 3,395, silver 1,513, copper 1,000, slate 20, iron 180. —*London Standard.*

MARVELOUS PRICES!

BOOKS FOR THE MILLION

Complete Novels and Other Works, by Famous Authors, Almost Given Away!

The following books are published in neat pamphlet form, many of them **handsomely illustrated**, and all are printed from **good type upon good paper**. They treat of a great variety of subjects, and we think no one can examine the list without finding therein many that he or she would like to possess. In cloth-bound form these books would cost **$1.00 each**. Each book is complete in itself.

The Widow Bedott Papers. This is the book over which your grandmothers laughed till they cried, and it is just as funny to-day as it ever was.

Grimm's Fairy Stories for the Young. The finest collection of fairy stories ever published. The children will be delighted with them.

The Lady of the Lake. By Sir Walter Scott. "The Lady of the Lake" is a romance in verse, and of all the works of Scott none is more beautiful than this.

Manual of Etiquette for Ladies and Gentlemen, a guide to politeness and good breeding, giving the rules of modern etiquette for all occasions.

The Standard Letter Writer for Ladies and Gentlemen, a complete guide to correspondence, giving plain directions for the composition of letters of every kind, with innumerable forms and examples.

Winter Evening Recreations, a large collection of Acting Charades, Tableaux, Games, Puzzles, etc., for social gatherings, private theatricals, and evenings at home; illustrated.

Dialogues, Recitations and Readings, a large and choice collection for school exhibitions and public and private entertainments.

Parlor Magic and Chemical Experiments, a book which tells how to perform hundreds of amusing tricks in magic and instructive experiments with simple agents.

The Home Cook Book and Family Physician, containing hundreds of excellent cooking recipes and hints to housekeepers, also telling how to cure all common ailments by simple home remedies.

Sixteen Complete Stories by Popular Authors, embracing love, humorous and detective stories, stories of society life, of adventure, of railway life, etc., all very interesting.

Called Back. A Novel. By Hugh Conway, author of "Dark Days," etc.

At the World's Mercy. A Novel. By Florence Warden, author of "The House on the Marsh," etc.

Dark Days. A Novel. By Hugh Conway, author of "Called Back," etc.

The Mystery of the Holly Tree. A Novel. By the author of "Dora Thorne."

The Fresco Fiend. A Novel. By Wilkie Collins, author of "The Woman in White," etc.

Red Court Farm. A Novel. By Mrs. Henry Wood, author of "East Lynne," etc.

Back to the Old Home. A Novel. By Mary Cecil Hay, author of "Hidden Perils," etc.

John Bowerbank's Wife. A Novel. By Miss Mulock, author of "John Halifax, Gentleman," etc.

Anne. A Novel. By Mrs. Henry Wood, author of "East Lynne."

Amos Barton. A Novel. By George Eliot, author of "Adam Bede," "The Mill on the Floss," etc.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE,
BODIE, CAL. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the northeast corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 56 degrees 26 minutes E. distant thirty-six chains; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 31," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 4 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE,
BODIE, CALIFORNIA, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 53 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty-nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

NOTICE TO INYO COUNTY BOND-HOLDERS.

Office of the Board of Supervisors, Inyo County, State of California, October 16th, 1886.

NOTICE IS HEREBY GIVEN TO THE holder or holders of the following bonds of Inyo County, State of California, to wit: 153 bonds of said county, known as bonds of the County of Inyo, in the State of California, numbered from 18 to 170 consecutively, of the denomination of $500 each, bearing interest at the rate of 7 per cent. per annum with interest coupons attached, issued during the year 1881 under authority of an act of the Legislature of the State of California, entitled "An Act to establish a uniform system of County and Township Governments," approved March 14th, 1883, and of an Act entitled "An Act to provide for Funding the Indebtedness of Counties in certain cases," approved May 8th, 1884. That unless such holder or holders of said bonds shall within thirty days after service of this notice by publication, which service will be completed on the 27th day of December, 1883, present the said bonds held by such holder or holders to the Board of Supervisors of Inyo County, State of California, at the office of said Board of Supervisors, in the Town of Independence, county and State aforesaid, and consent to a reduction of the interest thereon to five and one-half per cent. per annum, the lowest rate that has been offered by any other person or persons, firm, company or corporation, the said Board of Supervisors will proceed to cancel such bonds by payment of the principal and interest thereon accrued.

By order of the Board of Supervisors of Inyo County, State of California.

[SEAL] W. L. HUNTER,
Clerk of Board of Supervisors.

SHADE TREES.

Good, Thrifty Trees One and One-half Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

W. J. MARSH & SON,
FORT CHURCHILL, Lyon Co., Nev.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, JANUARY 1.....1887.

It is reported that the Holmes mine, at Candelaria, will soon be started up again.

Mr. S. G. Gregg has got back from his trip to the East, and will be on hand to begin his duty as Sheriff on Monday.

After a long term of idleness, work has been resumed in the Mount Cory mine, near Hawthorne. Twenty men are employed.

Mr. N. Rhine has moved into the new store and taken sole charge of the business of the late firm of Harris & Rhine.

It is believed that a rich gold field has been discovered in that part of New Guinea subject to the German government.

Mr. H. J. Robinson, of Gridley, Butte county arrived at Independence last Monday on a visit to his brother, Mr. E. Robinson.

The Czar is reported to be drinking heavily. This is strange since he was not appointed to the office he holds by Secretary Bayard.

Mr. J. J. Moore, County Treasurer elect, has been appointed Postmaster at Independence, to succeed G. H. Hardy, resigned. Mr. Moore will not take charge of the office for a week or two yet.

Miss Winnie Davis found the people of the North energetic and full of business. That is the way her respected Pa found them about the time Winnie used milk as a steady diet.—*Salt Lake Democrat.*

The stockmen of Nevada appear to be very uneasy over a proposition to enact a no fence law for the State. They don't want to be held responsible if their cattle destroy the crops of a settler who may be too poor to build fences to protect what he plants.

Mr. Andrew Clark, of Bishop Creek, has bought a young bull and heifer from the shorthorn herd of Mr. W. J. Marsh, of Fort Churchill, Nevada. The price of the animals was $350 each. This famous stock will be of very great value to Inyo county in a few years.

Mr. Isaac Harris has gone to San Francisco. Many old friends all over the county parted from him with regreat. Though the firm of Harris & Rhine is dissolved by the retirement of Mr. Harris, yet he still has property interests here, and is interested in the prosperity of the county.

General Logan is thought to be dying. No braver or patriotic American ever lived. Only those who took part in the same terrible struggle in which he gained distinction and proved his worth, can fully appreciate his great qualities and justly value his noble services to his country.

Mr. De La Matyr has so far recovered from the hurts received in a runaway a few weeks ago as to be able to resume his pastoral duties. He is a preacher of much more than average ability and everyone should go to hear him. No person of intelligence can fail to be interested in his discourses.

Some time ago an aged man named Bailiff shot and killed a young lawyer named Noon, at Santa Rosa. The cause of the shooting was an improper intimacy between the wife of Bailiff and Noon. The slayer was tried for murder and acquitted last week. It seems to be an unwritten law that no man shall be punished for killing the seducer of wife or daughter.

The enterprise of the Sacramento *Bee* and *Record-Union* in promoting and afterward describing the Citrus Fair held at Sacramento, is worthy of the very highest praise. Such newspaper work does more than all other agencies united to develop the resources of a country. The whole of Northern iCalifornia owes a great debt of gratitude to the *Bee* and *Record-Union* for the work they are doing for that section.

So many people are flocking into Los Angeles that great difficulty is experienced in finding sleeping room for them. The City Council is trying to help in the matter. It has been suggested to hire some large building and fill it with cots and charge 25 cents a night each for the use of these. It is also urged that some of the large public halls be spread with mattresses or cots for the use of strangers, when the halls are not otherwise used.

The headquarters of the army located at in Arizona is ordered to be located at Los Angeles. The *Express* says this is another feather in the cap of the southern metropolis, though a lunatic asylum would have been more useful. The candor of the *Express* in making such an admission is remarkable; it is very seldom that people afflicted that way are conscious of their own condition or atall willing to admit it.

Mrs. Dolores L. De Esparza, who died at Lone Pine last week, was popularly known by the name of Chata. She was sister to Miguel Castro, of Lone Pine. Mrs. Esparza was highly respected in the community where she lived. She leaves two boys, aged respectively six and three years, to mourn the loss of a kind mother, and a husband who feels most keenly the loss of a good wife. The remains were followed to the grave by almost the entire community. The burial services were conducted by Rev. Father Scanlan, and those who were present will not soon forget the impression which was produced.

San Diego and Los Angeles have perfect organizations for the object of securing immigration. Their books, pamphlets, newspapers and circulars are distributed all over the Union. They have regular agencies devoted to this work. Money has been subscribed liberally to meet the expenses incident to these finely conceived and admirably executed advertising enterprises. These people have public spirit. They are aware that what benefits the community, as a rule, benefits the individual interested in that community. Inyo county needs an organization for the express purpose of promoting the development of its great natural resources. Nothing of the kind exists at present. Where all will be benefited, all should assist.

Public Installation.

Next Thursday evening at 8 o'clock, in the Methodist Church, there will be a public installation of the officers of the Odd Fellows Lodge.

Not Ashamed Of Honest Work.

In an address delivered at the Teachers' Institute in Colusa, W. S. Green, editor of the Colusa *Sun*, said:

"From twelve years of age I made my own way in life—void of the advantages of a scholastic education, and I have worked at almost every conceivable thing; and I am proud to be able to stand in this presence and say that I have never, for a moment, been ashamed of any kind of labor. I have been cook and landlord at a hotel; I have kept a bakery and made bread, pies and cakes; I have milked cows and sold the milk, have raised vegetables and peddled them like a Chinaman; have done every kind of work a farm hand ever did; I have set type; have run the transit and level in surveying, and now when I want a stick of lumber, I go to the lumber yard, get it and carry it on my shoulder through the streets of Colusa, and I would not be ashamed to carry a piece of lumber on my shoulder through the crowded streets of San Francisco. Long before I was of age I made a motto, "Be ashamed of nothing that is honest."

Although I did not have an education, I do not undervalue one. I have felt the need of early training, and have ever been in the harness in the cause of education. The State should educate, but it should not make useless dudes of our boys and affected parlor ornaments of our girls. It should block them out, as it were, ready for use."

Mr. Green is far too modest when he says he "did not have an education;" he has an education, and a good one. He may not be a able to read Greek or Latin; he may not be a profound mathmetician; but he is well informed on many subjects that far more nearly concern ordinary human beings, and he has a good knowledge of the glorious literature of the English language, the purest, the wisest and best literature that ever existed. He can earn an honest living for himself and those dependent upon him, and this is more than many of the so-called "highly educated" can do. It is a misuse of the word "education" to apply it to any teaching that does not make a human being better able to do any kind of work, even the commonest, than one who is not educated. Many of the so-called "educated" are beings so utterly helpless as to be contemptible.

Another Gone.

One more of the brave and true men who gave up everything for country in the day of her danger has passed away. John A. Logan died at Washington last Sunday. No braver man than he ever entered battle; no more devoted patriot ever served his country in the counsel of the nation. His death, which came with startling suddenness to his family and friends, had not been unexpected by his physicians for some days. A lurking tendency to brain complication, which had been present in a greater or less degree, and constantly increasing in severity during his entire illness, had prepared them to expect the worst. The racking pains which he suffered during the early days of his illness, yielded to treatment, but left him in weak and exhausted condition from which he never rallied, and upon which fever preyed with increasing violence until the hour of his death.

Men of all parties, now that he is gone, will unite in saying what a sturdy, manly man he was. He was born in Jackson county, Illinois, February 9, 1826, so that his age was sixty years, ten months and fifteen days. His father was a native of Ireland, a doctor and a man of education and intelligence, so that he was able to instruct his son at a time when schools were not easily accessible in Illinois. During the time General Logan served in Congress, many reputations of public men were ruined by the discovery of corruption; but no trace of scandal or fraud attached to him. He was as honest as he was brave, and died possessed of about as little property as when he first entered public life. The character of John A. Logan proves that there is no degeneracy in the virtue of the republic.

Free Coinage of Silver.

A bill has been introduced in Congress which provides that the holders of silver bullion may have the same coined into standard dollars of 412½ grains on the same terms as applied to the coinage of gold. That the silver dollar shall be the unit of account and standard of value in like manner as is now provided for the gold dollar, and shall be a full legal tender. It also provides that the Secretary of the Treasury, instead of the coinage of all the silver bullion presented, shall exchange therefor silver dollars or certificates, coining only as much of the bullion as the needs of the country may require.

Artesian Wells.

One year ago last May the first artesian well was bored in Sierra Valley, Plumas county. Since then one well boring concern has put down eighty wells, and there are four other parties engaged in the same business in the valley. The wells range from 60 to 830 feet deep, each well giving a supply of water from five to a hundred and eighty gallons per minute, ranging from the ordinary temperature up to 130°. Land has greatly increased in value since these wells were bored. The work is still going on. If we can only get the work started in Owens valley a boom will surely follow.

Now Open.

I have fitted and newly furnished the house on the corner of Market and streets, where I am prepared to accommodate the public with first-class Board and lodging. Large and comfortable rooms for families. Suppers furnished on short notice. Board by the day or week at regular prices.

V. G. THOMPSON,
Proprietor.

Started Up.

The new mill at the marble quarry was started up last week. Everything worked well, except that the speed was too great, and a stop had to be made to gear down a little. Mr. Luce says of the quarry: "The quarry improves with every step, and is developing splendid, just as I saw by the eye of faith, based upon past expertence, for had it not improved it would have belied all the past, both ancient and modern."

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address

JAMES HINES,
Independence.

Worth Looking At.

The display of watches and jewelry at the postoffice is well worth looking at. Mr. Scott will take pleasure in showing the handsome goods to visitors.

AN OPENING FOR LOS ANGELES.

Rich Territory That Would Be Tributary.

More people than ever before are pouring into Los Angeles. Great trains arrive every few days from the East bringing people by the hundreds. The continuance of this great influx of people will very soon make new territory for settlement an absolute necessity. There is a region that now has a very sparse population, yet has room and resources enough for seventy-five thousand people, and Los Angeles may easily bring about the filling up of the country and control the vast business that would grow up. There are individuals in Los Angeles amply able to build the short stretch of railroad, the want of which is the only bar that prevents Owens valley from becoming the most valuable region for business that the city would be connected with. The coming summer will see a large increase of settlers in Owens valley, whether the southern route be opened or not. People will come in from the north over the Carson and Colorado railroad if an opening is not made from Los Angeles. Should the first rush of people into the valley come from Los Angeles their business relations would naturally be established there, and once established would remain. If connected with that city by rail, this great and fertile valley would become known in the East as part and parcel of the territory tributary to Los Angeles, and as such would add greatly to its fame and consequence.

Already business interests are growing up that will speedily make the opening of this route an absolute necessity to Los Angeles. At Carson fruit boxes are made to order and shipped by the carload to the fruit-growers of Los Angeles county. These boxes must be hauled over the Virginia and Truckee road to Reno; thence over the Central Pacific to Sacramento, thence to Stockton, and so on to Los Angeles. Or they must be hauled to San Francisco and then sent by sea to Wilmington, and from there hauled to the city. Instead of this long, roundabout and expensive way of shipping fruit boxes, if the gap between Keeler and Mojave were closed they would go in almost a straight line from Carson to Los Angeles. The opening of this line would also give access to a good market for oranges that is now supplied from Sacramento. Not only all the trade of California east of the mountains, but the whole of Western Nevada would be controlled by this route, not in oranges or other fruits alone, but in all kinds of merchandise, and in nearly all financial transactions. No ambitious and rapidly growing city ever before had a better opportunity to make a most valuable extension of business relations with new territory, than is now within the grasp of Los Angeles by completing the short link of railroad that will give her control of Owens valley.

A Good Move.

The citizens of San Bernardino have organized a bureau to give information of the resources of the county and to promote the coming of settlers. This is a good example for other counties to follow. By far the larger part of the work of building up the State is done by the local newspapers. Nearly every one of the editors of these papers is struggling along under great difficulties, giving time, labor and talent to do a work from which they are the very last to receive any benefit. Great good could be done if organizations like the above were formed to help the local papers in all localities where there are undeveloped resources. San Bernardino has an area larger than some European Kingdoms; the climate is delightful, much of the soil very fertile, and the county when fully developed would sustain in affluence a greater population than the whole State now has. If the new bureau enters heartily into the work and wisely and generously aids the local papers, a rapid increase in wealth and population will speedily follow.

Red Man's Feast.

About two hundred Indians met at Camp Independence last Monday to hold a feast. During the preceding week hunting parties were out in the valley and among the mountains and a large amount of game was secured, all of which was taken to the "big eat." Several noted Indian dancers were present, and the first dance came off on Monday night; this was the "war dance," and only two warriors performed. These were elaborately dressed, port of their costume being feathers stuck upon their noses. After the grand ceremonial performance the dancing became general, men and womed taking part. The music is a low "crooning" kept up by the whole company. The festival lasted all week, with dancing every evening.

Tapping a Lake.

In the Sierra Mountains, on the west side of Owens valley, are many small lakes. One of these is near the head of Black Rock canyon, a few miles north of Independence. It is the intention of Mr. C. B. Rawson to tap this lake during the coming summer, and bring the water down into the valley for irrigation. He thinks a tunnel of about three hundred feet in length would tap the lake at a depth of about forty feet. This would give a large supply of water. Many of these lakes might be tapped at a moderate outlay.

Too Late.

A communication from Bishop Creek, stating the death of Miss Moore, was received too late for insertion in last week's issue. All communications intended for publication must be signed by the writer, and must reach the printing office not later than Friday morning, otherwise they will not be printed, or will have to lie over one week.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

THE ASSESSOR REPLIES.

INDEPENDENCE, Dec. 27, 1886.

CITIZENS OF INYO COUNTY:—The undersigned would respectfully invite your attention to a plain statement of facts. In the report of the Grand Jury published last week, the following sentence occurs: "We also find upon examination of the Assessment Roll of 1886, that the Assessor has failed to collect personal property taxes to the amount of about $163, and would therefore recommend that the Hon. Board of Supervisors take necessary steps to recover the same." Now when this report was made my term of office as Assessor had not expired, and it was therefore premature for the Grand Jury to make such a report. That the amount of taxes stated was due is true enough; but the parties owing the same had already been notified by me that payment must be made, and in fact nearly the whole amount was paid about the time when the jury adjourned. This part of the report was evidently designed as a censure upon my official conduct; but I submit to every candid mind whether it is not in reality a testimony to the faithful discharge of duty such as any officer might be proud of. After a searching, and by no means friendly investigation of my official accounts, the Jury found that the very small sum of $163 of taxes on personal property yet remained unpaid, and that, too, while yet a considerable time remained to me for the collection of the same before the expiration of my term of office. A little knowledge of business, a little common sense and a great deal less of stupidity among certain of the Grand Jury, and no such unjust and foolish charge would have found a place in the report. As responsible citizens as Inyo county contains had given bonds to the county to guarantee the faithful discharge of my official duties, and to protect the county against loss through any fault of mine. Those bonds will continue in force long after the expiration of my term of office; and after my retirement if any neglect of duty, or any wrong I have done the county be discovered, my bondsmen can be forced to make good the damage. I invite the closest scrutiny of my action as Assessor, after the close of my term of office, and then it will be found that every dollar it was my duty to collect has been collected and paid to the County Treasurer.

Respectfully,
JOHN C. IRWIN,
County Assessor.

Mistake.

A mistake was made last week in reference to the appointment of a Supervisor to succeed the late George Stevens. By an oversight reference was made to the law in force previous to the enactment of the present County Government Bill; that law provided for the appointment of a Supervisor to fill a vacancy by the Judge; by the law now in force the Governor appoints. The change in the appointing power is no improvement; matters affecting only the county should be left entirely to the county authorities.

Till Robbing.

On the day before Christmas a man named Leon Peon was released from the jail at Independence, where he had been sent for stealing harness. A day or two afterward he went to Lone Pine. Here he struck up an acquaintance with Louis Pidillo, well known there. At the beginning of this week these two worthies were caught in the act of robbing a till in the saloon of Richards and Castro. They were not arrested, but both were warned to leave the town. Peon is strongly suspected of killing Alphonse Thiebaut a few months ago. A rumor was current on the street yesterday that Peon had been lynched by the citzens of Lone Pine, but it could not be traced to any authentic source.

A Child In Danger.

Last Monday evening Bertie Levy, a child aged about nine years, rode on a horse belonging to her father, Henry Levy, of Independence, while that and another horse were taken to water. On the way back from the brook the animals got frightened, and both started to run. The child dropped the lines and clung to the saddle; both horses rushed wildly through the streets; men ran and tried to stop them but they turned and dashed into the open country east of town. The horses kept up their wild career, but the child clung to the saddle screaming in terror. About half a mile east from town Bertie dropped from the animal and alighted in a pile of sagebrush, unhurt, except a few scratches. The men who were following came up in a few minutes and found her walking about, but in an unconscious condition. She was carried home, and is now apparently not the worse for her rough ride.

Typhoid, Scarlet and Yellow Fevers, Measles, Diphtheria, Small-pox, Cholera, etc.

Darbys Prophylactic Fluid will destroy the infection of all fevers and all contagious and infectious diseases. Will keep the atmosphere of any sick-room pure and wholesome, absorbing and destroying unhealthy effluvia and contagion. Will neutralize any bad smell whatever, not by disguising it, but by destroying it. Use Darbys Prophylactic Fluid in every sick-room.

The reason given for the resignation from the Tory cabinet of England of Lord Randolph Churchill, is that he discovered such gross frauds in the army and navy departments that he would no longer remain in office under an administration that took no pains to discover and punish such rascality. Under a Tory government all the offices are controlled by the aristocracy, and as many of these are such miserable blackguards as Lord Colin Campbell, nothing else might be expected that fraud and corruption wherever they are concerned. Perhaps it was a wish to be thought "so English you know" rather than mere greed for money, that led to so much corruption in the New York Board of Aldemen. Anglomania has been very prevalent there.

DIED.

ESPARZA—At Lone Pine, December 23, 1886, after a very brief illness, Mrs. Dolores L. De Esparza, aged 32 years.

MOORE—At Bishop Creek, Inyo county, Dec. 20, 1886, of paralysis, Miss Emerald D. Moore, grand daughter of H. S. and Emily Enloe, aged 17 years, 8 months and 8 days.

These shall resist the empire of decay,
When time is o'er, and worlds have passed away;
Cold in the dust the perished heart may lie,
But that which warmed it once can never die.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SPOONER, MO., writes: "I stood up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer taken off the women, and save as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., Jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy cure for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

CALIFORNIA.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

MOSBY'S FIGHT AT CHANTILLY.

trategy and Dashing Bravery Too Much for the Federals—A Chase.

The post at Chantilly was only two miles from the camp of a division of cavalry, and flanked by strong supporting parties on each side. When I got within two or three miles of it, I turned obliquely off to the right in order to penetrate, if possible, between them and Centerville, and gain their rear. But they were looking out for me, and I found there was no chance for a surprise. I despaired almost of doing anything, but as I did not want to go back without trying to do something, I ordered a few men to chase in the pickets, hopes that this would drive their ly out for some distance. They l several were killed and cap- m a high position I saw mount, form and move up t regained the pike also, so as t off. I got ready to charge they were near, although I ve half their number, vered another large body at had heard the firing com- rom the direction of Fry- nforce them. These were ad bargained to fight in ordered a retreat at a trot I was certain that they apidly, thinking I was , and, by getting strung e pike, would lose their ad- in numbers, and give me a turn and strike back. ulation was right. I kept my closed up, with two some dis- hind to give me notice when near. I had just passed over a was decending on the other when one of my men dashed up and said the enemy was right upon me. I looked back, but they were not in sight. I could distinctly hear their loud cheers and the hoofstrokes of their horses on the hard pike. I had either to suffer a stampede or make a fight. The cavalry officer is like the woman who deliberates—she's lost. If I had gone a step farther, my retreat would have degenerated into a rout. My horses were jaded by a long day's march, while the enemy's were fresh. I promptly ordered the men to halt, right about wheel and draw sabers. It was all done in the twinkling of an eye. Fortunately, just at the place where I halted was an abattis, formed of fallen trees, which had been made by the army the year before. The men formed behind these, as I knew that when they darted out it would create the impression on my pursuers that I had drawn them into an ambuscade. As they stood there calmly waiting for me to give the word for the outset—

"A horrid front they formed—
Still as the breeze, but dreadful as the storm."

I had no faith in the saber as a weapon. I only made the men draw their sabers to prevent them from wasting their fire before they got to closer quarters. I knew that when my men got among them the pistol would be used. My success had been so uninterrupted that the men thought that victory was chained to my standard. Men who got into a fight under the influence of such feelings are next to invincible and are generally victors before it begins. We had hardly got into position before the the head of the pursuing column appeared over the hill, less than 100 yards off. They had expected to see our backs, and not our faces. It was a rule from which, during the war, I never departed, not to stand still and receive a charge, but always to act on the offensive. This was the maxim of Frederick the Great, and the key to the wonderful success he won with his cavalry.

At the order to charge, my men dashed forward with a yell that startled and stunned those who were foremost in pursuit. I saw them halt, and I knew then that they had lost heart and were beaten. Before they could wheel my men were among them. Those who were coming up behind them, seeing those in front turn their backs, did the same thing. They had no idea they were running away from the same number of men they had been chasing. My men had returned their sabers to their scabbards, and the death dealing revolver was now doing its work. The Union cavalry had assumed, as I thought they would, that my retreat had only been feigned, to draw them into a trap. They could not understand why I ran away just to run back again. They had no time to ascertain our numbers or to recover from the shock of their surprise in finding us drawn up to receive them. I never witnessed a more complete rout, or one with less cause for it.—John S. Mosby in Boston Herald.

Steers on a Stampede.

Nothing I have ever seen is half so wild and foolish as a frightened steer, and a bunch of beef steers on a stampede are not to be laughed at; they will stop for nothing, and will run down and over anything that offers resistance in their path. The only way it is possible to stop them is to ride ahead of the herd and gradually turn them to running in a circle, when they will finally stop, but will be off again at the slightest unusual noise. If a man's horse were to stumble in a prairie dog's hole and fall it would mean certain death to both horse and rider, as the whole herd would be upon him in an instant; but the daring and reckless cowboy takes all such chances. —W. H. S. in Courier Journal.

Experiment in Prison Management.

The new experiment which the Dutch are making in prison management will be watched with interest throughout Europe. Hitherto Holland has held the belief that two years in a separate cell is as much as a criminal can stand and survive. This month the Dutch have amended their code so that every prisoner sentenced to a term of impriso ment of five years and over will spend the first five years of his term in cellular confinement. As in Holland even the chapels are constructed on the cellular principle, and the prisoners wear masks whenever they leave the narrow precincts of their living grave, the Dutch experiment seems very severe.—Boston Transcript.

—A Jersey City (N. J.) woman who runs a drug store recently engaged an assistant, and soon found the receipts of the business diminishing. While watching the man one day sell a package of herbs which he recommended for catarrh, she saw him put twenty cents in his pocket and the remainder, five cents, in the drawer. He was arrested and admitted retaining the twenty cents, which, he said, was the price of his advice. The justice dismissed the case on the ground that he could not reduce professional fees.—*Newark Register.*

THE INDUSTRIAL WORLD.

—It is estimated that eighteen million pairs of boots and shoes are annually manufactured in prisons.

—The Connecticut river and its tributaries furnish power to 2,298 mills, which represent 118,026 horse power.

—The foundations are laid for three more large cigar factories at Key West. These will employ one thousand operatives.

—A St. Louis pop-corn man is going to England to introduce the great American luxury, and will take over five thousand bushels of corn in the spring.

—It is claimed that the new Mannlicher repeating rifle, now being manufactured for the Austrian army, is the most perfect perfect rifle ever invented. It fires forty rounds a minute.

—If boys are raised in a way to impress on them that labor and industry is discreditable, luxury and idle habits will follow and vice comes as certain as night succeeds the day.—*N. Y. Examiner.*

—Two Pittsburgh manufacturing firms have bought land on which to erect two or three hundred houses which their workmen will be encouraged to purchase on easy payments.—*Pittsburgh Chronicle.*

—There are 555,855 persons in Great Britain outside of those having agricultural holdings who have from one-fourth of an acre to one thousand acres. Of these 135,736 have from one to five acres, and 148,805 from five to twenty acres. Only 663 have over one thousand acres.

—The New Jersey silk industry is growing rapidly. Plans are completed for a new silk mill at Paterson and for several extensions. A number of companies have decided to increase their capital stock. In several European silk centers the demand is chiefly for low grades, which manufacturers do not care to make.—*N. Y. Herald.*

—Oil from pine wood is now manufactured on a considerable scale in the South. The material is subjected to intense heat in sealed retorts, and one cord of it is said to yield fifteen gallons of turpentine, eighty gallons of pine-wood oil, fifty bushels of charcoal, 150 gallons of wood vinegar and a quantity of inflammable gas and asphaltum.

—In one of the Hudson River railroad shops there is a toothless steel circular saw thirty-eight inches in diameter, three-eighths inch thick at the edge, which is run at high speed with a stream of water pouring over it to keep it from cracking, and will cut off a bar of railroad iron in a short time. Three thousand can be cut before a saw is worn out. The ends get battered by use before the body of the rail, and when sawed the remainder can be used on side tracks.—*Albany Journal.*

—Andrew Carnegie is building on the summit of the Alleghenies, near Cresson Springs, a house, or castle, which will cost $1,000,000. The entire walls will be built up altogether of the undressed surface stone which is to be found on the place, and they are not to show in any place a single mark of the chisel or hammer. Mr. Carnegie's orders are positive on this point, he having expressed a wish to have as far as possible even the moss on the rocks used in the walls undisturbed.

—"Yes," said Brown, "I'm always making blunders. Why, the other evening I talked with a lady three hours, thinking it was my wife all the while. What do you think of that?" "I think," said Fogg, "that you are not only an unconscionable liar, but that your lie is a very foolish and illogical one. Thought it was your wife! And talked with her three hours! It won't do."—*Boston Times.*

—Angry citizen (who has just dropped a coin in the hat)—"I'm a good mind to thrash you. Why, you're an imposter; you're not blind. What do you mean by having that sign on you reading: 'Help the Blind?'" Beggar—"By gum! your right, boss. Don't blame me. It's de ole woman's fault. You see, I can't read, and she has put de wrong sign on by mistake. This is my lame day; to-morrow is my blind day."—*Tit-Bits.*

—Werker—"Hullo, Harold; I'm surprised to see you at this hour. I heard you had gone to work." Harold (offended)—"Naw, old chapple, you—aw—don't mean that now." Werker—"Indeed, I heard so." Harold—"Well, —aw—you didn't believe it, did you?" Werker—"No; I knew you too well." Harold—"Thanks, deah boy, thanks! I'm—aw—glad the base slandah received the tweatment it deserved."—*Rambler.*

A LUCKY CLUB.

How the Milkmen of the Lucky Ranch Came Out Ahead.

Marcus Stone is the fortunate owner of what is known as the "Lucky Ranch," on the San Bruno road near this city. He also conducts an extensive and very successful dairy business at 35 Eddy street, and is highly respected by every one who knows him. In the management of his business he employs quite a number of men. Mr. Stone said yesterday: "I happened one day to hear some of my men talking of investing in The Louisiana State Lottery. I had myself tried it before, and had drawn some prizes. So I said: 'Boys, suppose we form a club and buy a number of tickets together for the October Drawing, and divide the prizes, if we get any.' All agreed, and we each put in $10 and made a purse, enough to purchase nineteen whole tickets, one of which was 73,392, which drew $6000. This gave each man $660 as his share—an excellent return for a ten-dollar investment. I of ocurse am satisfied with the share that has fallen to me," added Mr. Stone, "though common report had it that I had secured the benefit of the whole ticket; and the boys are immensely pleased with their good luck. I suppose we'll have to put it down to the influence of the 'Lucky Ranch,'" added Mr. Stone as he turned to receive some of the friends who called to congratulate him on his luck with The Louisiana State Lottery.—[San Francisco (Cal.) Chronicle, Oct. 28th.

No gentlemen should smoke when walking with ladies, nor should a lady smoke when walking with a gentleman.

St. Jacobs Oil is pronounced a most extraordinary cure for rheumatism by Hon. James Harlan, ex-Vice Chancellor, Louisville, Ky.

That electric boy in California can be utilized when he becomes a few years older by marrying him to an electric belle.

Mr. J. Howard James, manager Stuckert's Livery, 619 N. 5th street, Philadelphia, Pa., says: After trying all other remedies without relief, for a heavy cold on the chest, accompanied by a severe cough, I used Red Star Cough Cure, and in a very short time was entirely well.

RENEWED HER AGE TEN YEARS.

That life may be prolonged is the desire of every invalid, even with suffering, but this is not all Compound Oxygen does, as the letters of many patients testify. A Lawrence (Mass.) lady writes:

"My old troubles are all slowly leaving me. I have renewed my age ten years or more."

A farmer writes from Lockesburg, Ark.:

"I am feeling better and clearer of pain than for years. I can plow all day."

A lady writes from North Waterford, Me.:

"My mother, although 81 years old, feels as well as she did when 40 years old. She walks around the house spryly and does considerable work. She is living, she says, a new life."

If you think that you or any of your friends might be benefited by the use of this treatment, you can decide after an examination of a record of its work in a multitude of cases. A pamphlet of nearly two hundred pages will be mailed free to any applicant by Drs. STARKEY & PALEN, 15.9 Arch street, Philadelphia.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

The difference between a hired girl and the lady of the house is that the hired girl has some time she can call her own.

THE PARENT OF INSOMNIA.

The parent of insomnia or wakefulness is in nine cases out of ten a dyspeptic stomach. Good digestion gives sound sleep, indigestion interferes with it. The brain and stomach sympathize. One of the prominent symptoms of a weak state of the gastric organs is a disturbance of the great nerve entrepot, the brain. Invigorate the stomach, and you restore equilibrium to the great centre. A most reliable medicine for the purpose is Hostetter's Stomach Bitters, which is far preferable to mineral sedatives and powerful narcotics, which, though they may for a time exert a soporic influence upon the brain, soon cease to act, and invariably injure the tone of the stomach. The Bitters, on the contrary, restore activity to the operations of that all important organ, and their beneficent influence is reflected in sound sleep and a tranquil state of the nervous system. A wholesome impetus is likewise given to the action of the liver and bowels by its use.

Evarts recently remarked to a clerk; "Mark my words;" and the clerk, though industrious and willing threw up the place.

BROWN'S LITTLE JOKE.

"Why, Brown, how short your coat is," said Jones one day to his friend Brown, who wittily replied: "Yes; but it will be long enough before I get another." Some men spend so much for medicines that neither heal nor help them, that new clothes is with them like angels' visits—few and far between. Internal fevers, weakness of the lungs, shortness of breath and lingering coughs soon yield to the magic influence of that royal remedy, Dr. R. V. Pierce's "Golden Medical Discovery."

"Bessie, temper is an awful thing. You ought to get rid of it." "Why, mamma, only yesterday you told me to keep it."

"DON'T PAY A BIG FEE!"

65 Cents pays for a year's subscription to the Weekly *American Rural Home*, Rochester, N. Y., without premium—the cheapest and Best Weekly in the World. 8 pages, 48 columns, 16 years old. Hurrah Democrats! Hurrah Republicans! now is the time to get a trial bottle of Irish May Flower at all Druggists for 75 cts.

ST. VITUS'S DANCE CURED.

FARMINGDALE, L. I., N. Y., Sept. 2, 1885.

I have been troubled for several years with an affection of the nerves which no doctor or no medicine could cure until I tried BRANDRETH'S PILLS. I would be taken with a violent pain in the middle of my spine, and my arms and legs would twitch violently. It acted something like St. Vitus Dance, and I couldn't control my limbs. It would come and go once or twice a month, lasting two or three days at a time. Finally, at the beginning of one of my attacks, I took five BRANDRETH'S PILLS. As soon as they acted freely, I found myself almost well. So I continued taking them for a month—one or two a night. It is now a year since I have had an attack, and I attribute my cure to BRANDRETH'S PILLS. FRANCES WOOD

The Wholesale Druggists of San Francisco will supply the trade with Irish May Flower.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria,

Irish May Flower, "King of all," 75 cts.

The man or woman who knows how to eat oysters gracefully has mastered two-thirds of the science of table etiquette.

$500 REWARD.

The former proprietor of Dr. Sage's Catarrh Remedy, for years made a standing, public offer in all American newspapers of $500 reward for a case of catarrh that he could not cure. The present proprietors have renewed this offer. All the druggists sell this Remedy, together with the "Douche," and all other appliances advised to be used in connection with it. No catarrh patient is longer able to say "I cannot be cured." You get $500 in case of failure.

Now that the high bonnets are in fashion the telegraph wires will have to come down.

A Cough, Cold, or Sore Throat should not be neglected. "*Brown's Bronchial Troches*" are a simple remedy, and give immediate relief. *Sold only in boxes*

VALVULAR DISEASE OF HEART.

Ready Remedy, Irish May Flower, 75 cts.

TIRED OUT!

At this season nearly every one needs to use some sort of tonic. BROWN'S IRON BITTERS enters into almost every physician's prescription for those who need building up.

BROWN'S IRON BITTERS—THE BEST TONIC

QUALITY NOT QUANTITY. PURITY. On Every Bottle. Trade Mark

For Weakness, Lassitude, Lack of Energy, etc., it HAS NO EQUAL, and is the only Iron medicine that is not injurious. It Enriches the Blood, Invigorates the System, Restores Appetite, Aids Digestion

It does not blacken or injure the teeth, cause headache or produce constipation—*other Iron medicines do*

MR. J. GRIFFITH, San Francisco, Cal., says: "I used Brown's Iron Bitters by order of my physician for general debility caused by inflammatory rheumatism, and am happy to state that it fully restored me to health."

MRS. S. BOSTWICK, 427 Eddy St., San Francisco, Cal., says: "I have used Brown's Iron Bitters for general debility and loss of appetite with great benefit. I think it a most excellent tonic and cannot say too much for it."

Genuine has above Trade Mark and crossed red lines on wrapper. Take no other. Made only by BROWN CHEMICAL CO., BALTIMORE, MD.

FATAL.

Do you know that a pain in the left shoulder or arm is a sign of heart disease? It is; and that disease may have progressed far towards a fatal termination without exciting suspicion. Take DR. FLINT'S HEART REMEDY at once.

Shortness of Breath. Dizziness, faintness, palpitation of the heart, shortness of breath, restlessness, pain in the left shoulder or arm, denote the presence of heart disease, and call for the immediate use of Dr. FLINT'S HEART REMEDY.

Dropsy. DR. FLINT'S HEART REMEDY rapidly removes the effusion in cases of Dropsy, which is due in most cases to some disease of the heart or general circulation.

Shaking Palsy. DR. FLINT'S HEART REMEDY is efficacious in cases of Shaking Palsy which have defied all other remedies, exercising its influence directly upon the nervous system, which is weak and excitable.

Brain Disease. DR. FLINT'S HEART REMEDY should never be absent from a household, for it immediately relieves all diseases depending upon a derangement of the circulation, such as Congestion of the Brain, Hysteria, Meningitis, Pneumonia, Paralysis, Dementia and Insanity.

Take it in Time. A man who presents an appearance of debility, whose countenance is anxious, and who is subject to spells of faintness, is liable to sudden death from heart disease. Let him take Dr. FLINT'S HEART REMEDY before it is too late.

Apoplexy. DR. FLINT'S HEART REMEDY would have prevented many cases of Apoplexy, which is usually dependent upon diseases of the heart, if taken when first any unusual sensations were felt.

Blessing of Sleep. DR. FLINT'S HEART REMEDY, for the man or woman who finds himself or herself unable to sleep nights, is an invaluable medicine, which will not only procure the blessing of sleep, but will prevent a general breaking down of the system.

At Druggists, $1.50. Descriptive treatise with each bottle; or address

SMOKERS' WHIMS.

What a Brooklyn Tobacconist Has to Say About His Wares.

"How can a cigarette firm afford to give away a watch for the return of seventy-five empty packages?" a local tobacconist was asked by a reporter.

"They can't afford it," was the reply, "but take that means of introducing certain brands of cigarettes. Many of the watches given away in this manner cost from $4 to $6 each, wholesale. The cases are made of silver and nickel. All new cigarettes are good at first. In some brands vile to acco is used, while in others it is the reverse. When first put upon the market a new cigarette is well made and contains the best of stock. This continues only until the cigarette is well established, when both the quality of tobacco used and the make become poor. In some instances where cigarettes are sold at low prices the tobacco is the best, but in the cheaper brands the stock becomes poorer and poorer until smokers give up the brand for some other."

"Why should the quality of tobacco used in cigarettes become worse as the brand becomes popular?"

"For this reason. There is little or no profit on new brands of cigarettes. Why? Because the tobacco used is of the best, and more is paid for making new brands of cigarettes than old ones. In recent years competition in cigarettes has done much to reduce the price. Why less than five years ago all cigarettes sold from 15 to 20 cents a package. Now all brands sell for 10 cents, while in some New York stores the price has even been reduced to 8 and 9 cents. Does it not stand to reason that the tobacco used in the cigarettes which sold at 20 cents per package is much better than that now used in the same brands which sell at 10 cents? Labor is no cheaper now than formerly, yet the price of cigarettes have reduced one-half. Some one must bear the loss. It is not the manufacturer. Who else then can it be, if not the smoker? The latter does not lose in a pecuniary sense, but in the quality of the tobacco used in the cigarettes. To my knowledge there are no less than two hundred brands of cigarettes manufactured. Some brands have long or short lives, according to their quality and names. A pretty name or picture on a wrapper greatly aids in selling certain brands. Many brands contain papier machie-holders. These can only be used in smoking one cigarette, and the packages sold contain a holder for each cigarette. Manufactures have replaced the pictures about which there was such a howl some time ago, by photographs of prominent actresses dressed, of course, in street costume. Other cigar dealers may not have noticed a decrease, but of late I have sold not one package of cigarettes, where I sold five formerly. Many smokers of cigarettes have given up the habit and taken to cigars."

"Do Brooklynites indulge much in snuff?"

"Artistic snuff taking is one of the lost arts. The habit is dying out. I sell but little snuff. Most of the business in that commodity is done in the Southern States. Chewing tobacco? No. I notice no increase in its use, but I suppose Brooklyn has more tobacco chewers now than ten years ago. Many of us were boys then, but have since grown up and have learned to chew."

"Which is more widely used, fine cut or plug?"

"Fine cut, of course. Some old fogies prefer plug, but its use is being superceded by fine cut. In both kinds of tobacco copperas is used. This is injurious to the mouth and teeth. I know many who are never without a chew in their mouths, unless, perhaps, it is when they sleep. Do you know that many Brooklynites who can afford better smoke the rankest and cheapest of cigars, because they prefer the flavor of them better than higher priced brands? To some men a strong five cent cigar of the blackest description is preferable to a clear Havana costing five times that sum. Men's tastes change in cigars as often as any thing else. I have a customer who every week or so orders a box of cigars to be made for him out of the blackest tobacco obtainable. Of course, the man has cast iron nerves but how long he can abuse them I don't know."—*Brooklyn Eagle.*

HOW TO PRUNE.

Frequent and Judicious Trimming of Trees Both Necessary and Profitable.

We look upon the roots as the part that nourish, but the roots are the mouths through which food is taken. It is more correct to say that the soil nourishes rather than the mouth and the leaves of the tree rather than the roots. By severely cutting back heads of trees I can almost suspend growth. Thus we often leave branches that I know must come off next season simply to induce growth of the part that is to remain permanently. Some people seek to urge the growth of scions in newly grafted trees by removing all large limbs. They should remember that they thus remove that which induces growth, and after such severe slaughter many of the fibrous roots will be found dead, for if they have no work to perform they become feeble and short lived. We must distinguish the difference between trees and vines. If we wish the grape to grow vigorously we cut it back closely, for its leaves are very large, and it has the faculty of covering with a trellis only a few buds. Thus we cut feeble growing vines back more closely than strong growing, for by close cutting we get more foliage than by leaving canes long. Therefore, in pruning trees the danger lies in cutting too much, and with vines not in cutting away enough. If you wish the tree to spread, cut to an outside bud; if to run higher and closer, to an upper or inside bud. Leave no crotches, as they are certain to break when laden. Cut close to the shoulder, but do not touch the shoulder. Remember that he who does not trim at all gets the most growth of tree, but he who trims often and wisely has the best orchard and fattest pocket-book.—*Fruit Recorder.*

Domestic Views.

The small boy was regaling a visitor with the family album.

"Who is this one?" asked the victim, as he began the photographic volume.

"Oh, that's gramp', an' here's gram' rite acrost the leaf."

"And this pretty lady?"

"That chromo's Ant Suke; she's a terror. An' that fel that looks as ef he didn't know beans is nunkey."

"Who are the two taken together?"

"That's pop an' mam, only they ain't fitin' there."

"And this sweet child?"

"That's me when I was a kid. An' that's pop's first wife what dide; and that's another nunky. Say, he don't look like a bird, does he? Pop says he's a real old gallus bird; an' this——"

The entrance of the family prevented further disclosures.—Detroit Free Press.

POSITIVE PROOF

Of the Wonderful Efficacy of Animal Magnetism as Applied to the Cure of Disease by Drs. Darrin—A Reporter's Interview with a Well-Known Citizen.

[*San Francisco Daily Report.*]

Having seen in print numerous testimonials of remarkable cures performed by magnetic agency, a *D. R.* reporter set out yesterday in search of some positive evidence on the point. There was a decided bias in the reporter's mind, which obviated the possibility of any surreptitious use of bifulutin statements not justified by the facts. He selected from the circular of the most prominent among our local magnetic healers the name of a well-known citizen, who, it was claimed, had been cured by his treatment. Calling upon George M. Mitchell, of the New Zealand Fire Insurance Company, at 312 California street, he was very kindly received by that gentleman, who willingly contributed much valuable information.

"Mr. Mitchell," asked the reporter, "is it true that you were treated by Drs. Darrin, the magnetic healers?"

"It is," replied Mr. M. "I had been afflicted with nasal catarrh so seriously as to affect my voice and make my condition apparent to my friends. After various futile efforts to procure relief, I called upon Drs. Darrin and placed myself under their treatment."

"How long had you been so afflicted? Please state also how serious your trouble was, and the result of your experiment."

"Certainly. I had been troubled with catarrh almost as long as I can remember. It was a source of constant annoyance to me. My symptoms were a perpetual sensation of a cold in the head. In twenty-four hours after Drs. Darrin first treated me I was greatly relieved. In about five weeks after my first visit I was discharged as cured, and, although that was over two years ago, have had no relapse since. I never was in better health than now."

Mr. Mitchell's appearance fully justified the latter statement. He is a picture of health, and a model of gentlemanly good nature.

Convinced that it was unnecessary to seek for further proof of the Drs. Darrin's wonderful skill, the reporter retired.

Drs. Darrin can be seen daily at their parlors, 113 Stockton street, San Francisco, from 9 A. M. to 8 P. M. The poor treated free of charge from 9 to 10 A. M. daily.

PUNGENT PARAGRAPHS.

—The water in Lake Huron has risen eighteen inches during the past year.

—A poor young man out at the elbows does not feel like laughing in his sleeves.—*New Orleans Picayune.*

—It is safe enough to say that earthquakes originate under the sea. No one can crawl under there to find out.

—An exchange says salt is a remarkable remedial agent. So it is, indeed. It has been known to even cure a ham.—*Lowell Courier.*

—An old lady in Holland scrubbed her sitting-room floor until she fell through it into the cellar. Excess in all things is wrong.

—Wife—"Why, aren't you going to wear your dress suit, my dear?" Husband—"Not much. The last time I wore my dress suit at a party a young woman ordered me to bring her a cup of coffee and be quick about it."—*N. Y. Sun.*

—Charles Mathews, being one evening in the front of the house and seeing a gentleman putting on his coat, preparatory to leaving, exclaimed: "I beg pardon, sir, but there is still another act." "Which is precisely the reason," replied the other, why I am going."

—Husband—"You know that pretty Mrs. F." Wife—"For goodness sake, John, don't talk about that pretty Mrs. F. I can't go anywhere without hearing her praises sounded, until I am sick to death of the sound of her name." Husband—"I was only going to tell you of a rumor I heard about her to-day." Wife—"A rumor? O, John, tell me all about it; that's a good soul."—*N. Y. Sun.*

—Manager—"You have not got a proper appreciation of art, and I can not give you more than twenty-five dollars a week." Pretty Actress—"But I was getting one hundred dollars just after I was divorced, you must remember." Manager—"Oh! you are the actress who was divorced?" Actress—"Yes." Manager—"And eloped with the French Count?" Actress—"Yes." Manager—"Three hundred dollars a week."—*N. Y. Graphic.*

ROYAL BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO. 106 Wall Street, N. Y.

NATURE'S CURE FOR CONSTIPATION, Sick-Headache, AND DYSPEPSIA.

TARRANT'S EFFERVESCENT SELTZER APERIENT, an elegant efficacious, pleasant aperient in the form of a powder, producing when dissolved in water an Effervescing Draught, recommended by our best Physicians as a reliable and agreeable remedy. It cures Constipation, cures Indigestion, cures Dyspepsia, cures Piles, cures Heartburn, cures Sick Headache, cures Liver Complaint, cures Sick Stomach, and gently urges all the Excretory organs to a proper action. It should be found in every household and carried by every traveler. Sold by druggists everywhere.

IRISH MAY FLOWER.

IRISH MAY FLOWER, the best remedy for Costiveness, Biliousness, Malaria, and Constant Headache. The Family Favorite. It has no equal for Children. It gently assists nature without detection from business or pleasure. The Best Bowel Regulator. Sold by Druggists at 75 cents. Yaqui & Co., Agents, office, 624 Montgomery St., S. F., Cal.

Recommended by Professors Hilgard, Cooke, etc

Powdered 98% CAUSTIC SODA.

Invalids' Hotel and Surgical Institute

Staff of Eighteen Experienced and Skillful Physicians and Surgeons.

ALL CHRONIC DISEASES A SPECIALTY.—Patients treated here or at their homes. Many treated at home, through correspondence, as successfully as if here in person. Come and see us, or send ten cents in stamps for our "Invalids' Guide-Book," which gives all particulars. Address: WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main St., Buffalo, N.Y.

OVER WORKED Women

For "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and overworked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Weaknesses and Diseases peculiar to women. The treatment of many thousands of such cases, at the Invalids' Hotel and Surgical Institute has afforded a large experience in adapting remedies for their cure, and

Dr. Pierce's Favorite Prescription

is the result of this vast experience. For internal congestion, inflammation and ulceration, it is a Specific. It is a powerful general, as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It cures weakness of stomach, indigestion, bloating, weak back, nervous prostration, exhaustion, debility and sleeplessness, in either sex. Favorite Prescription is sold by druggists under our *positive guarantee.* See wrapper around bottle.

PRICE $1.00, OR SIX BOTTLES FOR $5.00.

Send 10 cents in stamps for Dr. Pierce's large Treatise on Diseases of Women (160 pages, paper-covered). Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main Street, Buffalo, N. Y.

Dr. Pierce's Pleasant Purgative Pellets LITTLE LIVER PILLS.

ANTI-BILIOUS and CATHARTIC.

SICK HEADACHE,

Bilious Headache, Dizziness, Constipation, Indigestion, and Bilious Attacks, promptly cured by Dr. Pierce's Pleasant Purgative Pellets. 25 cents a vial, by Druggists.

A BALL ROOM PANORAMA,

With Portraits of the Maidens One is Apt to Jostle There.

There are maidens fond of flirting—
You will find them charming sweet;

And, their power great exerting,
They will bring you to their feet.
But you'll find, though they're diverting,
It is well to be discreet;
For your vanity they'll flatter,
And, perchance, some may be hissed,
They in soft love tones will shatter—
On attention they'll insist;
But you'll wonder what's the matter,
When you find that you're dismissed

But beware the maid of learning—
When you see her, pass her by,
For she's ever light-talk spurning,
And you'll find if you draw nigh
She'll discourse in accents burning
On the Whichness of the Why;
Indeed you'll be in consternation,
And you'll be both cold and hot,
On the verge of desperation
When she asks, as like as not,
If you'll give a dissertation
On the Whenness of the What.

Under guidance parental,
You will see at any ball,
Maidens grave and sentimental
Who fond suitors would enthrall,
And in manner transcendental
They will sigh with one and all;
They will talk to you for hours
On the beauties of a star,
Lisping praises of the flowers,
On the moon we see afar,
And of sylvan dells and bowers,
Till you wonder where you are.

There's the rich old merchant's daughter—
She's too wealthy to be sold—
But, though many men have sought her,
Still her hand she does withhold,
For she must, her mother's taught her,
Buy a title with her gold.
She may smile when you address her,
If of lords there is a dearth,

But 'tis useless to impress her
With your honor and worth,
For she'll think you an aggressor
If you're not noble birth.
Then there's sister, who's sweet and pretty,
Who is stately, fair and tall,
Who is clever, witty,
Who is belle of all the ball;
But she's poor, and that's the pity,
For 'tis wealth does her enthrall.
Of her charms you'll never tire,
But you'll best be not too bold,
For she has a poor old sire
Who intends she shall be sold,
And some wealthy man will buy her,
Who's decrepit, mean and old.

—Chicago Herald.

THE POET'S WAIL.

O, the autumn days are coming,
When the bees have stopped their humming,
And the partridge lone is drumming
In the copse upon the hill;
When the leaves are slowly falling,
And the sable crow is calling
To his mate to stop her squalling
With a wild and mournful trill;

Autumn winds the boughs are rustling,
And the towns again are bustling,
While the countryman is hustling
With his apples and his corn;
Days of Johnny-cake and bacon,
When the woods are all forsaken,
And the meadow-larks have taken
Flight across the fields forlorn.

'Tis the season melancholy,
Days when Nature is not jolly;
Soon the welcome Christmas holly
Will be hung o'er banquet hall;
Snows of winter will be o'er us,
And the season soon will bore us
When in manner quite decorous
We must seek the evening ball;

For the summer days are over,
Withered are the fields of clover,
And each merry woodland rover
On his haunts no more does dote;
And the question now, my dearie,
That doth make me feel so weary,
Is the old one, dark and dreary,
Can I wear last winter's coat?

—Henry Tholens in Tid Bits.

A Powerful Plaster.

"Have you a sister?" asked the settling clerk on the board of trade. "No! Then you don't know how dangerous it is to incur her displeasure. I promised to take my sister and a friend of hers to the theatre one evening and then forgot all about it. Well, she and her friend put up a job on me to get even. They made a great strong mustard plaster and put it in the pocket of my night robe. I remember I had a terrible dream that night. I dreamed I was dead. Then I woke up and I was sure I was dead. I could feel the fire burning my heart right out, and every now and then I would get a whiff of that mustard and it made a first class substitute for brimstone and sulphur. I tell you I suffered agonies."

"Well, it *must* have been a strong plaster," I said.

"Strong!" he ejaculated. "Look here! Now, I don't expect you to believe me; but, without exaggeration, that plaster was so strong that it drew my spinal column right plumb up against my breast bone, and when the plaster was removed the spine flew back into position with a snap that jarred the whole house."

I give this story to the reader for what it is worth. I will not give it as a whole my unqualified indorsement, for there are portions of it that I find extremely difficult to believe. —The Rambler.

The Man With a Harp.

It was in the infant class of a Sunday school. The teacher was trying to bring out the fact that David was a man of varied occupations. There had been smooth sailing until the question was asked: "What do you call a man who plays on the harp?" After a brief pause a youngster raised his hand and answers: "An Italian." The teachers and scholars had a good laugh and a new topic was introduced.—Omaha World.

LOADED FOR BEAR.

Farmer McCue Shoots Thirty-seven Buckshot at Once from his Trusty Gun.

WALTON, Oct. 23.—Joseph McCue of Sullivan county is a little set in his opinions, but owns up like a man when he finds that he is wrong. The other day he was working in his turnip patch, which is right across the road from his house. There are not many neighbors in the part of Sullivan county where Mr. McCue's farm is, which is the Beaverkill country, near the Ulster county line. Mr. McCue had heard a quail whistling in his turnip patch, and had taken his shotgun with him, thinking that maybe he might get the quail for his supper. As the farmer worked he was finally brought with his face toward the road, and he caught a glimpse of something passing along. Farmer McCue raised himself up. As he looked toward the road his eyes opened very wide. As they opened Mr. McCue exclaimed:

"By jee!"

What the farmer saw was a bear, and it was slouching deliberately along in the road, past the house. There was nothing but bird shot in Farmer McCue's gun, but he felt that he must get that bear. He seized the gun and fired both barrels at bruin. The bear stopped, looked in a deprecatory manner at the farmer, and then passed on. The farmer watched it until it disappeared in a bend of the road. Then he examined the hammers of his gun and blew into the barrels. Satisfied that the gun had gone off, he exclaimed:

"Missed him, by jee!"

Farmer McCue finished his work in the turnip field and went to the house.

"If I had gone out loaded for bear," said he to his wife, "I couldn't have seen my way, the quails would have been so thick. But there I was laying for quail, and what do I flush but a bear as big as a yearling colt! If that bear bothers me to-morrow, though, I'll be sorry for him, and I'll load the old gun now. Mother, count me out thirty-seven buckshot for each barrel!"

"You mean nine, Joseph," said Mrs. McCue.

"Thirty-seven, mother, for each barrel."

"Nine buckshot, Joseph, is a big load for any gun, and will kill an elephant!"

"Nine buckshot won't hurt a coon, mother, and I'm after bear. Thirty-seven is what I want, but it isn't enough. I've a notion to put in forty-seven, to make sure. No, I'll take thirty-seven; but thirty-seven ain't enough."

So Farmer McCue put in a double charge of powder and thirty-seven buckshot in each barrel. Mr. McCue is a good farmer, but his early education as a hunter was sadly neglected.

"Now let that bear trespass on me again, by jee!" said Farmer McCue.

The next day he went to work again in his turnip field. His gun, loaded for bear, was with him. He had no idea of seeing the bear, so that when in making a turn in the field he came almost face to face with it, evidently enjoying itself among the turnips, from the way it was pulling them up and munching them, the farmer was obliged to open his eyes wide again and exclaim, with more vigor than before: "By jee!"

Farmer McCue was bound to get the bear, however, and, backing off a few feet to where his gun lay, he picked it up, took good aim at the bear, and fired.

And fired.

Mrs. McCue heard the report at the house. It made the windows rattle, and reverberated among the hills like a Fourth of July salute. The farmer's wife ran to the door and looked over into the turnip field. There was a thick cloud of smoke over by the stone wall, where she had last seen her husband at work.

"Joseph must have killed the bear," she said.

But there was no bear and no Joseph to be seen. Mrs. McCue ran down into the field. She had not gone far before she saw the body of the bear stretched out among the turnips. Looking further, she saw Farmer McCue also stretched out among the turnips, as stiff as the bear. Just then Farmer Rose and his son, neighbors, happened to be driving by. Mrs. McCue hailed them. They carried Mr. McCue into the house. One side of his face was as black as his hat, and swollen three times its natural size. His right shoulder was dislocated, and his arm was black and blue from the shoulder to the elbow. It was a good while before he could be brought to. Then he opened his left eye, and, looking at his wife, said, firmly, but feebly:

"Mother, thirty-seven's enough!"

There was a hole through the bear, amidships, big enough to run a stovepipe in. Farmer McCue, a little set in his opinion as he is, but willing to own up like a man when he finds he is wrong, is doing as well as could be expected.—New York Sun.

Wits of Ancient Days.

Sir Nicholas Bacon being once, in the capacity of judge, about to pass the sentence of death upon a culprit, the fellow importuned him to save his life, alleging, among other things, that he had the honor of being a relation of his lordship. "How do you prove that?" said Sir Nicholas. "My lord," replied the man, "your name is Bacon and mine is Hog, and Hog and Bacon have in all ages been reckoned akin." "That is true," answered the judge, "but hog is never bacon till it is hung, and therefore, until you are hung, you can be no relative of mine.

George I, while on a journey to Hanover, stopped at a village inn in Holland, and while the horses were getting ready ordered two or three eggs to be brought to him, for which the host charged him 200 florins. "How is this?" said the king; "eggs must be very scarce at this place to bring 100 florins apiece." "Pardon me, your majesty," said the host; "eggs are plenty enough, but kings are scarce." The king smiled at the fellow's wit and ordered the bill to be paid.

Lord Norbury, the Irish judge, was once dining at a table, and corned beef forming one of the dishes he was asked if he would have a slice. "I would try it" he said, "if it were hung." Curran, who was present, replied: "If you were to try it, judge, it would be sure to be hung."—New York Mail and Express.

A Paradox.

It is utterly useless to try and sell a parachute to a man who is falling down stairs. And yet probably this the only time in his life when he would like to buy one or when the thing would do him any earthly good.—Cambridge Chronicle.

RELIGIOUS AND EDUCATIONAL.

—The Methodists have laid the corner-stone of a new college for women in Baltimore.

—There are fifteen thousand Jews in Cincinnati. Their church property is valued at $800,000.—*Chicago Times.*

—The Christian community in India is increasing at the rate of eight and one half per cent. a year, and therefore doubles every twelve years.

—The bey of Tunis has given a choice site of land, worth six thousand dollars, to a small Protestant congregation there, on which they intend to build a church.

—The *Presbyterian*, in calling for contributions for the relief of Charleston, says that members of their denomination are under peculiar obligations to their brethren in the faith "in this historic first spot where our church took root in this land."

—Schoolmistress X, teaching at Colesville, N. Y., was paid three dollars a week. She went to live at the house of the trustee who had fixed the rate of pay, and she was somewhat startled to learn that he had settled upon four dollars a week as the cost of her board.—*Buffalo Express.*

—The Chinese Government has very promptly paid ten thousand dollars to the Canada Presbyterian Mission in Formosa for property destroyed in the Franco-Chinese war. The mission now has thirty-eight stations with one thousand two hundred and seventy-three converts, the result of fourteen years' labor.

—According to the latest educational reports, the number of penmen in the United States ranking themselves the "Best in the World," is 27; the number who esteem themselves the "Best in America" is 413, while none were found who considered themselves "fair to middling."

—Mrs. Leland Stanford devotes considerable time and money in the cause of education in California. She has put in successful operation four large kindergartens, and her latest benefaction is the establishment of a night school for the jockeys and stable boys employed in the stables of her husband. —*Chicago Tribune.*

—One thousand carpenters of Berlin have addressed the following petition to the German chancellor: "Prince Bismarck—You have declared that you will not legally forbid Sunday work until convinced by the voice of the laborers that they demand rest on that day. Here, then, is their voice: We declare implicitly that we desire a law which will grant us protection in the enjoyment of freedom from work on Sunday. Sunday labor leads to crime and vagabondism."

—According to the latest statistics the Baptist Church in Germany numbers 169 congregations, 152 chapels, 1,282 preaching stations and 32,241 members. The net increase in the membership last year was 1,155. The number of Sunday-schools is 432, teachers, 293 and scholars 18,257. Value of church property, exclusive of debts, $400,000. Annual contributions for all objects, $100,000. About 18,000 copies of their church publications, 15,000 Bibles and 30,000 New Testaments were distributed.

WIT AND WISDOM.

—A nod-ditty: "The slumber song." —*Pittsburgh Chronicle.*

—Degrees not striven for by students or others—those below zero.

—Wisdom is an ocean that has no shore, and foolishness is a narrow stream that has no bottom.—*Lowell Citizen.*

—McGarrigan (taking his first sleeping-car trip; upper berth)—Hey, hoy, thevre, yez blece divil, they bees a felly undher me bid.—*Puck.*

—Honesty may not always win, but generally lives respectably and to be respected. There is some solace in this fact.—*Chicago Standard.*

—Never, under any circumstances, assume a responsibility you can avoid consistently with your duty to yourself and others. In other words, "mind your own business."—*Chicago Times.*

—He was a traveling printer, and, being out of employment, he hired himself out to a farmer. One day the farmer said: "I want you to set that hen." "How do you want her set, solid?"—*Texas Siftings.*

"What makes that girl walk so funny?" inquired De Smythe of Browne. "Is she intoxicated?" "Oh! no; she's not intoxicated," responded Browne. "It's only her shoes that are tight."—*N. Y. Independent.*

—Janes's wife has a place for every thing and a good reason for keeping the thing in that particular place. She keeps a vial of quinine pills in the kitchen clock, presumably in order that that standard tonic will prevent the clock from running down.—*Lowell Citizen.*

—Lightning struck a hive of bees in Kansas the other day. The painful story is soon told. The misguided lightning came out of that hive quicker than it went in, and went off into space with its tail between its legs. Moral: Never pick a quarrel when you are not acquainted with the folks.—*Texas Siftings.*

—"You met Charley on a yacht, they say?" "Yes, wasn't it romantic? We were on board three hours together. You see there wasn't any wind and we couldn't get to land. Well, before two of those hours were over he had proposed and I had accepted. I really believe the yacht helped us." "How was that?" "It was a case of luff at first sight."—*Tid-Bits.*

—At a house in Ohio where a minister was boarding, the servant-girl was anxious to anticipate every thing in her work that any one wished her to do. She had always "just done it," or was "just doing it," when any order was given. This amused the young divine greatly, and on one occasion he thought to nonplus the girl by a ruse. "I don't think Eliza has washed my Bible since I have been here," he said to the mistress in a low tone, but designed to be overheard by the girl. A few minutes later the mistress said to her in the presence of the clergyman: "Eliza, have you washed Mr. Blank's Bible?" "No, ma'am, but I've got it asoak."—*Harper's Bazar.*

EARLY DETROIT.

The Characteristics of the French Settler's Principal Live Stock.

Bees are very commonly kept, and were of no small profit. Of course, among a race whose favorite emblem, the cock, flourishes on every steeple, there was no lack of chickens. Ducks waddled along the shore, and incredible numbers of tame geese hissed and squalled at the passers-by, aided in their chorus by the yelping of small dogs, which were also quite common enough. Turkeys, wild and tame, abounded. Their cattle were small and not very good. Two of their oxen could not perform any heavy amount of labor compared with the average of working cattle to be found now. Hogs were numerous, of such long, gaunt proportions and huge heads that they have been generally distinguished as the "alligator" breed, from a caricature resemblance to that ungainly beast. Turned into the woods to forage for subsistance, they became wild and shy. Many years ago the island above Detroit was badly infested with rattlesnakes, and a drove of swine were sent there to destroy them. The hogs soon thinned out the snakes, but in the course of time became very numerous and lost all the habits and characteristics of tame animals. From these the island derived the name it has always borne until it ceased to be euphonious to refined ears and is now known indiscriminately as Belle isle, and Ile aux Cochons or Hog island. It is now a city park, awaiting the future of municipal taste or vandalism.

But the most important animal was the horse. In most countries physiologists trace out resemblances in character between this intelligent animal and his master. How far this is fancy and how far founded in truth it is unnecessary to decide. But there is no doubt the horses of this region possessed characteristics quite peculiar. Authorities differ concerning the origin of the breeds of ponies found here, and the time of their general introduction. From the varying characteristics of the ponies used by the French and Indians, there is reason to suppose them of very different origin. The Indian ponies resembled the mule in shape, being generally thin chested, with drooping head and slouching gait. He was rarely used except as a beast of burden, the Indians having no vehicles; and when plowing was to be done, their French neighbors were called in to do this important work. The powers of endurance of this persecuted animal were great, but if he possessed speed or other showy qualities he got small occasion to exhibit them. He was a very meek looking beast.—*Magazine of Western History.*

DOGS' EARS.

Some Good Reasons Why They Should Never Be Cropped.

Sir Edwin Landseer, one of the judges at the dog show in London, England, endeavored to exclude all dogs that had been mutilated by ear-cropping or otherwise. The principal reason for Sir Edwin's protest is that the cropping of ears is most cruel and hurtful to the dog. The cruelty complained of is not in the operation—that, after all, is a small matter. It consists in depriving the animal of a defense which nature has given it against the entrance of earth and sand into the ears. The entrance of these into the ears distresses the dogs much, causing deafness, abscesses and cancer. All dogs, more or less, require to be protected from sand and earth by overlapping ears; but especially do terriers—literally "earth dogs"—the species which, of all others, is most persecuted by cropping. They go into a burrow, their ears get full of sand, and they suffer ever afterward. Surely Sir Edwin Landseer is right in saying that judges of dogs ought not to sanction such gross treatment of the animal, and that the Society for the Prevention of Cruelty to Animals should look to the practice. The only excuse that can be set up for this system is a delusive one. It is said that fighting dogs fare better with their ears cropped, and the exigencies of fighting dogs have set the fashion for all others. It is true that if an ear be gone it can not be torn, but then it is forgotten that even for fighting purposes the ear is often a protection. All these fighting dogs have what are termed "points." One has his way of seizing the leg, another fixes upon the throat, and yet another makes a dash at the large gland behind the ear, which, in the dog, is as sensitive as the most sensitive gland in the human body. Deprive the dog of his ear and the assailant can get a good bite at it and lay his adversary low. Leave the dog his ear and the assailant's grasp of the sensitive gland is impeded by the folds of the ear and rendered much more feeble. Thus, even to the fighting dog, the long ear is a positive defense.—*N. O. Picayune.*

Contraction of the Hoof.

A hoof contracts from dryness consequent upon a state of inflammation of the interior of the foot, or from want of nutrition of the horn at the origin of its growth at the coronet. The injury is difficult to repair because the vascular tissue of the foot which connects the hoof with the interior part of it becomes absorbed and in part lost. The remedy is to rasp the hoof quite thin; to leave the frog untouched, so that a healthful pressure may be exerted on the interior of the foot; to keep the hoof dressed with a mixture of glycerine, molasses and water in equal parts, and to cover it constantly with a bandage to keep it moist, and to apply blistering ointment to the coronet.—*N. Y. Times.*

A Sacrifice of Friendship.

"When two pugilists step into the ring what kind of a musical composition are they going to perform?" inquired one traveling man of another.

"Give it up."

"A knock turn," was the reply.

And now they waste time trying to sell to each others' customers out of spite.—*Merchant Traveler.*

BANK DEFALCATIONS.

What an Old Banker Has to Say About Defaulters and Careless Directors.

After an experience of twenty-five years, I am convinced that the root of the evil is generally found in the practice of living beyond one's income. In these days, when luxurious living is so sought after, the temptation to excessive expenditure is constant and pressing. There is no man of stated income who does not feel it. Men with high salaries are as much tempted to it as clerks who are struggling with a family on a poor income. Keeping within the bounds of income is not merely a matter of dollars and cents. It is an affair of morals and character. To do it requires prudence, economy and self-denial. When it is done, the Scriptural precept of providing things honestly is complied with. Failure to do it involves debt, to begin with; and afterwards, in most cases, equivocation and breaking of promises, to say the least. Worse consequences sometimes ensue, namely, peculation, fraud, forgery, and, finally, the State prison.

It may be thought unnecessary for a high official of a bank, with a large salary, to exercise self-denial and economy. Experience teaches the contrary. As income increases, wants and aspirations increase, too; and if a man has a taste for art, music and other sources of luxurious enjoyment, he has constantly to hold in his desires with a strong rein. A man of such tastes will find it perfectly easy, and, indeed, very natural, to spend ten or twenty thousand dollars a year, or, in fact, much more.

The desire of the flesh, the desire of the eye, and the pride of life are all temptations daily besetting people with large incomes. And, unless they are steadfastly resisted, they inevitably lead a man into trouble. I venture to think that the pulpit might take considerable notice of these things. It is needed in these times.

So much, in brief, for the moral and spiritual aspects of this terrible case. A word as to the duties and responsibilities of directors. Here, again, I speak from practical experience. There are some things that directors can do. It is doubtful whether it would be possible for directors to overhaul every entry and every voucher of the cashier of a large banking institution, without sitting *en permanence*. But there are two things which they can do, and these go to the very root of the matter.

The directors of a bank, if they exercise a reasonable amount of vigilance, can easily tell whether their officers are living within their salaries or not. This especially applies to the cashier and higher officers, whose mode of living must be well known. They can, in the second place, very readily ascertain whether their cashier or higher officers are speculating in stocks or not.

These are practical points with respect to which directors are bound to exercise supervision. If they have reason to believe that their cashier is living beyond his salary, it is incumbent on them to have explanation at once. If such cashier can satisfy them that he has any other source of income, through his wife or otherwise, and is keeping within the *total*, well and good; but if he is making up the difference by speculating, the directors are bound to stop him at once. Even if he is living expensively, and is known to speculate, directors are bound to stop it. But in nine cases out of ten, with officers living on salaries, when speculation is indulged in, it is to enable a luxurious style of living to be kept up. Living beyond income, however, often begins early in life.—*Congregationalist.*

Propagate from the best.

It is a great error, and one far too prevalent among our agricultural brethren at the present day to select the best and most valuable animals, seeds, roots, etc., for the market, instead of retaining them to propagate from. In this they disregard future advantages in the pursuits of immediate profits. Instead of reserving those animals which are decidedly superior in size and symmetrical development, to transmit the excellences to coming times and through successive generations, which practice, if systematically adhered to, would insure a gradual but constantly progressive improvement, they are so easily fascinated with the hopes of gain that they willingly part with the very means which alone can secure its acquisition, and entail upon themselves evils from which it is impossible for them to escape.—*Detroit Tribune.*

Found Woefully Defective.

Proprietor of Museum—You have a new freak to present?

Agent—Yes.

"He defies every law of nature?"

"Yes."

"He is a profound puzzle to medical science?"

"Yes."

"Ah! we will likely strike a bargain. Oh!—another question: Has he appeared before all the crowned heads of Europe?"

"N-o."

"Then I don't want him." —*Philadelphia Call.*

—A curious incident occurred lately at Hollywood park, says the Boston *Journal*, where the representation of immense Turkish rugs was artistically formed of living plants. A farmer and his wife were driving through the grounds and from a distance admiring the rugs, which they supposed to be the work of the loom and not of the gardener. A heavy shower came up, when the old couple made their way to the mansion and called the attention of the servants to the rugs that were lying out in the rain.

—Samuel Gilbert, of Georgetown, N. J., stored one hundred and fifty bushels of potatoes in the attic of his little house preparatory to barreling them. On Tuesday night while his family was at supper the floor gave way and the potatoes came down on them, breaking Mr. Gilbert's arm and Mrs. Gilbert's leg, fracturing her shoulder, and injuring a daughter's arm so that it will have to be amputated.—*N. Y. Times.*

UIT SCIONS.

of many kinds can be had om the State University at Berkely. In circular just issued Professor Hilgard ays:

"The Standard Orchard of the University contains upward of 500 named varieties of Fruit.

The Standard Orchard of the University is maintained not as a commercial enterprise, but to serve several purposes. First, that of illustrating the instruction that is given in horticulture; second, to serve as a means of identifying fruit specimens which are sent to us from all parts of the State for that purpose; third, as a source from which any citizen of the State can obtain scions or bud-sticks either for the purpose of testing varieties under the conditions prevailing in his locality or to insert in bearing trees to establish the identity of un-named varieties which he may have. There is such variation in the characteristics of varieties grown under different conditions in California that often we can but approximately identify a variety and send scions of that variety, true to name, for the grower to fruit for himself and thus compare the two when grown under the same conditions. In all these directions the the Standard Orchard at Berkely is proving of value to the fruit interests of the State.

The accurate records which have been kept of tree growth and fruitage of the different varieties serve as a trustworthy guide for planting in regions adjacent to the bay and coast, where the climate in its main features most resemble that of Berkeley. The forthcoming report of the College of Agriculture for 1886 will contain tabulated results of several years' observations by Mr. W. G. Klee, from which the reader may learn what varieties promise well and those which are likely to be worthless in the section of the coast region to which allusion is made. From these observations it is also possible to indicate certain varieties which have good points, but evidently need a warmer locality to develop full quality. Such varieties are commended for trial at greater distance from the coast.

TERMS.—Orders may be sent for few or many varieties, as may be desired, We cannot furnish large quantities of a single variety, because the object is to test varieties and not to furnish material for commercial propagation. Packages of scions are forwarded by mail, and applicants are required to send 10 cents for each dozen ordered, to defray expenses of packing and postage. Postal notes, payable at the Berkely postoffice, are requested to be sent in lieu of stamps whenever practicable. Any surplus left after filling orders as far as possible will be returned to the senders, deducting letter postage.

The limits of an announcement of this kind prevent a full enumeration of varieties which can be furnished. We select, therefore, such kinds as seem to us most promising and least known to growers. Those who may desire other varieties than those named may apply for them, and they will be furnished if we have them.

APRICOTS.

Observations on the growth and bearing of our collection of apricots for several years warrant the naming of several varieties as well adapted to bay and coast climates in this part of the State; Blenheim or Shipley medium size, color fine, early, very productive; Beauge [?], very handsome fruit of Blenheim type, most beautiful golden yellow, painted with brightest red; rich quality, a clingstone, ripening here the middle of July; Orange, possibly identical with the Royal, but grown here, has much higher color, a good bearer and early, but the tree is only a moderate grower; Sardinian, a small apricot, possibly valuable because of its earliness.

Apricots not altogether satisfactory here but likely to be valuable in warmer parts of the State. Alberge de Montgamet, large freestone, pitting very readily, color orange, flesh firm and rich; St. Ambroise, large, fine-looking fruit and tree large and vigorous; Kaisha, from Syria, pale colored, excellent flavor and quality and very juicy; Canino Grosso, fine, large fruit of Hemshirk type; De Coulorge, also fine fruit of similar type.

APPLES.

The following varieties include the most promising of those in our collection which are not generally known in this State:

Benoni; shaded and striped with red; midsummer; for table and market; very good to best.

McCloud's Family, yellow, striped with dull red, late summer, very good.

Fanny, crimson red, midsummer, very good.

Julian, whitish, striped with rich red, very good.

Red Canada, beautiful red, winter, very good.

Mother, splashed and marbled with red, winter.

McAfee's Nonsuch, striped and splashed with red, winter.

McLellan, red, beautiful, very good to best.

Dalonega, striped and splashed on yellow ground.

Green Sweet, greenish yellow, very sweet.

Cardinal, yellow, middle of July, tree a fair grower, but yield here rather small.

Count Orloff, pale yellow, rather a small bearer, but good quality and good keeper.

Grimes' Golden Pippin, yellow, a fair grower, middle of September.

Disharoon, yellowish, dull red or russet cheek, a strong grower and healthy tree, fruit good and a good keeper, October and November.

Duckett, yellowish, striped and splashed with red, winter, tree fair grower and fruit good.

Equinetely, greenish yellow, covered and splashed with red, a fair grower and good bearer, fruit good, and keeps until March,

Rome Beauty, shaded and striped with [illegible] good grower and bearer, fruit good, Dutch Mignonne; yellow, striped and splashed with red, a fair grower and good bearer, fruit good, keeping until March and April.

Canada Reinette, large russet, a fair grower, fair bearer, quality good and fair keeper, ripens in September.

CRAB APPLES.—The University collection of crab apples shown at the fairs attracted much attention by their great variety in form and color. We can furnish scions of the following varieties:

Oblong Crab, Montreal, Chicago Coral, Red, Siberian, Yellow Siberian, Currant, Transcendent, Large Yellow, Ringo, Malus Karda, Hewe's Virginia, Lady Crab, Large Red and Hysops.

PEARS.

Our collection of pears is very good, and the quality of many of our winter fruits, especially, excellent; but the presence of the summer fogs has the tendency to give them a russet surface. The same varieties grown farther from the coast will present a much handsomer appearance. The collections shown at this year's State and Mechanics' Institute Fairs were highly commended. The spraying of the orchard with the sulphide-whale-oil soap solution produced a marked effect upon the black fungus, and gave the trees and the fruit a much better appearance.

In connection with the descriptions of the following varieties, of which scions can be had, we give the time of ripening of this locality, which, compared with the greater part of the State, is very late. Those starred [*] have proved exempt from the black fungus, or nearly so, every year since fruiting here:

Annie Ogereau; very handsome pear; beginning of August.

Ott; middle of August, before Seckel; small but delicious.

Duchesse Prencoce; above medium; steady bearer; fair quality; end of July.

Doyenne Robin; medium to large; beginning of September; good bearer; fair quality; excellent keeper.

Dr. Reeder; small, but of the highest quality; end of September; beginning of October, after Seckel.

*Paradise d'Autumne; September and October; medium size; very good.

*Marie Louise d'Uccles; end of September; small grower but large and constant bearer; fruit large; good quality.

Sheldon; large; end of September; good.

*Bonsceiller de la Cour; large; regular bearer; good; middle of October.

*Jalousie Fontenay Vendee; medium; good bearer; resembles in taste Beurre Gris of Europe.

*Pimaston Duchesse d'Angouleme; a pear entirely different from the ordinary Duchesse; is large to very large; so far a shy bearer; good.

*Baronne de Mello; medium; regular bearer; good.

Augustus Dana; large; November; very good; so far a shy bearer.

*Beurre Gris d'hives Nouveau (new gray winter pear) a variety, we are told, which was formerly cultivated considerably in Santa Clara but now not met with; large to very large; tree a good regular bearer; quality very good; November and December.

*Md. Lariol de Barny; large; good bearer good: (resembles Emil d'Heyst).

*Jaminette; above medium size; November and December; excellent keeper; good (extremely sweet).

Fondante de Noel; above medium; very handsome; December; good.

*Jones Seedling; small; a good steady bearer; October; good.

Duhamel de Monceau; December; above medium; very good; tree a poor grower.

*Doyenne d'Alencon; late; ripening January 1; good grower and healthy; yield fair puality good and a good keeper.

*Beurre de l'Assomption; middle of August; fair grower and healthy; yield good; fruit handsome and large but not a very good keeper.

Forelle, or German trout pear; a fall pear of great beauty.

*Louis Vilmorin; large pear resembling Clairgeau. Not adapted to Coast climate; should be tried elsewhere; tree healthy and yield fair.

De Tongres; very handsome; highly colored; a good keeper; fruit shown at the fairs attracted much attention; tree healthy and a good grower. Ripens here October 1st.

Plums.

Scions of the following varieties can be furnished.

Ontario; the best early plum we have; green; above medium; quality fair.

Black Morocco; small blue plum; very early; cracks badly in this locality.

Lawrence's Favorite; seedling of green gage; resembling it but larger.

Wangenheim Prune; resembles the German prune but bears better here.

Red Magnumbonum; a good plum; rather large; freestone.

Victoria; handsome, large, flesh yellow and rather coarse, but sweet; tree vigorous and hardy.

Lombard; a populur Eastern variety; medium size; violet red; flesh juicy but not rich.

Reine Claude de Bavay; one of the best varieties, which should be better known here; very late; greenish yellow; flesh juicy melting and rich.

St. Lawrence; rather large; dark purple with light bloom; yellow flesh, sweet and rich.

McLouglin; one of the best; large; skin thin, yellow, dotted with red; flesh yellow; very sweet and luscious.

Prince Englebert; a good variety; tree very productive.

Goliath; a large handsome plum; deep red to purple.

Copper Plum; and old variety; tree very productive, vigorous and hardy; fruit medium size; late; should be better known.

St. Martin's Quetsche; a late prune from Germany, tree hardy and apt to overbear, fruit medium size, pale yellow, hangs long on the tree, flesh yellow, freestone.

Peters' Yellow Gage; very good here; tree a strong grower, flesh yellow, juicy and sugary;

Prince of Wales, and old variety, very srtisfactory in this locality.

Orange, very large and handsome, yellow tree vigorous and productive.

Belgian Purple, rather large and deep purple, handsome, tree strong and productive.

Drap d'or d'Esperen; fruit large, golden yellow, flesh light yellow and good quality.

Ive's Autumn; an excellent plum, yellow with red dots, large.

Royal de Tours; large, bright red to violet, flesh highly flavored, juicy, very good.

Autumn Compote; large, whitish yellow, with crimson in the sun, flesh yellow, very good.

Diapree Rouge; tree rather a poor grower but fruit large, reddish purple, flesh pale green, juicy and melting.

Reine Claude Rouge; very good to best, is somewhat known in this State.

Denniston's Superb; an excellent variety tree a strong grower, healthy, hardy and productive, fruit round and large, color pale yellow.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, Bodie, Cal. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the northeast corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 56 degrees 26 minutes E. distant thirty-six chain; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 4 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S Land Office at Bodie, Mono county California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE, Bodie, California, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 56 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty-nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 56 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty-nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

SHADE TREES.

Good, Thrifty Trees One and One-half Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

☞ These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

W. J. MARSH & SON,
FORT CHURCHILL, Lyon Co., Nev.

TO ADVERTISERS

A list of 1000 newspapers divided into STATES AND SECTIONS will be sent on application—FREE.

To those who want their advertising to pay, we can offer no better medium for thorough and effective work than the various sections of our Select Local List. GEO. P. ROWELL & CO., Newspaper Advertising Bureau, 10 Spruce Street, New York.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, JANUARY 8.....1887.

S. D. Thurston has been chosen by Sheriff Gregg to be Under Sheriff.

Young wheat and alfalfa have been making good growth around Camp Independence the past two weeks.

The new county officers took charge of their several offices last Monday, and the county business goes along as smoothly as usual.

Mr. and Mrs. Shirley, oi Virginia City, were at Independence several days this week; they intend to buy a farm and settle in the valley.

Quite a number of people in Virginia City who have saved money and want to secure homes, intend coming to Owens valley shortly to settle.

The Legislature of California failed to organize at the first meeting last Monday. This defers the election of a United States Senator till January 18th.

The Legislature of Nevada met and organized last Monday. A. J. McDonell, republican, of Storey county, was elected Speaker. Wells Drury was elected Speaker pro tem.

A subscription has been made for Mrs. Logan. As the first installment of the subscription $20,000 worth of United States four per cent. bonds will be bought and presented to her.

The Bishop Creek Brass Band came down and took part in the festivities at Independence last week. The boys show much improvement in their music and play a number of popular airs very fairly.

The Odd Fellows held an open installation in the Methodist Church on Thursday evening which was well attended. A supper was given, after which the younger people danced in Mairs' dining-room. The affair passed off very pleasantly.

The first number of the *Esmeralda News* has been issued. This is the newspaper started at Hawthorne with the outfit of the Candelaria *True Fissure*, that became became defunct some weeks ago. We wish the *News* success.

John W. P. Laird, Esq., will in a few days open a new law office in the premises so long occupied by the INYO INDEPENDENT. As District Attorney for several years, Mr. Laird has become thoroughly familiar with all the public and much of the private business of the county. Clients will find him a good and reliable attorney.

The Mono county *Chronicle-Union* suggests that the Constitution should be amended so as to permit two or more counties to unite in forming one judicial district, presided over by one Superior Judge. As this amendment would not compel, but would only permit such union where a majority of the voters of all the counties interested desired such union, it should be submitted to the people.

Mr. W. L. Hunter retired from office and went to his ranch at the beginning of the week. During his term of office as County Clerk, every courtesy that could be done with a strict regard for duty, was cheerfully extended to any who asked for it; but not the slightest preference was given to any over another. The county never had a more accommodating, but at the same time a more scrupulous and exact Clerk than Mr. Hunter.

Independence needs a school house and new town hall. Before long the great rush of work on the many new buildings put up in the town since the fire will be over. Then when so many good carpenters are here would be a good time to begin work on a building that would serve both wants. The ground floor could be made to give all the school room necessarry and a second story could be added that would make a suitable town hall. If a little effort is made the object can be attained.

The legislators of Nevada favor a free gospel. Instead of electing a Chaplain, as is done in other States, they have asked the clergy of Carson to take turns in praying for them gratis. If the legislators are so scrupulously careful of the State money as to refuse to appropriate any of it to pay a Chaplain, abstinence from one extra drink or one cigar a day by each member and handing over the price thereof to some pious minister elected as chaplain, would make a handsome addition to his meagre income.

Our new settlers are taking an active interest in Sunday school work. Good fathers and mothers want to have good influences thrown around their children. Wise and loving parents will not take their children where religious and moral training are neglected in public. Here at Independence there is a revival of interest in the Sunday school; every parent should aid in the good work, not merely by encouraging their children to attend, but by going themselves and giving such help as they can. Nothing will more surely attract the most desirable kind of settlers than the assurance that their children will have all the external aids to grow up in virtue and honor.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

New Open.

I have fitted and newly furnished the house on the corner of Market and Washington streets, where I am prepared to accommodate the public with first-class Board and lodging. Large and comfortable rooms for families. Suppers furnished on short notice. Board by the day or week at regular prices. V. G. THOMPSON, Proprietor.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does no need two bulls. Apply to Sam Davis. Appeal Office, Carson City, Nev.

Safe Moved.

The safe of the County Treasurer was moved last Wednesday from the office of G. H. Hardy to the office of the new Treasurer, J. J. Moore. The present Treasurers' office is in the room formerly occupied as the Sheriff's office.

Still Building.

Building at Independence goes on with undiminished vigor. There is no cessation in the sound of saws and hammers. Not one day's work has been lost by the workmen from bad weather since the work of rebuilding the town was begun last July.

New Printing Office.

A new printing office is nearly completed for the INYO INDEPENDENT. The building is forty feet long by twenty-four feet wide, and stands a little over one hundred feet east from the Court House; just far enough to be beyond the limit required by insurance companies to give the lowest rate of interest.

Legislature In Session.

The Assembly organized by the election of W. S. Jordan as Speaker. Frank D. Ryan was elected Clerk; P. R. Cline, Sergeant at Arms; G. L. Saulsbury, Minute Clerk; Albert Hart, Journal Clerk; Jacob Shaw, Engrossing Clerk; Mrs. C. E. Levy, Postmistress; J. R. Brierly, Speaker, pro tem; Rev. E. R. Dille, Chaplain.

Wise Action.

An effort is being made to have a system of irrigation for Nevada. Assembly resolution No. 2, by Drury, of Ormsby, provides for the appointment of a joint Irrigation Commission consisting of five members from the Assembly and four from the Senate, to be appointed by the President of the Senate and the Speaker of the House, to enable the Legislature to provide such legislation as the State needs relative to a system of irrigation.

Base Ball.

The game played by the Big Pine and Independence clubs last week, was interesting beyond all expectation. On Friday evening when it got too dark to play longer, six innings had been played and the Independents were nine runs ahead. Next morning the game was renewed, the remaining three innings were played and the game ended with the Independents seven runs ahead. This result was quite unexpected by everyone, even by the players themselves. The Independents played with skill altogether unexpected.

Flattened Out.

For a year past the Republican party of Nevada has been pestered by a little chipmunk of a fellow named Powning. Without a single qualification for the office but the most the most boundless self conceit and impudence this little chip wanted to be made United States Senator. The Legislature has sat down on him so heavily and flattened him out so thin that the creature will hardly be able to utter the faintest squeak for some time to come.

New Years Party.

The party given on News Years Eve by the Y. M. S. Club was a success in every way. The attendance was large; the disguises varied in color and design; the music excellent; and in fact, every detail complete. The new building put up by J. C. Irwin made a first-rate ballroom. Mairs gave a grand supper at his new hotel. The elegance of the tables and the excellence of the fare were praised by every participant. This first party given by the Young Mens Social Club will attract large attendance to all future entertainments given by the Club.

Runaway.

Last Wednesday evening Charlie Thurston was driving a pair of horses attached to a farm wagon in the vicinity of the Methodist Church. The wagon wheel dropped into a rut or ditch, and Charlie was pitched from the wagon seat, lighting upon the tongue between the horses. The animals at once started to run, and Charlie dropped to the ground, the wagon passing over him, but not hurting him. The team dashed against a tree near by, one horse going each side of it; the harness broke and the animals ran on but were soon caught. No serious damage was done; Charlie got a few slight bruises, but was not much the worse for the runaway.

The Other Extreme.

A year or two ago landowners in Owens valley were anxious to sell property below its real value. Now that the resources of the valley have become better known to the public and many people are coming here looking for homes, there is danger of error in the opposite direction. Some parties who still want to sell are asking higher prices than intending settlers are willing to give. It must be kept in mind that though a great many strangers are coming here, yet the price of land will not increase much in value till all the Government land shall be first located. By forgetting this fact sales may be missed. Most of the people who are coming here looking for land know very well what it is worth.

San Carlos Mine.

From time to time S. A. Densmore does a little work on the San Carlos mining claim above Independence station. Recently a shipment of 170 sacks of ore was make to the new works at Reno. The ore weighed 20,873 pounds and its value was 40 ounces silver per ton and 49 per cent. lead; net value of the whole, $429.97. In any other part of the State ore that would net to the owner over forty dollars per ton would be mined vigorously. Here in Inyo county mines like the San Carlos attract but little attention and are worked only by fits and starts. If we could borrow Edison for a while and get him here to electrify miners, farmers, and all others into a little more animation the county would go ahead more rapidly.

Terrible Cages.

The prison cells in the new jail were finished last Tuesday. The work was done by McGrew, of Oakland. There are four of these cells, all enclosed in one huge box of steel and iron. The whole thing looks like a monster safe. The doors have combination locks and a multiplicity of bolts and bars. The cells are enclosed in a room that is also iron lined throughout. Under the iron floor is about three feet of concrete and earth, and under this again is iron equal to the whole area of the room containing the cells. It makes one shudder only to step inside of these cells, even with the doors open. Even with tools and time it would appear a hopeless task for anyone to try to cut his way out of these cells. A mere look into these tombs for the living ought to be enough to prevent the most reckless from the commission of such crime as would lead to confinement therein.

Supervisors Proceedings.

TUESDAY, Jan. 4, 1887.

The Board of Supervisors of Inyo county met at the above date and place. Present, Thos. Boland, Chairman; J. C. Eddy, E. Robinson and J. D. Harger.

Ordered that P. H. McGrew be allowed the sum of $35 for repairing lock of county safe and removing said safe to residence of J. J. Moore and bracing floor to support same.

Report of A. Stecker, Superintendent of Court House, was accepted, showing that there is now due M. E. Gilmore $6000 on contract for building Court House and jail.

It was ordered to pay M. E. Gilmore $3750 out of special building fund.

The following resolutions were unanimously adopted by the Board:

WHEREAS, It has pleased the allwise Providence to call from amongst us a member of our Board, the late George Stevens,

Resolved, That we recognize in his departure the loss of an earnest worker, a wise counsellor, an agreeable companion and a pleasant business associate.

That we tender his bereaved and afflicted partner in life, our most sincere and heartfelt sympathy, and may the hand that directed the blow give strength to bear the affliction.

That the whole community will feel the loss of one who has pioneered the settlement and civilization of our county, and ministered so materially to its advancement and general prosperity, physically and morally.

Whereupon the Board adjourned until Wednesday, Jan. 5, at 9 o'clock a. m.

Attest: THOS. BOLAND, Chairman.
P. H. MACK, Clerk.

WEDNESDAY, Jan. 5 1887.

Board met pursuant to adjournment, same members present.

Ordered that $1598.25 be paid to M. E. Gilmore out of the special building fund.

Board adjourned until 10 o'clock a. m., at which hour it reassembled, all the members being present.

In the matter of refunding the bonded indebtedness of Inyo county, was ordered postponed until next regular meeting.

Whereupon the Board adjourned until Feb. 7, 1887.

Attest: THOS. BOLAND, Chairman.
P. H. MACK, Clerk.

Don't Encourage Them.

The negroes in some of the Southern States are very much dissatisfied with their treatment by the whites and very many of them are leaving and going to other States. It is reported that a large number of them intend coming to Southern California and a good deal of satisfaction is expressed thereat. Our State will be better without them. While it was not the choice of the negroes to be slaves, yet their presence and condition as such was a curse to the South; and since their emancipation they have been the cause of endless turmoil, riot and murder. No inferior and utterly unlike race can live among a superior race without causing trouble and great evils. Our own experience with the Chinese ought to teach us that an inferior race among us is evil and only evil, and that continually. White people are pouring into the State in such numbers as will fill it up in good time, and we don't need negroes. We had better get rid of the Chinese before any encouragement is given another inferior race to come and settle among us. But for the presence of the negroes the Southern States would long since have been settled up by white people far more densely than Massachusetts New York and Pennsylvania are now settled. The soil, the climate, all the natural resources and conditions in the South are far superior to the North, and only the presence of the negroes prevented that section from far outstripping the North in the march of improvement and civilization. The negroes should not be encouraged to come among us.

Supervisors.

A a special meeting of the Board of Supervisors was held at the beginning of the week. The meeting was held for consideration of matters connected with the Court House.

Typhoid, Scarlet and Yellow Fevers, Measles, Diphtheria, Small-pox, Cholera, etc.

Darbys Prophylactic Fluid will destroy the infection of all fevers and all contagious and infectious diseases. Will keep the atmosphere of any sick-room pure and wholesome, absorbing and destroying unhealthy effluvia and contagion. Will neutralize any bad smell whatever, not by disguising it, but by destroying it. Use Darbys Prophylactic Fluid in every sick-room.

TAKE SIMMONS LIVER REGULATOR

FAULTLESS FAMILY MEDICINE

"I have used Simmons Liver Regulator for many years, having made it my only Family Medicine. My mother before me was very partial to it. It is a safe, good and reliable medicine for any disorder of the system, and if used in time is *a great preventive of sickness.* I often recommend it to my friends, and shall continue to do so.
"Rev. James M. Rollins,
"Pastor M. E. Church, So. Fairfield, Va."

TIME AND DOCTORS' BILLS SAVED *by always keeping Simmons Liver Regulator in the house.*

"I have found Simmons Liver Regulator the best family medicine I ever used for anything that may happen, have used it in *Indigestion, Colic, Diarrhœa, Biliousness,* and found it to relieve immediately. After eating a hearty supper, if, on going to bed, I take about a teaspoonful, I never feel the effects of the supper eaten.
"OVID G. SPARKS,
"Ex-Mayor Macon, Ga."

Working Classes ATTENTION!
We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man Who Spends Money
For advertising in newspapers in these hard times without first obtaining an estimate of the cost from Geo. P. Rowell & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

AGENTS WANTED for the MISSOURI STEAM Washer
Active, honest persons all over the country, with or without team.
JOHN C. EVANS, SHORTLANE, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will put up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."
JOHN R. DODGE, JR., Jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $1000."
I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

Secure A Homestead For Your Family.
CALIFORNIA.
INYO COUNTY—Owens River Valley
THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.
The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for it the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

S OF TEA MAKING.

n China—A Missionary's "The Basket Fire."

he beginning for the fur- on of the fragrant and pic, it is to be observed ut one tea plant. All the nown originate in one plant; two kinds of tea known to fferent soils impart their arities more or less to the the plant is one. Art secures ons and differences. The tea s its leaf the year round, but f is unfit for use, the new y being used. There are three rops picked each year. In the of Formosa teas, the leaves are ured on paper pans or platters charcoal fires. The platters are de heavy by using several thicknesses f paper pressed firmly together. The juice of the leaves in a short time so colors this paper that it resembles copper. So complete is the deception, that a missionary who had traveled in China and inspected the process of tea making avowed himself ready to make oath to his statement that copper pans are used in curing teas. This also is the popular belief in America.

Mr. A. S. Woodworth, of Boston, who has made the production of teas a special study, and has carefully investigated the processes employed in China, declares that no such thing as a copper pan of any kind is used in China for tea firing, and that all teas are cured on paper or iron. The mistake of the missionary and others was natural enough, for the discolored and polished paper utensils are excellent imitations of copper. This first drying on paper pans, just alluded to, is a process to be watched carefully, the object of using paper pans being to prevent the leaves from becoming too hot; that is, becoming dust dry or losing the moisture too rapidly. The leaves, as they warm up, are constantly rolled in the hand, and as soon as the pan becomes too hot, it is removed from the fire. The leaves must not burn, they must be kept soft. After this first firing the leaves are placed on trays and set away in racks, much as the cardboard is disposed of to dry, but in this case the object being a semi-fermentation. Then the leaves are placed on the fire again and the process is repeated several times. This is done on the plantation.

When this stage of curing has matured, the product is packed in bags much like wool sacks and carried to the shipping ports for the final treatment, where it is submitted to "the basket fire." A bright, smokeless charcoal fire is prepared, and about two pounds of tea are placed in each basket, and sometimes 300 or 400 of these baskets may be seen in one room at once. These leaves are kept over these fires for about half an hour, or until they are thoroughly dry, not a particle of moisture remaining. This, then, is tea, and it is at once packed in chests and is fit to stand a sea voyage, and will retain its flavor under favorable conditions for a year or two. It is an object to get the tea out of China as soon after curing as practicable, because the climate there is so much more moist than it is here; the tea will not keep so well there. The above is a description of the preparation processes of Oolong or Formosa teas. Other classes of teas are produced by different processes of curing. The Japan and green teas are not allowed any degree of fermentation, the Oolong teas have a semi-ferment, while the Congou teas are submitted to a complete fermentation. All Japan teas partake of the peculiar flavor of the soil where the plant is grown. Japan Oolongs have been made, but no process can rid a Japan leaf of that peculiar flavor.—Boston Herald.

DREAMS OF THE BLIND.

At What Age a Child Loses All Memory of the Visible World.

Among the papers read before the biographical section of the American Association for the Advancement of Science, was one on "The Dreams of the Blind," by Dr. Joseph Jastrow, of Philadelphia. The object of the paper was to determine the extreme age at which a child may become blind and yet lose all memory of the visible world, so that it no longer sees in its dreams.

"Almost all dreams of normal persons," the papers says, "are sight dreams, and a dream is often spoken of as a vision. The blind are deprived of this most important sense; but if they have not been born blind they may remember enough of what they have seen to enable them to imagine how things look, and when the imagination has free play in sleep to picture themselves as in full possession of all their senses. Physiologists would explain this by saying that during the years in which they saw a certain part of the brain has become educated to receive and interpret all these messages which the eye sends and that when this part of the brain acts spontaneously in sleep the person dreams of seeing. Such a portion of the brain would be called the sight center.

"If, now, we find out the latest age at which blindness may set in, and yet the person keep on dreaming of seeing, we will find out the time it takes for this sight center to develop, for, of course, it is not present in the new-born infant. For this purpose about two hundred blind persons of both sexes were questioned at the institutions for the blind in Philadelphia and Baltimore, and it was found that those who became blind before their fifth year never dreamed of seeing; of those whose sight was lost between the fifth and the seventh year, some did and some did not see in their dreams; while all whose eyesight was destroyed after the seventh year had quite as vivid dream visions as seeing people. The fifth to the seventh year is thus shown to be the critical period. This period corresponds with the age which authorities assign as the limit at which a child becoming deaf will also become dumb, and also with the age of one's earliest continuous memory of one's self.

"It is interesting to note that blind persons dream quite as frequently as normal people, and that with those who do not see in their dreams hearing plays the principal part. When dreaming of home, for instance, they will hear their father's voice or their sister singing, and perhaps will feel the familiar objects in the room, and thus know they are at home. We, in such a case, would see it all."—*Philadelphia Press.*

For Visitors' Benefit.

A pastor in this city has on the wall of his study in large but not too conspicuous, letters, for the benefit of his visitors, this Scriptural benediction: "The Lord bless thy goings out."—Detroit Christian Herald.

ESSAYS ON BOYS.

What Two Rhode Island Youngsters Know About Their Own Kind.

The teacher in one of our intermediate schools one day recently had a lesson in language, giving for the subject the word "Boy," the scholars to write out what they could about the subject, and this without assistance and without any time for preparation. Following are two specimens of the "compositions," written by two small boys, one nine and one ten years of age:

A boy is a biped animal, one to three feet high. Some boys are wise, intelligent, dull, bad, good, kind, gentle, cross, unkind, stupid, etc. Some boys are very kind to their brothers and sisters. My brother is very kind to me. Some boys grow up to be great men, some mayors of cities, and some own great mills and stores. Boys who study when they are small become the greatest men. Some boys who do not study when they are young grow men, are poor, and have to go out with a pickaxe and shovel, shoveling out the gutters and streets. Holidays some boys sell lemonade and ice-cream and some such things as what I have mentioned and earn lots of money. Last Fourth of July I had a lemonade and ice cream stand and earned some money. Some boys learn how to swim and some save lives. Some boys steal things and get arrested, and their parents have to bail them out. Some boys are cruel to animals. Some boys come to school with shoes and stockings off and their hair uncombed, and are not neat. The teacher does not like this, so she makes them look neat. Some boys stay home and take care of the garden and the baby and some boys run away and get into mishief. Some get hurt. One day in the week's vacation I went off with Sylvester Bennett to play in some sand. It was in winter. We came home in his yard, and there was some ice on the ground, and he took an axe and began chopping it. I went to pick it up and he struck me in the eye with the back of the axe. This was an accident. He cried and I did. Once I was coming home from school. I jumped on a milk team. When I jumped I lost my balance and fell flat in a mud hole. Boys are not so good, kind, gentle and stupid as girls are."

SECOND ACCOUNT.

"A boy is a small biped, not very large, but they are large enough to be in mischief. In summer most of the boys steal all the fruit they can, chew tobacco and smoke it, and fight, and swear, and curse, and tell lies, and are lazy, and saucy, and sulky, and are proud. In school they whisper and play and do not like to study when the teacher is not looking; and most of them come with dirty hands and faces, and they dirty up the yard and building, and run away. The boys play ball, polo, shinny, racing, flying kites, horse, switch, bull-in-the-ring, hide-and-go-seek, tag, chasing, trapping, jumping, running, swimming. At home some boys sauce their mother, and don't want to do any errands for their mother. I have seen some boys ask their mother for a cent, and if they will not give them one they will begin to cry, and if they get one they will begin to laugh and sing and jump. In winter they will be crying for sleis. A boy asked me for a match to smoke a pipe, and I told him that his match was on the State farm. Boys are always in mischief."—*Providence Journal.*

Cases of Foolhardiness.

A young man of exceptionally steady and cautious habits was employed some time ago by one of our leading woodworking establishments. His steady, cautious nature led to promotion, and a part of his duty required his presence where there are many rapidly revolving pulleys and belts. It was noticed that he gradually got to "fooling" with the belts, and he was warned of the danger by some of the old hands. The other day there was a sudden jar and a stoppage of a part of the machinery. An examination revealed a broken belt and the mangled corpse of the young man. The cause was evident to the coroner's jury—pure carelessness. Every week we read of accidents to carpenters, painters, etc., and no wonder. The recklessness of this class of men in trusting themselves on rickety scaffolds is incomprehensible.

The othe day we saw a painter at the top of a long, light ladder, the foot of which rested on a frail pine goods box, on a sideling pavement. On a close calculation there was not more than an inch, or at the most, two inches, of "center of gravity" that prevented his receiving a terrible fall. And this man, like hundreds of others, takes a pride in showing his fearlessness in the pursuit of his vocation under all circumstances. Sensible people call it foolhardiness. It has cost the life of many a good fellow, and we really believe that whenever a man exhibits unmistakable symptoms of this form of mental obliquity, he should be discharged from positions involving danger to himself and others.—Scientific American.

Pollution of the Thames.

It may be taken for granted that the worse use to which a river can be put is to turn sewage into it. Unfortunately a great deal of sewage finds its way into the Thames, and in a short time, it is to be feared, the quantity will be materially increased. The new scheme for the drainage of Richmond involves the erection of sewage-works on the river bank at Mortlake, exactly opposite Grove park, one of the most charmingly rural portions of Chiswick. Of course there will be a large annual expenditure upon chemicals; the sewage will be "completely deodorized;" and the effluent water discharged into the river will be "pure and transparent." It unluckily happens that we know what that means. This same deodorizing process is in operation at the Chiswick sewage-beds. Quite apart from the odors, the pollution of the steam and the disfigurement of the river bank at Mortlake are serious matters. At the present rate of progress it will not require many years to transform the Thames between Hammersmith and Kew into the "infected sea" which a French writer has described it as being below London bridge.—Pall Mall Gazette.

Great Britain's Pasturage.

In Ireland and England there is some pasturage all winter, and there are no places for the shelter of stock and sheep. The Scotch highlands are largely used for sheep raising. The variety is a good, fat, black-faced one, and the pasturage excellent. Hay is left out in the open air all winter, both here and in Ireland. It is put into small stacks and tied around with ropes. In England many of the hay and straw stacks are thatched and they are, as a rule, ridge-shaped instead of round.

WEBSTER'S BIRTH-PLACE.

Changes Wrought by the Years in the Scenes Which the Statesman Loved.

Webster's birth-place was formerly situated in Salisbury, N. H., but many years ago a large tract of land, containing this and many other farms, was set off in helping to form the town of Franklin. The road approaches the spot from the south, but on reaching it turns at a right angle towards the west, so that the present dwelling faces the south. It is a large, plain farm house of two stories, with door in the middle. From the northern side, just flush with the eastern end, runs a one-story L; adjoining this on the north is a woodshed. The house and L were once painted yellow, but the sun and storms of many years has been at work, and, if not defeated by a new coat of color, will, before long, reduce the whole to that hue which nature loves to bestow on all structures raised by man.

Directly east of the L stands a magnificent elm. It was planted by Daniel's father, Captain Ebenezer Webster, in 1768, and for nearly a century and a quarter has been nurtured by the sunshine and the showers, and invigorated by the pure air of this northern region. Its diameter is more than five feet at a height of nearly a yard from the ground and its gigantic limbs have a sweep of some seventy-five feet from side to side. Beneath it is a well of pure, cold water, dug by Captain Webster many years before the birth of his illustrious son. The old-fashioned well-sweep once erected above it gave place to a more convenient curb over a quarter of a century ago, and this in turn has been supplanted by a modern wooden pump, which creaks and "chugs," indifferent to the fact that it stands upon historic ground, and delivers from its mouth of pine the water from one of the oldest wells within this soil. For this well and this noble tree Daniel Webster never lost his fondness.

After resting and feeding our horses, eating our lunch beneath the old elm, and drinking from the historic well, we drove down to the valley of the Merrimac, a distance of three miles, where is situated the Elms farm, to which Captain Webster removed his family, two years after Daniel's birth. The old tavern in which they first lived, in which the lad read the Psalms to the teamsters when only six years old, and in which he subsequently made his famous defense of the woodchuck, has disappeared with the march of improvement, but the dwelling that they subsequently occupied still stands. It is in one of the broadest portions of the Merrimac valley, and forms the central part in a group of buildings now occupied as an orphans' home. On the death of Captain Ebenezer Webster the estate came into the hands of Ezekiel, who sold one undivided half of it to Daniel. The latter, at the decease of his brother, became sole owner. After his own death it was purchased by a gentleman by the name of Tay, from whom it was secured for its present use.

The house fronts the north, and is a plain two-story structure, with door in the center. The L which adjoins it on the west was built by the statesman, by whom a large number of beautiful elms and maples were planted about the place. Within every thing is kept, as far as possible, in its former condition. We see the same restricted front hall; the same quaint, narrow staircase, with square rail balusters; the same old-fashioned wainscoting; the small windows with broad paneled shutters on the inside. On the right of the door on entering is the dining-room, in which the Senator used to entertain his friends, and on the left of the parlor, from the rear of which opens the sitting-room, originally with folding doors between. These, however, have been taken away, and only the broad doorway remains.

In the parlor formerly stood Mr. Webster's table, at which he was accustomed to sit, looking out of the east window down the valley to the graveyard where slept his father, mother and several other members of his family. It was the sight of this burial ground that led him in later life to exclaim: "Alas! while the living all change, the tabernacle of the dead remains unaltered. To me my little native village is now hardly known but by its sepulchres. The villagers are gone; an unknown generation walks under our elms; unknown faces meet and pass me in my own paternal acres. I recognize nothing but the tombs. I have no acquaintance remaining but with the dead."—*Cor. Providence Journal.*

THE CORINTH CANAL.

An Eminently Useful Work Which Will Be Completed in Five Years.

This work, which, cutting through the Isthmus of Corinth, will be of sufficient depth and width to allow of the passage of large vessels, is making rapid progress, employing about one thousand men. The quantity of earth to be excavated will be about twelve million cubic feet, and of this, about two and a half millions have already been removed. The depth of the canal is proposed to be twenty-six feet; and the width at the surface of the water will be seventy-two feet, except at the entrance, where it will be about three times that width. The water is already admitted to a distance of sixteen hundred feet into the land at each end, the depth being nearly seventeen feet. It is confidently estimated that the canal will be accomplished in about five years from the present time, judging by the rate at which it is being carried on. It will be an eminently useful work when completed, and one calculated to save much valuable time, by enabling ships to go through the Isthmus, instead of having to sail round the Morea in order to pass from east to west, or from west to east—a circumstance that must carry its own importance in the commercial and maritime world.—*Chambers' Journal.*

—There used to be 362 varieties of sharks in salt water, but the number has dwindled down to about ninety, without any apparent good reason for such a change. The number of land-sharks has steadily increased.—*Detroit Free Press.*

The family of Hon. W. B. Hoke, Judge of the Jefferson County, Ky., Court, used St. Jacobs Oil with signal success.

Col. Henry Watterson's *Courier-Journal* declares that "no man can be as honest as President Cleveland seems to be, and conscientiously believes he is."

Mr. F. Rentschler, San Francisco, Cal., contracted a severe cold, and became so hoarse he could not speak. He tried a number of remedies without benefit, and even the efforts of two physicians failed to give the slightest relief. He was induced to try Red Star Cough Cure, one bottle of which entirely cured him.

LIFE'S BRIGHT SIDE.

Sam Johnson once said that the ability to look at the bright side of life was worth to any man as much as the addition to his salary of one hundred pounds a year, and when he wrote that sum meant a great deal. It is as true to-day as then. But many of those who are in the possession of a blue horoscope find it difficult to change the color of the landscape before them. Several of the letters written by patients of Doctors Starkey & Palen say that the use of Compound Oxygen has enabled them to see everything clearly. Melancholy is gone; the disposition to be morose and disagreeable has somehow vanished; and "I feel like singing all the time," and "I can skip and run like a child," are samples of the expressions of the disposition now. *Dyspepsia* was what was the matter with most of these patients, and a little timely treatment eliminated that disturber, and caused life to be seen in an entirely different light. If you would like to understand Compound Oxygen—its mode of action and results—address Drs. STARKEY & PALEN, 1529 Arch Street, Philadelphia, and you will have mailed to you free a volume of nearly 200 pages which afford very interesting reading.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews 615 Powell street, San Francisco.

The editor of a Georgia paper says liberty is always pictured as a woman because liberty to survive must be vigilant, and there is no blind side to a woman.

A VALUABLE MEDICAL TREATISE.

The edition for 1887 of the sterling Medical Annual, known as Hostetter's Almanac, is now ready, and may be obtained, free of cost, of druggists and general country dealers in all parts of the United States, Mexico, and indeed in every civilized portion of the Western Hemisphere. This Almanac has been issued regularly at the commencement of every year for over one-fifth of a century. It combines, with the soundest practical advice for the preservation and restoration of health, a large amount of interesting and amusing light reading, and the calendar, astronomical calculations, chronological items, etc., are prepared with great care, and will be found entirely accurate. The issue of Hostetter's Almanac for 1887 will probably be the largest edition of a medical work ever published in any country. The proprietors, Messrs. Hostetter & Co., Pittsburgh, Pa., on receipt of a two-cent stamp, will forward a copy by mail to any person who cannot procure one in his neighborhood.

We have had "progressive euchre" and progressive orthodoxy," and now we have a "progressive democracy." By and by we will have a progressive horse car.

INVALIDS' HOTEL AND SURGICAL INSTITUTE.

This widely celebrated institution, located at Buffalo, N. Y., is organized with a full staff of eighteen experienced and skillful Physicians and Surgeons, constituting the most complete organization of medical and surgical skill in America, for the treatment of all chronic diseases, whether requiring medical or surgical means for their cure. Marvelous success has been achieved in the cure of all nasal, throat and lung diseases, liver and kidney diseases, diseases of the digestive organs, bladder diseases, diseases peculiar to women, blood taints and skin diseases, rheumatism, neuralgia, nervous debility, paralysis, epilepsy (fits), spermatorrhea, impotency and kindred affections. Thousands are cured at their homes through correspondence. The cure of the worst ruptures, pile tumors, varicocele, hydrocele and strictures is guaranteed, with only a short residence at the institution. Send 10 cents in stamps for the Invalids' Guide-Book (168 pages), which gives all particulars. Address, World's Dispensary Medical Association, Buffalo, N. Y.

The poets are apostrophizing Bartholdi's statute. O, Liberty, what rhymes are committed in thy name.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

A REMEDY FOR INDIGESTION.

For ladies and children whose taste cannot be offended with impunity, HAMBURG FIGS form a remedy for constipation, indigestion, piles and liver complaints which is as pleasant to take as it is effective in use. 25 cents. At all druggists. J. J. Mack & Co., proprietors, San Francisco.

We have received *The Kansas Magazine*, published at Kansas City, Mo. It is neatly printed on fine paper and full of excellent articles. See their advertisement.

PALPITATION OF THE HEART.

It should be found in every household and carried by every traveler. Sold by druggists everywhere.

Sick-Headache, AND DYSPEPSIA.

S F N U (First Series) No. 233.

SENATOR BOONE'S OPINION OF DRS. DARRIN.

San Francisco Chronicle.

The reporter wended his way to the office of Scrivner & Boone, attorneys-at-law, 320 California street, with the view of applying the reporter's exhaust pump to the Hon. John L. Boone, who was cured by Drs. Darrin. Upon stating the object of his visit he found Mr. Boone an enthusiast on the subject of his treatment and cure. He said:

"I was troubled with eczema, which had attacked my nose. This gave me the appearance of being a hard drinker, when, as a matter of fact I have always been most abstemious in the use of liquors. I was for ten years under treatment with the best physicians in the city. Instead of getting better I got worse, though one of my doctors, I am satisfied, did the best he could for me. Indeed, he declared that he would stake his reputation as a physician on my case, and if he failed would consider himself disgraced. So great was my annoyance that it threatened to drive me from my profession. Finally, becoming disgusted with these repeated failures, I consulted Dr. Darrin and placed myself under his care. My improvement was immediate, and after a few days to my inexpressible relief, the disagreeable eruption was entirely removed. *Dr. Darrin's magnetic treatment cured me.* This was more than two years ago, and none of the symptoms have since reappeared. Dr. Darrin is a well-read, scientific and skillful man, and I am glad to testify to his attainments. My previous experiments had cost me large sums of money, which was worse than throwing away. One thousand dollars would not tempt me to again become similarly afflicted, if I could not again come under this man's treatment."

A Lady's Thanksgiving.

TO THE PUBLIC: This is indeed a Thanksgiving Day for me, and I know of no better way to express my thanks than by giving the public the marvelous way in which Drs. Darrin of 113 Stockton street, San Francisco, cured me of deafness. I had been deaf a long time, which had gradually come upon me. I applied to the Doctors, and through their magnetic treatment I am restored. MRS. M. C. PETERSON,
924 Pacific street, S. F.

November 25, 1886.

Dr. Darrin can be seen daily at his parlors, 113 Stockton street, San Francisco, from 10 A.M. to 8 P.M. The poor treated free of charge, 9 to 10 daily. Send for circular. Examination free.

America has no titled classes, but there are numerous "counts" here when election is over.

* * * A disease of so delicate a nature as stricture of the urethra should only be entrusted to those of large experience and skill. By our improved methods we have been enabled to speedily and permanently cure hundreds of the worst cases. Pamphlet, references and terms, 10 cents in stamps. World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

Snowshoe clubs are organizing in Northern Michigan, and $1,500 worth of flannel uniforms have been ordered from one tailor alone.

For Coughs, Colds, and Throat Disorders, use "*Brown's Bronchial Troches,*" having *proved* their efficacy by a test of many years. *Sold only in boxes.*

The shoemekers' strike in Massachusetts has come to a waxed end, and the men have returned to their benches.

Sick and bilious headache cured by Dr. Pierce's "Pellets."

A judge elected in Texas agreed not to run. The public will now make him run. He worked the colored vote on the sly.

If afflicted with Sore Eyes, use Dr. Isaac Thompson's Eye Water. Druggists sellit. 25c.

Try Germea for Breakfast.

THE CHARLES A. VOGELER CO., BALTIMORE, MD.

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS,

from a common **Blotch,** or **Eruption,** to the worst **Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin,** in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. **Great Eating Ulcers** rapidly heal under its benign influence. Especially has it manifested its potency in curing **Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck,** and **Enlarged Glands.** Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using **Dr. Pierce's Golden Medical Discovery,** and **good digestion, a fair skin, buoyant spirits,** and **vital strength,** will be established.

CONSUMPTION,

which is **Scrofula of the Lungs,** is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, **Dr. PIERCE** thought seriously of calling it his **"Consumption Cure,"** but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for **all Chronic Diseases** of the

Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from **Indigestion, Dyspepsia,** and **Torpid Liver,** or **"Biliousness."** In many cases only part of these symptoms are experienced. As a remedy for all such cases, **Dr. Pierce's Golden Medical Discovery** is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

SOLD BY DRUGGISTS, at **$1.00, or SIX BOTTLES for $5.00.**

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, **World's Dispensary Medical Association,** 663 Main Street, BUFFALO, N. Y.

$500 REWARD

is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption. Dr. Sage's CATARRH REMEDY cures the worst cases of **Catarrh, "Cold in the Head,"** and **Catarrhal Headache.** 50 cents.

STEINWAY, KRANICH & BACH, Gabler, Woerish Pianos; Burdett Organs, band instruments. Largest stock of Sheet Music and Books. Bands supplied at Eastern prices. M. GRAY, 206 Post Street, San Francisco.

THE PRESIDENT OF THE NEW YORK STATE SENATE.

For expediting legislative business, Edmund L. Pitts, the President of the New York State Senate, stands almost without a peer. Such a place as he holds is a most trying one and requires great powers of endurance. One of Mr. Pitts' ablest supporters will be seen is his letter given below:

STATE OF NEW YORK, SENATE CHAMBER,
ALBANY, March 11, 1886.

I have used Allcock's Porous Plasters in my family for the past five years, and can truthfully say they are a valuable remedy and effect great cures. I would not be without them. I have in several instances given some to friends suffering with weak and lame backs, and they have invariably afforded certain and speedy relief. They cannot be too highly commended.
EDMUND L. PITTS.

A subscriber asks us the question: "How can I prevent my bay from being fast?" Let him join the district telegraph corps.

ANOTHER LIFE SAVED.

Mrs. Harriet Cummings, of Cincinnati, Ohio, writes: "Early last winter my daughter was attacked with a severe cold, which settled on her lungs. We tried several medicines, none of which seemed to do her any good, but she continued to get worse, and finally raised large amounts of blood from her lungs. We called in a family physician, but he failed to do her any good. At this time a friend who has been cured by DR. WM. HALL'S BALSAM FOR THE LUNGS, advised me to give it a trial. We got a bottle, and she began to improve, and by the use of three bottles was entirely cured."

Woven Wire Mattresses and

Iron Beds, manufactured by W. A. Schrock, 19 New Montgomery Street, San Francisco, Cal. Send for Catalogue and Price List.

9—Cash Present in Gold	200	19—One Ladies' Pair Bracelets	50
10—Cash Present in Gold	100	20—One Sewing Machine	35

To the next 20, each a solid Gold Watch, worth $100 each.
To the next 50, each a solid Silver Watch, worth $25 each.
To the next 100, each an Elegant Photograph Album, worth $5 each.
To the next 125, each a Solid Gold Ring, worth $2 each;
To the next 185, an Elegant Book, worth $1.50 each.
If a competitor should fail on the first he will stand a chance for one of our

MIDDLE REWARDS.

To the 158 persons whose names come in the middle, counting from number one to the last received, we will give the following rewards:

First Cash Present in Gold	$75	Fifth Cash Present in Gold	$100
Second Cash Present in Gold	50	Sixth Cash Present in Gold	75
Third Cash Present in Gold	250	Seventh Cash Present in Gold	50
Fourth Cash Present in Gold	175	Eighth Cash Present in Gold	25

To the next 30, each $10 in cash. To the next 20, each $5 in cash. To the next 20, each $2.50 in cash. To the next 75, each $2 in cash.

LAST REWARDS.

To those who are too late for any of the above rewards, a special chance still remains. To the 333 persons whose names come in last we will give the following rewards:

To the last name on the list we will give $500.00 in cash. To the next to the last name we will give $300.00 in cash. To the third name from the last we will give $200.00 in cash. To the next 50, each $10.00 in cash. To the next 100, each $5.00 in cash. To the next 200, each $2.50 in cash.

TOTAL VALUATION OVER $21,000.00.

Each competitor must in every case send $2 for one year's subscription to THE KANSAS MAGAZINE with their answer. No answer will be recorded unless accompanied by the cash, for which we will send, post-paid, our splendid Magazine. Present subscribers can compete by paying for another year or for a friend. The regular subscription price of our elegant Magazine is only $2 a year, so

U PAY NOTHING FOR COMPETING

for the above presents. The gifts will be sent to the successful ones, and their names published in our February issue of THE KANSAS MAGAZINE. Don't delay. The Magazine is worth much more than the money, and by answering quickly you may secure one of the larger prizes. This is the fourteenth Competition of THE KANSAS MAGAZINE, all of which have given the utmost satisfaction to the successful ones. The receiving of your magazine will be your receipt.

Every parent should encourage children to enter this contest. Besides familiarizing themselves with the Bible they secure a highly-deserving family Magazine, and also a chance for one of the rewards. We refer to over 28,000 subscribers. We enter every letter in the order and on the day received, and number the names as recorded in our subscription books; hence there can be no mistakes. We can not make corrections in answers after letters are entered. If you do not get one of the largest you may get one of the smaller rewards, and thus be amply repaid. If you don't get anything but our Magazine you will be satisfied, as it has no equal at the price. No answers will be recorded bearing postmark date here later than January 27, 1887. You must send before that date.

Send money by new postal note, money order or registered letter, express, or draft on Kansas City, Chicago or New York. Do not send checks on local banks. Canada bills are worth only 90 cents on the dollar. We pay no attention to Answers in Letters, without the Subscription to the Magazine, on Postals or Telegrams. The following receipts speak for themselves:

WASHINGTON, KAS., Oct. 22, 1886.

Received from THE KANSAS MAGAZINE, of Kansas City, Mo., the sum of ($2,500) twenty-five hundred dollars for answering their Bible Question where the word "Silver" was first mentioned in the Bible, my answer being 13th Chapter and 2d verse of Genesis. The money was this day duly paid me in full. S. E. FARROW.

ARGENTA, ARK., Nov. 6, 1886.

I have this day received from THE KANSAS MAGAZINE two thousand dollars ($2,000) as my premium for answering correctly their Bible Question—"Where was Silver first found in the Bible?"—Genesis, 13th Chapter, 2d verse. CECIL NORLIS.

The following are a partial list of the names of those who were awarded presents in our December, 1885, and March, 1886, Bible Competition: Mrs. Maria Crawley, West Markham Street, Little Rock, Ark., $2,500; Miss Maggie Mitchell, Corner Fifth and Chestnut, St. Louis, Mo., $2,000; Chas. M. Hill, Topeka, Kas., $2,500; Mrs. William Crawford, Atlanta, Tex., $2,000; B. Martin, Frog Level, La., $1,200; Benj. W. Avery, Louisville, Ark., $500; Thomas Heard, Texarkana, Tex., $750; B. Dixon, Magnolia, Ark., $1,000; Miss Dora Crawford, Atlanta, Tex., $1,250. *Write to any of these parties if you want any further proof.*

THE KANSAS MAGAZINE is an old-established Family Magazine, handsomely printed, finely illustrated, pure and elevating in tone, and a favorite in thousands of homes. To satisfy all as to its merits, we mail sample copies for 10 cents, their cost, we cannot send them free.

A Holiday Present of 10 Books to Every New Subscriber

which will be mailed free of postage on receipt of their subscription.

We refer to the following prominent citizens, all of Kansas City, Mo.: Major B. F. Jones, Secretary and Treasurer Kansas City Water Works; Charles D. Lucas, Recorder of Deeds; First National Bank, The Kansas City Bank Note Co., and any responsible house of Kansas City.

BURDETTE

Pays a Tribute to the Memory of His Meek Mannered School Teacher.

Bennie Gibbs is one of the daring, venturesome boys in my memory of school days. His pa was a school director, and consequently Bennie defied the teachers in the Gibbon school to an extent that made him heroic in our eyes. It was always understood that Bennie was to test every new teacher to see how much "sass" he would take before he broke out and left the reservation. One time old Mr. Grayson was sick and a substitute took the school for a few weeks. The substitute was a mild looking man, of middle age, somewhat bald, with a thin neck, sandy complexion, meek voice and padlock whiskers. Not a boy of us was afraid of such a looking man as that; still, Bennie Gibbs, as usual, took the field for a reconnoisance the first morning. First he dropped a book on the floor. Then he dropped his slate. Then he pushed the big dictionary off the table. Then he whispered. Then he left his seat without permission. Then he slammed the door like an earthquake when he went into the recitation room. Then he whistled once. Then he mewed softly, like a cat. Then he whined like a dog. Then he said "Ma'am!" very loudly and pertly when the new teacher spoke to him very mildly, and we all laughed ourselves tired. Then Bennie coughed like an old man. Then it was time for recess and the new teacher looked at his watch and told us to put away our books and then he tiptoed meekly down the aisle to Bennie Gibbs' seat. He took Bennie by both shoulders and churned him up and

And churned him up and down.

down for a while and then he shook him until Bennie's hair began to fly out, and then he bent over the shrinking lad and wore out an ebony ruler on him. Then he said, in a meek, timid way, "The school may have recess," and touched the bell for us to go out. We walked out like boys walking to their own executions. That night Mr. Gibbs went to see the new teacher about it, and that meek man beat him with a chair leg until he had to be put to bed. You never saw such a man. He wasn't afraid of anybody. One day he put the president of the board of education out of the school room because he criticised the way the new man taught long division. This teacher, whose name was Moses H. Meeker, went into the Union army soon after the war broke out, and when one of our old boys, George Slocum, a Missouri boy, who had gone into the Confederate army and was serving under Price, heard that Meeker was in Grierson's cavalry, he deserted and came north and shot off three fingers of his right hand to avoid the draft. He said as soon as he heard that old Meeker had enlisted he knew the south had no chance. Meeker is a preacher now. He has been preaching in the same church for eighteen years, and never had but one row with the choir. That was the first Sunday he preached, and they do say that now, if he ordered that choir to sing the long meter doxology to "Amsterdam" or "Silver Street," they'd do it, if it burst the organ. — Robert J. Burdette in Brooklyn Eagle.

Why He Followed.

He was going home to his wife and family. It was growing dark. He had a lonely road from the car and he was making as fast headway as he could, when he suddenly gathered a dim suspicion that a man was following him purposely. The faster he went, the faster the man went and they came to a graveyard.

"Now," he said to himself, "I'll find out if he is after me," and he started through the cemetery. The man followed him. Vague visions of revolvers behind him, sensations of sandbags and loaded clubs and things grew upon him. He dodged around a grave and his pursuer dodged after him. He made a detour of a mausoleum. Still the forbidding shadow was after him, around and around. At last he turned and faced the fellow.

"What in thunder do you want? What are you following me for?"

"Say, do you always go home like this? I'm going up to ——'s house to do a job of carpentering, and a man at the car told me if I'd follow you I'd find the place. Are you going home at all?"—San Francisco Chronicle.

He May Get It All.

"So you want my daughter?" queried a Chicago capitalist, as the young man finished his address and stood with folded arms.

"I do."

"Ethel is used to luxury, you know?"

"Yes, sir, and she shall have all that heart can wish."

"But you are a poor young man, just getting a start in Dakota."

"Am I? I guess not. Our county has issued bonds to the amount of $250,000 for internal improvements. I am county treasurer and let all contracts."

"Take her, William, and remember that integrity is the keynote to success."—Wall Street Daily News.

A Guilty Conscience Makes Cowards.

"Hey, there! You've got my umbrella. I've found it at last, have I?" exclaimed a large-sized man, in a loud and menacing tone, as he stood in a doorway on one of the principal streets one rainy morning recently while a number of pedestrians were hurrying past. A dozen men turned at once on hearing him, and came toward him, holding out their umbrellas and making profuse apologies. With the air of an injured individual, the large man selected a fine silk one from among the number, and the procession moved on again. —Chicago Tribune.

A Vermont Cat.

A. Lapell has a knowing cat in his grist mill that has been there long enough to be familiar with the business. Upon opening his place of business one morning Mr. Lapell found the cat had caught a rat and placed the same on the scales to be weighed. The slide on the weighing bar was at the exact weight of the rat—two pounds. Whether the cat climbed the scales after placing the rat on the platform and actually weighed the rat Mr. Lapell is not prepared to say.—Scranton (Vt.) Courier.

An Appropriate Diet.

"I smelt cake baking this morning, Maria. What kind was it?" inquired Mr. Jinks. "Sponge cake, dear. Shall I put some on the table for dinner?" "No," said Jinks, gloomily, "save it till some of your relations come to see us again. It'll be more appropriate."—Merchant Traveler.

HALLOWMAS EVE.

The Celebration of Halloween Instituted by the Ancient Druids.

Old superstitions die hard, and it will certainly be long before the festival of Halloween becomes as much a thing of the past as has practically become the Guy Fawkes celebration on the 5th of November. Long before the Christian faith made way among the untutored people of ancient Britain, the Druids had performed special rites on what is now known as Hallowmas Eve; fires were lit deep in remote forests, upon outlying spurs of hills, even upon the great plains that stretched between dense forests and partially cleared woodlands; mystic rites were performed, the help of the true God was implored, the machinations of evil powers were protested against. The earliest records bear witness to a universal belief that on this night the powers of darkness muster in great force, that all supernatural beings hold revel within the sphere of humanity, and that therefore it behooved all persons to be careful on this night of all nights, for any sin committed rendered the perpetrator liable to be brought under the influence of some evil spirit throughout the whole year thereafter. To this day any child born in Scotland on the eve of the 31st of October is supposed to be in possession of certain mysterious faculties, to hold—if not consciously, at least unconsciously in the midnight hours when the senses are obscured by sleep—communion with the supernatural world, and to be at all times a person whose actions, however eccentric, must be regarded charitably. Those who have read Sir Walter Scott's Monastery will remember that he has made use of this circumstance has space. "She's as flytie as a Halloween wean" is a phrase that may even yet be occasionally heard north of the Tweed, and in most of the popular accounts of wizards and uncanny folk the date of their births is generally set down as on the last day of October. When, later on, All-hallow Eve became a Christian observance, the old customs pertinent to its celebration did not pass into disuse; on the contrary, they became more and deeply established, every here and there accumulating some new superstition, or annexing some old belief that had long lingered without direct association with any special day, season or locality. Bonfires are still lit on Hallowmas Eve, though perhaps only one or two here and there among the members of the innumerable village communities who thus celebrate the great event know that the practice is a remnant of paganism; indeed, it is surprising, in the use of this as of many other popular customs, to find how few know any thing whatever of the significance of their celebrations. "We do as our fathers did before us," is sufficient to account for every thing. In Protestant countries the vigil of All-souls is no longer a religious observance, or, at any rate, is not so in Scotland, England or Germany. It may be said that Halloween, as we understand it, is only celebrated by the Teutonic and Celtic races; with the Latins it is merely a religious vigil, round its observance clinging few if any of those wild legends or superstitions that are so plentiful in Scandinavia, Scotland and Ireland. The nearest approach to the Northern solemnity, and even weirdness, is the Venetian *notte delle morti*, or night of all the dead; but the religious ceremonies attendant thereon take place not on the 31st of October, but on the eve of All-souls Day, that is, the day following. It is in Scotland and Ireland that Halloween is kept in its entirety; in the former, curiously enough, more in the east, mid-country, and Lowlands than in the remoter Highland districts; in other words more among the Scots proper than among the pure Celts. The best chronicle of Hallowmas Eve that exists is the well-known poem of Burns, containing as it does some record of the most generally practiced customs in connection with this really ancient vigil, but, considering the popularity of the subject, there is a wonderfully limited "Halloween" literature. The succeeding threefold chronicle may possibly, then, contain something novel as well as of interest to many readers. It may be that the time is not far distant when All-hallows Eve will lose its hold upon rural as completely as it has upon urban populations, when bonfires will be lit only by a few youngsters, when apples will cease to be ducked for, and when nuts will no longer be set ablaze amid the red-hot coals; but the writer, for one, believes that such a time is not yet at hand, and disbelieves that Halloween will disappear altogether as a festival.

It is not only that there would be a revolution in the child-world if such sacrilegious disuse were to become the fashion, but that there are too many older children interested in the famous eve to allow its celebration to drop altogether yet awhile. At sea, in Canada, the States, Australia, even in India, wherever a true Scottish or Irish family is located, there is sure to be one voice raised in favor of the genial old custom. Its superstitious observances must undoubtedly pass away—have, indeed, to a great extent already become obsolete—but the good-fellowship, the laughter, the nut-roasting, the apple-ducking, the candle-singeing ought long to be specially associated with the 31st of October.—*Wm. Sharp, in Harper's Magazine.*

The Severn Tunnel.

The tunnel under the estuary of the River Severn, in England, on the line of the Great Western railway, which has occupied thirteen years in construction, has at last been successfully completed. It is one of the greatest engineering achievements of modern times. The length of the tunnel proper is about four miles. For upward of two miles it passes under the estuary of the Severn, and at high tide the water over it is about one hundred feet in depth. The tunnel line, with the cuts, is upward of seven miles in length. For more than four miles the tunnel is driven through hard pennant stone. It is twenty-six feet wide by twenty feet high, and is lined with vitrified brick. The cost is £2,000,000.—*N. Y. Star.*

BILL NYE

On the Value of Documentary Proof of Self Defense.

Probably no legal phrase in common use is so little understood, and through this ignorance so fruitful of the long, tedious and expensive litigation which it is said to be the object of law to prevent, as the two harmless looking words of "self defense." In law the term embraces and describes "all the rights conferred upon the individual to protect by his own acts and agencies his property or his person against some injury unlawfully attempted to be inflicted by another." This definition should be committed to memory by every schoolboy in the land. He will then have laid the foundation for a knowledge of the law of self defense which may be of great value to him in after life.

But the chief difficulty in setting up and proving self-defense in a court is twofold.

First—We must be thoroughly convinced that a great injury to person or property is contemplated.

Second—We must be able to establish by proof that such injury to person or property was so contemplated by the assailant at the time of the self defense alleged.

In other words, the identity of the assailant and his sincere desire to do us great injury, either to person or property, must be proved beyond the possibility of a reasonable doubt in the minds of the highly intelligent jury. This is not so easy as at first appears. We must establish by some proof that is free from bias or prejudice that the defendant was just in the act of imbruing his hands in our gore or about to commit a felony when we smote him, as set up in our defense. Therefore the testimony of members of the family would have little weight with an average jury.

For these reasons, which I trust I have made quite clear, it has occurred to me that documentary evidence would be the best. Supposing that I awake in the night from a sound and innocent slumber to find the bull's eye of a total stranger shining in my eyes. I

The bull's eye of a total stranger.

see that he is ransacking the pockets of my pantaloons. I start suddenly as a wave of horror passes the entire length of the spinal column. The frenzied start squeaks the costly framework of the richly carved couch on which I recline. In an instant the gentleman whips out a small gun, tells me to move at my peril, and with his pockets full of stuff that I have toiled hard for years to accomplish, he slowly egresses. I realize that my wife would not be a competent witness on my behalf, and I have failed to provide other witnesses in my apartments. You know a man cannot think of everything. In fact, thousands of men retire every night with absolutely no one as witness or to protect them but their wives, forgetting that as a protector a wife is almost worthless, and as a witness she is even more so.

So I have written out and had printed a large number of blanks, on which appear the following questions with spaces for answers. You wake up in the dead hours of night to find a party in the room engaged in the felony industry. You ask him to be seated, and taking from your writing desk the blank alluded to, you propound the following conundrums to him, filling in the answers as he gives them:

1. What is your name?
2. Where do you reside?
3. What is your age?
4. Your weight?
5. Are you married or single; and if so, would your family be left destitute in case I should shoot you in self defense?
6. Do you die easy or do you generally cling to life?
7. Are you a natural born citizen of the United States or are you an alien?
8. If an alien, please state whether it is a family characteristic?
9. Do you use tobacco?
10. Please state what disposition you would like to have made of your remains in case you should be shot in self defense.
11. Do you drink?
12. If so, why will you persist in so doing?
13. What do you generally take?

(Intermission.)

* * * * * *

14. Do you contemplate the commission of a felony?
15. If so, state what is your favorite style of felony and your reasons for dabbling in felony?
16. Is this the first time you have ever taken part in a justifiable homicide?
17. If not, please state fully where, when and under what circumstances you took such a part, and whether or not you at that time took the offensive or defensive.
18. Do you smoke cigarettes?
19. Please breathe hard on the breast tester, not necessarily for publication, but for future analysis.
20. Have you ever been insane?
21. Are you insane now?
22. Do you ever have microbes on your brain?
23. If so, do you think that they tend to deteriorate the brain tissue, or do you think that they improve it in your case?
24. Have you any other clothes that you would prefer to be laid out in, aside from those you now wear?
25. When did you first begin to toil up toward the pinnacle of felony?
26. What amount of money would you be willing to take in order to forego and, as it were, omit this particular felony?
27. Would mining stock or ninety-day paper be taken in such a deal?
28. If unsatisfactory answers are made to both the above interrogations, will you please state fully what medical college you would prefer to endow with yourself?
29. Is the idea of a personal devil repulsive to you?
30. Would you please protrude your tongue as far as possible, and hold it there until a physician can be summoned?
31. Are you an offensive partisan?

(Sign here).....

Signed in the presence of.....

.....

The witnesses must be wholly disinterested parties, and in case either should be unable to sign his or her name two witnesses to the making of the mark must be present and sign.

By using these blanks and using them intelligently I believe that much tedious and exasperating litigation might be avoided, and that a great deal of brain fag, which is becoming so alarmingly prevalent among jurors, will be prevented. Should these lines be productive of such results, though it be in a slight degree only, I shall be proud and happy.—Bill Nye in Century.

QUEER FREAKS.

Idiosyncrasies and Peculiar Ways of Some Noted Men.

Augustus Hare, one of the cleverest divines in the English Church, when he had ended a train of hard thinking, would rise from the desk and spin around on his heel a few seconds and then resume his studies.

Dr. Johnson would never enter a certain lane in London without going between two particular posts of which there were four.

Frederick the Great in his youth was noted for his stubbornness and bashfulness, and, we are told, showed this at his sister's marriage. Instead of appearing at the ceremony in court attire he came with the servants dressed as one of their number.

Neander, the famous church historian, was unable to lecture to his students unless he had in his hand a quill pen, which he tore to pieces while he talked, and it was always necessary to supply him with a second when the first had been entirely wasted.

Charles II. of England was very fond of hunting insects, and it is related by certain historians that he was hunting a moth in the supper-room at Whitehall when the Dutch fleet sailed up the Thames and burned Sheerness.

Charles Dickens, the famous novelist, was a most untiring walker; he considered it but a trifle to pass over forty or even sixty miles of country. Should a friend visit him a walk was his (Dickens') first proposition. Tradition says in the long run he had few friends spending a whole day with him.

Archbishop Whately was one of the most philanthropic of men, and yet, when dying, he is reported to have said: "I rejoice to think that never in my life have I given a copper to a beggar with whose antecedents I was a stranger."

The Earl of Chatham was most peculiar in his habits; these, no doubt, were engendered by his hypochondriac nature. On one occasion, in midsummer, he wished to have snow, and adopted the following rather curious method of having his wished realized: The servants were ordered to have large fires in every room, the walks outside were covered with salt to make things have a wintry appearance, and doors and windows were kept shut to keep out the biting cold. How long this whim lasted the historian does not record.

William Wilberforce became so absorbed in conversation in evening companies as wholly to forget himself. He would lift himself from his chair in his earnestness, move forward a little, and gradually approach perilously near the edge. It was a tradition in fashionable English circles that he had fallen several times to the floor; but in families where he was loved it was the custom to station one of the older children behind his chair to move it forward as he moved and guard him against peril. Some who afterwards became leaders in English society retained among the pleasantest memories of their childhood the recollection of the services rendered to this brilliant and eloquent converser.

Rossini, the composer of "The Barber," when engaged with any great composition, invariably shaved himself in a most fantastic way to prevent his going out-of-doors.

George IV., King of England, was very feminine in his habits; he possessed scores of embroidered shirts, which were considered by him to be the best department of his wardrobe, and were accordingly displayed with great pomp to any particular friend of his Majesty.

Napoleon habitually watched a certain star, which he declared was his, for it never abandoned him, but was always in sight commanding him to go forward, giving as a reason for his success its own appearance.—*Chicago Tribune.*

LINCOLN'S CHILDHOOD.

A Time of His Life About Which the Great President Never Talked.

Of all these years of Abraham Lincoln's early childhood we know almost nothing. He lived a solitary life in the woods, returning from his lonesome little games to his cheerless home. He never talked of these days to his intimate friends. Once, when asked what he remembered about the war with Great Britain, he replied: "Nothing but this. I had been fishing one day and caught a little fish which I was taking home. I met a soldier in the road, and having always been told at home that we must be good to the soldiers, I gave him my fish." This is only a faint glimpse, but what it shows is rather pleasant—the generous child and the patriotic household. But there is no question that these first years of his life had their lasting effect upon the temperament of this great mirthful and melancholy man. He had little schooling. He accompanied his sister Sarah to the only schools that existed in their neighborhood, one kept by Zachariah Riney, and another by Caleb Hazel, where he learned his alphabet and a little more. But of all these advantages for the cultivation of a young mind and spirit which every home now offers to its children, the books, toys, ingenious games and daily devotion of parental love, he knew absolutely nothing.—*Nicolay and Hay, in Century.*

Air-Tight Paper Bottles.

Paper bottles were patented in America in 1883. Their sale was not extensive at first, but now that European patents have been secured, covering nearly all fields of probable competition, the controllers of the patents, we are informed, intend to manufacture the bottles in large quantities. In the item of freight alone they will effect a saving of one-third less weight than glass or stoneware, and are on the whole less liable to breakage. Paper being also an excellent non-conductor, fluids stored in air tight paper bottles will withstand a more intense degree of heat or cold than they could endure without injury in bottles of any other material.—*Boston Journal of Commerce.*

MISCELLANEOUS.

—The Crown Prince of Germany sells one thousand quarts of milk every day from his farm at Panetz, near Berlin. The Prince is a cowboy.

—A Goshen (N. Y.) electrician has invented a machine by which the temperature of the atmosphere can be foretold at any and all parts of the country. —*Troy Times.*

—Many think that more money can be made in California raising nuts than fruit—the former keep and carry so well. The English walnut is the favored California nut.

—Twenty years ago water was not allowed to Austrian soldiers while on the march. Now an unlimited supply is permitted, and to this fact is attributed their freedom from sunstroke during this year's autumn maneuvers, when the heat was extraordinary.

—A novelty of the amusement season in New Orleans the coming winter will be white balls, a custom borrowed from Spain and France. All the women must attend dressed in white only, with white ribbons and white laces and flowers.—*N. O. Times.*

—"I regret to state," said a college student, reporting to his literary society the condition of its library room, "that one of the back shutters has been busted off, and that the burst of Lewis Cass has lost an ear." He wondered why the society laughed at its own loss. —*N. Y. Mail.*

—American Shakers, who number about 4 000, are worried over their own wealth, which is valued at about $12,000,000. The elders begin to feel like monopolists, and that the possession of so much property is contrary to the gospel scheme which they desire to follow.—*Chicago Inter Ocean.*

—Nashville has a citizen who, in dress and general conduct, appears to be perfectly sane, but each morning he gets up early, fills a small bag with food, a little tobacco and some stones, goes to the river and throws it in. Asked why he does this, he says: "Brother can't get any thing to eat under the water." One of his brothers was drowned.—*Nashville American.*

—One of the New York elevated roads has been compelled to pay seven thousand dollars damages to a man whose premises it passes. He claimed the main nuisance of the elevated enterprise was the "momentary flashes of darkness" which its passing trains cast into his windows. The legal light on the flashes of darkness won the case, baffled philosophy and the corporation. —*N. Y. Tribune.*

—To such a degree of perfection and effectiveness has astronomical photography now reached that among its achievements is a photograph of the cluster in Perseus, showing stars down to the thirteenth magnitude. In this particular case the negative was obtained in fifty minutes with a 6-3-inch object glass of 83-inch focal length, the view being subsequently enlarged four times and reproduced by helio engraving.—*N. Y. Sun.*

—An editor out West remarks that he has good reason to believe that newspaper men become white mules after death, because the expression of the countenance of a white mule has often reminded him of some deceased brother journalist, especially the despondent droop of the lower lip. He also calls attention to the fact that editors and white mules seldom die and are awful hard to kill.

—The grand object of many visitors to the fair seemed to be the accumulation of as many advertisting circulars as possible. They went about with their arms full, and one stout lady actually carried a market basket into which she carefully laid any bit of printed paper offered her. Perhaps she collected enough paper to pay her admission fee, or at least to set her up in tin dippers for the winter.—*Boston Correspondent.*

—Some one has looked into the future and seen the "ship of the next century." He says that this steamer will apply its motive power in a more rational method than the propeller screw represents, and that the crankshaft will be done away with. The water will be conducted not on a circuit around the ship's body, but right through it lengthwise on a straight line, and the water rejected at the stern will steer the vessel.—*Chicago Tribune.*

—A young woman picking her way across the railroad tracks in Indianapolis saw a brakeman wave his hand to her from the top of a departing freight train. She smiled sweetly and waved back. Then the brakeman waved more violently, and the girl smiled more sweetly and stopped and tried to get out her handkerchief, to fittingly carry on the flirtation. The next thing she knew she was yanked off the track by a flagman just in time to escape a backing train which the brakeman had seen and tried in vain to warn her of.—*Indianapolis Journal.*

—Near Randolph, N. Y., recently, occurred a peculiar accident with fatal result. In company with a number of companions the ten-year-old daughter of Francis McGinity, set out to gather chestnuts on the farm of Lester Scudder. She was perched on a chestnut tree twenty feet from the ground, when the limb on which she was standing broke with a crash, and the girl was hurled head-first downward. Her clothing caught as she went down and while thus hanging for an instant between heaven and earth she cried to her companions: "I am dead; good-by." She struck on her forehead, causing the blood to issue from mouth and nose. She leaped to her feet, but in a moment fell over dead. Her neck was broken. —*N. Y. Sun.*

Deserved to Be Arrested.

"Awthuh, I've made up another one. Now don't puff that cigawette so hah'd, deah boy, or you'll wattle me, don't you know. Now, why is a cwazy bahber like a person who has a mania foh stealing things, don't you know?"

"Give it up."

"Because he's a clipped-em maniac, don't you know."

Pretty soon a policeman came along and hung a very dilapidated conglomeration of hat, cane, cigarette and overcoat over a letter box, while he went to call the patrol wagon.—*Merchant Traveler.*

THE STATE CREDIT.

Governor Bartlett finds himself confronted by serious problems in State finance which will at once enlist all his well-known genius for such work as their solution requires. An increase of expenditures in the last two years amounting to $2,100,000 is not a pleasant fact to contemplate. It is an increase in expenses at the rate of $1,050,000 per annum, which, unchecked, will at the end of Governor Bartlett's term have run to $4,200,000, and will for the six years that then will have passed aggregate nearly $7,000,000.

When we remember that Governor Bartlett states that this increase is in the ordinary expenses of the Government, the shock to one's sense of the proprieties of administration is increased. There has been no such increase in the State's population as warrants this swell in the cost of their government.

Its cause must be sought in the difference in motive between the executive and the legislative branches of the Government, and we expect that in the course of correcting it Governor Bartlett will frequently resort to the veto.

His record as the executive head of this city is a sufficient guide to the work that is before him. That work involves something more than a mere adjustment of outgo and income, holding expenses down to what taxation raises. This State is seeking immigration. It is calling for more people to invest in its lands, and upon them to build homes. Economists know that people are slow to seek a State whose misgovernment is testified by the excessive cost of administration, and by a constantly widening margin between income and outgo.

Our soil and climate will display their phylactery in vain, if they are shadowed by extravagance and corruption in the government of the State. Our people must make up their minds now to stand by Governor Bartlett in the application of those correctives which he knows so well how to use. It will be no light task, for he will encounter powerful and at present almost dominant influences in his own party, which have upon them the long accustomed habit of looking upon the State as somebody else's heifer, which they may milk as long as she will give down.

We know the Governor well enough to believe that he will be as fearless as he is intelligent in reforming the evil tendency to excessive expenditure.—[Alta.

Fact Versus Theory.

The speculators of Wall street and the bondholders everywhere have kept up the most dismal prophecies of the evils that would come upon the country from the continued coinage of silver. But every one of their mournful predictions is contradicted by the facts. The gold now owned by the Government amounts to $170,912,413, being the largest sum which the Government has owned since the resumption of specie payments, except on one single occasion. In addition to this the increase in the stock of gold for December was almost $7,000,000, and for half the fiscal year over $14,000,000. At the same time the stock of silver has been steadily decreasing, although coinage goes on without interruption. The plain truth is that in the every day business of life silver is more used and more useful than gold, and multitudes of people use silver while comparatively few use gold. An ounce of fact is worth a ton of theory; and silver will be used for the purchase of the articles needed in every home, regardless of the theories of fanciful financiers or the schemes of speculators.

Co-Operation.

The value of "co-operation" was never better illustrated than in Ireland at the present time. From generation to generation the Irish people were at the mercy, or rather at the will of their landlords, who had no mercy, till "co-operation" was tried, and it works like a charm. Formerly the landlord made it his study to find how little was absolutely necessary to keep soul and body together in his tenants, and every bite or sup produced from the land beyond that he demanded as his own. The pig had to be fatted with the choicest potatoes and sold to pay the rent. Now all that is changed; the tenants fix a fair rate of rent for the land and offer the same to the landlord; with him it is Hobson's choice, that or nothing. All the laws of England, backed by fleets and armies, are powerless against this system of "co-operation." When millions of people act as if inspired but with one will, and that will is governed by strict justice, nothing can prevent them from being successful in whatever they undertake. Long live "co-operation" in Ireland, and may it speedily be adopted by the oppressed everywhere.

It would be little short of a crime for the present Legislature to fool away the time without passing some good law in favor of irrigation. The strong indications of a dry season ought to bring the most indifferent to take interest in the matter. The firm of Miller & Lux ought not to have influence enough in the Legislature to prevent measures of such vital interest to all the rest of the people of the State.

So far there is not much indication that the present Legislature will be any more fruitful of legislation on the irrigation question than its predecessor. A quarter of the sixty days allotted to the session has already passed, and nothing has been done.

"They may do west for a that 's done yet,
But only just, they've no' begun yet."

Till the seat in the United States Senate could be disposed of, it was not to be expected that any attention would be given to matters in which only the people at large are concerned. The average legislator won't waste much time on public business so long as he has personal ends to accomplish. The delay so far appears to rest with the Senate, the majority of that body being too deeply interested in the election of a U. S. Senator to attend to anything else.

How's Your Liver?

Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.

NEVER BEEN DISAPPOINTED.

As a general family remedy for Dyspepsia, Torpid Liver, Constipation, etc., I hardly ever use anything else, and have never been disappointed in the effect produced; it seems to be almost a perfect cure for all diseases of the Stomach and Bowels.
W. J. McILROY, Macon, Ga.

INDEPENDENCE MARKET,

E. Robinson, Prop.

Keep constantly on hand the very choicest of all kinds of meats, including

Beef,
Mutton,
Pork,
Lard,
Sausage.

I make a specialty of furnishing meats by the quantity for the mines and outside camps.

Highest market price paid for beef cattle.

All meats will be sold at the lowest possible living rates.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, Bodie, Cal. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its post-office address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the northeast corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 31 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 76" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 6 degrees 26 minutes E. distant thirty-six chain; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

SHADE TREES.

Good, Thrifty Trees
One and One-half
Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

W. J. MARSH & SON,
FORT CHURCHILL, Lyon Co., Nev.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, JANUARY 15.....1887.

Farmers in the San Joaquin valley are rather despondent by the prospect of a dry season.

Additional interest will be given to irrigation legislature by the prospect of a dry season.

Barnes and Kehoe have leased a portion of their White Hill mines to Wilmot and Whittaker.

A few days ago John C. Irwin sold to S. A. Densmore seventy-five head of stock cattle. Price not stated.

Mr. Page, of Truckee, arrived at Independence last Wednesday. He comes in search of land for himself and others.

Mrs. D. Crough returned home last Wednesday from Tuolumne county, where she had been visiting the past two or three months.

Mr. E. Chenot put men to work a few days ago on another new building. This will be used as a wareroom for grain and other bulky goods.

The smokestack of the upper mill at Belleville fell last week, crushing in the roof of the mill, and doing damage to the extent of $10,000.

Last week the United States Senate confirmed the nominations of Mr. J. W. P. Laird and Mr. A. W. Eibeshutz as Register and Receiver of the Land Office at Independence.

Reno is to be supplied with electric light. An effort is being made to have the wire extended to Virginia City and the light supplied there also.

The firm of Robinson & Roper, butchers of Independence, has been dissolved. Mr. Robinson has bought the interest of Mr. Roper, who retires from the business. See the notice of Mr. Robinson in another column.

Edward Murphy died at Carson last week. Ed was well known in Candelaria and had many friends there. He was a son of ex-Attorney General Murphy, of Nevada. He died of Brights disease of the kidneys. Ed was an amiable and steady young man.

Every miner on the Pacific Coast has good reason to rejoice over the election of William M. Stewart to the United States Senate from Nevada. Again and again Mr. Stewart has shown his high ability and hearty good will to serve the interests of the miners.

The people of San Bernardino have petitioned the Legislature for another Superior Judge. The population and business of the county have increased so largely during the past year or two, that the one Superior Judge of the county is no longer able to attend to all the business of his court.

In his final message to the Legislature of Nevada, Governor Adams strongly urged the need of a proper system of irrigation for the State. There are millions of acres of land in Nevada, which, if irrigated, could be made highly productive and capable of affording sustenance to a largely increased population.

Joseph Loryea, Secretary of the Candelaria Mill and Mining Company, died in San Francisco January 5th, from the effects of a surgical operation. He had been ill for a long time and some weeks ago went to San Francisco to place himself under treatment of surgeons.

Mr. Bertrand Rhine returned to Independence last Wednesday, after an absence of nearly two years. He will remain and assist his father in his business. Bert is heartily welcomed back again by all old friends and will speedily make more new ones. Miss Sophie Rhine also came with her brother.

Mr. Collins, of Warm Springs, went to Kern county at the beginning of the week. He is making arrangements to move all of his stock of cattle and horses to his new home as soon as possible. Mr. Sanger went on similar business a week or two before. These gentlemen are making great improvements and will soon have fine homes and valuable estates.

Charles Rudofsky has made the first wine from grapes grown by him at Georges Creek. New though it be, the wine is of very fine quality, and gives promise of becoming with age a wine of rare excellence. More than one expert has declared that along the foot-hills in Owens valley will yet be produced the most valuable wine in the State.

In his inaugural address, Governor Bartlett expressed astonishment that the expenses of the State Government for the last two years exceeded the expenses of the two preceding years by $2,100,000. He intimated very strongly that this vast increase of outlay was caused by wasteful and extravagant expenditure of the public money, and said that the remedy to supply the deficiency should not be by increased taxation, but by greater economy in the public offices. As a Governor, friends and opponents appear to agree that General Stoneman was a dismal failure in every way. Like Missus Gummage, everything seemed to go "contrairy" with him.

Disappointment to the public and mortification to the party in power, resulted when it was discovered that a stupid blunder had been committed that prevented the inauguration of Governor Bartlett at the time first appointed. Certified copies of election returns, as the law requires, had not been sent from three counties. The blunder was only discovered when the returns were being read in the Legislature, and when a great number of people had met to witness the inauguration. The ceremonies were broken off and postponed for a few days till the missing returns turned up when the Governor was duly installed into office.

Thanks.

To the people of Independence.

The Bishop Creek Brass Band desires to express its thanks to the Young Mens Social Club, to O. I. Mairs, and to the people of Independence generally, for the generous treatment accorded its members during their recent visit there. The many kind courtesies shown will be remembered with pleasure.

Adopted by unanimous vote of the Band.

J. W. CLARK, President.

W. A. CHALFANT, Secretary.

New Business House.

Mr. John Fiehman is putting up a new building at Keeler, and as soon as it is finished he will open a general merchandising business. Work was begun on the building last Monday.

Technicalities.

Last Monday the bond of Mr. Eibeshutz, as Receiver of the Land Office, was returned from Washington for correction of one or two technicalities. The changes were made as directed and the bond sent back. It is to be hoped that there are no more obstacles in the way of removing the office from Bodie to Independence.

Always Pleasant.

Mr. and Mrs. Barnes will give a party at the Lake View Hotel, on St. Valentine's Eve., Feb. 14. Reduced fares will be given on the railroad. The new building being put up by Mr. Fiehman will be ready for use as a ball room on that occasion. There will be ample hotel accommodations for everybody. The parties given by Mr. and Mrs. Barnes are always pleasant and always well attended. There will be a crowd at the next one.

Repealing a Piece of Folly.

The last Legislature of Nevada enacted a law for the punishment of any person who would invite another to drink spirituous liquor of any kind. The Act was commonly known as the "Anti-treating Law." The passage of the Act was a very dull joke, and the law was a dead letter from the hour of its enactment. A bill has been introduced in the present Legislature for the repeal of this piece of foolishness. The cause of temperance reform is often seriously injured by ignorant and over-zealous temperance people.

Fruits, Trees and Vines.

The number of fruit trees in California, as collected from the Assessor's reports, are: Apples, 2,700,000; peach, 1,200,000; pear, 1,500,000; plum, 500,000; orange, 1,600,000; lime and lemon, 500,000. The acreage planted to grapevines is estimated at 70,500. It is highly probable that these reports fall far short of the actual numbers. It would be interesting if the State officials would give the increase in the trees and vines for the past five or six years. The future increase is certain to be much more rapid than the past. All over the State more land is being devoted to fruit culture.

Their Only Hope.

Lincoln county, Nevada, has a great area of good land, and large crops of wheat, oats, barley and other products can be raised; and yet the county is in a state of bankruptcy. The great natural resources of the county are of no value without a railroad. It is useless to raise crops where they cannot find a market. Settlers will not go there, and much of the country is without an inhabitant. Realizing that there can be no improvement without a railroad, the representative of the county in the Legislature has succeeded in getting a bill passed by the Senate to exempt from taxation for seven years any company that will build a railroad into the county.

School Report.

The following is the report of the Independence school for the month of December, 1886:

Pierce Johnson 91	Lester Laird 89
Ernest Laird 90	Sarah James 90
Mary Mulholland 89	Alice Rose 84
Ethel Hardy 88	Nettie Roper 87
Lorin Auger 91	Elsie Eibeshutz 93
Emily Conklin 91	Lizzie Thompson 90
Ettie Wood 90	George Hardy 89
Alice Zink 89	Clifford Baxter 89
Charlie Rose 87	Irving Woodin 86
Norma Mairs 86	Clara Willett 85
Rosa Roeper 83	Julian Eibeshutz 92
Arthur Robinson 91	Ettie Roeper 85
Johnnie Baxter 85	Bertie Levy 85

Rollin Laird 90.

R. L. PEELER, Teacher.

Follow a Good Example.

The cruel disregard of human life shown by the striking workmen of the street car lines in San Francisco, is certain to deprive them of all sympathy from the public; and without public support there is not the least chance for them to succeed in their struggle against the companies. Last week a charge of dynamite was exploded under the Larkin street line, in a thickly settled neighborhood. By this brutal act the lives of many innocent people, even women and children, might have been sacrificed. The villains who exploded the dynamite knew this very well, and if they are discovered and caught the heaviest punishment the law allows should be given them. Proper enforcement of law is the only safeguard for life and liberty, and its violation should be swiftly followed by punishment. Chicago has shown how to deal with dynamiters; the example should not be neglected.

A Dread Disease

A few weeks ago Mrs. Conklin was taken with diphtheria. Doctor Woodin was called in and treated her till she is now almost entirely recovered. Last week Dora Shepherd, the little daughter of John Shepherd, of Georges Creek, was taken ill with the same disease, and here again Doctor Woodin was called in. The child seemed to be at the point of death a few days ago, but the Doctor succeeded in checking the disease, and it now seems that his little patient will come out all right. Fortunately the Doctor had large experience with this dread disease in the East and knows how to treat it successfully. By his wise precaution in secluding his two patients there is little danger of the further spread of the disease. Though there is but the one case at Georges Creek, yet it has been thought prudent to close the school for the present.

Fatal Accident.

On Thursday Edward Gahan went down the Sweetwater road for a load of pine logs from a mountain side, about 7 miles north of Bridgeport. After getting his load he started down the hill to the road. J. W. Towle, with a team, was below him, having gone down the hill, after helping Gahan load, to turn his team out of the road. He heard Gahan shout to his horses, and upon looking back he saw Gahan's foot slip from the brake, causing him to fall from the wagon. At the same instant the wagon turned over upon him, crushing him to death. He was dead before Towle could get to him. Sam. McNaughton, George Kinney, George Vansjickle and Ed. Murphy were present and assisted Mr. Towle in removing the wagon from the body, which was placed in Towle's wagon and brought to town. The body was terribly mangled. Edward Gahan was a native of Canada, and aged 54 years. He was an old resident of this place, and was esteemed and respected by all acquainted with him. He was unmarried.—*Chronicle-Union.*

Misplaced Shot.

Last Thursday Charley Robinson and a friend of his went hunting quail. A short distance from town Charley was sitting down in the tall grass, out of sight of his friend, when a flock of quail started up and the friend blazed away. Charley flopped over in the grass quick enough to escape getting any of the shot in the upper portion of his body, but he did not escape altogether; the nether part of his body was made to look like a big currant dumpling, and his mother had quite a job for some hours picking out the shot. After the sores heal up Charley won't mind the marks, as they won't be in sight.

A Remarkable Well.

The greatest flowing artesian well yet heard of is in Kern county. The *Californian* says: "The artesian well bored recently on the land of Mrs. Adelaide J. Moore, in this county, throws out 2,500,000 gallons daily, and is surpassed in the amount of its flow by few, if any in the State. It supplies water enough to irrigate 1,500 acres. The pipe has a diameter of eight inches and the water spurts nineteen inches above its top. The well was bored by B. F. Mull and is on Sec. 4, township 26 south, range 23 east, Mt. D. B. and M.

Work For Prisoners.

How to employ State prisoners, so that the product of their labor should not interfere with that of honest workmen, is one of the most difficult problems in prison management. The Colusa *Sun* makes a wise suggestion on the subject; but the labor of the convicts might be used anywhere in the State on work like that proposed by the *Sun* in the Sacramento valley. Here is what is suggested; "The immense bodies of tules bordering the Sacramento river in the lower part of Colusa, in Sutter, Yolo and Solano counties, are easy of reclamation, and the price of land will justify an effort. The State can help this work along without expending any money. If we had a few men of brains in the Legislature, who would make an effort at benefitting the State, instead of bending all their energies to securing what little spoils that lays around the capital, we might hope for something.

The State is feeding and guarding men by the thousand in her prisons who are doing nothing of any benefit. Now if the State will furnish one thousand men and feed and guard them, this work can go on. The land owners can easily do the rest, and the State will be out nothing. State prisoners are now at work on the Mississippi levees. We have studied the Sacramento river for the last thirty years, and know its every characteristic. We know that the water can be handled, and handled easily. We have estimated that the land can all be reclaimed for $20 an acre. If the State will furnish the labor above indicated, it will be done for that figure or less. The land reclaimed will give work to thousands of men and support thousands of families. It will add directly many millions to the taxable property of the State and indirectly many millions more. In fact, the increased taxes from such reclamation would more than support the State Prison.

We have heard it urged that it would be cruel to put men to work in the tules—it might injure their health! What a pity! Good, intelligent, *honest* men have to work in worse places. It would make the heart of the philanthropist (?) sore to see a thousand men compelled by the State to work on levees, but he could see thousands of honest men, compelled by their necessities, to work on so unhealthy a work as the Panama Canal, and think it all right. We do not believe in cruelty to prisoners, but we do believe in making them useful. Putting them to work on levees would stop all the little trouble about what little they do interfering with free labor. We do not think that there is much in the objection made, but this would stop cavil. A thousand men furnished with the proper tools could work a revolution in a few years.

We do not care here to discuss any plan of reclamation in detail. We have done that heretofore, and can do so again if we can get the Legislature strained up to action. The work is thoroughly practical. We would be willing to risk our life on overcoming engineering difficulties. If the State will provide the men and the law, we can soon convince the land owners that it is wisdom for them to do their part.

Interstate Commerce.

In the discussion on the Interstate Commerce Bill in the Senate, Mr. Stanford took a leading part. The pith of his argument was about as follows: Suppose a new line of railroad built part way across the continent, from New Orleans to El Paso, for instance. Between these two points a rate of freight is established which is quite satisfactory to shippers. Call this rate thirty dollars per ton; a rate that pays the railroad only a fair profit on the capital invested. No one at either end of the new line makes any complaint of this rate; the people of New Orleans and of El Paso are equally well satisfied. Again, suppose the same line extended from El Paso to San Francisco. Here it is brought into competition with water carriage by way of the Isthmus and around Cape Horn. In order to get any through business between New Orleans and San Francisco, the railroad must carry freight at very low rates, say ten dollars per ton. On this the railroad may earn only one dollar per ton, and must carry twenty-one tons all the way through in order to earn as much as it would gain for carrying one ton to El Paso. The passage of the bill under discussion would prohibit the railroad from earning the dollar on the through ton of freight. The dollar earned in this way enable the railroad to maintain itself. Deprived of this source of revenue, the railroad is able to continue a reasonable rate of freight to El Paso. Instead of the intermediate point being injured by the low through rate, it is made a sharer in the small gain of the railroad on freight carried between terminal points. Mr. Stanford argued that Congress should not attempt to deprive people of what advantage they may have by living and doing business at points that may have the advantage of both railroads and water communication. Congress should not say, that because a railroad must carry twenty-one tons of freight all the way from San Francisco to New Orleans, in order to earn as much as it would from carrying one ton to El Paso, therefore it must not carry the twenty-one tons at all. The Senator argued that such would be the effect of the bill.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

New Open.

I have fitted and newly furnished the house on the corner of Market and Washington streets, where I am prepared to accommodate the public with first-class Board and lodging. Large and comfortable rooms for families. Suppers furnished on short notice. Board by the day or week at regular prices. V. G. THOMPSON, Proprietor.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Typhoid, Scarlet and Yellow Fevers, Measles, Diphtheria, Small-pox, Cholera, etc.

Darbys Prophylactic Fluid will destroy the infection of all fevers and all contagious and infectious diseases. Will keep the atmosphere of any sick-room pure and wholesome, absorbing and destroying unhealthy effluvia and contagion. Will neutralize any bad smell whatever, not by disguising it, but by destroying it. Use Darbys Prophylactic Fluid in every sick-room.

MISCELLANEOUS

NOTICE.

TO ALL WHOM IT MAY CONCERN: I, W. H. JENKINS, being a one-fifth owner in the Stevens ditch, give notice that I will not be responsible for any debts contracted by the said Stevens Ditch Company, from and after this date.

Monday, January 10th, 1887.

W. H. JENKINS.

Notice.

HAVING BOUGHT OUT THE INTEREST of my late partner, Julius Roper, in the late butchering firm of Robinson & Roper, of Independence, I hereby give notice that I will pay all bills due by said firm and collect all outstanding bills due the same.

AGENT FOR W. R. STRONG & CO.

S. A. DENSMORE, Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SPRINGLAND, Mo., says: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN H. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

CHURNING SONG.

To and fro, to and fro, slowly swings the churn;
To and fro, to and fro, crimson roses burn;
Drowsy scarlet poppies sway
Where the morning breezes play;
To and fro, to and fro, waves the nodding fern;
O'er the clover, far away,
Laden bees and perfumes stray,
Mingled with the catbird's lay;
To and fro, to and fro,
In the sunny glow.

Rocks the cradle to and fro, (while the churn I swing);
In the maple, rocking slow, children of a king;
Monarchs of this castle fair,
Horsehair builded, hung in air;
Golen robins, to and fro, flash on vivid wing;
From the nests the young birds call,
Oak leaf shadows, soft and small,
Like the moment's footsteps fall;
To and fro, to and fro,
Swift they come and go.
—Lillian M. Thompson.

VARIOUS FORMS OF VERTIGO.

Symptoms Which Sometimes Scare Persons Badly—Not Often Dangerous.

Vertigo is from a Latin word that means to turn.

It denotes an ailment characterized by a sudden feeling of dizziness, and at times by actual failing. Sometimes surrounding objects seem to the person attacked to whirl around, or the floor (or ground) to rise up. The fact that vertigo is often one of the earlier symptoms of apoplexy, frequently fills the person with terror, lest that deadly disease may be impending. But in the majority of cases it has no such significance, not even as indicating a tendency.

One form of vertigo, a very persistent form, is due to irritation of certain nerves within the inmost chamber of the ear, the so-called labyrinth. This was what Dean Swift suffered from so long, and, to the physicians of his day, so unaccountably. One of its symptoms is temporary deafness. This distinguishes it from all other forms.

Another form connects itself mainly with the eye. Of this kind is the feeling of giddiness which some people have when, being on a train at rest, another train slowly passing deceives them into the idea that it is their own train which has begun to move. The giddiness occurs at the moment when the false and the true sensations become confused together.

In the case of the near-sighted, the internal muscles of the eye, often being unduly strained in their efforts to converge the eyes sufficiently for the sight of near objects, suddenly give way, when the eyeballs turn out and the letters run into each other. This is accompanied with a feeling of giddiness, eyeache, headache, and sometimes nausea.

A third form connects itself with some slight disorder of the stomach, and occurs most often when the stomach is empty. There is a sudden swimming in the head, objects seem to revolve, and the person totters, and perhaps falls.

A fourth form is purely of nervous origin, and is due to nervous exhaustion. It may be caused by intellectual overstrain, long-continued anxiety, physical excesses, or the immoderate use of tobocco, alcohol, or tea. Elevated positions may bring on an attack. It rarely results in actual falling, but oftener in the feeling of being about to fall.—Youths' Companion.

A FAMOUS DIARY VILLAGE.

Cheese and Butter Industry of Northern Holland—A Glimpse of Brock.

One boatload of excursionists, such as is seen every Sunday on the bay of San Francisco, would drive all Holland from Helder to Rotterdam and from The Hague to Zutphen, to the verge of distraction. The voyagers are of the tranquil sort. If there is any hilarity it is a foreign element. They do not generally exceed twenty or thirty, chiefly inhabitants of the villages that border the canal, or farmers from the houses that appear here and there on the face of the country like islands, and as some of these are surrounded by a dyke, and a ditch with a drawbridge, islands there are indeed capable of being defended like a medieval castle, against all comers. There is probably on the boat a man interested in dairy produce, who tells you in a melancholy tone that cheese has fallen. This is sad, for if there is one thing more than another that the causal traveler is interested in, it is the price of cheese.

Cheese and butter are closely related to the prosperity of the North Holland canal, because several villages along it are engaged in that industry. One of these is Broek, which lies about midway between Amsterdam and Monnikendam, and has for untold ages been famous for its dairies and its neatness. Formerly everybody went to Broek, for fear that if he did not when he got home all his friends would ask him in chorus, "Have you been to Broek?" and he would reluctantly be compelled to answer, "No." Broek lies along its main dyke and scattered over considerable space behind it. It has the usual allowance of small canals, several neat shaded streets, and a church or two, for it has some 1,600 inhabitants who live by butter and cheese alone.

We did not land at Broek, but as we glided along almost under the shade of its trees we made an acquaintance with it that was sufficiently intimate. It turned for our benefit its back doors to the canal, and about them were hanging dairy utensils shining in the adulterated sunlight. It also left its stable doors open, that travelers might gaze therein and remark, though the spotted cows were grazing in the meadows, the porcelain stalls in which they pass the winter and the appliance for attaching their troublesome tails to the spotless ceiling. Travelers have recovered from their commonplace infatuation regarding Broek, and are now contented to study Dutch cleanliness in a generic way in towns less noted for that virtue, and simply as an incident of passage. The fact is, personal neatness is less exceptional in Europe than it was fifty years ago.—Amsterdam Cor. San Francisco Chronicle.

Effects of Electric Light.

The light from an electric light tower in Davenport, Iowa, falls full upon a flower garden about 100 feet away, and during the past summer the owner has absorved that lilies which have usually bloomed only in the day have opened in the night, and that morning glories have unclosed their blossoms as soon as the electric light fell on them.—New York Sun.

STRAIN OF SHORT-HAND WRITING.

Subtleties of Stenography—Nerves Must Be Kept in Excellent Trim.

McElhone, chief of the corps of official reporters of the house of representatives, is a man of a great deal of culture, who has a remarkable library. He probably reads more than any man connected with the house of representatives. Among the curiosities of his library he has a great many rare books upon the profession of short-hand, in which he is so greatly skilled. He received recently from one of the states a request to aid in furnishing them information as to the history of short hand, and he has of late been consulted, with the same object in view, by short-hand societies in Europe. Speaking upon this subject the other day McElhone said: "The short-hand writers of our day are mistaken in thinking that they are the masters of a new art. Short-hand is centuries old. It was an art known in early Roman history. The Catholic councils from a very early time were reported in short-hand. There was a period in the history of England when the art of short-hand writing was a part of the education of every gentleman. Pepys' diary was wholly written in short-hand, and had to be translated before it was published."

I was talking some time ago with another one of the most experienced stenographers at the national capital. He said: Short-hand is an art. Public men, however, seem to think that anybody can write short-hand, and they sometimes say it is mere mechanical work. I have given twenty-five of the best years of my life to this art, and am learning something to this hour. Seldom a day passes that I do not discover something new about the intricacies and subtleties of stenography. There is another thing about short-hand that is not generally understood. A man of bad or irregular habits can not be a permanently successful short-hand writer. Success in this profession depends upon the nerves, and a man with broken nerves will become a poor writer. You will find that the best writers in the two houses of congress are compelled to take long seasons of rest to tone up their nerves, and to recover from the tremendous strain of a session of congress. I have often heard Mr. Murphy and Mr. McElhone, who are at the head of the official corps of stenographers in the senate and house, respectively, say that they need all the rest of the long vacation to recover from the arduous exertions which they are required to put forth during the sessions of congress.

"As for myself, I am affected in short-hand writing by the simplest things. I am obliged to be careful even with my eating in order to keep my nerves in proper condition. I can not eat corn beef and cabbage, for instance, and read my notes with the facility that I like. (This stenographer redictates all of his notes to short-hand amanuenses, who are themselves accomplished writers.) Often, when I have been traveling over the country with investigating committees, when they have accepted invitations to lunches and dinners, I have been compelled to decline the invitations, in order to keep my nerves in good trim for the work of the day. Some of the congressional reporters are so broken down at the end of a long session that they have to take trips to Hot Springs to recuperate. Some of them make it a point not to do any short-hand writing during the vacation, in order that their nerves may secure the proper tone for the winter work. Some have had the idea that the phonograph might ultimately take the place of the short-hand writer, and that every lawyer or public man could have one of these instruments in his office and talk into it, and then send the little strips away to be written out. But the phonograph has not met the expectations of its inventor in that particular. The voices of most people are not strong enough to talk into the phonograph for any considerable period, and that instrument has not the faculty which the stenographer has of giving the proper answers to the direction—"please repeat the last work."—Washington Cor. Inter Ocean.

Fatigue Weakens the Memory.

Fatigue of every form is weakening to the memory. Impressions received when we are tired are not permanently fixed in the mind, and their reproduction is often impossible. Fatigue is the result of an excessive activity of any faculty, continued until its stored-up nutriment is exhausted. After a period of rest, and a return to normal conditions, the memory also returns. A very interesting illustration of the result of fatigue upon memory has been given by Sir Henry Holland. He says: "I descended on the same day two very deep mines in the Hartz mountains, remaining some hours under ground in each. While in the second mine, exhausted by fatigue and inanition, I felt the utter impossibility of talking longer with the German inspector who accompanied me. Every German word and phrase deserted my recollection; and it was not until I had taken food and wine and been at rest for some time that my memory returned."

A fact like this, and many others which might be mentioned, goes to show that there is a close relation between memory and nutrition.—How to Strengthen the Memory.

Oysters That Grow on Trees.

The boat soon reached the mangroves, and, pushing in as far as possible, we found ourselves surrounded by the life of the tropics. As the tide was out, we could reach up from the boat and gather over our heads the oysters which were growing in great clusters on the roots and branches of the trees. The clear water was filled with ashes of strange forms and brilliant colors, and they were perfectly fearless, so that they could be examined without difficulty, as they chased and captured their food among the submerged roots. The bottom was thickly covered with beautiful sea anemones, and everywhere, on the bottom, on the roots and branches of the trees, and on the rocks at the water's edge, we found a wealth of mollusks and crustacea, which soon taught us to regard the mangrove-thickets as rich collecting grounds.—Prof. W. K. Brooks in Popular Science Monthly.

Peculiarity of the Soil.

A peculiarity of Oglethorpe, Ga., is the marked division between the red and gray lands. The line between them can be plainly seen and can be followed its entire length. Even in roads it is so distinct that it can be marked out to the inch.—Chicago Times.

OF GENERAL INTEREST.

—A wealthy New York physician declares it as his belief that "the oyster is the most healthy article of food known to man."

—The Chinese claim to have discovered the art of sneezing and to have practiced it two thousand years before any other nation caught on.

—The Chamberlain (D. T.) *Democrat* says that beets and carrots have grown to such a size in Brule County this year that farmers are compelled to use stump-pullers to pull them from the ground.

—Patsey Collins, while shoveling grain in the top of a big Niagara Falls flouring mill, fell into the hopper, slid for eighty feet through a spout eight by ten inches in size and shot out, with six tons of grain, into a car standing on the track below.—*Buffalo Courier.*

—A young medical student in Sacramento tried the earth-cure on a sick man and came within a shave of having the lamp-post cure tried on him. He hadn't got the patient covered higher than his hips when he gave up the ghost.—*San Francisco Chronicle.*

—The naturalist Karl Plotz died recently in Greifsward at the age of seventy-two. He was perhaps the greatest European authority on butterflies. His works comprise thirty volumes, with more than ten thousand illustrations from his own hand.

—The Women's Christian Temperance Union of Cambridge, Crawford County, Pa., persuaded the store-keepers of the village to stop keeping cigarettes after the exhaustion of the present supply, and then bought up the supply and cremated it.—*Philadelphia Press.*

—The life insurance agent had been talking steadily for only an hour or so, when the victim, perceiving a chance to get a word in edgewise, remarked: "Do you know you remind me of sudden death?" "How so?" "Nobody is safe from either of you."—*Texas Siftings*

—The first Massachusetts ship was built in Medford in 1633, and was of sixty tons burden. This was the beginning of shipbuilding in New England. The same year a water mill was built at Dorchester, and another by Mr. Damner at Roxbury. These were the first water mills in New England. —*Boston Budget.*

—A St. Louis man going through one of the poorly lighted streets felt a rat up his trousers' leg, and pounded the victim successfully with his cane. When he got the animal settled and came to a light, he drew out his fine gold watch, which had slipped down his trousers' leg. It was something worse for the pounding. Poor old Missouri.—*Chicago Inter Ocean.*

—A triple wedding occurred a few days ago at Verdigris Valley, Neb. The three and only children of Mr. and Mrs. Tomce were at high noon united in marriage to their hearts' mates. Over five hundred guests were present. The grooms and their best men wore badges and bouquets of orange blossoms and the brides and their attendants wreaths of orange blossoms.

—Thomas Caldwell, of West Troy, N. Y., recently traded horses with George Brewer, of Smokey Tavern, and shortly after the trade discovered that the animal he had traded for was balky and wind-broken. He then traded with the father of Brewer for a three-year-old colt, which he also discovered was of no use. Then he borrowed a rig from a farmer and went home disgusted.—*Troy Times.*

—The use of morphia by physicians to suspend pain which they can not cure is said to have become an abuse. A Pittsburgh man has been found to have one thousand and forty hypodermic injection punctures in his body. Many are said to take the injections for the soothing effect when nothing in particular ails them, and thus fall into a habit worse than drinking, which is the natural consequence.—*Pittsburgh Chronicle.*

—Some one in Hudson, N. Y., has written to the Toronto *Globe* as follows: "As I am a very rich man and can easily afford it, I have decided to give the whole of North America to my wife, believing from my knowledge of a woman's nature that she will govern you all wisely and well. As I am the legal husband of every woman in the world, this includes every woman on the Continent.—Ezra, King of England, North America, the World and the Church."

—While the orchestra was playing the prayer from "Rienzi" in the Louisville Music Hall the other day a vigorous baby struck in with a lung solo right in one of the most delicate passages. Conductor Damrosch stopped the orchestra and sat down. When the little one had been quieted he remarked that while it was a good thing to give children a musical education, there was such a thing as beginning too early in life. Then he resumed his baton and the prayer was resumed.

LUCK OF A PORTUGUESE FROM FAYAL.

NEW BEDFORD, Nov. 15 (*Special*)—A Portuguese from Fayal bought a ticket of The Louisiana State Lottery, and after carrying it in his pocket for fourteen months, gave it to a fellow countryman who has been in America only a few weeks. The latter investigated, and found that the ticket had drawn $15,000. The money arrived in this city to-day, and the Portuguese will sail in a few days for Fayal.—*New York Tribune's Special, Nov. 16th.*

A young man from Fayal, who has been in San Francisco five weeks, has drawn $15,000 in a lottery, and will go home in the barkentine "Moses B. Tower," to sail this week. The ticket has been purchased for $1.10, and held fifteen months by a Portuguese in California, who got tired of it and presented it to the fortunate man. The money has arrived in this city, and Messrs. Loum Snow & Son, agents of the barkentine, have deposited it in a bank for safety. The owner of it takes it very coolly, and does not wish to have his name printed. —*New Bedford (Mass.) Standard, Nov. 16.*

An exchange asks how it would do to stop the pay of salaried Master Workmen during strikes ordered by them.

Mr. Ed. P. Wells, Thetis P. O. Stevens Co., Wash. Terr., was entirely cured of rheumatism by the use of St. Jacobs Oil. He says: "I consider it a wonderful remedy and will always speak a good word for it."

The resurrected winter overcoat has made its appearance and the air is permeated with the pungent aroma of camphor.

Architect Edmund Legendre, 419 Sutter street, San Francisco, Cal., states that having suffered for a long time with a severe cough, and falling to obtain any relief from doctors and the numerous preparations he took, he became alarmed. Tried Red Star Cough Cure, and one bottle entirely cured him.

READY FOR EMERGENCY.

A realizing sense of danger always characterizes a wise and courageous man. Whether the danger is present, as on the battle-field, or prospective, as when one is threatened with a deadly malady, a judgment as to the proper course to be pursued is always formed. Here is an instance of the latter kind of acumen: "I have just caught a severe cold, writes *Robert Armstrong*, of *O'Bannon, Kentucky*, to Drs. Starkey & Palen, 1529 Arch street, Philadelphia, Pa., "and send check for another supply of your Compound Oxygen. My *asthmatic trouble has disappeared*, and I have nothing of it, as heretofore, when I take cold. I eat and sleep well. *I am, in fact, a new man*, and attribute my health to the use of Compound Oxygen." The efficacy of this treatment in cases of Consumption, Bronchitis, Asthma and Neuralgia passes all belief. Write for a free pamphlet on the subject and study up the theory of cure for yourself.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

Old Party—If I had 50 cents and gave it to you to get changed in order to give you a penny, what would be left? Street Arab—An old man!

A VALUABLE MEDICAL TREATISE.

The edition for 1887 of the sterling Medical Annual, known as Hostetter's Almanac, is now ready, and may be obtained, free of cost, of druggists and general country dealers in all parts of the United States, Mexico, and indeed in every civilized portion of the Western Hemisphere. This Almanac has been issued regularly at the commencement of every year for over one-fifth of a century. It combines, with the soundest practical advice for the preservation and restoration of health, a large amount of interesting and amusing light reading, and the calendar, astronomical calculations, chronological items, etc., are prepared with great care, and will be found entirely accurate. The issue of Hostetter's Almanac for 1887 will probably be the largest edition of a medical work ever published in any country. The proprietors, Messrs. Hostetter & Co., Pittsburgh, Pa., on receipt of a two-cent stamp, will forward a copy by mail to any person who cannot procure one in his neighborhood.

"Pa, do 'pro' and 'con' mean opposite things?" "Yes, son." "Is that the reason why they speak of 'progress' and 'congress?'" "N-n-n—yes, son."

"DON'T PAY A BIG FEE!"

65 Cents pays for a year's subscription to the Weekly *American Rural Home*, Rochester, N. Y., without premium—"the cheapest and Best Weekly in the World," 8 pages, 48 columns, 16 years old. Without Premium, **65c.** a year! Rochester, N. Y.

"Mamma," asked little Carrie one day, "can you tell me what part of Heaven people live in who are good but not agreeable?"

A Sore Throat, Cough, or Cold, if suffered to progress, results in serious pulmonary affections, oftentimes incurable. "*Brown's Bronchial Troches*" reach directly the seat of the disease and give instant relief.

The standard medicine, Irish May Flower.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

The Wholesale Druggists of San Francisco will supply the trade with Irish May Flower.

WHY WILL YOU DIE?

SCOVILL'S SARSAPARILLA, OR BLOOD AND LIVER SYRUP for the cure of Scrofulous Taint, Rheumatism, White Swelling, Gout, Goitre, Consumption, Bronchitis, Nervous Debility, Malaria, and all diseases arising from an impure condition of the bood. Certificates can be presented from many leading physicians, ministers, and heads of families throughout the land, endorsing SCOVILL'S BLOOD AND LIVER SYRUP. We are constantly in receipt of certificates of cures from the most reliable sources, and we recommend it as the best known remedy for the cure of the above diseases.

Ready Remedy, Irish May Flower, 75 cts.

An Ithaca, N. Y., juryman wrote his verdict thus: "My verdick is no kos of ackshun."

AN IMPORTANT ARREST.

The arrest of a suspicious character upon his general appearance, movements or companionship, without waiting until he has robbed a traveler, fired a house, or murdered a fellow-man, is an important function of a shrewd detective. Even more important is the arrest of a disease which, if not checked, will blight and destroy a human life. The frequent cough, loss of appetite, general languor or debility, pallid skin, and bodily aches and pains, announce the approach of pulmonary consumption, which is promptly arrested and permanently cured by Dr. Pierce's "Golden Medical Discovery." Sold by druggists.

Mr. Tack has been elected Vice President of the Belgian Chamber of Deputies. His rulings ought to be pointed.

"I owe my Restoration to Health and Beauty to the CUTICURA REMEDIES"

DISFIGURING Humors, Humiliating Eruptions, Itching Tortures, Eczema, Psoriasis, Scrofula and Infantile Humors cured by the CUTICURA REMEDIES.

Some merchants give short weight to customers because they have long waits for their bills.

"I DON'T WANT RELIEF, BUT CURE,"

is the exclamation of thousands suffering from catarrh. To all such we say: Catarrh can be cured by Dr. Sage's Catarrh Remedy. It has been done in thousands of cases; why not in yours? Your danger is in delay. Enclose a stamp to World's Dispensary Medical Association, Buffalo, N. Y., for pamphlet on this disease.

An old school doctrine—that the teacher is a tyrant.

GET RID OF THAT BAD TASTE.

When you wake up in the morning with a bad taste in your mouth, with your throat and tongue dry and a yellow coating on your teeth and gums, don't imagine it was all caused by what you ate the night before. Of course everybody does that and everybody "swears off" from again eating such food. The trouble is that your liver is clogged, your kidneys are overworked and your bowels are not doing their duty. Take from three to ten of BRANDRETH'S PILLS and note the sudden and wonderful change in your system.

Hurrah Democrats! Hurrah Republicans! now is your time to get a trial bottle of Irish May Flower at all Druggists for 75 cts.

"Seal of North Carolina" Plug cut is the Boss smoking Tobacco. It is kept by every first-class dealer in town.

Fifty years standing; Irish May Flower.

If there is any one thing which stands in the way of the moral advancement of the colored race, it is the humblest barnyard chicken.

Weak lungs, spitting of blood, consumption and kindred affections, cured without physician. Address for treatise, with 10 cents in stamps, World's Dispensary Medical Association, 663 Main street, Buffalo, N. Y.

An exchange says "kind words are never lost." But your wife sometimes mislays them until she wants another new bonnet.

At the front, Irish May Flower, 75 cents.

SHOE and hardware dealers sell Lyon's Heel Stiffeners; they keep boots and shoes straight.

Solve the puzzle and win the prize. Address "Family Talk," 624 Montgomery St., San Francisco, for particulars.

Ladies delight, Irish May Flower, 75 cents.

Try Germea for Breakfast

Irish May Flower, "King of all," 75 cts.

Mother Wanted to See Him.

Young husband (to wife)—Didn't I telegraph you not to bring your mother with you?

Young wife—I know. That's what she wants to see you about. She read the telegram.—Texas Siftings.

The Lime Kiln Club.

"Am Pardon Johnson in de hall this eavenin'," asked the president, as he turned his gaze toward the stove, behind which Pardon is sure to be seated if the thermometer marks less than eighty degrees above.

"Yes, sah."

"Den please step dis way until I spoke a few words wid you. Pardon, I understand dat you am studyin' to be a doctah."

"Yes, sah."

"Dat's good news, an' Ize personally glad ca't. Dey am sartin things about the doctah business which you should allus keep in view. In de fust place, look dignified an' act wise. Many a man who doan' know 'nuff to come in when it rains has kept de fact from de public by lookin' as if he knew all dat had happened in dis world eber since de fust sun rose an' sot."

"Yes, sah."

"If you am called in a case an' you find you doan know wheder de pusson has got smallpox or de measles, doan gin yerself away too quickly. Gin de case a few days to develop, an' it will turn out to be one or the odder. After it turns out you want to remark dat you war' suah of it fum de fust."

"I understands."

"Neber gin up a case. De doctah who admits dat he can't do a pashient any good loses prestige; de doctah who hangs by till de patient goes under ground kin say dat nobody could hev saved him."

"I was intendin' to say dat, sah."

"Keep your prescriptions an awful secret, Pardon. If you should tell a sick man dat you had given him a Dover's powder or some Peruvian bark he would neber get well. Your only safety am in deceivin' your pashients. If de medicine works all right dey will git well and praise your skill; if it works de odder way de undertaker an' sexton will hide he fack under ground."

"Dat's what I'm calkerlatin' on."

"An', lastly, Pardon, enter into partnership wid some druggist as soon as you make your start. People who am foolish 'nuff to fall sick mus' expect to pay well fur deir medicines. De hundred per cent. profit which de druggist calkerlates on kin jist as well be made a hundred an' forty, an' de extra goes to you. An' some more lastly, doan' hev nuffin' to do wid patent medicines. If a pashient of yours has a bruise doan' permit him to buy his salve or liniment off de shelf. You kin git $2 for writin' him out a prescripshun fur de werry same thing."

"I learned dat de werry first week, sah."

"Exactly. Ize glad to see you hev tumbled to all de little rackets, an' on behalf of dis club I bid you good speed."—Detroit Free Press.

A Nice, Quiet Trip.

"The queerest wedding trip I ever heard of," said the station master at the west side depot, "took place one day last week. The couple were from a little corn and hog station down on the Burlington, and they came up on one of the morning trains. They went into the waiting room up stairs and remained there the whole day. At noon they brought out a bit of lunch and ate it together. Only once or twice did the groom venture beyond the station walls, and the cries of the hackmen quickly frightened him back. The bride had a great curiosity to go over closer to the river, so she could see the shipping, but the groom was afraid to leave the station for fear of getting lost. Notwithstanding the seeming monotony of the day they were as happy as clams all day long sitting a-hold of each other's hands. When evening came they took the night train for home, where they were doubtless received as a hero and heroine after their adventures while taking in the wonders of Chicago."—Chicago Herald.

Faultless but Soulless.

A correspondent asks Bill Nye what he thinks of his composition, specimens of which he sends him, and the humorist answers: "In the first place, your style of composition is like the present style of dress among men. It is absolutely correct, and, therefore, it is absolutely like that of nine men out of every ten we meet. Your style of writing has a mustache on it, wears a three-button cutaway of some Scotch mixture, carries a cane and wears a straight, stand-up collar and scarf. It is so correct and so exactly in conformity with the prevailing style of composition, and your thoughts are expressed so thoroughly like other people's methods of dressing up their sentences and sand papering the soul out of what they say, that I honestly think you would succeed better by trying to subsist upon the quick sales and small profits which the drug trade insures."

Pigs' Feet are "Crubeens" in Ireland.

Mrs. Whitkins determined to get a green girl, just from the ship, and bring her up by hand, so that she would do things exactly to suit her. This is one of her experiences of the first day.

She took Bridget to the window and, pointing out the butcher's shop opposite, said: "Now, Bridget, go over there and see if the butcher has got pigs' feet."

Bridget stayed a long time and then came back with this information: "Shure, ma'am, I cuddent see the shape av his fate; he kept behind the counter all the time."—Exchange.

Their Special Use.

"Yes, Bobby," said the minister, who was dining with the family, "everything in this world has its use, although we may not know what it is. Now, there is the fly, for instance. You wouldn't think that flies were good for anything, yet——"

"Oh, yes, I would," interrupted Bobby. "I know what flies are good for."

"What, Bobby?"

"Pa says that they are the only thing what keeps him awake when you are preaching."—Texas Siftings.

Preferred Coffee Beans to Cloves.

"I must always keep plenty of coffee in the house," said Clara on the eve of her marriage to her mother. "I know Charley is very fond of it, for when he takes me to the theatre and goes out between the acts I smell it on his breath."—New York Sun.

ARMY PANICS.

Some of the Most Remarkable Incidents of This Kind on Record.

Napier, in his "Peninsular War," devotes but some eight or nine lines to an account of the most remarkable recorded incident of this nature, in which Robert Crauford's celebrated Light Division—consisting of those three distinguished regiments, the Fifty-third, the Fifty-second and the Ninety-fifth—were seized and put to flight by an attack of fear so sudden and causeless that the historian makes no attempt whatever to ascribe a reason for it. "The Light Division," he writes, "encamped in a pine wood, where happened one of those extraordinary panics attributed in ancient times to the influence of a god. No enemy was near, no alarm given, when suddenly the troops, as if seized with a frenzy, started from sleep and disappeared in every direction; nor was there any possibility of allaying this strange terror; until some persons called out that the enemy's cavalry were among them, when the soldiers mechanically ran together, and the illusion was dissipated." It seems odd that so diffuse a writer should have seen fit to say so little of so extraordinary an occurrence, more especially when we remember that this same Light Division was the flower of the British army in the Peninsula, and that he writes of it not many pages before as "composed of three regiments singularly fitted for difficult service. Long and carefully disciplined by Sir John Moore, they came to the field with such a knowledge of arms that six years of warfare could not detect a flaw in their system, nor were they ever overmatched in courage and skill."

In South Africa the disaster of Isandlhwana gave the soldiers' nerves a severe shaking, and it often happened that false alarms at night led to the rousing of whole camps, and sometimes even to a reckless discharge of firearms. In some cases friendly natives or even comrades were taken by the the excited imagination of a sentry for enemies; in others, unoffending cattle, even a bush or a shrub, became the innocent cause of a fusillade sufficient to have dealt widespread destruction to a host of Zulus.

An odd incident, illustrative of the slightness of the cause—or even, perhaps, of the absence of any cause at all—that gives rise to a panic, occurred on the night of Tel-el-Kebir, amidst a small corner of the force that was bivouacking on the battlefield. The narrator had crawled into a marquee, in which, with other commissariat stores, were the rum casks from which the troops had received their liquor ration after the fatigues and excitement of the day's fight and the previous night-march. Besides one or two commissariat issuers in charge of the stores, several "odds and ends" of other corps had found their way into the marquee, preferring to rest under its shelter, amid the casks and biscuit-boxes, than udder the open sky with the sand for a bed. Suddenly, in the middle of the night, when all were sleeping, a noise and commotion began in the bivouac outside. Before the inhabitants of the tent were sufficiently awake to understand its cause, the curtains were thrust aside by a red-coated soldier, who shouted to us to get up: "The Arabs are in the camp—they are upon us!" Then he disappeared as rapidly as he had come. Every one sprang to his arms, and probably experienced that especially uncomfortable sensation that is caused by a vague feeling of an unseen, though imminent, danger against which one is ignorant how to guard. Outside every one around was aroused and up, eagerly striving to discover from what quarter attack was to be expected. Nothing, however, more unpleasant occurred than the advent of a staff-officer asking the cause of the confusion. Probably the truth never did reach headquarters. Afterward, however, a report gained ground—no other or better reason was ever forthcoming—that the alarm arose from the screams of a sleeping soldier, who, overwrought, perhaps, by the horrors of the day, had been fighting his battle over again in his dreams!—*Chambers' Journal*

HOW TO READ.

Advisability of Writing a Short Abstract After the Perusal of a Work.

Nobody can be sure that he has got clear ideas on a subject unless he has tried to put them down on a piece of paper in independent words of his own. It is an excellent plan, too, when you have read a good book, to sit down and write a short abstract of what you can remember of it. It is still a better plan, if you can make up your mind to a slight extra labor, to do what Lord Stafford and Gibbon and Daniel Webster did. After glancing over the title, subject or design of a book, these eminent men would take a pen and write roughly what questions they expected to find answered in it, what difficulties solved, what kind of information imparted. Such practices keep us from reading with the eye only, gliding vaguely over the page, and they help us to place our new acquisitions in relation to what we knew before. It is almost always worth while to read a thing twice over, to make sure that nothing has been missed or dropped on the way, or wrongly conceived or interpreted. And if the subject be serious, it is often well to let an interval elapse. Ideas, relations, statements of fact are not to be taken by storm. We have to steep them in the mind, in the hope of thus extracting their inmost essence and significance. If one lets an interval pass, and then returns, it is surprising how clear and ripe that has become which, when we left it, seemed crude, obscure and full of perplexity.

All this takes trouble, no doubt; but, then, it will not do to deal with ideas that we find in books or elsewhere, as a certain bird does with its eggs—leaves them in the sand for the sun to hatch and chance to rear. People who follow this plan possess nothing better than ideas half hatched and convictions reared by accident. They are like a man who should pace up and down the world in the delusion that he is clad in sumptuous robes of purple and velvet, when, in truth, he is only half covered by the rags and tatters of other people's cast-off clothes.—*John Morley.*

PERSONAL AND IMPERSONAL.

—Moses Iverson, aged eighty-five years, and Miss Aggie Rux, aged eighty years, both colored, were married a few days ago in Stewart County, Georgia.

—Amos Ferguson, an eccentric old man known as the "Bard of Chautauqua," is dead. He lived near Jamestown, N. Y., and translated the Bible into verse.

—Miss Sedoher Rhodes and Miss Cora Smith, two beautiful and accomplished young ladies of Grand Forks, D. T., are said to be the best lady shots in the Territory.

—Dwight L. Moody, the evangelist, says his name has no handle to it, either clerical or professional. He is simply Mr. Moody, and he shrinks from the interviewer.—*Chicago Mail.*

—Solomon Bernstein, a boy fourteen years old, who landed at Castle Garden the other day from the steamship Rugia, has three hands and only one perfect leg. The other terminates at the knee in an eight-fingered hand.—*N. Y. Mail.*

—James Bell, the yachtsman who has fired the brass Long Tom in challenge to all America for a race in 1887, is a rich shipbuilder of Glasgow, Scotland. His wife is a sailor, too, and their three young children even are "old salts."

—The first check Jay Gould ever received was for seven dollars, and he gave a man fifty cents to tell him what to do to get it cashed. Since that occasion he has had the nerve to enter a bank all alone and present his paper to the paying teller.—*Detroit Free Press.*

—It is said of Hon. Hannibal Hamlin that if he meets a man of his own age he can tell him by name, tell who his father was, whom he married and where his children are, while if the acquaintance be a man a generation younger than himself he not only knows his ancestor and whom he married, but also whom he wanted to marry and didn't.—*Lewiston (Me.) Journal.*

—Emeline Jones, a coal-black woman of gigantic proportions, was the cook who engineered the dinners for which the late Carlton Club of New York was famous. She learned the art by which she thrived on the Eastern shore of Maryland; and she could cook a canvas-back duck in such a manner that a Senator who had one taste of it would have promised his vote upon any bill rather than not get a second mouthful.—*N. Y. Herald.*

—A fifteen-year-old girl visited Bracebridge, Can., recently, and distinguished herself in various ways. She visited the public school, and had the courtesy of the teaching fraternity extended to her on the ground that she taught a private school at her home in Midland. She hired livery rigs and ordered goods which she never called for with great industry, and generally exhibited such remarkable enterprise that it was thought well that a constable and magistrate should wait upon her and advise her to return home, which advice she judiciously accepted.—*Toronto Mail.*

"A LITTLE NONSENSE."

—The Boston *Traveler* attempts to be funny as follows: "What might be considered the shortest way to spell dog?—K9."

—Marketman—Why did you return that pair of fowls yesterday? Customer—Because I thought you had better send them to a home for aged couples.—*Boston Transcript.*

—"Mr. Hardup, it's a pity you couldn't follow the earth's example," said Cashby to an impecunious friend. "How do you mean?" "Why, settle once in a while."—*Merchant Traveler.*

—"Have you 'Blasted Hopes?'" asked a young lady of a librarian with a handkerchief tied over his jaws. "No, ma'am," said he, "it's only a blasted toothache."—*Carl Pretzel's Weekly.*

—Young Blinks takes his country cousin, who is in the city on a visit, to see a base ball match. Ball hits c. c. in the eye. "Gosh all fish-hooks. What hit me?" Blinks—That's a fowl. Country Cousin—A fowl? I thought it was a mule.—*Prairie Farmer.*

—At the last meeting of the Brotherhood of Unmitigated Liars, Bill Bledso stated that he was the most inveterate liar in Heppner. He told the truth, thereby violating one of the rules of the society, for which he was fined sixteen dollars, to be applied to the Ananias monument fund.—*Exchange.*

—"I hope there are no cannibals around here," said a stupid traveler to a United States frontier girl as she was mixing a batch of bread. "There are plenty of 'em," returned she, pouring some cornmeal into the pan. "We most always eat a little Indian with our bread."—*Leeds (Eng.) Mercury.*

—At a recent revival meeting down in Virginia an old farmer arose to his feet and paralyzed the congregation with the following preface to his "experience:" "Dear friends, I am glad to have this opportunity to mingle together and to spend these happy hours where I couldn't if I wasn't."—*Washington Critic.*

—"Funny, wasn't it, about that Missouri bank which went into liquidation the other day having fifteen thousand dollars more assets than liabilities?" "I prefer to wait for particulars," replied the other. "What particulas?" "I think the President was either too honest to speculate or too lame to skip. The machinery slipped a cog somewhere."—*Wall Street News.*

—A Hartford gentleman who is quite a man to carry on in his family and "run" the other members, was in his usual mood at the tea table, the other evening. "I declare, if these aren't the worst biscuit I ever saw. If I couldn't make better ones, wife, I believe I'd sell out housekeeping altogether." "Very well," said the wife, "any time you think you can do better, let me know and I'll clear out." Up spoke the enfant terrible of the family. "Then papa'll have to get a step wife, won't you?" It is safe to say there will be no "step wife" in that family.—*Hartford Post.*

RIEL'S GRAVE.

The Neglected Resting-Place of the Half-Breed Leader in the Northwest Territory.

No visit to this interesting region is complete without crossing over Red river from Winnipeg to the suburb of St. Boniface, the home of Archbishop Tache. There are two men of Winnipeg who, by their personal merits and a long course of wise actions for the benefit of this region, have become pre-eminent in their influence over the people of the Canadian Northwest. Sir Donald A. Smith, whose Winnipeg home is at Silver Heights, on the banks of the Assiniboine, was for many years the head of the Hudson's Bay Company in this country and his influence over the people in the wide domain extending from the boundary to the Arctic circle and from the great lakes westward to the Rocky Mountains has been very marked. Archbishop Tache, whose province extends over the same wide territory, is the revered spiritual adviser of the French and Indians, and also a sage counselor for the whole country. These two men for a long period have been a reliance of the Government in dealing with these remote peoples, and they were mainly instrumental in settling the original troubles in Manitoba which resulted in its being made a Canadian province. Riel very properly objected to some suggested modes of settlement, because, as he said, the people of this region desired to be equal to and not subordinate to Canada; they did not wish "to be the colony of a colony." Crossing over the substantial bridge spanning the Red river between Winnipeg and St. Boniface, the attractive cathedral is in full view. The river sweeps grandly around from the west to the north, and on the edge of the outer bank is a road. A plain white fence borders this road, with foliage behind it, from among which stands up the cathedral of St. Boniface, with its tall, shining, tin-covered spire, a reproduction of those seen on the lower St. Lawrence. Above this is the large, square academy building, which is a school of the Sisterhood of Gray Nuns from Montreal, and adjoining it is their convent. Below the church, embosomed in trees, stands the modest residence of the Archbishop, a low, square-roofed house, yet comfortable in its appointments. St. Boniface College is behind. The buildings are constructed of the cream-colored stone found near by and which is used so extensively in Winnipeg. The church is of modern build, erected in 1860, to succeed the original church then burnt. It has a famous chime of bells, first sent out from London to the old church, destroyed when the church was burnt, the fragments collected and sent back to London for recasting, again sent out, and, after meeting various mishaps, finally safely brought overland by ox teams from St. Paul, on the Mississippi river. They are known here as "the traveling bells of St. Boniface." But the most interesting part of the place is the grave of Riel in the church yard. It is a flat grave inclosed by a plain wooden fence, with a cross, also of wood, stuck in the ground and bearing the words "Louis David Riel," without mark. His widow, who recently died, is interred alongside without any mark, and, in fact, the graves show no evidence of any care being taken of them. The death of Riel by the extreme penalty of the law, while still a cause of great irritation among the French of Lower Canada, has probably ended all prospect of French half-breed domination in any part of the Northwest, where the English rule, mainly through the instrumentality of the Canadian Pacific railway, has now established its supreme authority.—*Winnipeg Cor. London Times.*

FOR THEATER GOERS.

How to Act in Order to Be Known as a Veteran Patron of Art.

The latest rules adopted by theatergoers by mutual agreement are as follows:

Always go late.

Saunter slowly down the aisle.

Make as much noise as possible taking seat.

Raise your hand and beckon to usher for programme.

When you get it attract attention by the way it is flourished before looking at it.

At first be inclined to sneer and jeer at the play, and whisper "chestnut" or cocoanut in an audible voice.

When the curtain goes down on the first act and great applause follows, get up and go out, apparently disgusted.

Return in the middle of the second act, and smile when all those who have to get up to let you pass grumble.

Ask some one if you have lost any thing by not seeing the first part of the second act, and if so, what was it in detail.

At the end of the second act yell bravo! and make a demonstration of applause that will deafen everybody around you, and bring the actors before the curtain.

Don't go out between the second and third acts, but remain and bore everybody in hearing by making a gushing criticism of the fine points made by the actors who won your hearty approbation.

Work your opera glass to its fullest capacity during the third act and applaud vigorously every fine point made by your favorite actor, even if it mars a pathetic scene.

Go out between the third and fourth acts with a great deal of bustle and assurance, and come in after the curtain has gone up, with the unmistakable smell of liquid refreshment upon you, and a hilarious disposition to be prodigal with applause.

Be sure and leave before the last act is over, just as the hero is dying and speaking in a low tremolo voice, and don't forget to snap your opera glasses in casing them, and stumble over the knees of those who ignorantly desire to see the curtain go down.—*N. Y. Mail and Express.*

—The old turnpike still in use between Lancaster and Harrisburg, Pa., was laid out in 1734, about one hundred and fifty-two years ago.

A RECEIPT FOR COLD FEIPT.

For nothing at all we will give a receipt
For pleasantly warming in winter your feipt.

First see that the shoes or the boots you may wear
Are polished each morning with scrupulous cear.

This reason is founded on science, you know,
And will, if it's followed, relieve you of wow.

Don't purchase a tight-fitting boot or a shoe
But get a size larger, or, better, get toe.

Be sure they are stout ones and perfectly whole,
Made low in the heel, thick, broad in the wsole.

Then oiling them, go without rubbers, which sweat
And make your feet tender to coldness and weat.

Some folks woolen stockings prefer, but they should
Wear socks made of cotton, as those are more good.

For feet, like your face which in winter is bare,
Grow tough when exposed to the frost in the are.

No chilblains will itch you or give you an ache
If, when it is bed time, iced water you'll tache,

And plunge your feet in it—then rub 'em with might
Until they grow scarlet and—probably wight.

Now toast 'em awhile by the grate, and, I guess
You'll find this receipt for cold feipt a success.

N. B.

Some husbands, who think they're as sharp as a knife,
Will warm their cold feet on a poor, sleepy kwife.
That's cold blooded murder for which women wise
Can get a divorce from such marital tise.

—H. C. Dodge in Detroit Free Press.

A WOMAN RECEIVING A LETTER.

She took the letter in her hand,
The envelope she keenly scanned;
The address several times she read.
"I wonder who it's from," she said;
"I know the writing very well,
But whose it is I cannot tell."
With curiosity she burned,
And straightway to the postmark turned.
"The postmark! that will end the doubt."
'Twas blurred; she could not make it out.
A dark cloud o'er her visage stole,
And keenest anguish wrung her soul.
The address she again perused:
"Who can have written it?" she mused.
She could not with the problem cope,
And so she broke the envelope.
Her last resource, she had no better—
And then she knew who wrote the letter.

—Boston Courier.

No Sandpaper There.

Detective John Webb was passing the Bates street end of the vegetable market three or four days ago, when a stranger accosted him with:

"Say, I came in town the other day to git my boots fixed, and I was looking around this place a little and lost a silver dollar out of a hole in my pocket."

"But you didn't come back to look for it, did you?"

"Yes I did. I think I lost it right over there, where I dodged a wagon. Have you heard of any one picking up a dollar?"

"No, sir."

"Seen any advertisement in the papers?"

"No. You'd better save your time."

"Why?"

"Why, man, you aren't green enough to expect to get that dollar back, are you?"

"Of course I am. Wasn't it mine? Didn't I lose it?"

"Well! Well! Some one ought to sandpaper your head!"

"They had, eh?" queried the man, as he searched around in the street. "I lost it just about here, while I was jumping out of the way of a wagon. If anybody tries to rub any sandpaper on my head I'll!"——

He made a dive into the dirt and fished up a silver dollar, and as he hold it between his thumb and finger and danced around he cried:

"Here she is—this is the very one! I know it by the nick I cut on the edge. Ought to have my head sandpapered, had I? Well, you just bet I know my gait, and I'm $1 ahead! It's lucky for me, though, that you didn't find it. You look just like a man who'd have chucked it into his pocket and let me go to ruin. Sandpaper! How would you like to bite a file?"

And the abashed detective couldn't say a word in his own defense.—Detroit Free Press.

Peculiarities of Cities.

A Chicago young lady was gazing at the Bartholdi statue. "Grand!" she exclaimed; "superb! lovely! too sweet! but, George," she said, turning to her escort, "how very small the feet seem."—New York Sun.

ONE FOR ST. LOUIS.

Landlord of hotel—I see we have a newly married couple here—Mr. Hiram Deeper and bride—but the register doesn't say where they are from. Clerk—I heard him ask her at breakfast this morning: "Would you like some of them molasses, Susie?" Landlord takes pen and writes "St. Louis" on register opposite their names.—Chicago Tribune.

Wanted Quinine.

"Give me about a dollar-'n-a-half's worth of quinine," said a sad-looking young man to the druggist. "Why, what do you want so much for?" "Well, you see, I've been around to see my girl, and I've just got the worst case of shake I ever heard of. Make that an even $2 worth, will you?"—Arkansaw Traveler.

Diogenes Again.

Brother Jonathan—I say, old man, if you are in dead earnest about finding an honest man, and care to be guided by my experience, let me inform you you're on the wrong track.—Life.

Brevities.

Kate Field asks: How many women marry a good man? One at a time, Kate, except in Utah.—New Haven News.

Another peaceful Indian has been discovered in Montana. He has been petrified for over 1,000 years.—New York Graphic.

"Some men are born great." Yes, but gracious! how some of them do shrink.—New Haven News.

The rear support of the street car is called the dasher because so many people dash after it.—Philadelphia Herald.

Gentleman in restaurant at table, with a broken soft boiled egg before him—Waiter, how long do you keep your eggs? "Until they are eaten."—Paris Joke.

The poets are apostrophizing Bartholdi's statue. Liberty! what rhymes are committed in thy name.—Life.

It is said that the kingdom of Bavaria has 4,500 hook and ladder companies, and 250,000 firemen. It seems hardly credible, but the Bavarians are inordinate smokers, and maybe the authorities thought that where there was so much smoke there was sure to be some fire.—Harper's Weekly.

AVOID LAW-SUITS.

Litigation an Expensive Method of Settling Business Difficulties.

Seldom is either party to a great lawsuit satisfied with the result. Even to the one who obtains a favorable verdict, the long list of expenses, vexatious delays and uncertainties more than offsets the fruits of victory. Few men would appeal to the law in the settlement of business disputes could they realize the possible delays of the law, the exorbitant charges of attorneys and other expenses incidental to the successful prosecution of a suit.

Again, if the merchant or manufacturer would, before commencing a suit, pay a visit to the court-house and casually examine the men of whom the juries are composed, he would hesitate to submit his grievances to such a tribunal for adjustment. In every large city there are hundreds of political strikers, hangers-on, men without legitimate employment, whose names are placed on jury lists, who have few or no qualifications for the place. The jury system, as conducted in our cities, is a failure in the consideration and settlement of complicated business matters or in the solution of difficult mechanical problems, such as frequently arise in the trial of certain cases.

With the average jury, the true merits of a case do not always control the verdict. Prejudice, a popular lawyer, an accident, a confused witness, the appearance or occupation of the parties to the suit, politics, religion, are all incidental factors in shaping a verdict in the minds of ignorant, untrained, weak-minded jurymen. Justice and equity do not always prevail in the appeal to twelve men.

Business law-suits are too frequently born of heated passion, misunderstanding, ignorance of all the facts of the law governing the case, false pride in maintaining an opinion of a threat, an overbearing disposition, or perhaps a disinclination to look calmly at both sides of a question. There are cases in the lives of many men when a law-suit can not be avoided, but they are few.

Fifty per cent. of all disputes could better be settled by reference to experts or those versed in matters similar to those in dispute. Many a suit would be dropped were the plaintiff able to count the cost at the commencement. Many a suit would be avoided were the parties in interest willing to weigh calmly both sides of the question, and to do unto their fellow men as they would be done by.

Think of a business man, whose time is almost invaluable to him in his regular round of duties, hanging around a court-house day after day, awaiting the coming up of his case, witnesses under pay, costs accumulating, patience being exhausted, and all perhaps to settle the point whether his neighbor owes him fifty dollars more or less.

An appeal to the courts of law is akin to buying a lottery ticket, though the result is not known so speedily. The victim's sufferings are longer drawn out, his money is taken in smaller but more frequent installments. A suit at law destroys a man's equilibrium, makes him nervous, irritable, ugly, prevents him from giving the needed thought and attention to his legitimate business, and generally ends in loss and disappointment. The lawsuit is seldom worth its cost, even to the one who obtains the verdict. Avoid it whenever possible to do so without prejudice to your property or character.—*Manufacturer's Gazette.*

FALLING IN LOVE.

The Surest Guide for the Ultimate Happiness of Races and Individuals.

Short men as a rule prefer tall women, while tall men admire little women. Dark pairs by preference with fair; the commonplace often runs after the original. People have long noticed that this attraction towards one's opposite tends to keep true the standard of the race; they have not, perhaps, so generally observed that it also indicates roughly the existence in either individual of a desire for its own natural complement. It is difficult here to give definite examples, but everybody knows how, in the subtle psychology of falling in love, there are involved innumerable minor elements, physical and mental, which strike us exactly because of their absolute adaptation to form with ourselves an adequate union. Of course, we do not definitely seek out and discover such qualities; instinct works far more intuitively than that; but we find at last, by subsequent observation, how true and how trustworthy were its immediate indications. That is to say, those men do so who were wise enough or fortunate enough to follow the earliest promptings of their own hearts, and not to be ashamed of that divinest and deepest of human institutions, love at first sight.

I do not doubt that, as the world goes on, a deeper sense of moral responsibility in the matter of marriage will grow up among us. But it will not take the false direction of ignoring these, our profoundest and holiest instincts. Marriage for money may go; marriage for rank may go; marriage for position may go; but marriage for love, I believe and trust will last forever. Men in the future will probably feel that a union with their cousins or near relations is positively wicked; that a union with those too like them in person or disposition is at least undesirable; that a union based upon considerations of wealth or any other consideration save considerations of immediate natural impulse, is base and disgraceful. But to the end of time they will continue to feel, in spite of doctrinaires, that the voice of Nature is better far than the voice of the Lord Chancellor or the Royal Society; and that the instinctive desire for a particular helpmate is a surer guide for the ultimate happiness, both of the race and of the individual, than any amount of deliberate consultation. It is not the foolish fancies of youth that will have to be got rid of, but the foolish, wicked and mischievous interference of parents or outsiders.—*Grant Allen, in Fortnightly Review.*

WEBSTER'S OXEN.

The Great Orator and Statesman Enjoying the Quiet of His Farm.

When Mr. Webster came to Marshfield he found the land poor and the soil thin. But this was no obstacle to him. He was accustomed to say that he did not want to buy good land, preferring to take that which was considered of little value and show that it could be made productive by cultivation. One method of accomplishing this result—a method in which he was a pioneer—was by purchasing great quantities of menhaden and spreading them upon his fields, an experiment that extended its fragrance into adjoining townships, and linked the statesman's name with vile odors for many miles around. In his various efforts of this kind, however, he was remarkably successful, and the soil which had been reluctant to yield its increase to other hands, in his became generous in its bounty. A favorite crop with him was corn, of which he generally raised six or seven hundred bushels. Another was yellow turnips; of these he sometimes planted as many as ten acres, obtaining from one thousand to one thousand and five hundred bushels. The harvesting of them was regularly begun on the morning after the State election, which fell on the first Tuesday of November. Notice was sent out to the surrounding region a few days previously and all who wished were invited to come and participate in the pulling, receiving three bushels of turnips for a day's work. Mr. Webster indeed had great faith in turnips as food for stock, his faith being based upon an experiment made one fall with three yoke of oxen. These did well upon the diet set before them, and were so eager for their meal that it was difficult to cut up the roots fast enough to satisfy them. The farm yielded two hundred tons of fine English hay and supported about fifty head of young stock, from eight to fifteen cows, and eight or ten yoke of oxen. Of oxen Mr. Webster was always fond, and was as good a judge of them as could anywhere be found. He knew all his own by name, kept track of their ages and peculiarities, and frequently wrote home from the National capital directing such and such a yoke to be sold and replaced by others in order to keep his stock always at the best. On his return from Washington they were among the first objects of his thought, and sometimes, after entering the house and greeting the members of his family, he would, without sitting down, go out to the barn to see those dumb members of his larger family, going from one to the other, patting and stroking their faces and feeding them from his hands. Equally fond was he of showing them to his guests. On one occasion, as he stood thus with a friend, feeding them with ears of corn, his son Fletcher amused himself by playing with the dog. "My son, said Mr. Webster, "you do not seem to care much for this. For my part I like it. I would rather be here than in the Senate. I find it better company." Every one remembers how, only about a week before his death, he had them driven up into the lane before the house in order that he might see them for the last time. Such glimpses as these are worth whole volumes in revealing to us the real character of the man.—*Providence Journal.*

CARE OF THE FEET.

A Course of Treatment Recommended to Ladies Suffering From Corns, Etc.

Ladies whose feet has become misshapen from excessively narrow boots can do much to remedy the difficulty by care and pains. Select easy, roomy shoes and stockings of soft fabric. Bathe the feet thoroughly in water comfortably warm, never allowing it to grow cold enough to feel chilly, and wipe them thoroughly dry with a soft towel—coarse crash is almost poison to sensitive skins, and often causes irritation and a small eruption like rash. Then rub into them thoroughly about the joints or injured parts cold cream, or what is better, glycerine, perfectly pure, and mixed with double the quantity of water. Especially should it be diligently applied in the joints of the great toes if they are enlarged or painful. Wipe off with a damp cloth and dry carefully, after which powder the feet thoroughly with rice flour powder. Brush off all that comes away easily and put on the stocking, being careful that no semblance of a seam comes over the sensitive joint. Adjust the shoe carefully—never "jump into" any article of wearing apparel—smooth the boot over the foot and ankle, if it is a high top, and be certain that it is comfortable.

These cautions may seem trifles, but the feet are ill, and all conditions of recovery must be observed. Take care that they do not get very cold or in the least damp. The ankle should also be protected by gaiters or leggings, if there is any necessity for going out in wet weather. The difficulty is in inflammation of the joint membranes, and has had many serious results. At night the feet may be wiped off with a damp cloth, and the glycerine and powder repeated. Ladies who adopt this plan will never find soft corns coming between the toes. For hard corns there is nothing better than a little judiciously-applied caustic, which should just touch the hardened part of the corn, never the surrounding flesh. Repeat every other day, first soaking the feet in warm water and gently scraping the surface of the corn until it will finally come out altogether. Great care must be taken to keep the caustic from the whole flesh, and the foot should never be damp, as the application will spread rapidly. Such a course of treatment, patiently followed, has in several cases restored to quite passable shape and comfort feet that were considered as hopelessly deformed.—*Demorest's Monthly.*

—A curious case of subterranean dwellings and storehouses came to light on the English coast recently. A clergyman, while drawing water from a deep well, lost the bucket, which had swung to one side half the way up from the surface of the water. Going down thirty-two feet he found an opening into passages and chambers, one passage leading toward the shore, but not finished. The chambers are eight feet high, and were evidently used at one time by smugglers.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY, JANUARY 22.....1887

GRATIFYING PROSPERITY.

Rapid Increase in Wealth and Population.

The fifth annual report of the Secretary of the State Immigration Association gives certain facts that illustrate the prosperity of the State. The year just closed is in striking contrast with that of 1880 or 1881, when depression existed in almost every branch of industry. Now there is activity and growth in all directions. Within a few years thousands of new homes have been established on Government land that for years before was regarded as valueless for general agricultural purposes; large private holdings have been subdivided and improved; new railroads have been built and projected and new towns have been established. As illustrating the growth of the State it may be mentioned that seventy one new postoffices have been established in little less than a year. As further proof of the change that has been wrought in the short term of five years, we find the taxable property of the State has largely increased. In the report of Surveyor-General James W. Shankland, of August 1st, 1882, we find that the assessed value of property, real and personal, for the year 1881, as compared with that of 1885, is as follows:

For 1881.		
Real estate	$489,018,222	
Pers'n'l prop'ty	156;422,844	
Total.....		$645,471,066
For 1885.		
Real estate....	$639,275,352	
Pers'n'l prop'ty	171,212,282	$810,487,634
A gain of.....		$165,016,568

This is an immense gain to make in three years; in the year just past the gain was certainly greater than during any of the preceding years. The increase in taxable property has been relatively greater in Los Angeles county than in any other county, viz, from $20,021,557 in 1881 to $39,293,272 in 1885. The report make very favorable mention of Inyo county and refers intending settlers to the samples of the products of the county on exhibition in the rooms of the Association.

Destroying Fruit Pests.

In answer to many inquiries in reference to remedies for the destruction of fruit pests, Professor Hilgard, of the State University, recommends whale oil soap. He says this is not only the best vehicle for other insecticide substances, but that it is a good destroyer of many insects when used by itself. Some users buy the oil and make the soap themselves, in accordance with the common process of making the soft soap at home. The result is not always satisfactory, for the reason that the various brands of "lye" differ widely in strength.

Matthew Cooke, in his excellent book on the repression of injurious insects, prescribes that one pound of soap dissolved in one gallon of water shall constitute the basis of the washes. Some have found this wash unnecessarily strong while others have found it too weak to accomplish anything.

In a bulletin issued in February last (No. 52) were given the analysis of sundry brands of "lye," from which it appeared that they differ in strength as much as 500 per cent; so that a person using the proportions prescribed for one kind, would, in using the other, make his wash too strong or too weak, as the case might be, to that precise extent; either wasting his work or perhaps scorching his trees.

An examination of the several brands of whale-oil soaps in the San Francisco market has revealed similar differences between them. In this case the inert substance present to excess in some samples is simply water, which was found to range, in different preparations *sold at the same price*, from 21 to as much as 82¼ per cent. Curiously enough, the most highly watered article was among the most salable; the reason being, probably, that while the article having nearly 80 per cent of soap and 20 of water is somewhat difficult to dissolve and has to be boiled, the one in which these proportions are reversed can be made into a wash by simply stirring it in cold water. But apart from this inconvenience, the one is actually worth fully four times as much as the other, for the purpose it is intended to subserve; provided that the user will take the trouble to put in the water himself, instead of having it shipped to him from San Francisco.

Sheep License.

One of the sheep men who was forced to pay license under the law established by the Supervisors of Mono county sued the county to recover the amount of tax paid by him. The case was tried in the Superior Court and Judge Hakes gave judgment in favor of the county. The *Chronicle-Union* says:

The case went to trial, and after the plaintiff closed his evidence the District Attorney moved to dismiss the case on the ground that the evidence presented did not show facts sufficient to constitute a cause of action. The case was ably argued for two days by District Attorney W. H. Virden for the county and J. E. Goodall and Wm. O. Parker for the plaintiff. On Wednesday Judge Hakes took the matter under advisement and at eleven o'clock on Thursday morning he rendered his decision in favor of the motion thus nonsuiting the plaintiff. This is a very important decision to this county, involving the return of about $1,400, money collected for sheep licenses, and a claim if successful, of a hundred dollars damages in each case, besides the costs of suit, perhaps one hundred dollars more in each case, and as there would be seven-seventeen cases the county would be stuck to the tune of $5,000 including the $1,400 collected. The constitutionality of the Ordinance was not touched upon by Judge Hakes.

Should no appeal be taken to the Supreme Court the sheep license will continue to be collected in Mono county without further trouble. If an appeal should be taken and the law declared to be unconstitutional all the money collected would have to be returned.

SIMMONS LIVER REGULATOR

Unfailing Specific for Liver Disease.

SYMPTOMS: Bitter or bad taste in mouth; tongue coated white or covered with a brown fur; pain in the back, sides, or joints—often mistaken for Rheumatism; sour stomach; loss of appetite; sometimes nausea and waterbrash, or indigestion; flatulency and acid eructations; bowels alternately costive and lax; headache; loss of memory, with a painful sensation of having failed to do something which ought to have been done; debility; low spirits; a thick, yellow appearance of the skin and eyes; a dry cough; fever; restlessness; the urine is scanty and high colored, and, if allowed to stand, deposits a sediment.

SIMMONS LIVER REGULATOR (COURSLY VEGETABLE) Is generally acknowledged to be the Standard Liver Medicine. It acts with extraordinary efficacy on the LIVER, KIDNEYS, STOMACH AND BOWELS. AN EFFECTUAL SPECIFIC FOR Malaria, Bowel Complaints, Dyspepsia, Sick Headache, Constipation, Biliousness, Kidney Affections, Jaundice, Mental Depression, Colic.

Endorsed by the use of 2 Millions of People, as THE BEST FAMILY MEDICINE for Children, for Adults, and for the Aged.

ONLY GENUINE has our Z Stamp in red on front of Wrapper.

J. H. Zeilin & Co., Philadelphia, Pa., SOLE PROPRIETORS. Price, $1.00.

BELL'S Flouring Mills,

A. N. BELL, Prop.

TRY BELL'S EXTRA PATENT ROLLER FLOUR.

Having added Patent Rolls and other Improvements to our Mills, I am now turning out Flour that is fully

Equal to the Best.

Corn, Oats and Barley Cracked on Short Notice.

A. N. BELL,

Independence, Cal.

INDEPENDENCE MARKET,

E. Robinson, Prop.

Keep constantly on hand the very choicest of all kinds of meats, including

Beef, Mutton, Pork, Lard, Sausage.

I make a specialty of furnishing meats by the quantity for the mines and outside camps.

Highest market price paid for beef cattle.

All meats will be sold at the lowest possible living rates.

TUTT'S PILLS

25 YEARS IN USE.

The Greatest Medical Triumph of the Age.

SYMPTOMS OF A TORPID LIVER.

Loss of appetite, Bowels costive, Pain in the head, with a dull sensation in the back part, Pain under the shoulder-blade, Fullness after eating, with a disinclination to exertion of body or mind, Irritability of temper, Low spirits, with a feeling of having neglected some duty, Weariness, Dizziness, Fluttering at the Heart, Dots before the eyes, Headache over the right eye, Restlessness, with fitful dreams, Highly colored Urine, and CONSTIPATION.

TUTT'S PILLS are especially adapted to such cases, one dose effects such a change of feeling as to astonish the sufferer.

They Increase the Appetite, and cause the body to Take on Flesh, thus the system is nourished, and by their Tonic Action on the Digestive Organs, Regular Stools are produced. Price 25c. 44 Murray St., N.Y.

TUTT'S HAIR DYE

GRAY HAIR OR WHISKERS changed to a GLOSSY BLACK by a single application of this DYE. It imparts a natural color, acts instantaneously. Sold by Druggists, or sent by express on receipt of $1.

Office, 44 Murray St., New York.

RED STAR TRADE MARK. COUGH CURE

Absolutely Free from Opiates, Emetics and Poison.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, Bodie, Cal. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor," being the north east corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 59 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, the nce,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 86 degrees 26 minutes E. distant thirty-six chain; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S Land Office at Bodie, Mono county California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

SHADE TREES.

Good, Thrifty Trees One and One-half Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

W. J. MARSH & SON,
FORT CHURCHILL, Lyon Co., Nev.

TO ADVERTISERS

A list of 1030 newspapers divided into STATES AND SECTIONS will be sent on application—FREE.

To those who want their advertising to pay, we can offer no better medium for thorough and effective work than the various sections of our Select Local List. GEO. P. ROWELL & CO., Newspaper Advertising Bureau, 10 Spruce Street, New York.

REAL ESTATE AGENCY.

The Inyo County Real Estate Agency,

Conklin & Mulholland,

PROPRIETORS,

BRANCH IMMIGRATION BUREAU

This establishment is instituted for the purpose of furnishing information to those who are seeking cheap and desirable homes, in the land of a climate unsurpassed, plenty of water and whose fertility of soil is equalled in no locality.

In Owens River Valley lands can be obtained by occupancy, by purchase, or by Government entry.

WE WILL BUY,
SELL, EXCHANGE
AND NEGOCIATE LANDS
IMPROVED OR UNIMPROVED

Make Entries of Government Lands Under Homestead, Pre-emption, or Timber Culture Entries.

Give Any Information Legal or Otherwise, In Person or by Letter.

CORRESPONDENCE —SOLICITED.

To those who desire cheap lands for producing any and all the Cereals, Grasses, cultivated or wild any and all vegetables, the choicest and most delicate fruits, as well as the hardiest, or lands for vineyards which are unsurpassed, and which can be obtained by the acre, hundreds or thousands of acres, we say come to

Owens River Valley,

the most fertile and desirable portion of California, which means that it has no equal on the Globe.

Now Is The Time, When Lands are Cheap and Can Be Obtained.

WE HAVE FOR SALE THE FOLLOWING CHOICE TOWN AND COUNTRY PROPERTY:

The New York Butte Ranch, comprising 400 acres all grass and tillable lands, a large and fine two story frame dwelling house, stables and corrals, perfect water right in abundance, a large orchard of apple, peach and other varieties of fruit trees, and a vineyard.

The Eight Mile ranch, North of Independence on the Main road, good dwelling house, 30 acres in alfalfa, with one hundred inches of water.

Houses and lots, stables, business houses and unimproved lots in town of Independence.

Four ranches, the Cartago and Olanche properties, pasture and alfalfa lands, comprising 1200 acres, with plenty of water, a number of dwelling houses and stables, 150 acres in alfalfa, fruit trees, vines etc.

120 acres of land, all fenced, adjoining the town of Independence.

10,000 acres in Tulare county. The finest grazing lands on the Coast.

Hotel and saloon properties in the town of Bishop Creek.

Valuable gold, silver and lead mines, patented and unpatented.

Furnaces, Mills and Machinery.

The Rex Montes, Arctic and Bomerang, patented mines together with the Rex Montes quarts mill, in perfect running order, with water power, five stamps with room for ten, with all necessary well built buildings.

Four acres in the town of Independence all set with choice apple, peach, apricot, nectarine, pear plum and quince trees, grape vines, black berries, shrubbery, good dwelling house and stable and one-sixth of all the water flowing down Pine and Pinyon Creeks.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, JANUARY 22 .....1887.

Here at Independence the work of making garden was begun this week. Lettuce onions and other hardy vegetable are being planted.

Recent developments at Cerro Gordo promise rich results. Mr. Chapin and others have found what appear to be extensive deposits of high grade ore.

The Inter-State Commerce bill has passed the Senate of the United States. California will not be benefited by this law, but it may be a benefit to other States and Territories.

A new forty or sixty stamp quartz mill to be run by water power, is to be built in Six-Mile Canyon, Virginia City, in the Spring. The *Chronicle* says there will be several such mills built.

Dispatches say that the rainfall of Wednesday and Thursday was copious and general over the State. There is rejoicing everywhere over the brightened prospect, and assurance of good crops.

Mr. T. C. Boland put carpenters to work this week, making improvements on his buildings at Keeler. Tom is an enterprising merchant, and won't be left behind in the march of improvement.

Mr. and Mrs. W. S. Enos and their three children arrived at Independence last Monday. The family makes a desirable addition to our new settlers and are sure of a hearty welcome from all their neighbors.

C. S. Preble, and C. S. Young, late Superintendent of public instruction for Nevada, have bought the Reno *Gazette*. Mr. Fulton made the *Gazette* an excellent paper and doubtless the new proprietors will not let it degenerate.

In no other part of the State can so much good land be bought for the same amount of money as in Owens valley. No where else can be found such safe investment for money, and such certainty of securing a good home for a moderate outlay,

Already Mr. Nathan Rhine has to make additional room in the new store. It was bought that the building would give ample room for years to come; yet it has only been occupied a few weeks and last Wednesday carpenters were set to work making a large extension.

All over the country newspapers declare that by the election of Mr. Stewart to the United States Senate Nevada will have the ablest delegation in that body of any State in the Union. Several other States have each one able Senator, but no other State has such a pair of Senators as John P. Jones and William M. Stewart.

Last Tuesday evening a slight rain set in. By next morning it increased to a good steady pour that continued all day. Thursday morning the clouds had cleared away and it was then seen that a great deal of snow had fallen on the mountains on both sides of the valley; here are stored up the fertilizing waters for the coming season. In darkness and storm, not less than in the joyous sunlight, the mercy and wisdom of the Great Creator are seen.

Over in San Bernardino county last week a fellow named Lew Maginnis made vile remarks about the wife and daughters of a man named Hock Hurley. The latter overheard the talk of the dirty brute, stepped forward and told him he must fight. Maginnis deserved to be shot like a sheep killing dog but Hurley gave him an even chance. Seven shots were fired. Hurley was unhurt, but he put lead enough into the brute to make him have a still tongue in future.

All through the contest over the election of a United States Senator, only one argument has been offered in favor of the choice of Mr. Hearst for the position, namely, that he had spent a great deal of money to help his party in the late election. There is no escaping the conclusion that this is simply putting up a seat in the Senate to be sold to the highest bidder. There are many democrats in the State who by education, talent, experience and character would have done honor to California in the Senate, and would have served her in a way Mr. Hearst is utterly incapable of doing.

So far it would appear that the present Legislature is as utterly unfit to deal with the irrigation question as any of its incapable predecessors. A few bills on the subject have been introduced, but not one of a comprehensive character. Such efforts might be compared to a lot of doctors, each one trying to cure a separate small pox postule, but not one of them having the least idea of trying to effect a radical cure of the patient. A bill ought to be passed providing for a thorough survey of all the sources of water in the State; and then storage and distribution could be undertaken in a systematic way. Nothing else will result in permanent good.

Mr. James Berdan and wife and Miss Moore, sister to Mrs. Berdan, of Salinas, Monterey county, are at Independence. In consequence of some correspondence from Independence Mr. Berdan came here with the intention of settling. He says he finds the country better in every way, in soil in climate, in variety of productions and in markets than had been represented to him, or than he had expected. He is determined to make his home here. It affords no small pleasure when strangers who come here say, as they all do, that the correspondence that induced them to come, so far from being exaggerated, does not tell all that may be said in favor of the county.

Last Saturday Remi Nadeau died at Los Angeles. His death was caused by Brights disease. He was aged sixty four years. The deceased was well known in Inyo county; he is reported to have left a large fortune. An old merchant of Inyo says when Ramie Nadeau first came to the county all the property he had was a pair of oxen and a wagon. He engaged to haul goods to the Eclipse mine and started upon the trip; his wagon broke down and he was unable to get another, but he had agreed to deliver the goods and did it. He went and cut down a tree, chopped off all the limbs but two, which were left sticking out like shafts; piled his goods upon the trunk of the tree, hitched up his oxen and dragged the goods to the mine. About that time the big strike of ore was made at Cerro Gordo; an immense amount of freighting was to be done; Nadeau was the man for the occasion went into the business, and, this merchant says, made a half a million dollars in a few years.

Mrs. Scott, of Boston, arrived at Independence last Monday, on a visit to her daugater Mrs. Weichart.

A narrow guage railroad runs northward from Reno into Plumas and Lassen counties in this State. It is rumored that the C. & C. road is about to be extended from Mound House to Reno so as to connect with this road. The extension would be of very little value to Owens Valley unless the other road was extended into Oregon and the C. & C. continued South to a connection with Los Angeles.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

Kearsarge Mine.

Mr. Gray, who is operating at the Kearsarge, has recently struck some valuable ore. Sacks of the ore sent to San Francisco were found to carry $30 per ton in gold and from $1000 to $1200 per ton in silver. Mr. Gray contemplates running a tunnel 1500 feet long; as the mountain is excessively steep the inner end of the tunnel would be about the same depth from the surface. There is good indication of a valuable and extensive mine there.

Improvement.

It is always gratifying to notice improvements. Mr. John Baxter is doing work that will attract the attention of every one coming to Independence from the north. At his place there is a fine row of trees on each side of the road; he has already cleared away a long stretch of unsighly, rickety old fence of rails, boards, posts, poles and rubbish in general, and put up a handsome picket fence. He has ground cleared as a site for a new dwelling house and will put up a good building. When these improvements are completed the approach to town on that side will be through a handsome, well-shaded avenue. When the fine orchard that borders the road is in full bloom in the spring, or when the trees are laden with blushing peaches in the early summer or with golden apples later in the season, there will be few more attractive places than the home of Mr. Baxter. This fine home and valuable property is all the fruit of about ten years honest industry. Others may do as well.

A Home Production.

Last Spring Mr. J. J. Smith had some broom corn planted at Bishop Creek. It made a good crop in quantity and turned out a first-class article for brooms. Some of the broom was sent to San Francisco and put on exhibition at the rooms of the State Immigration Association. Competent judges pronounced it to be first-class. Mr. Smith is now making brooms of the same material; some of these can be seen in the stores at Independence; and their superiority to any imported brooms is at once apparent on comparison. Mr. Smith is evidently a very expert workman. Dealers and users should patronize this home product; every article we can make or produce at home should have the preference over what is imported. Every dollar we can keep at home, the community is that much the richer. Dealers are requested to send in their orders as early as possible. Address J. J. Smith, Bishop Creek, Inyo county, Cal.

Terrible Murder.

A terrible murder was committed at Carson last Sunday. The *Union* of Monday says: "About ten o'clock last night "Old Bayley" an aged negro well known in this vicinity from his residence here for 20 or 25 years was most foully murdered. The facts as near as can be found, are these. Bayley and wife had been conversing, when she went to bed Bayley was left sitting near the window between it and the stove, when the contents of a shotgun was poured into his head through the window at a distance of only a few inches, the powder burning his flesh, blowing his head nearly off, killing him instantly. The ground being frozen no tracks or trace of the assassin could be found. A young negro who was working for Bayley, named Geo. Moore has been arrested on suspicion, but nothing appearing against him will be released soon. Coroner Friend, Dr. Lee and a jury went out this afternoon to his place near the Poor Farm, where the murder occurred to hold an inquest. The officers have no trace whatever of the perpetrator of this, the foulest of murders ever perpetrated in Ormsby county.

Valuable Stock.

Mr. W. S. Enos has brought some very valuable stock to Independence. Among the rest are three thoroughbred Durham bulls and ten high grade bulls. These will all be placed with the herd owned by Mr. Enos. One of the three thoroughbreds is known by the name of Duke of Sacramento; his color is red; he is a very fine looking animal and no less can be said of the other two. All are recorded in the herd books. The graded animals, except to an expert, appear to be quite as valuable as the others.

Perhaps even greater attraction will be found in some horses brought here by Mr. Enos. One of these is by far the most noted blood ever brought into the county.

Albenton is a bright bay, without white, foaled April 14th, 1883; bred by Leland Stanford, Palo Alto, Cal. He is 16 hands high, and has size, style and finish. Was sired by Gen. Benton (the sire of six in the 2:30 list, and the sire of the fastest four-year-old in the world, Sally Benton, 2:17¾) He is also the sire of Arab, that made a record last season of 2:17¼; and is now offered to be matched against any horse in the world.

The dam of Albenton is Abbie, by Almont (the sire of 32 in the 2:30 list); he by Alexander's Abdallah, (the sire of Goldsmith Maid); second dam, Norma [the dam of Lucy Cuyler, one-half mile to wagon 1:05, and a mile in 2:15¼]. She was by Alexander's Norman [the sire of Lulu, 2:15, and May Queen, 2:20]. Albenton has been handled but little, on account of his age and large size, but showed a quarter as a yearling, close to a 2:40 gait, and received the first premium at the California State Fair, 1885, for the best 2-year-old standard trotter, over colts by Sultan and other noted sires.

It is the intention of Mr. Enos to let this splendid horse make the coming season to a limited number of approved mares. Terms will be made known at the proper time. The presence of Albenton will be of great interest to all our horse breeders and to all lovers of fine horses. Mr. Enos has also brought a first-class Clydesdale stallion. It is his intention to have the best animals of the various breeds, and to aim at producing the very best animals of the several kinds.

Taken Up.

Members of the Independence base ball club, say that the challenge issued by the Big Pine club has been accepted. The prizes to be contended for are the honors of victory and a purse of two hundred dollars; the game to be played at Big Pine on Saturday, February 5th.

New Open.

I have fitted and newly furnished the house on the corner of Market and Washington streets, where I am prepared to accommodate the public with first-class Board and lodging. Large and comfortable rooms for families. Suppers furnished on short notice. Board by the day or week at regular prices. V. G. THOMPSON, Proprietor.

Dead.

After a long illness J. W. Smith died at Bishop Creek at 9:30 o'clock yesterday [Friday] morning. Deceased was an old and honored citizen of Inyo county. He was elected Sheriff a few years ago on an independent ticket. He was a native of Canada, aged about 49 years. The funeral will be conducted under the auspices of the F. & A. M., of which he was a member but up to the hour of going to press arrangements had not been completed.

Typhoid Scarlet and Yellow Fevers, Measles, Diphtheria, Small-pox, Cholera, etc.

Darbys Prophylactic Fluid will destroy the infection of all fevers and all contagious and infectious diseases. Will keep the atmosphere of any sick-room pure and wholesome, absorbing and destroying unhealthy effluvia and contagion. Will neutralize any bad smell whatever, not by disguising it, but by destroying it. Use Darbys Prophylactic Fluid in every sick-room.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect His sire, Saratoga, was imported direc from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Hogging.

One of the Nevada legislators is a mean "cuss," if the correspondent of the *Enterprise* tells the truth. He says: One legislator struck it big yesterday and last night. He got after the faro game in Cap Avery's "Hole-in-the-Wall" saloon, putting in $110, and during a seance of about ten hours he played so unlucky that he walked off $1,100 loser. Then he concluded to start a little old faro game of his own, having a hundred or two left, so he hired a professional friend to run his game for him in the rear of another saloon as he didn't know how. The result was that his friend won over $1,400 from $100. And now this legislator objects to honorably giving half his winnings to the man who won the same. He offered him $5, but this was refused, and the agent proposes going in for what he can get. This is an interesting feature among sporting men.

Errors Corrected.

A correspondent at Big Pine sends a clipping from a Chicago paper in reference to a part of Inyo county, with a request that some errors therein be corrected. Among other things the article makes certain statements about Death Valley that are as far from sober fact as the description of the Valley of Diamonds in the story of "Sinbad the Sailor." It is not true that "poisonous gases issue from fissures in the rocks that are fatal to life." During about nine months in each year many men work in the valley at the borax mines. During the months of July, August and September work is suspended; the heat is then too great for men to work out in the open plain where the borax is mined or dug; but this is the only reason for suspending the work. Men who know Death Valley well are confident that in parts of the valley the finest oranges, bananas and other tropical and sub-tropical fruits may be grown. The Chicago paper is wrong in its statements about the character of Death Valley and it is still more in error by giving the impression that the whole of Inyo county is of the same character. In reality there is more difference between the climate of Owens valley and Death Valley, than the climate of Chicago and that of Winnipeg. Owens valley is much cooler than Death Valley in Summer, than Chicago is warmer than Winnipeg in the Winter. Two high mountain chains and two valleys separate Death Valley from Owens valley; then the former at its lowest depression is about 240 feet below the level of the sea, while the latter has a mean elevation above the sea of about 4,000 feet. At Lone Pine station, near the south end of Owens valley, the top of the rail of the Carson and Colorado railroad is 3,760 feet above sea level. A branch station of the United States Signal Service is located at Keeler on the east side of Owens Lake. The highest temperature recorded at the station for the year 1886 was 104°; the lowest temperature 31.4°. The atmosphere is comparatively dry and clear at all seasons, consequently changes of temperature are less felt than where the air is moisture laden, as at Chicago. There is no healthier country in the world than Owens valley, as many are ready to attest who came here invalids, apparently on the brink of the grave, but who are now hale and hearty, and have every appearance of living to a good old age.

A. R. CONKLIN,
Attorney-at-Law
Independence, Cal.
Will practice in all the Courts of the States of California and Nevada.

W. H. GEORGE, M. D.,
Physician and Surgeon,

AGENT FOR W. R. STRONG & CO.
S. A. DENSMORE, Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer. Active, honest persons all over the country, with or without team.
JOHN C. EVANS, SHOTLAND, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will set up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and babies to pay for it."
JOHN R. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $1000."
I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

Secure A Homestead For Your Family.
CALIFORNIA.
INYO COUNTY—Owens River Valley
THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.
The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

CHARACTER OF THE EAR.

A Significance Beyond the Mere Registration of Sound—Characteristics.

The generally accepted theory that a large ear denotes generosity and a small ear the reverse is a shallow conclusion based upon the most superficial observation. The configuration and position of an ear mean much more than its size. Large ears rather more often than small ones are unelaborate, presenting no well defined elevations and depressions, which smooth surface indicates both a want of perception and delicate understanding. This same smooth surface, whether the ear be large or small, usually indicates the very refinement of selfishness. It is true that among the large, smooth-eared people are found the doers of good; but observation will, as a rule, disclose the fact that such action has its source in self-gratification, and not in an unselfish willingness to endure for the good of others.

An ear which is rather long, has a less bluntly defined elevation, is thick, highly tinted, soft-lobed, set well forward on the head, and is indeed what the casual observer would call a handsome ear, indicates that its possessor belongs to that by no means small class who look out for the interests of all save those who have real claims upon them. They govern, if at all, by a mesmeric power, and never for the good of the governed. They are likely to be grasping, and also strangers to the grace of gratitude. Incapable of lasting regard, they are also incapable of inspiring it.

A thin ear indicates keen susceptibility, both as to sound and mental and physical impressions. When such an ear projects out from the head it indicates a narrow alertness, a quick perception, not of things in their entirety but only in a line straight on. A thin ear lying closer to the head indicates breadth as well as susceptibility.

A small, soft ear, with no decided lines, a triangular-shaped yielding lobe, and a flat rim only partially developed is a hysterical ear, and belongs to those whose emotions predominate. They love intensely, but not long, and hate in the same way. They are of the shallow extreme type, with whom nothing endures.

An ear long from its upper margin to the lower edge of the lobe and rather narrow, with very decided depressions and elevations, will register sound with accuracy and be able to distinguish all the small inequalities not only of music but other things. Such an ear indicates delicacy of perception, but invariably belongs to one devoted rather to methods than results. On the other hand, an ear which is broad rather than long, with the same indentations and elevations, would indicate ability to comprehend things in their entirety and appreciate motive and spirit rather than minutiæ.

An ear the cartilage of which is soft and elastic, easily punctured and torn, indicates a weak physical, mental, and moral nature; while an ear of strong cartilage with perfect, clear cut lines belongs to a character strongly defined throughout. This fact is recognized by the Sioux Indian tribes, with whose customs I was familiar as a child. It was quite a general practice among them to puncture the ear all around the outer edge for the inserton of different objects. When the ear was found soft so that the bits of lead, rare stones, etc., which were inserted as ornaments, tore out, the possessor was regarded, if a young squaw, as a ne'er-do-weel, unlikely to be enduringly obedient, and so make that lifelong drudge, a good Indian wife; and if a brave, as one on whom his tribe could not count, either on the hunt, in council, or in war.

The ear which denotes a creative temperament has numerous and clearly-defined indentations, and is never fully developed and perfect in its shape. An ear which is highest in its indications and really the most beautiful is one lying close to the head, neither too narrow nor overbroad, gracefully rounded, with clear, perfect curves, strong lines, and firm, delicately-tinted cartilage.

The conformation of the human ear is so infinitely varied that it is quite impossible to lay down hard-and-fast rules by which to read its different significations, but with the outline given a little patient observation of people whose striking characteristics are well known to the observer will. I venture to say, convince the person taking such cognizancs that the human ear has a signification beyond the mere registering of sound.—Antoinette V. Wakeman in Chicago Times.

First Washington Newspaper.

The first newspaper printed and published in Washington City was The Gazette, the first number of which appeared on June 15, 1796. It was edited and published by Benjamin More, a bookseller, on Wednesdays and Saturdays, at $4 per annum, and was really a good paper for that day, well made up and neatly printed. The editor complained bitterly from time to time of the want of patronage and finally, after thirty-five weeks of existance, it was discontinued.—Ben: Perley Poore.

Smallest Heavenly Bodies.

The two satellites of Mars are pronounced by Newcomb by far the smallest heavenly bodies yet known. Their diameters can not be stated with any degree of accuracy, but that of the outer satellite may be as small as five miles while that of the inner satellite probably lies between ten and forty miles.—Boston Budget.

The Hindoo Peasant's Wages.

The average Hindoo peasant does not, as things are, earn sufficient to procure life's necessaries; and a very large proportion of what he does earn is taken from him by the government in the form of taxation. As a result we get the widespread disease and physical deterioration of the people and constantly recurring famines, each one more serious than its predecessor.—London Letter.

A Benefit of Ill Health.

But perhaps the greatest benefit of ill health is the solicitude of our friends, the discovery that they care a great deal more for us than we dreamed or dared to show; and is not the discipline that wakens the sensibilities and "touches us to finer issues" a blessing?—Harper's Bazar.

At Victoria's Jubilee.

On the occasion of her semi-centennial jubilee as a monarch, June 20, 1887, Queen Victoria will be surrounded in Westminster abbey by 300 princes, dukes, earls, archbishops, peeresses and ladies of high nobility.—New Orleans Times-Democrat.

MINE OWN.

Some sob "Mine own" above a daisied mound
Whose narrow darkness clasps their all in all;
I, having naught to lose, have nothing lost,
Nor mourn I when the dead leaves round me fall;
And when the summer's gauds forgot to shine,
I need not weep, for they were never mine.

Thou art not mine—thou never hast been mine—
I watch thy happy love through shadows black;
Better 'twould be to wait beside a tomb,
Knowing that heaven's peace would give thee back.
I walk alone to meet the coming night,
And the long years roll on beyond my sight.
—Julie K. Wetherill in New York Grapic.

STOLEN BY CUBAN BANDITS.

Sons of Rich Parents Held for a Ransom—Fear of a "Venganza."

A young Cuban was lately "secuestrado" by banditti, and afterward restored to his parents for 92 tentenes—near $500. It is quite common, in the country in Cuba, for young men and boys—usually the sons of rich parents—to be "secuestrado," which is being captured and held in concealment by banditti until such sums as they choose to demand of the parents be paid them. The sum exacted is more or less large, according to the reputed wealth of the parents.

The "secustre" is sometimes done in the boldest, most positive but most polite manner, thus:

The banditti find out—often through secret information furnished them by some person or persons living in the neighborhood of the coveted captive—what the movements of the family are and when to make the attack. The latter point settled, they ride up to the house, dismount, enter, salute the family in the most polite manner, and demand a certain sum of money or the son as hostage till the required sum be paid. Fault of money, which is generally the case, the son is carried off. The parents dare not refuse to let him go, for, unlike Sheridan, "they are afraid," as on the least show of resistance politeness takes wings and disappears, and daggers and pistols without coffee appear on the scene.

When the prize is not captured in the highly refined and civilized (?) manner, but is caught wandering off by himself in some lonely spot, the parents are notified of the capture by receiving a note from the banditti—no doubt a B. L. M.—demanding money. This, in return, is sent at once; the son is rostored to the happy bosom of his delighted family and no questions are asked.

The parents, considering themselves only too lucky in getting their child safely restored to them, dare not pursue the highway kidnappers or bring them to justice, even if they know their exact whereabouts, as they fear a "venganza." This—a revenge—is, indeed, quite often serious. In some cases whole plantations, crops, houses and all perish by fire to gratify a "venganza." In fact "venganzas" seemed to be feared to such an extent that many offences which would not be tolerated elsewhere are often unresented by individuals here.—Cuba Cor. New Orleans Times-Democrat.

Not Captivated by Country Life.

In truth, there is no country life in America, in the English sense of the word. There are plenty of wealthy people with little or nothing to occupy their time. But they have not taken to the soil, and that pleasant autumn round of hospitality which the American lady so admires in England is practically unknown in the states. Hospitality of the most lavish description is practiced by our kindly kinsfolk. But it is exercised in town, or at the seaside, where happily, hotel life is rapidly being displaced by "cottage" or villa housekeeping. If the well-introduced tourist visits New York or Boston any time between June and October, the chances are that he will find the brown-stone fronted house to which his letters are addressed closed. The ladies, at all events, will be at Newport, or Saratoga, or Atlantic City, or Long Branch, or at their summer place on the Hudson. The head of the house, if still in town, will take a running trip now and then to see them, or, if the place is close at hand, will come in and go out twice a day. If less wealthy, they may be found at a seaside hotel, or a "mountain resort," or as "summer boarders" in a farm-house. But anything like a gated migration to a country-house in the midst of the owner's own woods and fields and coverts, not to return until April or May, is almost unknown.

The reason of this is mainly that the Americans have not yet been captivated by country life. They lavish fortunes on their town houses, and build yachts which are marvels of luxury. But the idea of laying out an estate and living on it does not attract them. They buy "real estate"—to keep and sell at a profit, not to enjoy it. The institutions of the states are against this. As the entire estate of a father must be equally divided among his heirs, the accumulation of land is surrounded by difficulties, and the country is advancing so rapidly that the chances are in favor of the owner being tempted to sell his park for a city site or to run a railway through his garden. Nor must it be forgotten that the English landowner, with his inherited rank and responsibilities, has bonds binding him to the soil which are unknown to the wealthiest American. The latter has no farms to look after, no tenants to arrange with, no "position in the county" to keep up.—London News.

The Indian Idea of Drunkenness.

Said a friend who has passed many years among the Indians: "Every one knows that whisky is the worst enemy an Indian has; and, because they display such a strong desire to get hold of it, most people imagine that they have an inordinate love for it. Now I have had an excellent opportunity for coming to a fair conclusion, and it is my opinion that their appetite for liquor is no stronger than that of a white man. The whole trouble is that the Indian considers it an honor to get drunk. Where this outrageous idea originated no one knows. They themselves can not explain it. To us it seems most strange that a human being should consider it an enviable distinction to become intoxicated. I have known young Indians, to whom whisky was distasteful, to get drunk simply to rise in the estimation of their comrades. And yet," continued my informant, "there is nothing which will so quickly stop a quarrel between Indians as to tell them that they act like drunken men. Is it not a strange contradiction?"—Pioneer Press "Listener."

WORD PICTURES.

Prose Poems by Murray on Immortality and the Man Charles Dickens.

Apropos of the readings of W. H. H. Murray, the following selections may prove of interest. They are from a volume published in 1873 by Lee & Shepard, and are fairly characteristic of the man and fair samples of his pulpit utterances. While new to many, to some they will be as welcome as the face of an old friend, while all will, no doubt, recognize in them the hand of a master in word painting.

There is a bird that mariners call a "frigate bird," of strange habits and of strange power. Men see him in all climes; but never yet has human eye seen him near the earth. With wings of mighty stretch, high borne, he sails along. Men of the far North see him at midnight moving amid auroral fires, sailing along with set wings amid those awful flames, taking the color of the waves of light which swell and heave around him. Men in the tropics see him at hottest noon, his plumage all incarnadined by the fierce rays that smite innocuous upon him. Amid their ardent fervor he bears along, majestic, tireless. Never was he known to stoop from his lofty line of flight, never to swerve. To many he is a myth; to all a mystery. Where is his perch? Where does he rest? Where was he brooded? None know. They only know that above cloud, above the reach of tempest, above the tumult of transverse currents, this bird of Heaven, so let us call him, on self-supporting vans that disdain to beat the air on which they rest, moves grandly on. So shall my hope be. At either pole of life, above the clouds of sorrow, superior to the tempests that beat upon me, on lofty and tireless wing, scorning the earth, it shall move along. Never shall it stoop, never swerve from its sublime line of flight. Men shall see it in the morning of my life; they shall see it in its hot noonday; and when the shadows fall, my sun having set, the last they shall see of me shall be this hope of gain in dying, as it sails out on steady wing, and disappears amid the everlasting light.

I can not close until I have alluded to him who has so lately died across the sea. While all the pulpits of the land were speaking, this was silent, because I felt that better words than I might speak would tell how America mourned above his bier. But since a division of utterances has occurred and lest my silence should be misunderstood, I speak. I join no dispute above Charles Dickens' grave touching his personal habits, his errors or his theological views, the circumstances and conditions of his life were too unlike mine for me to be his judge. That the man loved his fellowmen, I know; that he loved his God, I hope, and have faith to believe. In thought I stand uncovered beside the tomb in which his body sleeps, in silent sadness that so sweet and gentle a spirit is taken from the earth. In reverent gratitude I thank the Lord that He did bless mankind with the birth of such a mind. I thank Him as for a blessing vouchsafed to me personally. I feel that I am a better man than I should have been had no Charles Dickens lived. More than once has he lightened my burdens by his words; more than once warmed my heart towards men; more than once assisted me to hate hypocrisy and detest wrong. Did all other hands bring thorns, mine should bring the sweetest rose of all the fields, and plant it on his grave.

Where else in all the pages of our mother tongue as in his works can you find humor so refined, wit so keen, yet so free from coarseness, that a mother might read it to her children before they say their prayers? Where will you find a warmer heart, a freer hand, a spirit more generous to confess an error or a wrong? Never more will the bells ring at Christmas eve but that to me a note of sadness will mingle with their chimes; for he who taught the world the lesson of the festival, who, using it as a text, preached, as no pulpit ever preached, a sermon of charity and love—the hand that touched the bells of England and made the whole world melodious with Christmas chimes, is cold and motionless forever! Farewell, gentle spirit! Thou wast not perfect until now. Thou didst have thy passions and thy share of human errors, but death has freed thee. Thou art no longer trammeled. Thou art delivered out of bondage, and thy freed spirit walks in glory. Though dead, thou speakest. Thy voice is universal in its reach. The ages will be thy audience. Thy memory will be as a growing wreath above thy grave. It will take root in the soil that covers thee, and, with the years, renew its blossoms and its leaves perennially.—*Boston Globe.*

—When a young man has had the honor of a thrashing from a beautiful young woman he gains a certain distinction as a masher, which he pays for by being laughed at. But the lady is laughed at, too. It is a big joke all round, with a square show for gossips. The successful use of the whip is something that is beyond the reach of the girls. To attempt it is dangerous; first, because it is an unwomanly and rowdylike act, and, secondly, because the girls who try it, as a rule, are not good girls.—*N. Y. Mail.*

—A Chicago expressman says that the oddest thing he ever received by express was a grave. It was in a box about four feet long, covered with glass. Inside was the earth of a child's grave—the turf, flowers, headstone and all. It was going from this State to California? Some man had moved out there, and had the body of a dear child taken up and shipped to him. The thought struck him that he would like to have a little of the sod from the old homestead, and so he sent for the top of the grave.—*Chicago Mail.*

—The punishment visited upon murderers among the Esquimaux is unique. Captain Gordon, of the Arctic steamer Alert, recently arrived at Halifax from Hudson's Bay and Straits, reports that, at Cape Chidleigh, one Esquimau had been "removed" in cold blood by another to whom he had become obnoxious, and the latter, "in accordance with the unwritten laws governing the Esquimaux, now lives with and supports the two wives and families of the murdered man."

Minister—Do you bet on horse races, deacon? Deacon—No, parson I bet on horses.

Mr. Arthur Shurtleff, Parker, Dakota, writes that he suffered for two years with a lame knee, which was entirely cured by the use of St. Jacobs Oil. He considers it a most wonderful remedy. It conquers pain.

The latest gem in the line of coroner's jury verdicts comes from Dakota, where a jury found that "she came to her death from a felonious desire to reach a happy hereafter."

Mr. L. D. Vinson, Cashier D. & I. R. R., has tried and endorses Bed Star Cough Cure.

HOMES FOR THE HOMELESS.

The co-operative system inaugurated seven years ago by publishers of the OMAHA WEEKLY BEE, whereby the patrons of that paper share directly in the income from advertising, has been a marked success. Last year The Bee Publishing Company divided among its subscribers, real estate, machinery, implements, musical instruments, silverware, clothing, books and other articles, valued in the aggregate $43,137.00 These premiums were for the most part paid for in advertising, which, owing to the extensive circulation of the paper, had become so valuable as to command three dollars per inch for each insertion. Three farms, covering in all 200 acres—80 acres in Kansas, 80 acres in Iowa and 40 acres in Nebraska—procured in trade from the J. I. Case Threshing Machine Company, of Racine, Wisconsin, were among last year's premiums to patrons of the WEEKLY BEE.

This year the BEE'S premium list excels all its previous efforts. Three good farms, each 80 acres, located respectively in Woodbury county, Iowa, and Howard and Hail counties, in Nebraska, are on the list. The most valuable among these is the Hall county farm, with house, well and other improvements. This farm is near Grand Island, a rapidly growing city of over 7,000 population. There are also among this year's premiums, a Minnesota Chief Threshing Machine, with horse power complete, several harvesters, 20 fanning mills, 12 plows and many other farm implements; 2 gold and 40 silver watches, from the Waltham and Elgin factories; 1 grand piano, 2 parlor organs, 35 sewing machines and thousands of other articles, aggregating in all $45,518.00. Every subscriber guaranteed a premium worth at retail at least $1.00.

Sample copies, with full premium list, mailed free. This is no swindling scheme, gotten up by adventurers, but a perfectly legitimate division of profits, by responsible publishers of a reputable paper that ranks as the leading journal West of Chicago and is now in its sixteenth year. No intelligent person would expect that every subscriber will receive a $1,500 farm, a $1,000 piano, or a $650 threshing machine, but all have an equal chance in the distribution which is always conducted by the subscribers present, usually numbering many hundreds.

The enormous increase of its circulation is, however, by no means entirely due to this co-operative premium scheme. Its consistent and aggressive championship of the rights and interests of the farmer, mechanic and laborer, and its fearless opposition to monopolies and monoply methods has made the BEE popular and influential.

The subscription price of THE WEEKLY BEE is Two DOLLARS per year. Direct your remittance by money order, postal note or registered letter, to THE BEE PUBLISHING CO., OMAHA, NEB., who will mail to you a numbered and registered premium receipt. Each subscriber should also give explicit directions as to postoffice address.

The degree that Harvard conferred on Princeton seems to be somewhere about 260 Fahrenheit.

A VALUABLE MEDICAL TREATISE.

The edition for 1887 of the sterling Medical Annual, known as Hostetter's Almanac, is now ready, and may be obtained, free of cost, of druggists and general country dealers in all parts of the United States, Mexico, and indeed in every civilized portion of the Western Hemisphere. This Almanac has been issued regularly at the commencement of every year for over one-fifth of a century. It combines, with the soundest practical advice for the preservation and restoration of health, a large amount of interesting and amusing light reading, and the calendar, astronomical calculations, chronological items, etc., are prepared with great care, and will be found entirely accurate. The issue of Hostetter's Almanac for 1887 will probably be the largest edition of a medical work ever published in any country. The proprietors, Messrs. Hostetter & Co., Pittsburgh, Pa., on receipt of a two-cent stamp, will forward a copy by mail to any person who cannot procure one in his neighborhood.

A private hobby of Secretary Whitney is said to be chicken-raising. This looks very much like a bid for the colored vote.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

WHAT SENATOR NELSON THINKS OF ALLCOCK'S POROUS PLASTERS.

SENATE CHAMBER, ALBANY, N. Y., April 4, 1885.

On the 27th of February, 1883, I was taken with a violent pain in the region of the kidneys. I suffered such agony that I could hardly stand up. As soon as possible I applied two ALLCOCK'S POROUS PLASTERS, one over each kidney, and laid down. In an hour, to my surprise and delight, the pain had vanished and I was well. I wore the plasters for a day or two as a precaution, and then removed them. I have been using ALLCOCK'S POROUS PLASTERS in my family for the last ten years, and have always found them the quickest and best external remedy for colds, strains and rheumatic affections. From my experience I believe they are the best plasters in the world. HENRY C. NELSON.

A CASE NOT BEYOND HELP.

Dr. M. H. Hinsdale, Kewanee, Ill., advises us of a remarkable cure of Consumption. He says: "A neighbor's wife was attacked with violent lung disease, and pronounced beyond help from Quick Consumption. As a last resort the family was persuaded to try DR. WM. HALL'S BALSAM FOR THE LUNGS. To the astonishment of all, by the time she had used one-half dozen bottles she was about the house doing her own work. I saw her at her worst, and had no idea she could recover."

"Seal of North Carolina" Plug cut is the Boss smoking Tobacco. It is kept by every first-class dealer in town.

FIVE dollars saved yearly in boots and shoes by using Lyon's Heel Stiffeners; costs only 25c.

If afflicted with Sore Eyes, use Dr. Isaac Thompson's Eye Water. Druggists sell it. 25c.

"A Slight Cold," Coughs.—"*Brown's Bronchial Troches*" give immediate relief.

A BOON TO WOMEN

A WOMAN'S GRATITUDE. Mrs. F. OATS, of *Shumway, Ill.*, writes: "When I had used Dr. Pierce's 'Favorite Prescription' one week, I could walk all over the door-yard, and I could get into a wagon and ride two miles to see my neighbors. I had not been able to walk out in the door-yard for six months. After using the 'Favorite Prescription' two weeks, I rode in a wagon ten miles; my neighbors were all surprised to see me up and going about and helping to do my housework, **after doctoring with thirteen of the best physicians we could get**—and the last one told my husband that I would never be able to do my housework any more. I am thankful to my God that I wrote to you, for I had suffered from 'Female Weakness' until I had almost given up in despair."

TERRIBLE PAIN. Mrs. F. E. WILCOX, *Friendship, N. Y.*, writes: "For five or six years I had been badly troubled with female weakness and terrible pains across the small of my back and pit of the stomach. Three bottles of Dr. Pierce's 'Favorite Prescription' acted like a charm, and cured me completely, to my great joy."

MARVELOUS BENEFITS. Rev. SIDNEY C. DAVIS, *Galien, Michigan*, writes: "I wish, in this letter, to express my gratitude for Mrs. Davis and myself for the great good which has been accomplished in her case by the use of your proprietary medicines. When she began to take them, in January last, she could not endure the least jar, could walk but a very few steps at a time, and could stay up only about thirty minutes at a time. Now she not only sits up almost the entire day, but can walk around, call on her neighbors, two and three blocks away, and not feel any injurious effects at all. When we consider that she had kept her bed the greater part of the time for fourteen months, and would lose repeatedly the advance she had made, her progess now seems marvelous. We had almost lost confidence in medical practitioners, and advertised remedies, but have found in your Dr. Pierce's 'Favorite Prescription' and 'Pellets' the properties needed, and which we believe will bring about a complete and final recovery."

BED-FAST FOR MONTHS.

TREATING THE WRONG DISEASE.

Many times women call upon their family physicians, one with dyspepsia, another with palpitation, another with backache, or nervousness, another with pain here and there, and in this way they all present alike to themselves and their easy-going and indifferent doctor, separate and distinct diseases, for which he prescribes his pills and potions, assuming them to be such, when, in reality, they are all symptoms caused by some uterine disorder. While the physician is ignorant of the cause of suffering, he encourages his practice until large bills are made, when the suffering patient is no better, but probably worse for the delay, treatment, and other complications made. A proper medicine directed to the cause would perhaps have entirely removed the disease, thereby instituting comfort instead of prolonged misery.

DOCTORS FAIL. "**Female Weakness" Cured.**—Mrs. SARAH A. LOVELY, *Greenfield, Adair Co., Iowa*, writes: R. V. PIERCE, M. D. *Dear Sir*—"Having been ill a number of years, and having tried in vain almost every advertised remedy, as well as having paid nearly a hundred dollars to our local physicians, without benefit, I was finally induced to consult you. You advised me to send for your medicines I accordingly sent for your 'Medical Adviser,' six bottles of your 'Golden Medical Discovery,' six of your 'Favorite Prescription,' and six vials of your 'Pleasant Purgative Pellets.' When I first began using these I could not stand on my feet. In ninety days I could walk a mile, and do light housework; whilst in six months I was completely cured, and my health has remained perfect ever since. I recommend you and your medicines wherever I go and loan your 'Adviser' to my friends. Two of our most prominent physicians who have read your great work 'The People's Common Sense Medical Adviser,' pronounce it the best family doctor book they have ever seen."

"DO LIKEWISE." Mrs. E. F. MORGAN, of *Newcastle, Lincoln Co., Maine*, says: "Five years ago I was a dreadful sufferer from uterine troubles. Having exhausted the skill of three physicians, I was completely discouraged, and so weak I could with difficulty cross the room alone. I began taking Dr. Pierce's 'Favorite Prescription' and using the local treatment recommended in his 'Common Sense Medical Adviser.' I commenced to improve at once. In three months I was *perfectly cured*, and have had no trouble since. I wrote a letter to my family paper, briefly mentioning how my health had been restored, and offering to send the full particulars to any one writing me for them, *and inclosing a stamped envelope for reply.* I have received over four hundred letters. In reply, I have described my case and the treatment used, and have earnestly advised them to 'do likewise.' From a great many I have received second letters of thanks, stating that they had commenced the use of 'Favorite Prescription,' had sent the $1.50 required for the 'Medical Adviser,' and had applied the local treatment so fully and plainly laid down therein, and were much better already."

A THOUSAND THANKS. Mrs. CAROLINE BYERS, *corner Duke and Argyle Streets, Halifax, N. S.*, writes: "Dr. R. V. PIERCE, I thank God, and thank you a thousand times, for the relief that your valuable medicines, the 'Favorite Prescription' and 'Pellets' have given me. I am perfectly cured of a chronic sickness that had troubled me for years. How my heart is overflowed with joy and gratitude towards you, my tongue can never express."

DOCTOR'S MISTAKE. Mrs. HENRY PATTERSON, of *New York City*, writes: "I had been under an eminent physician's care for eight months for what he called 'spinal disease.' I became worse during all this time, when, chancing to see a copy of Dr. Pierce's Medical Adviser at the residence of a friend, I read that part devoted to 'Woman and her Diseases.' I soon became convinced that my disease was a uterine affection, which, as you say, caused *sympathetic* backache, inward fever, nervousness, and general debility. I commenced the use of Dr. Pierce's 'Favorite Prescription' and 'Golden Medical Discovery,' applying also the local treatment which he recommends in the *Adviser*, and in three months I was well and strong."

"ALL RUN DOWN." Mrs. V. H. PETERSON, of *Lockport, N. Y.*, had suffered for three years from "female weakness," was greatly emaciated and "all run down" as she expressed it, and Dr. Pierce's "Favorite Prescription" and "Golden Medical Discovery" promptly cured her, as they have thousands of similar cases.

OVER-WORKED WOMEN.

For "worn-out," "run-down," debilitated school teachers, milliners, dress-makers, general housekeepers, and over-worked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics.

NOT A "CURE-ALL." Dr. Pierce's Favorite Prescription is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Weaknesses and Diseases peculiar to women. It is a powerful, general as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It promptly cures nausea and weakness of stomach, indigestion, bloating, eructations of gas, nervous prostration, debility and sleeplessness, in either sex. "Favorite Prescription" is sold by druggists under **our positive guarantee.** For conditions, see wrapper around bottle. **Price Reduced to $1.00 per Bottle, or Six Bottles for $5.00.**

EVERY INVALID LADY should send for "The People's Common Sense Medical Adviser," in which over fifty pages are devoted to the consideration of diseases peculiar to women. Illustrated with numerous wood-cuts and colored plates. It will be sent, post-paid, to any address for **$1.50.** A large pamphlet, treatise on Diseases of Women, profusely illustrated with colored plates and numerous wood-cuts, will be sent for ten cents in postage stamps. Address,

WORLD'S DISPENSARY MEDICAL ASSOCIATION, No. 663 Main Street, BUFFALO, N. Y.

LIVER, BLOOD AND LUNG DISEASES.

LIVER DISEASE. G. W. LOYZ, *Trudhomme, La.*, writes: "For four years I suffered from liver complaint and attacks of bilious fever; loss of appetite, nausea, constipation, sometimes diarrhea, pain in the back of the head, right side and under the shoulder-blades, fullness after eating, general debility, restless nights, tongue coated, etc. After taking four bottles of 'Dr. Pierce's Golden Medical Discovery' and 'Pellets,' I find I am as well as I ever was.

GIVEN UP TO DIE. **Liver Disease.**—MERRIT STREET, Esq., Druggist, of *Bluff Springs, Ala.*, writes: "Miss ELIZA GLENN, of this place, had been sick for more than a year with a severe affection of the liver, but when she was at the lowest, she bought three bottles of 'Golden Medical Discovery' from me, and, although before using the medicine she was given up to die by all the attending physicians, her father assures me that she has now fully recovered."

A BAD CASE. SAMANTHA GAINES, *Lockport, N. Y.*, writes: "For six or eight years previous to 188, I had been troubled with a severe pain in the small of my back, also across my shoulder-blades, with considerable bloating of the stomach from wind; was so nervous at times I could hardly sleep; also troubled with dizziness and hard breathing spells. I was induced by my step-daughter, Mrs. Warner, of Olean, N. Y., to try the 'Golden Medical Discovery.' The effects were marvelous. After taking three bottles I was entirely cured."

MALARIAL FEVER. Mrs. CAROLINE SIMMONDS, *Medina, N. Y.*, writes: "I have been troubled with symptoms of malaria, with fever, for three years, but after using three bottles of your 'Golden Medical Discovery' and 'Pleasant Purgative Pellets,' I am happy to say that I am entirely cured, and to-day I am perfectly well and able to do my own work."

GENERAL DEBILITY. S. L. FISHER, *Sidney Plains, N. Y.*, writes: "Dr. R. V. PIERCE, Buffalo, N. Y. *Dear Sir*—My wife suffered for several years from general debility. She had become a confirmed invalid. The physicians who attended her failed to help her, and it seemed as if she must die. On reading one of your Memorandum Books, it occurred to me that your 'Golden Medical Discovery' might help her. I procured a bottle, and, after its use, a change for the better was noticeable, and after using five bottles, she was a well woman. I have recommended it to several, and in every case, it has produced good results. I can never feel too grateful to you for the saving of my wife's life."

DYSPEPSIA CURED. **Dyspepsia.**—LUCY A. WOOD, *Taylor's Store, Va.*, writes: "After many years of great suffering from the evils of dyspepsia, I was induced to try your 'Golden Medical Discovery,' and I cannot express the gratitude I feel for the great good it has done me. I do not suffer any pain from eating, and I enjoy life as well as anybody can wish."

DIARRHEA AND COUGH. Mrs. CURTIS BOGUE, *West Enosburg, Vt.*, writes: "Two bottles of your 'Golden Medical Discovery 'cured my cough and chronic diarrhea. It has worked like a charm in my case. It is truly wonderful. I walked over a mile last week to recommend your medicines."

"THE BLOOD IS THE LIFE."

Thoroughly cleanse the blood, which is the fountain of health, by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, vital strength, and soundness of constitution will be established.

Golden Medical Discovery cures all humors, from the common pimple, blotch, or eruption, to the worst Scrofula, or blood-poison. Especially has it proven its efficacy in curing Salt-rheum or Tetter, Fever-sores, Hip-joint Disease, Scrofulous Sores and Swellings, Enlarged Glands, and Eating Ulcers.

ABSCESS OF LIVER. ISAAC GIBSON, *Kenwood, Pa.*, writes: "My wife is getting well fast. When she began to use your 'Golden Medical Discovery,' our best doctors in Indiana County said she would die. They said your medicine would do her no good; that she had an ulcer on her liver as large as half a loaf of bread. Well, sir, to our surprise, when she began using your 'Golden Medical Discovery,' she commenced spitting up phlegm for some two weeks, and then commenced spitting up corruption and blood (it looked like what comes out of a blood boil) for some ten days. She now has been well for weeks."

SCROFULOUS SORES. Mrs. A. L. CORY, *Hadley, Crawford Co., Kansas*, writes: "My son, aged fifteen years, was taken down last January with swellings on his right shoulder, left hip and knee. He lay helpless for five months, when great abscesses formed, four of which continued to discharge at the time he commenced using your 'Golden Medical Discovery' under your advice. Now, after having used four bottles of the 'Discovery,' he is almost well and walks three-fourths of a mile to school every day. A scrofulous sore on his arm, which ran constantly for two years, has healed completely under the influence of the remedy named."

Boils and Carbuncles.—J. ADAMS, Esq., *Toledo, Ohio*, writes: "I have used nine bottles of your 'Golden Medical Discovery,' and the result is I am to-day free from boils and carbuncles for the first time in many years."

"Fever-Sores."—Mrs. A. H. CRAWFORD, *Linn Grove, Buena Vista Co., Iowa*, writes: "I am the person who wrote to you two years ago for advice respecting fever-sores on my leg. I took six bottles of your 'Golden Medical Discovery' and was cured."

Constipation and Ulcers.—Mrs. A. D. JOHNSON, *Georgetown, Ky.*, writes: "The 'Golden Medical Discovery' relieved me at once. I had a very bad sore on the back of my left hand for five months, and it cured that, as well as constipation and indigestion, from which I was suffering very much."

Scrofulous Tumor and Sore Eyes.—Mrs. S. E. GRAYDON, of *Greenwood, S. C.*, writes: "My daughter has been entirely cured of scrofulous sore eyes and a large tumor on her neck, by the use of your 'Golden Medical Discovery.' I have great faith in all your medicines."

CONSUMPTION, WEAK LUNGS, SPITTING OF BLOOD.

Golden Medical Discovery cures Consumption (which is Scrofula of the Lungs), by its wonderful blood-purifying, invigorating and nutritive properties. For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Severe Coughs, Asthma, and kindred affections, it is a sovereign remedy. While it promptly cures the severest Coughs it strengthens the system and purifies the blood.

The nutritive properties of cod-liver oil are trifling when compared with those possessed by Golden Medical Discovery. It rapidly builds up the system, and increases the flesh and weight of those reduced below the usual standard of health by "wasting diseases."

LUNG DISEASE. **A Wonderful Cure.**—DANIEL FLETCHER, Esq., *Gloucester, Mass.*, writes: "Nearly five years ago, I was taken sick with a disease regarding which the three physicians who attended me were unable to agree. One of the foremost physicians in Boston called it a tumor of the stomach, and treated me for that, nearly killing me with physic; another, a homœopathic physician, thought I had consumption. When taken sick, I weighed 157 pounds. I suffered from a heavy cough, night-sweats, kidney troubles, etc., and was reduced so rapidly that my physicians gave me up. They were unable to help me in the least. At that time I weighed but ninety pounds, and had not been able to lie down, but had to sit up in order to breathe. I had been confined to my room for six months, expecting to die. I was so bad at times that I could not allow any one to come into my room, as I could not talk; nor was I able to walk. I picked up one of your memorandum books on the floor of the hotel where I was boarding, and after reading it I began taking your 'Golden Medical Discovery,' and the first bottle brought me around so that I could walk around the room all day. I soon began to build up, and gained so rapidly that it astonished me. I have taken no other medicine since then, and have used perhaps twenty bottles in all of this medicine. I stopped taking it in August, one year ago. I feel that it has saved my life. I now weigh about 160 pounds, and I think, and my friends with me, that this medicine saved my life. It certainly is worth its weight in gold, and I consider it a wonderful remedy from its effect in curing all my ailments."

REDUCED TO A SKELETON. **Consumption Cured.**—W. J. HARTLEY, *Vera Cruz, Ala.*, writes: "I met with an old friend of mine not long since, and he told me of the very low state of health he had been in and he applied to our best doctor, but gradually grew worse under his treatment; was reduced to a skeleton, had a fearful cough and was thought to have consumption. While in this low state he made a visit to see his relations, and while in a distant town, he purchased a bottle of medicine called, 'Dr. Pierce's Golden Medical Discovery,' and took it, and by the time it was used he was as well as he ever had been. When I saw him, he looked to be in the bloom of health. His statement caused a great deal of inquiry, as he is a man of high standing."

SAVED HIS LIFE.

BLEEDING FROM LUNGS. JOSEPH F. MCFARLAND, *Athens, La.*, writes: "My wife had frequent bleeding from the lungs before she commenced using your 'Golden Medical Discovery.' She has not had any since its use. For some six months she has been feeling so well that she has discontinued it."

Consumption Cured.—J. ANTHONY SWINK, *Dongola, Ills.*, writes: "For five years I suffered very much from a terrible cough and debility. More than a year since I commenced to take your 'Golden Medical Discovery,' and it has completely cured me. I thank you for the splendid health I have since enjoyed."

Golden Medical Discovery is Sold by Druggists. Price $1.00 per Bottle, or Six Bottles for $5.00.

PAT'S LOVE EPISODE.

His Persistent Courtship Has a Spooney Termination.

"She's consintid at last! Fur two years I'd thoht a dale ov Nelly McCusker, only I had nothin' ov an Irish bye's bouldness to up and tell her that same! But yisterday sez I to mesilf: 'Pat Murky, now's yer toime, or niver!'

"Nelly was in the pantry washin' the dishes an' sumthin' shouted: 'Ax her! She's too busy to look at yer, onyway.'

"So I starts on wid: 'Troth, Nelly, it's a bad loife for a bye to be livin' alone.'

"'Yis,' sez she, wid nary a twinkle, 'Mike Ryan, that's jist bin sint to prison, is in a bad way, indade.'

"'Och,' sez I, 'there's many a bye that's lonely livin' rite wid his friends an' naybors. Sure an' I'm lonesome mesilf.'

"Cud ye luv a bye loike me."

"'How can I b'lave that,' sez she, 'whin ye've got a fiddul?'

"'Fidduls,' sez I, 'are cheerin', but I've got me two eyes set on somethin' cheeriner.'

"She forgot to ax me what that sumthin' wus, so I trotted off by another road, sayin':

"'Faith, Nelly, I'm goin' back 'cross the pond in Marchuary.'

"'Indade!' sez she, flurtin' the dishrag. 'An' it's a pity ye iver cum over!'

"'Yis,' sez I. 'Jane sed that same in her last lether.'

"'An' who's Jane?' axt Nelly, gettin' red loike the crabs on the table besoid her.

"'She thinks a power o' me,' sez I, onheedin'.

"'Shure an' that's quare. Is she young—as me?'

"'Yis.'

"'An' better lookin'?'

"'Paple moight think so.'

"'An' is she waitin' fur ye?'

"'Yis.'

"'She'll be changin' names, sure, I reckon?'

"'Yis.'

"'What's her name now?'

"'Jane—Murky!' cried I, wid delight.

"'Thin, sho's your sister?' sez Nelly, cross ez her mistress. 'Well, it ain't much matter, seein' ez how I've got a bye wotchin' fur me over in Ballycoran.'

"'What's his name?' axt I, turnin hot an' cold to wunst.

"'Barney Flynn,' sez she.

"'About me size?'

"'Yis.'

"'An' does he luv ye?'

"'Nixt to the Vargin.'

"'Is he coming to Americky, sure?'

"'No.'

"'Why not, bedad?'

"'Och, Pat, he's married alriddy!'

"'The spalpeen!' says I.

"'Don't give him hard names,' sez she. 'Barney Flynn's me step-bruther!'

"Then she lafft that purty laugh o' hern an' I wint up close.

"'Nelly,' sez I.

"'What, Pat?'

"'Cud ye luv a bye loike me?'

"'Troth an' I wudn't thry.'

"'Why not, darlint?'

"'Faith, I wus niver axt to.'

"'Thin I'll ax ye now.'

"'Don't do it,' sez she. 'I'm that full o' work I couldn't reply for a month,' an' the dishes flew'd ivry wich way es she sed it.

"But I sat down on the stip.

"'I kin wait,' sez I.

"'The misthress wull cum an' foind yez here.'

"'I'll be plazed to mate her.'

"'I'll tell her ye're a robber.'

"'Begorra, that's just what I am, fur I'm afther Nelly McCusker's heart.'

"'Ye'll be arrested.'

"'I have bin alriddy, and yer blu' eyes did it!' sez I. 'Cum, Nelly, lock me up in yer warm heart foriver.'

"'Och, it's boulted, an' I've lost the key.'

"'Thin I'll cloimb in at the winder.'

"'She hung her curly hed fur a minit, an' when she lookt up I axt her to be my woife.'

"'I'll guv ye foive secinds,' sez I. 'Ef ye wull, just fetch me the big pewter spoon ye've bin wipin'; ef you won't, thin put it back in he drawer.'

"Thin here's the spoon!"

"'She peeped at me over the top av it.'

"'D'ye mane what ye say, Pat?'

"'Yis, darlint,' says I.

"'Thin here's the spoon!'"—New York Mercury.

He Knew Their Weak Point.

Newly elected member of congress (to a committee of the Women's Suffrage association)—I will present your bill, ladies, before the house, but you must remember that every voter must be 21 years old, or over that age, to vote.

Middle-aged Committeewoman—Oh, dear me, girls, we never thought of that; we had better let it go for a few years until we are old enough.—Texas Siftings.

Proof.

"They wouldn't let me work, Susan, 'cause I'm out with them Knights, an' wasn't a 'union' man."

"Lawks, Jabez, I can stand your being out wid 'em nights, but jes take your penshun papers round an' show 'em you was a Union man an' always will be."—Harper's Weekly.

Shopping in the Country.

"No, ma'am; those are two articles we don't keep; but the oysters, I think, you will find at the postoffice, and bananas you can get across the way, at the barber's."—Harper's Bazar.

HOME AND FARM.

—Lemon juice and sugar, mixed very thick, is useful to relieve coughs and sore throats. It must be very acid as well as sweet.—*Chicago Journal.*

—Save all worthless heads of cabbage and the waste leaves for the cows. They will appreciate and eat them greedily and materially increase their flow of milk as a result of the extra feed.—*Indianapolis Sentinel.*

—Experiences teaches that the earlier in an animal's age full feeding is resorted to the better it is both for its vigorous health and rapid growth. Thus will the best returns be secured, whether the animal is intended for early sale or raising.—*Boston Post.*

—It will take at least five pounds of corn fed to a pig in a pen to make one pound of pork. When allowed to have all the grass it will eat, one pound of corn fed to a pig daily will make it thrive, and two pounds a day will cause it to fatten. The grass system is the cheapest and it makes the best meat.—*Chicago Tribune.*

—German mustard will keep a year. Eight tablespoonfuls of mustard, four tablespoonfuls each of salt and white sugar, a saltspoonful of cayenne, four tablespoonfuls of melted butter, the juice of one raw onion (a large onion squeezed through a lemon squeezer), and mix with vinegar.—*Boston Budget.*

—A new breakfast cup, or rather a favorite one of Napoleon's r vived, is to blend coffee and chocolate together, pouring each from the pot held two feet high above the cup. It is more restorative than coffee alone, and less rich than chocolate alone, and is held to be a happy marriage of the two. The invention was made, it is said, by Voltaire.—*Exchange.*

—For Cabbage Salad: Choose tender cabbage, and after removing stalk and ribs, cut the leaves into the finest strips possible. Cut some fat ham or bacon into very small dice and fry them until they begin to brown. Set the frying pan back from the fire, and add to the bacon equal quantities of vinegar and water and a little salt and pepper. Pour all this warm over the cabbage and serve.—*Boston Budget.*

—It is estimated that a bushel of apples makes four gallons of vinegar of such a strength that it frequently needs the addition of considerable water before it can be used as a condiment. The cost of production is not great, and a good article rarely ever sells for less than twenty-five cents per gallon. Such being the case there should be no waste of small or knotty apples as is usually the case.—*N. Y. Times.*

—It is the greediest cows, and these are always the best, which are most apt to choke with fallen fruit. Even they are not liable to injury if not fed when ravenously hungry and given plenty of time. It is mainly the haste with which fruit surreptitiously obtained is swallowed that induces danger. If a cow is choking, distend her throat with some solid substance, and then with the hand remove the obstruction.—*Michigan Farmer.*

—Quince Bread. Allow one apple for every six quinces. Boil the quinces and apples in water until they are soft; then peal them, remove the cores and press the pulp through a sieve. To every pound of pulp allow one pound of sugar. Clarify the sugar and then put in the pulp, adding a little finely-grated lemon peel. Boil until perfectly stiff, stirring constantly. Then put the mass in moulds or paper cases and dry in a cool oven. The "bread" must be stiff enough to cut in slices.—*The Caterer.*

LATE EXPERIMENTS.

Experience With Grasses at the Kansas State Agricultural College.

Prof. E. M. Shelton, of the Kansas State Agricultural College, reports that his experience with orchard grass indicates that larger yields of pasture and hay are obtained from a given area of ground when it is allowed to have its own way, unchecked by crowding; and that it is mistaken practice to sow very thickly in order to counteract the tendency to grow in tussocks. About a bushel and a half of seed are therefore enough for an acre. He has obtained excellent results by adding to this quantity of seed three quarts of red clover seed, both growing well together. He finds no amount of tramping or close grazing at any season to injure a well-rooted orchard grass sod. It is one of the earliest grasses to start in the spring and the latest to succumb to frost in autumn. He remarks that lucerne should not be pastured or mown during the first season, as it makes a feeble growth at first, but it is a good practice to run the mower occasionally over the surface high enough to miss the lucerne and cut off the tops of the weeds; after this it will take care of itself and of all the weeds within its reach. Prof. S. thinks it the most valuable for Kansas. Irrigation makes it invaluable. Very close grazing late in autumn is apt to be fatal to it. In answer to the inquiry as to the relative merits of red clover and lucerne, he remarks that while clover yields hardly more than one-half the hay or pasturage afforded by lucerne, yet in point of quality lucerne is greatly inferior. The stalks are nearly solid and quite woody, and there is much waste in feeding the hay. Speaking of the Texas bluegrass (*Poa arachnifera*) Prof. Shelton remarks that it is of a much coarser habit than the common blue-grass, that it will withstand the climate of Kansas, but he does not know "that it can be propagated from seed at all. We have plants of this grass, raised from seed, of two years' growth; the upper leaves were rendered brown by the last severe winter. It forms a dense sod, but has shown no tendency to throw up seed stalks. Our winters at the North are probably rather severe for its best success." Prof. S. strongly recommends sowing grass seed alone, after a generous preparation of the soil; holding that when sown with grain the grass operates as a weed on the grain, and the grain is a weed to the grass, and that after the young grass has been retarded and dwarfed by the grain, it suffers more from mid-summer heat when the grain is cut, than with a strong early growth, with no other plants to rob the soil of moisture.—*Ohio Farmer.*

RELIGIOUS AND EDUCATIONAL.

—The minutes of the last Presbyterian General Assembly show that 115 of their churches last year received additions of 50 and over each.

—Two or three clergymen in Brooklyn introduced the practice of giving brief talks to the children before beginning the morning sermon.—*Brooklyn Union.*

—Rome papers report that the Pope intends to establish a great university in the Lateran Palace. The head of the Universitias Leonina is to be the Jesuit Cardinal Mazzella.

—The Chinaman in America is being more and more cared for. According to the New York *Tribune* "twenty-two Chinese missions have been established in New York and Brooklyn since 1878, and are in a flourishing condition. What is more, a large proportion of the convert 'stick'"

—In an article published in the *Nouvelle Revue*, a French traveler declares that there is scarcely a village in Syria without a Protestant church; more than one may be found even in the gorges of Mount Hermon. At Beyrout there is a German hospital and American university, where the most practical sciences are taught, especially that of medicine.

—"A Century of Protestant Missions," is the title of a book published in England by the Rev. James Johnston. It makes the startling estimate that while 3,000,000 converts have been added to the churches, there are now 200,000,000 more heathen in the world than there were when Protestant missions began a hundred years ago.—*N. Y. Witness.*

The *Illustrated Christian Weekly* follows up the remarks of President Eliot, of Harvard, in denunciation of the tendency to extravagance that seems to be increasing among collegians with some appropriate remarks of his own. Owing to this extravagance, the scale of expenditure is raised to all, and it will cost the frugal student of to-day from 50 to 100 per cent. more than it did their equally frugal fathers to take a college course in similar comfort.

—In Brazil are found the best schools in South America. They are divided into three grades—the primary, the secondary, and the technical schools. The first two correspond to the various grades of our public schools. There is but one institution in the country corresponding to our college, namely, "College Don Pedro II." in Rio de Janeiro. The lower schools are free, and the law even demands compulsory attendance.

—The Bishop of Rochester does not approve of the popular clamor for brief sermons. "Do not," he advises his ecclesiastical subordinates, "readily give in to what is often only a worldly cry for short sermons. You need a great deal more experience than you can claim now for making a fifteen minutes' sermon that shall be really useful. Either so much will be compressed into it that it will become loaded and obscure, or what is perhaps more likely, so little will go into it that it will be impossible to endure it."

—The figures laid before the Methodist conference show the steady growth of the Methodist Church in Canada. The membership is placed at 197,479. There are 1,610 ministers and probationers. The church has property to the value of $9,975,043. The number of Sunday-schools is 2,675, with an attendance of 191,185. Sabbath-school papers have a circulation of 229,639. The work of temperance, according to the report of the statistics committee, has been carried on energetically, as is witnessed by the fact that 46,280 Sunday-school scholars have taken the total abstinence pledge.

WIT AND WISDOM.

—Etiquette is natural kindness put into thoughtful acts.—*Texas Siftings.*

—Architectural points of a newspaper. Its columns.—*New Age.*

—You can not expect a girl of the period to stand fire because she is accustomed to face powder.—*N. Y. Independent.*

—How is it possible to expect that mankind will take advice when they will not so much as take warning?—*Swift.*

—A Colorado jury found that the death of a gambler, who had been killed in a shooting affray, resulted from "lead poisoning."

—What you remember of what you read, and what you save of what you earn, represent your actual value.—*Washington Critic.*

—"If pigs were to grow on trees what would be a good name for them, Snooper?" "For what, Joggins, the pigs?" "No; the trees." "Don't know; what would?" "Porky pines."—*Pittsburgh Chronicle.*

—Old Party—Hey, officer, I want to go to Chicago; is this my train? Typical Metropolitan Policeman—Begorra, oi don't know; the men of some railroad company is fornist on the carr, an' oi suppose it's their prawperty. Have yees lost a train inywheres?—*N. Y. Mail.*

—School-teacher — Come, Bobby, surely you can spell Kentucky—K-e-n-t—Now think what comes after t? Bobby (in deep thought)—Well, I don't know which you mean. There's George for sister Belle, Tommy Brown for me, and the man pop always tells he will settle with in the morning.—*The Judge.*

—A crier in a Massachusetts town, whose duty it was to announce auctions, lectures, etc., was needed one day, and those who went to find him were greeted by the following rather equivocal sign nailed upon his door: "No crying for three weeks on account of the death of wife."

—We must learn to accommodate ourselves to the discovery that some of those cunningly-fashioned instruments called human souls have only a very limited range of music, and will not vibrate in the least under a touch that fills others with tremulous rapture or quivering agony.—*N. Y. Examiner*

THE TURKEY.

Thanksgiving a Day that Gives Special Zest to the Life of the Weary.

That we should have a season of Thanksgiving in which to express our gratitude to Him, the Giver of all good, is a duty doubly binding upon us. Not only has He given us all that is needed for existence, but He has added thereto manifold things with the sole end and intent of making that existence pleasurable. If man, in his obstinacy or obtuseness, sometimes fails in the full enjoyment of them, the fault is his. Desire, capacity and reason have been given him that he may the better appreciate the blessings bestowed; and if he makes bad use of three such attributes, the conclusion is plain that he would not make good use of a dozen others if he had them.

There are some discontented mortals in the world—and, perhaps, it would not be a world without them—who declare they have nothing to be thankful for; that Thanksgiving was made for the rich, not for the poor. An assertion we will not dispute; but, the possession of dollars does not constitute riches, nor the want of them poverty. There is many a man, rich indeed in all the wealth the world can bring him, who gets very little out of his dollars, unless it be anxiety and misery, and these are not exactly the kind of riches for which he feels like being thankful. No. The truly rich, indeed, are the ones for whom Thanksgiving was intended and made, and of these he is richest who is contented with the least. Men—and myriads of them—have found and could tell the world the solemn difference that lies between true and false riches—could they come from the grave to do so.

But our philosophy is running away with us and making us forget a very important adjunct to Thanksgiving,—or rather something more than an adjunct, for it has become, we may say, part and parcel of the day itself; namely, the turkey. Custom now mixes feasting and mirth with most of our celebrations, though the events they commemorate be sacred, or their origin religious in its character. And, in this, custom is wise. There can be nothing very wrong in the enjoyment of those things which have been given us for the purpose; indeed, to refrain, would be as Milton says, an evidence of ingratitude to the Giver. A free and cheerful mind, too, especially at hours of meat, is one of the soundest sureties for a long life. Hope may be the anchor, but mirth is the cable whose unrusted links hold our craft from dashing on the rocks.

Nor is there any thing incongruous in the mixture of cheerfulness with matters of a sacred character. Long-faced religion must stand, if it stands at all, upon other doctrines than that taught by Him, the Master; and its followers are not following Him when they practice it.

But to return to our turkey. How or when this delicious bird first became such an important feature at the Thanksgiving feast we are not prepared to say. That it is worthy of its place at any table is the opinion of no less an authority than Brillat-Savarin, who enthusiastically says:

"The turkey is, assuredly, one of the noblest gifts the New World has given to the Old. * * * It is the largest, and, if not the most delicate, is at least the most savory of our domestic fowls. It also has the exclusive advantage of assembling around it all classes of society. When our vine-growers and farmers give a feast on a long winter's night, what do we behold turning on the spit before a hot fire?—a turkey. When the useful manufacturer, the hard-working artisan, wishes to give a treat to his friends the *obligato* dish is a turkey stuffed with chestnuts and sausages. And in our high gastronomic circles, in those select reunions where politics are obliged to give way to a dissertation on taste—what is expected? What is brought up at the second course—a truffled turkey."

This general gastronomic fitness is quite as fully appreciated in the New as well as the Old World, and from Thanksgiving up into the month of February, or even later, the turkey has little respite from its martyrdom to the greed of man, and continues to grace with its juicy presence the tables of all classes that feel pecuniarily able to pay for it. Indeed, "Where do all the turkeys come from?" is quite as often asked as that other problematic one, which has been puzzling the brains of all humanity, regarding the destiny of the pin. We trust, however, that no dearth in the supply will ever be serious enough to cause us any gastronomic inconvenience, and that the Nation, as she meets the day upon the rim of the revolving years, will be ever ready with the prayer upon her lips: "Heaven bless Thanksgiving and the turkey!"—*The Caterer.*

Metallic Railway Ties.

The subject of the introduction of metallic railway ties as an imperishable and economical substitute for the present article has led an authority in this line to write that, after much track walking and observation of the condition of wooden cross ties in various stages of decay, he concludes that the principal cause of their short life is not natural decay, but decay hastened by frequent laceration and breaking of the wood fiber by the rail spike, the breakage in every instance being from the surface, which is unsheltered from weather and subject to constant strain from passing trains. Experiments in stone and iron ties, he says, have proved very unsatisfactory, the wood tie being declared by railroad men unequaled. Any thing that will render the service of the latter more lasting must prove a great boon. His own observation leads him to believe that a rail chair which will prevent the mutilation of the tie in question, and at the same time avoid the strain and wave motion imparted to rails by passing trains, will add to the average life of the wood tie nearly one hundred per cent. and would at the same time decrease the cost of track maintenance.—*N. Y. Sun.*

SAID TO BE TRUE.

Sanguine Encounter Between a Southern Gentleman and a Modest Stranger.

The following is strictly true. This statement is made in defense of every thing else which has appeared in this paper.

Several years ago a gentleman, and one, too, who became a distinguished General in the Confederate army, met, in Hot Springs, a man whom he thought he could beat playing billiards. "I can beat you playing billiards," said he, "for ten dollars a game."

The stranger modestly replied that he was not a billiard player, but that as he had a few dollars for which he had no particular use, he would play. The game began. The stranger beat the General ten games. The General paid the money and remarked:

"You have beat me playing billiards, but I can whip you."

The stranger, evidently a quiet man, replied:

"Is that the custom of the country? Understand that I have been here but a short time and that I desire to do as the people do."

"That is the custom," said the General.

"All right. I never had a fight in my life, but if it is the custom of the country to fight a man simply because you can't beat him playing billiards, all right. As a gentleman you will not take advantage of me."

"Of course not."

"You acknowledge that I beat you plying billiards?"

"Yes, and therefore I propose to whip you."

"And you won't take any advantage of me?"

"No sir. I am a gentleman."

"You have doubtless a lot of tricks in boxing of which I know nothing."

"I tell you, sir, that I am a gentleman. Therefore I have no tricks."

"All right."

They went into the back yard. The stranger was "skittish," but finally he came up. Friends "called time," and the boxing began. The Southern gentleman was knocked down. He got up and was knocked down again. Again he tried it and again he went down.

"Look here," said the Southern gentleman, as his friends were wiping the blood off his face, "where do you live?"

"In Ireland."

"What is your business?"

"I am a prize-fighter."

The Southern gentleman turned away. He had whipped every thing that had come along, but he was modest enough to acknowledge that there were some men who could whip him. To-day he is one of the most successful cotton planters in the South, and is peaceable, but fights when a man asks him to play billiards.—*Arkansaw Traveler.*

JAKE CONTRIBUTES.

How Old Man Dunder's Boy Assisted a Sunday-School Library.

"Looking for Jake, I suppose," said Sergeant Bendall as Mr. Dunder entered the station with a very long face.

"Vhell, I like to see Shake. I doan' know vhas I shall do mit dot boy."

"What is it this time?"

Mr. Dunder laid five alleged half dollar pieces on the desk in a row and replied:

"May be you see dose?"

"I do."

"May be it vhas goot money?"

"Every one of 'em is bogus!"

"Dot ish so. Some fellers pass 'em on me for beer sometimes vhen I vhas in a hurry. I puts 'em all in a box behindt der bar."

"Well?"

"Vhell, last Sunday Shake takes a notion to go mit Sunday-school. Dot vhas all right. It vhas der vhay ter make goot poys. Dis morning der superintendent comes down ter me mit dis bogus money and says:

"'Mr. Dunder, you haf some boy named Shake?'

"'Yes.'

"'He vhas mit our Sunday-school yesterday. He vhas a werry nice boy.'

"'So he vhas.'

"'We take up a leedle collection to buy some new books, und your son Shake puts all dis money in der box. What shall you do aboudt it?'

"Vhell, sergeant, you see how it vhas. Dot vhas some more tricks by Shake, und I haf to shell out two dollar und a half good money to make up."

"And where is Jake?"

"He shlips oudt vhen dot man comes in, und I doan' find him any more. May be you see him pretty soon? If so, yust tell him dot vhas sooch a good shoke dot I laugh all oafer, und dot he can come home. I vhill be laughing ha! ha! ha! vhen he comes in. I shall keep laughing till he goes down cellar mit me to see if dot gas-meter vhas leaking, und den——!"

"I see."

"If you hear somebody yell oudt dot he vhas kilt and won't neafer do so any more you go right along and mind your business. It vhas Shake and me, und I vhas taking dot bogus money out of his hide!"—*Detroit Free Press.*

A. T. Stewart's Mascot.

I hear a queer story of the superstition of A. T. Stewart. From the beginning of his career as a New York merchant until shortly before his death he imagined that his fortune was bound up in that of the little old apple woman who had a stand in front of his store. When his chief store was down by the City Hall this little old apple woman was encouraged and protected by him, and when he moved further up Broadway to the big white building now occupied by Denning, it is said that he personally superintended the carrying of the little apple woman's effects to a new stand outside of it. Here she stayed during all of its prosperity in these new quarters, but shortly before his death she disappeared. Stewart looked upon her as a mascot, and he often said, so the story goes, that when she died or left the place that his good luck would go with her. Strange to say it was even so. A few months after this Stewart began to decline, and the apple woman was hardly forgotten before he was in his grave.—*Carp, in Cleveland Leader.*

Queer Wrinkles.

JOKE ON THE LETTER F.

Husband (who is one of the funniest men unhung)—My dear, can you tell me why the letter F is like a cow's tail?

Wife—No, certainly not.

Husband—Because it is the end of beef.

A PRUDENT SUGGESTION.

Young Artist (to farmer)—Have you any objections to my painting the old mill across the way, sir?

Farmer—No, I haint no objections of you want to paint it, but it strikes me, stranger, it would look well 'nough whitewashed, an' would come cheaper.

IN JUST THE PROPER CONDITION.

"How's the good wife, Mr. Hayseed?" asked the minister of an Indiana farmer.

"She's got the fever'n ague powerful bad."

"I'm sorry to hear that. Is she in bed?"

"No; she's out in the back yard shakin' the dhin' room carpet."

A DELICATE COMPLIMENT.

"Mrs. Dearmont, of Chicago, and Mrs. Waldo, of Boston, are to lunch with me to-day," said a lady to her husband, "but I hardly know what to give them." "I would suggest," replied the husband, "that a delicate compliment to both ladies would be a dish of pork and beans."

A CHICAGO NIGHT PICTURE.

He came in very late, and while groping about in the dark delivered himself of the following:

"(Hic)—! (hic)—!! (hic)—!!!"

"Are you addressing such language to me, sir?" demanded his wife from under the bed clothes.

"No, m' dear," he said, "I wash speakin' t' th' coal scuttle."

AN INCONTROVERTIBLE FACT.

"Chicago may be a great city," remarked a St. Louis drummer to a professional brother from the former place, "she may be a big city, a high, wide and deep city, a wicked city, but"—and his manner was impressive—"she can't play ball."

The Chicago man, in his despair, hurled himself through the open car window.

A LARGE HEART.

"Simpkins is a soft fellow," remarked Miss Brown, "but he must have a big heart. He told me that a Chicago girl tried to trample on it, but couldn't do it."—New York Sun.

A Thanksgiving Dinner.

BEFORE.

AFTER.—Rural New Yorker.

He Was Fond of Her.

A man who was traveling along a country road in Arkansas was overtaken by a gaunt fellow who asked: "How fur yer goin' on this road?" "About two miles." "Wall, I tell yer whut I wush yer'd do. When yer get ter Dr. Gillum's—big white house on the right—stop and tell him that Bill Henley's wife is powerful sick and wants him right now." "I'll do so. Are you Mr. Henley?" "Yes, sir." "It's fortunate that you saw me, for instead of going all the way to the doctor's you can now go back and stay with your wife." "Yes, but you see I wanter go to the circus. That's the reason I can't go all the way to the dock's. They tell me that they've got ten monkeys an' er b'ar. Wall, here's whar I turn off. Don't furgit ter tell the dock."—Arkansaw Traveler.

Jottings From Life.

ON THE ROLLING DEEP.

First Passenger—Well, old boy, what's up this afternoon. Second Passenger—All but the soup.

A LIVING ILLUSTRATION.

"Yes," said a passenger in a street car, who was arguing with a friend, "some men are born great, others achieve greatness, and some"—just then a lurch of the car landed a fat woman in his lap—"and some," he concluded, "have greatness thrust upon them."

SHE FELT SLIGHTED.

"Mamma," said an innocent of 5 years old, "when I grow to be a woman, will I get married and have a wedding?"

"I hope so, my dear. Why do you ask?" said mother.

"Because, mamma, I sha'n't ask you to my wedding."

"No! Why not, Mamie?"

"Why, mamma, you didn't ask me to yours."

DISCHARGED.

Magistrate—The young woman says that your continued staring at her annoyed her excessively.

Prisoner—I never intentionally annoyed a woman in my life, your honor.

Magistrate—Then why did you stare at her so persistently?

Prisoner—Because she is pretty and I couldn't help it.

Young Woman—Let him go, judge.—Life.

A Mysterious Disappearance.

Jim Fargo is one of the best fellows in the world, with the exception that he will take an occasional drop. His wife, good woman, keeps her eye on him, however, and he finds it difficult to get anything without going some distance for it. Some friends called on Jim the other day and had hard work to find him. At last he was discovered crawling out from under the barn, covered with dirt and cobwebs, but evidently very sober. Eyeing himself for a moment, he turned an abstracted, dissatisfied look upon his friends and remarked briefly:

"It's singular what's become of that jug."—Detroit Free Press.

The Sunday Question.

A little girl of 5, anxious to do a little work on her doll's dress, sat down last Sunday with needle and thread and began sewing. Her mother told her to put her things away, because it was Sunday, adding: "You know God does not like to have you sew on Sunday." The little girl laid aside her needle and remained thinking for a few moments, when she broke out with: "Mamma, do you suppose He would care if I ripped a little?"—Boston Budget.

Reckless Extravagance.

The Winnipeg man who sold his wife and three children to a neighbor for $70 did very wrong. He should have held on for $75 anyhow.—Cambridge Chronicle.

NIGHT IN GREENLAND.

The Joys of Courtship in the Land of Tallow Candles and Barking Seals.

In the countries of the extreme north the nights are six months long. What a place that must be to spend an evening with a young a lady! Just think of it! Think of it, ye poor young swains who are obliged to make your call no longer than the miserable space of four or five poor hours. Think of the picnic an Esquimau dude has when he starts out for a call on his inamorata! He arrives at her house just after dark, and the two sit in the front parlor for a few weeks, not realizing that it is long past the hours of gloaming and that the room is as dark as the tricks of a politician. Then her mother comes in and lights the gas, saying: "I think you children would have better sense than to sit here in the dark. You had better have a little light on the subject."

Then the old lady skips out to give the young people a chance, for she doesn't believe in young girls losing time, and in Greenland there is only one night a year. After her departure the young couple sit on the sofa and look at the photograph album for a week or two. This is no novelty to them, as they know every photograph in the book, from hers, taken when she was in short skirts, to his, taken only yesterday morning, representing him leaning over the back of a chair, twirling his alleged mustache and smiling so persuasively that he looks as if he were trying to get trusted for half a dozen shirts. They sit closer and closer as they begin to get more deeply interested in the photographs. She snuggles up to him and points with her sealskin-gloved finger to the portrait of her cross-eyed aunt, who was bitten by a Spitz dog the night before. He is deeply moved, although he has seen the picture before, and, as he draws nigh to take a closer look, he presses his arms lightly around her waist, whose symmetry is concealed by her bearsk'n Mother Hubbard. After his manly arm has been there a few days, she notices it, calls him a "horrid thing," and flounces across the room to the piano. She plays for a fortnight, and then he, wearying of looking at the pictures in "Bunyan's Pilgrim's Progress" on the center table, tip-toes across the floor and embraces her just as she strikes a diminished seventh on the piano. She turns around on the piano-stool with an alluring little giggle, and their lips meet in one brief but blissful kiss, about four days in duration.

This is all very pleasant, of course, and they sit holding each other's hands and looking volumes of Byronic poetry into each other's eyes for a few more weeks, when an interruption takes place. The parlor door squeaks, and in the twinkling of a hook-and-eye the young man occupies the sofa at one end of the room and is reading the evening paper, while the young woman is looking over the music. It is an embarrassing two hours for both of them, when the father enters and looks suspiciously from one to the other. The old gentleman comes ostensibly to bring the young people some candies to eat by way of a little supper, to be washed down by a bowlful of snow. In reality, however, he is there to see how they are behaving themselves. Anon he leaves them, first winding the clock in a rather suggestive manner, and then setting the alarm four months ahead, in order that he may surely get up in time for breakfast.

What a relief when he is gone! The two kindred souls again proceed to intercommunion, and no sounds are heard but the barking of the pet seal out in the wood-shed and the suggestive ticking of the well-trained clock as the weeks fly swiftly by. It seems to the twain that the night is yet young, when in about two months and a half her big brother comes home from the theater where a melodrama in one hundred and forty-seven acts has been rendered by the regular stock-company. Her brother is late, because, being somewhat smitten on the leading lady of the company, he took her out for a little supper lasting the greater part of a week. He no sooner vanishes than a sound as of two heavy boots falling on the floor above warns young Lothario that he must soon depart. The old gentleman's boots falling on the floor mean that adieux must be cut short, and that there must be no hanging over the front gate for thirty-six or forty-eight hours. The young lovers grapple each other in a convulsive embrace. It seems hard that they should have to part, and that he must go so soon, but it must be. Fate is against them. Time waits for no man, and the Spitz dog is untied. They cling about each other's necks for three weeks, breathing vows of fealty, and then kissing her again (time twenty-four hours) he hurries to the gate just as a gruff voice is heard from the top of the stairs, saying:

"Clarissa, is that young man never going?"

Clarissa answers: "Do go 'way from the hall, pa. Somebody might see you."

Then she locks the door, goes to her boudoir and dreams about him—to her the only him in all this wide, wide world — for the next two or three months.

In some respects Greenland is the place to live.—*Chicago News.*

A Pretty and Sensible Change.

A novel and pretty change was made in a marriage ceremony performed in Brooklyn, N. Y. The groom and his best man took their place near the chancel rail on entering the church from the vestry. The bride came in on her father's arm ascended the steps, still holding his arms; the groom stood partially facing her. The couple maintained these positions, surrounded by maids and ushers, during the first part of the ceremony. At the words: "Who giveth this woman to this man?" the father led the bride forward, and with a bow, surrendered her to the groom, who led her forward, the couple taking their places directly facing the minister. The effect of the change was recognized as very beautiful and appropriate, the father keeping the daughter at his side until he gave her to her husband's keeping.—*Christian Union.*

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY, JANUARY 29.....1887

IRRIGATION.

The Proper Course to be Taken.

The fifth Progress Report presented by State Engineer Hall to the Legislature suggests the only means by which the great question of irrigation can ever be settled properly. Mr. Hall says there should be created an Irrigation and Water-rights Legislative or Code Commission, to be composed of at least five members, to hold office for two years from the date of their appointment, which should be about the first of July, 1887.

The members of this Commission should be citizens of high repute and attainments, and not directly interested in irrigation, or water-rights, or any rights or business directly dependent or in conflict therewith.

These Commissioners should be selected from localities well distributed throughout the State, with a fair representation from quarters where the chief questions to be considered are of special importance.

They should be well paid for their services, and be allowed their actual expenses while traveling on duty.

It should be made the duty of the Commission:

First—To inquire into the subjects of water-courses, water-rights, and irrigation throughout the State.

Second—To frame a complete code of laws with respect to the subjects of their inquiry.

Third—To report fully the results of their inquiries, and recommend a code or course of legislation on the subject to the Governor for transmission to the Legislature at its following session (1889).

Fourth—To attend upon the Legislature at its session for the purpose of explaining the subjects of their propositions, and facilitating the passage of the needed laws.

Fifth—To report to the Governor at the close of their term the results of their labors in the inquiry and before the Legislature, together with recommendations for the future, unless otherwise ordered by the Legislature to which their report is referred.

In the performance of this duty the Commission should be required:

a—To thoroughly familiarize themselves with the data now collected and in the State Engineer's office.

b—To examine the field throughout the State, in the light of this data.

c—To take and record testimony, receive statements, and hear arguments and explanations from persons locally interested in the subject of their labors.

d—And for this purpose to hold open meetings in the chief town of each irrigation county, and elsewhere if necessary and expedient.

e—To collect or cause to be collected such additional data with respect to the facts of irrigation, water-supply, storage, water-courses, dry lands; etc., as may be necessary or expedient for their purposes.

f—To examine and study the existing laws and decisions which bear on the subject in California.

g—To study the laws and systems of administration of water-courses and irrigation, of other countries and states.

h—To mold a system for California, conformable to our general theory and form of government, but to effect the ends generally found necessary to irrigation countries.

i—To point out how private rights in natural water-courses, such as may be recognized and insisted upon by our Supreme Courts, may be most readily set aside or extinguished for the benefit of irrigation, by process of law.

j—To make public the results of their proceedings and deliberations, from time to time, by reports of progress to the Governor, and thus enlighten the public on the subject, as the work goes on.

The Commission should have a Secretary to serve as reporter and recorder of the board and keep its accounts, and its office should be in the State Capitol building, where there is now collected, in the offic of the State Engineer and in the State Library, a vast fund of data and number of works and authorities for its information.

The State Engineer should be designated as the engineer to the Commission, should be required to present and explain to it all that he has effected and collected in his investigation, should furnish such abstracts of data as might be called for by the Commission, should accompany the Commissioners in their examination of the field and inquiries throughout the State—taking the maps and data necessary to facilitate their inquiries and understanding of the subject—and should collect such additional data as the Commission might require and call for."

Without the information such a Commission alone could furnish the Legislature will be groping blindly in attempting to deal with the subject.

Secretary Bayard has negotiated a new treaty with China. The treaty excludes Chinese laborers from this country for thirty years after its ratification. No Americans are allowed to enter China, but Missionaries and Merchants may enter and are to be protected. There is little doubt that the treaty will be ratified.

FOREST TREES.

A Valuable Report.

A copy of the First Biennial Report of the California State Board of Forestry (just received, contains highly interesting and useful information. Forestry is a subject almost as interesting to the people of this State as irrigation, and is, in fact, most closely related to that all important matter. Most of the native trees and shrubs are described in the report; trees of foreign origin that would be suited for planting in different soils and climates, such as California affords, are also described. Maps are given showing the extent of forest in different parts of the State. A communication to the Board from Mr. Milton Thomas, of Los Angeles, may contain a valuable hint for the people of Owens valley. From the experience of Mr. Thomas it would appear that the red gum tree would be well suited to our valley; he says:

"I have been requested by you to prepare a paper on the planting of forest trees for profit. I will say that I have had some experience in that line, having planted forty acres of blue gum; also, some red gum, catalpa, and black walnut; and I intend to plant out sixty acres more this coming Winter, and will plant the red variety, and some black walnut. I prefer the red gum (Eucalyptus rostrata) to the blue, from the fact that the red splits readily, and is much easier worked up into wood. The blue gum is hard to split, and costs much more to put into marketable shape. The red gum endures the frost well. Frosts that would injure the blue gum, and in some instances kill them, do not injure the red at all. The red gum does not grow quite as rapidly as the blue, but upon the whole, I certainly would advise people that want to raise a forest of timber for profit, to plant the red gum. Some plant these trees eight by eight feet, others six by ten feet. I planted ten by ten feet, believing that when they are six years old or older, I would have more timber to the acre than those who planted them nearer together. I have noticed that trees planted at a reasonable distance are always larger than those very near together. I believe that it has been demonstrated beyond a question that almost all kinds of trees or vines pay better planted at some distance from each other than when they are too near. Now, as the profit to be derived from planting forest trees is the most important question to any who desires to plant a forest, I will commence at the beginning by supposing that an individual wishes to plant, say, sixty acres. This would take twenty-six thousand one hundred plants.

Twenty-six thousand one hundred plants, at ten dollars per thousand	$261 00
Planting them out	175 00
Plowing the land eight to ten inches	150 00
Harrowing and pulverizing	40 00
Man to cultivate and care for, six months	360 00
End of first year's work	$986 00

The second year will require a man eight months, at $60 per month, including team and board, which would amount to $480. After that there would not be any expense to amount to anything. Total amount the first year, in round numbers, $1,000; the second year, $500. I have made liberal allowance. Having had experience, I am prepared to say those are the outside figures. If the trees are well taken care of when a year old they ought to average twelve to fifteen feet in height, and the second year thirty feet; and when five years old will pay a handsome profit. There being four hundred and thirty-five trees to the acre, eight trees when five years old will make a cord of stove wood, worth $9 per cord, which will cost half this sum to have it prepared for and delivered to consumers, leaving a net profit of $243 to the acre, or $48 60 net per acre per annum for each year of the five; and in five years after there will be as much or more wood as at the first cutting. It is quite possible that this timber will be used for various purposes, in the near future, that will make it still more profitable. It will be readily seen that after the first planting there will not be any expense, as all that is ever required, after the timber is removed, is to take off some of the sprouts. There is no reason why one planting will not last for fifty or one hundred years, and pay interest on a value of $500 per acre. The best time to plant in this county is February or March.

Abolish Them.

As a rule Boards of Commission established by the Legislature are costly nuisances. In many cases the establishment of these Boards has little else in view than making places for political bummers. A few genteel dead beats who cannot earn their board will get a friend in the Legislature to introduce a bill for the establishment of a "Board" of some kind, and when the bill becomes a law these lazy parasites are appointed members. Sometimes the salary fixed for the members is quite small, but when that is the case there is a chance to steal, and then the "Board" is not slow to improve the opportunity. Three or four years ago it was discovered that the members of the State Prison Board were drawing large sums of money to which they had no legal right, and yet these were all "honorable men." Legal proceedings were begun and they were compelled to pay back to the State their ill-gotten gains.

Assemblyman Hart, of Colusa, has introduced a Constitutional amendment relative to the Railroad Commission. It proposes the repeal of the section of the Constitution under which the Board was established, and to abolish the whole business. This ought to receive the requisite vote to place it before the people. The Commission is an enormous expense to the State and entirely useless. Those who have complaints can obtain redress much easier by preferring them directly at the central offices of the companies in San Francisco. There are several other useless commissions that ought also to be abolished.

A bill has been introduced in the Nevada Legislature for the abolition of bonds of all State or County officers. This is a measure of very doubtful wisdom. Those who are to be entrusted with the care of large sums of public money should give some security for the safety of the money. Men who support candidates for offices of trust should not object to become sureties for said candidates when they are elected to office. Bank officers do not give bonds, and the robbery of banks by officers is almost an every day occurrence.

TAKE SIMMONS LIVER REGULATOR

FAULTLESS FAMILY MEDICINE.

"I have used Simmons Liver Regulator for many years, having made it my only Family Medicine. My mother before me was very partial to it. It is a safe, good and reliable medicine for any disorder of the system, and if used in time is *a great preventive of sickness.* I often recommend it to my friends, and shall continue to do so.

"Rev. James M. Rollins,
"Pastor M. E. Church, So. Fairfield, Va."

TIME AND DOCTORS' BILLS SAVED *by always keeping Simmons Liver Regulator in the house.*

"I have found Simmons Liver Regulator the best family medicine I ever used for anything that may happen, have used it in *Indigestion, Colic, Diarrhœa, Biliousness,* and found it to relieve immediately. After eating a hearty supper, if, on going to bed, I take about a teaspoonful, I never feel the effects of the supper eaten.

"OVID G. SPARKS,
"Ex-Mayor Macon, Ga."

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, BODIE, CAL. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the north east corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence.

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 56 degrees 26 minutes E. distant thirty-six chain; thence.

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence.

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence.

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence.

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence.

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 412 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE, BODIE, CALIFORNIA, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 56 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence.

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence.

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence.

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence.

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence.

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence.

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W, thence.

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence.

9th Course—West thirty chains and twenty nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W, and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

SHADE TREES.
Good, Thrifty Trees
One and One-half Cents Each.

Cottonwood Trees
Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.
10,000 trees can easily be carried at once in a spring wagon.
Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.
These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, JANUARY 29.....1887.

Mr. W. Barrows left town last Tuesday for San Francisco.

Mr. O. I. Mairs has gone on business to Los Angeles. He went by way of Mojave.

Mining location notices and other legal blanks at the office of the INYO INDEPENDENT.

Jimmy Reynolds don't wear any necktie now; he finds that a boil is warm enough without one.

The children will be the better for attending Sunday school; the parents will be the better if they go with them.

Julius Roeper has sold his cattle and tract of land on the river to Thomas Webb. The cattle number one hundred and thirty-five head.

Mr. C. Anthony arrived at Independence last Monday from San Francisco. He stayed in town a day or two and then went on to Darwin.

The price of lead has increased to four and a half cents a pound. Silver is also increasing in value; a late quotation was 102½ for bar silver.

There appears to be quite a revival of mining industry in the canyon between Dayton and Virginia City. Silver City is reported to be quite prosperous at present.

Mr. N. G. Fairman arrived in town from Panamint at the beginning of the week. He expects to stay here about another week and will then make a trip to San Francisco.

Mr. and Mrs. Bardine and Miss Moore started last Tuesday from Independence on their return to Salinas, Monterey county. They expect to return here before long, to stay permanently.

The filthiest and most loathsome thing ever seen is a human mouth with tobacco smoke, profanity and obscenity coming out of it; and they are very apt to be all there at the same time.

J. W. P. Laird has received his commission as Register of the Land Office. It is his intention to start with Mr. Eibeshutz, the Receiver, for Bodie on Monday to bring all the belongings of the office to Independence.

Enough snow fell at Bridgeport, Mono county, last week, to admit of sleigh-riding for the first time this winter. The *Chronicle-Union* says the thermometer fell to two degrees below zero at that place on Friday night of last week.

Valentine's day will be duly honored by a party at Mair's Hotel, Independence. The party is sure to be pleasant; everybody is invited to attend. Care will be taken that nothing shall be omitted that will add to the enjoyment of the occasion.

An annual party at the Lake View Hotel is one of the institutions of Keeler. Mr. and Mrs. Barnes make these friendly meetings so pleasant that those who attend one are eager to go on the next occasion. The coming party on Valentines day will be the best yet.

Colonel Samuel Keefer, proprietor of the Grand View Hotel at Monrovia, Los Angeles county, went into a room of the hotel and shot himself through the head. Mr. Keefer was a wealthy man, well known in hotel circles. He owned the Grand Central Hotel in New York, and had been in bad health for some time past.

A young man murdered his own father in San Francisco last Monday. The parricide was a lazy loafer; the father advised him to be a man, take to honest industry and shun evil. For this the son seized a large knife and plunged it into the body of his father. The gradations are easy from idleness to theft and murder.

No young man can possibly succeed in life without early established habits of industry, frugatity and temperance. Opportunity comes in vain to him who has not studied to gain knowledge, practiced to turn it to the best use, and learned to control his own passions and impulses. Some men are born great, some achieve greatness, but no man has greatness thrust upon him unless he has some great merit.

San Francisco has become a perfect hell of atrocious murders. One of the most awful crimes yet heard of was committed last Monday morning. The victim was William Hayes, and the murderer his son, Daniel.

The family was seated at the breakfast table, when the elder Hayes commenced to remonstrate with his son because he did not go to work, and, instead of being a burden, become a help to support the family. This enraged Daniel, and, picking up a carving knife from the table, he rushed at his father and before the latter could evade him plunged the knife into his back.

The wounded man rushed out on the street, but soon fell, and died in a few minutes. The parricide was arrested, and is now confined in jail. The dead man was fifty-four years of age, and was employed in the California Cracker Company's works. He leaves a wife and several sons and daughters. The murderer is twenty-eight years of age and a native of Australia.

It is incomprehensible that judges and juries can permit murderers to escape hanging in such a murder cursed city; or that educated men can be hired to pervert just laws so as to screen bloody villains from deserved punishment.

Now Open.

I have fitted and newly furnished the house on the corner of Market and Washington streets, where I am prepared to accommodate the public with first-class Board and lodging. Large and comfortable rooms for families. Suppers furnished on short notice. Board by the day or week at regular prices. V. G. THOMPSON, Proprietor.

Typhoid, Scarlet and Yellow Fevers, Measles, Diphtheria, Small-pox, Cholera, etc.

Darbys Prophylactic Fluid will destroy the infection of all fevers and all contagious and infectious diseases. Will keep the atmosphere of any sick-room pure and wholesome, absorbing and destroying unhealthy effluvia and contagion. Will neutralize any bad smell whatever, not by disguising it, but by destroying it. Use Darbys Prophylactic Fluid in every sick-room.

A MUCH NEEDED CHANGE.

We Should Petition for the Passage of the Amendment.

The following is the text of the bill introduced in the Assembly by Mr. Gould, providing for the formation of a new Agricultural District:

Section 1.—Sections six and eight of an Act entitled "An Act to form agricultural districts, to provide for the organization of agricultural associations therein, for the management and control of the same by the State," approved April fifteenth, eighteen hundred and eighty, is hereby amended so as to read as follows:

Section 6.—The Counties of Los Angeles, San Diego, San Bernardino, Santa Barbara, and Ventura, shall constitute Agricultural District, Number Six.

Section 8.—The Counties of Nevada, Placer, El Dorado, and Amador, shall constitute Agricultural District, Number Eight.

Section 2.—The Counties of Alpine, Inyo, and Mono, shall constitute Agricultural District, Number Fourteen.

Section 3.—This Act shall take effect immediately.

Over two years ago the first suggestion for this change in the law was made in the INYO INDEPENDENT; it is a matter of very great importance to Inyo county, and we should petition the Legislature to pass the bill.

The Funeral.

A very large number of people attended the funeral of James W. Smith, at Bishop Creek, last Sunday. The funeral was conducted by the Masonic fraternity. Quite a number of the members of the Lodge at Independence, of which deceased was a member, were in attendance. The body was first taken to the M. E. Church, where Rev. C. Logan preached a sermon suitable to the occasion. At the grave Brother A. R. Conklin read the funeral service of the order; this was done in a most impressive and feeling manner. The deceased had no relatives in this country; yet his nearest kindred could not have cared for him more tenderly in his sickness, nor shown more respect for his memory than the friends who waited about his bed and finally paid the last taibute of respect at his grave.

Rather Small.

A physician who was formerly located at Candelaria, but who is now living in one of the southern coast counties, writing to a friend at Independence says: "I have a beautiful ranch here, as level as a floor and can raise anything on it, but would rather live on one meal a day east of the Sierras than have abundance here. The people here have small souls; if a million of such were put into a mustard setd they would rattle." In fact, the open-hanked, generous ways of the "days of forty-nine" are still the rule east of the Sierras, and only there; and one who has been long used to those ways is filled with disgust at the closer ways and narrower economy fast becoming the rule west of the mountains.

Agreeably Disappointed.

Mr. Bardine and party, who were here lately from Monterey, were very agreeably disappointed in our winter weather. They had been urged not to come, and were told that if they did venture into Owens valley at this season they would not be able to get out of doors for snow. They were much pleased to find the weather a great deal pleasanter here than in Monterey county, and to learn that snow very rarely falls in Owens valley, and on those rare occasions never lies upon the ground more than a few hours. The party went away firmly convinced that Owens valley has the most delightful winter weather upon the Pacific Coast.

The Marble Mill.

Mr. Luce, Superintendent of the marble quarry, says the mill, so far as completed, is running in good shape. A gang and one rip saw are in operation and they are doing good work. The quality is fine; there is no fear as to quality or quantity. Mr. Luce was assured that all the machinery for additional saws would be delivered at the quarry about the middle of December. But the makers failed to be on time, and up to the beginning of the present week the last piece of machinery had not been delivered. There is plenty of demand for all the marble the mill can turn out when working up to its full capacity.

Finished.

The new Court House is finished. It is a neat looking building outside and in. So far as the Contractor is concerned the work is all that could be wished for, and the material used in the building is all good. But as some urged at the start, the plan of the building is not satisfactory in some respects The Court room is entirely too small, and even now, before the building is occupied, it is evident that one or more partitions must be torn out to make the room larger. This can be done at small cost and without injury to the building. The county has got full value for all money expended on the building.

Pilfering.

Of late some petty thieving has been done around town. Among other things several dozens of eggs were stolen from the cellar under the Norman House and a few nights ago a number of hams were stolen from Mrs. Lewis at Camp Independence. It is quite likely that a no very extended search would be necessary to find some of the stolen property; a search warrant in the hands of an officer might bring it to light.

Seed.

At the request of Hon. H. H. Markham, our representative in Congress, a large package of seeds of many kinds has been sent to the office of the INYO INDEPENDENT. Many of these seeds are of valuable plants suited to Owens valley. Farmers and gardeners who will agree to properly plant and cultivate these seeds are invited to call at this office and they will be supplied free of charge.

The New Supervisor.

The Governor has appointed R. J. Eldred, Supervisor, to succeed the late George Stevens. The appointment is a good one, no better selection could have been made. Mr. Eldred has a good knowledge of business and is familiar with the affairs of the county. The commission of Mr. Eldred was received last Wednesday.

Go Ahead.

There is a movement on foot to organize a company and issue bonds to build a town hall. The building is very much needed; not a week passes but it would be used for some public purpose. Nearly every man in town stands ready to take some stock in such a labor and pay for it in material, labor or coin. Let us go ahead and do it.

Printing Office Moved.

The office of the INYO INDEPENDENT has been moved into the new building erected for it just east of the Court House yard.

Try Him.

Before sending money out of the county for goods, every housekeeper should call and examine goods and prices at the store of Nathan Rhine. Mr. Rhine is determined that there shall no longer be any excuse for sending away for goods on the ground of quality or price. Try him.

More Buildings.

Mr. M. E. Gilmore has begun work on a nice dwelling house, just north of the residence of Mr. A. R. Conklin. The building is for Mr. Nelligan, the painter. Mr. Rhine will begin work immediately on two new buildings; one a dwelling house, to be located just east of the store, and another a large warehouse.

Reorganized.

The Sunday-School at Independence was reorganized last Sunday. Mr. Henry L. Clarke was elected Superintendent; Mrs. Woodin, Assistant Superintendent; Mr. R. L. Peeler Secretaay and Miss Katie Hardy Treasurer. The school is steadily growing in members as more interest is being taken by parents and grown up young people. The meetings are held each Sunday forenoon in the Methodist Church. Everybody is made welcome.

Public Spirit.

The George lots at Independence, better known as the Blaney lots, were sold at public auction last Monday. There were several bidders, but the property was sold to Mr. A. W. Eibeshutz. The purchase was made in pursuance of a bond given to the Supervisors, that if the new Court House should be placed on the site it now occupies, then these lots should be bought and deeded to the county to make part of the Court House Yard. The lots were occupied by the Blaney House hotel up till the time of the great fire, last June. This addition to the Court House yard will make it large enough to be quite an ornament to the town when properly improved. The public spirit that prompted the purchase and gift of the property to the county is something that deserves hearty commendation.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Ore Shipments.

From the Brown Monster Tom Bastian and his partners shipped two car loads of ore to San Francisco a few days ago.

At Darwin a good deal of ore is being taken from the Lucky Jim and Defiance mines. A miner who went through all the workings of the Defiance lately, says the mine now looks better than ever before.

From Lookout Frank Fitzgerald is shipping ore regularly, teams are constantly employed hauling from those places to Keeler.

Tom Crough recently took out and shipped some fine ore from the claims he is interested in at Red Hill.

Wilmot, Whitaker and Thorpe had a a large stock of supplies taken to the White Hill at the end of last week, and have begun work under a lease for one year from Barnes & Kehoe.

Great Benefit to Los Angeles.

In a lengthy article on the career of the late Remi Nadeau, the Los Angeles *Express* says:

"When the mining boom was on at Cerro Gordo, which was from 1866 to about 1872, Mr. Nadeau was prepared to do the freighting for that country. His partners in this great enterpise were Judson and Belshaw of San Francisco. It was a great undertaking. The company owned, at least, one thousand head of mules, innumerable wagons and employed an army of men. Stations were established, water developed and roads built between this city and the mountains of metal of Inyo county. The enterprise was of great benefit to Los Angeles as immense sums were paid out each month for wages and supplies. This proved exceedingly remunerative, and Mr. Nadeau soon found himself a very rich man."

The great benefit to Los Angeles that resulted from the enterprise of Mr. Nadeau and his partners will be far exceeded by the completion of railroad communication between the city and Owens valley. The trade that will follow the completion of the railroad will not be temporary, like a mining boom; it will endure for all time, and will increase with the years. Having known the value of Owens valley business once, Los Angeles should hasten to regain it.

Meteorological Summary for December. 1886, Keeler, Cal.

Mean actual barometer	26.447 inches.
Mean temperature	45°
Highest temperature Dec. 20th	62°
Lowest temperature Dec. 11th	30°
Absolute range of temperature	32°
Mean relative humidity 50 per cent.	
Prevailing direction of wind S. W.	
Maximum velocity of wind, direction and date 29 miles S. and N. W. 9th.	
Precipitation	0.00
Number of clear days	16
Number of fair days	14
Number of cloudy days	1
Number of rainy days	0

Light frosts occurred as follows: 1, 15, 18, 19, 30, 31. Heavy frosts on the 23, 25, 26, 27.

Meteorological summary for the year ending Dec. 31, 1886.

Mean actual barometer	26.306 inches.
Mean temperature	60°
Highest temperature Aug. 10th	103°
Lowest temperature Nov. 22d	24°
Annual range	79°
Mean relative humidity 42 per cent.	
Prevailing wind S. W.	
Total precipitation 1.94 inches.	
Average cloudines 16 per cent.	
Clear days	291

AGENT FOR W. R. STRONG & CO.

S. A. DENSMORE,
Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer. Active, honest persons all over the country, with or without team.

JOHN C. EVANS, STOUTLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and tables to pay for it."

JOHN P. DODGE, JR., jeweler, NORMAL, Ill., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $1000."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

MIMICRY IN NATURE.

Some Curious Scientific Facts Concerning Many Species of Butterflies.

Rev. W. J. Holland, pastor of the Bellefield Presbyterian Church, and one of the most noted etymologists of the country, has received some very rare and valuable accessions to his already large collection of butterflies. The new specimens come from China, Japan, Africa, Switzerland and parts of this country. One of the most interesting is that sent by Rev. B. C. Henry, author of the "Cross and Dragon," formerly of Sharpsburg, but now missionary in the island of Hainau, China. Rev. Henry was the first white man to collect insects in that island for scientific purposes. He has sent Rev. Mr. Holland some five hundred and fifty specimens of butterflies, representing about one hundred different species. The specimens belong to what is known as the Siam fatuna, and contain six species hitherto unknown to science.

In showing the new specimens to a reporter, Mr. Holland said: "These butterflies exemplify in a striking manner what is known in science as mimicry. Let me explain. Here is a male butterfly," he said, pointing to one of the finest-looking specimens, "and by its side is the female. This female differs greatly in appearance from the male of her own species, but is almost the counterpart of the male of another species. Now that male, to which the female is so similar in appearance, belongs to a species that, on account of peculiar excretions from the body, enjoys immunity from the ravages of birds. For some reason unknown to science, there are certain species that are thus free from the attack of birds. As the propagation of the butterfly depends principally on the female, nature has provided that in those species not favored with immunity from bird attacks the females should resemble the forms which enjoy this immunity. Not only is their mimicry of other forms of butterfly, but of the bark of trees, the blades of grass and other natural objects on which the female butterfly rests.

"I have just received a collection of fifteen hundred specimens from the west coast of tropical Africa, where Du Chaillu started out to hunt gorillas. The African butterflies present a great variety of form and color. In the Madagascar butterflies the male is constant in the same species, but the female shows as high as seven varieties of form. This variety of form is no doubt due to the principle of mimicry by which the female butterfly is protected."

"On this theory, then, the Arctic butterflies ought to be white," suggested the reporter.

"The Arctic butterflies are often white," continued Mr. Holland, "but not because that is the color of the snow. In Greenland the butterflies are the insects of the summer as well as here. Some of our butterflies are almost the color of the vegetables on which they perch and hence can scarcely be distinguished from their surroundings.

"It is a curious fact about the Greenland butterfly that the same species which here mature in forty days requires in that climate over two years. There is one species of butterfly that is a great cosmopolite. It is found in China and in Pennsylvania. I refer to the thistle butterfly. It has followed the thistle-down all over the world. The intelligence of butterflies is shown in their wonderful memory. They will fly about for hours and then return to the identical leaf from which they started and go to bed. The largest butterflies, the orthnoptera, measure as high as eleven inches across the wings from tip to tip."

"How large a collection have you now?" was asked.

"I never keep an account of the number of specimens, as that alone does not make a collection valuable. I think I have the most complete collection of this country. Of the 639 specimens in America north of the Rio Grande I have an abundant representation. But my collection is not complete, nor will it be until I have about 750,000 specimens. That will be in the days of my great-great-grandson perhaps."—*Pittsburgh Commercial-Gazette.*

The Great Germanic Family.

The annual statistical register of the German empire for the years 1884-85 has just been published. It shows that in the entire world the number who speak the native language and follow German customs may be calculated at 70,000,000. Of these 42,000,000 belong to Germany, 8,000,000 to Austria, 2,000,000 to Hungary, 2,000,000 to Switzerland, 1,250,000 to Russia, [illegible] that there still remains 13,750,000 for other parts. Of these 3,250,000 are scattered in the remaining European countries, 7,000,000 in the United States and Canada, and 500,000 in South America. The remnant of 3,500,000 may be divided between Africa, Australia and Asia. No other European nation has yet attained to the high figure of 70,000,000. The great Germanic family is far more numerous than either the Slavs or the Latins.—New York Mail and Express.

The Best Known Glaciers.

The best known glaciers are those of the Alps—numbering 1,150, as Professor Heim has just ascertained, and covering a total area of more than 500 square miles—but important ones also occur in the Pyrenees, the mountains of Norway, Spitsbergen, Iceland, the Caucasus, the Himalayas, the southern extremity of the Andes, in Greenland, and on Antarctic lands. One of the Spitzbergen glaciers stretches eleven miles along the coast, and projects in icy cliffs 100 to 400 feet high. The great Humboldt glacier of Greenland, north of the 79th parallel, has a breadth of forty-five miles at the foot, where it enters the sea.—Arkansaw Traveler.

Called Him "You."

The depths of wickedness to which even a Quaker child can sink make one readily believe in the doctrine of total depravity. Two little Quakers quarrelled, and after saying words at each other, one of them in a tremendous burst of rage, with clenched fists and blazing eyes, shouted: "Thee's you." The other boy looked at him in horrified silence. Then he solemnly said: "I shall go and tell mother that thee swored."—New York Sun.

Some of the diamonds owned by Mrs. A. T. Stewart were so large that she never wore them outside the house, fearing that people would take them for imitations. Stewart bought them in early life to show people that he was getting ahead.—Detroit Free Press.

THE PRESIDENTS.

Their Standing from a Strictly Financial Point of View.

Of the earlier Presidents Washington was the wealthiest. When he died his estate at a moderate valuation was worth $300,000. Adams was a poor man, but independent in his last years, thanks to the good management of his wife. Jefferson was wealthy when he became President, but lost his property and died insolvent. His home was sold, and his daughter was saved from want by the generosity of South Carolina, which gave her $30,000. Congress bought his library, and with the proceeds his debts were paid. All of his descendants are poor. Madison left a handsome property, and was wealthy when President. Congress bought his manuscript papers, paying $30,000 for them. Mrs. Madison's son, Payne Todd, squandered her property, and in a few years after her husband's death she was poor. His estate was valued at $280,000 in 1816.

James Monroe died insolvent. He sold his Virginia estate after the death of his wife, and died in New York.

John Quincy Adams left $50,000. His successor, Andrew Jackson, was a rich man for his day. The Hermitage, which he left to his adopted son, is now the property of the State. Martin Van Buren left a fine estate valued at $300,000.

James K. Polk left about half this amount, and, as he had no children to make use of it, his widow has enjoyed t since his death.

John Tyler was not a rich man, though he owned a fine farm in Virginia and a number of slaves. He had a large family, and was so long in public life that he went to the White House poor. What he saved in office enabled him to live in comfort afterward. His second wife had means, and their eight children were well educated.

Mr. Fillmore, by a second marriage, became a wealthy man.

Franklin Pierce left no child to inherit his property, which was valued at $50,000.

President Buchanan was worth $250,000, which he gave to his nephews and nieces.

Abraham Lincoln's estate was valued at $75,000.

Andrew Sohnson had $150,000 when he left the White House. A part of this amount was lost by the failure of the Freedman's Bank,

President Grant never had any money until he became Lieutenant General. His salary and the generous gifts of his friends made him a millionaire. All of his property was lost in the Grant-Ward failure. His wife is independent again through the sale of his book.

Hayes is very wealthy.

The gifts to Mrs. Garfield made her rich. Her husband left a small property, worth not more than $40,000.

Ex-President Arthur is worth about $100,000, and Cleveland has about the same amount.—*N. Y. Sun.*

The Russian Guards.

Created in 1691, they received their baptism of fire in 1695-6 during the two Azof campaigns, after which came the following exploits in their order of date: Narva, 1700; capture of the fortress of Nienschanz, 1703; battle of Pultawa, 1709; siege of Viborg, 1710; battle of the Pruth, 1711; siege of Stettin, 1712; of Eigenstadt Hango, 1713; capture of Otchakof, 1737; capture of Khotine and battle of Stawngans, with the Swedes, 1739. After this a long interval elapsed before the Guards reappeared in the field at Austerlitz in 1805. They were present afterwards at Friedland in 1807, Borodino in 1812, Bautzen, Culm and Leipsic in 1813, and La Fere Champenoise and Paris in 1814. In 1828 they fought in Turkey before Varna and in the action of Hadji Hassan Larom. In 1831, during the Polish war, they took part in the combats at Szimanowo, Przetyn, Rudki, Ostrolenka, and in the assault on Warsaw. In 1863 they served during the Polish insurrection, and their last active service was during the Turkish war of 1877-8.—*Novoe Vremya.*

Quit Coddling Their Locomotives.

B. S. Gillette, of Detroit, who was here in attendance on the meeting of the Brotherhood of Locomotive Engineers, said to me: "A great change has taken place in the feeling of engineers with reference to the engines they run. In the old days a man became attached to his locomotive. He made it a part of his daily life. He got into the habit of looking upon the machine as a human being. He was tender with it. He was careful not to push it to its utmost tension, no matter what the occasion. Gradually the feeling has spread that an engine is constructed to do a certain amount of work and that it must be made to do that work regardless of the wear and tear of the machinery. Railroad superintendents prefer men for engineers who understand that machinery is made for use, and who will push it for all there is in it, if necessary. Of course, they want men to be careful and prudent. But they do not want the engines coddled like sick babies."—New York Tribune.

German Chemicals in Japan.

Among the chemicals which are imported into Japan, the following are stated to be almost exclusively of German origin: Boracic acid, carbolic acid, salicylic acid, tannic acid, quinine, iodine and opium preparations, chloral hydrate, chloroform, cocaine hydrochlorate, cream of tartar, glycerine, and santonine. German papers report with evident glee that at the University of Tokio the lectures in pharmacy are given in the German language, in which also the books used are printed and the examinations held.—New York Post.

Buoyant Suits for Seamen.

A Norwegian engineer, W. C. Moller, has found that reindeer hair and skin possess remarkable buoyancy, and when the unshorn skin is used as a life-belt it has the advantage over cork of warming the wearer while in the water. He attributes great value to suits made from reindeer hair, one of which of the weight of a pound may keep a man from drowning, while it furnishes greater protection from cold than oilskin and other materials.—Arkansaw Traveler.

A Science of Manners.

Manners are an art. Some are commendable, some faulty; but there are none who are of no moment. How comes it that we have no precepts by which to teach them, or at least no rule whereby to judge them as we judge sculpture and music? A science of manners would be more important to the virtue and happiness of men than one would suppose.—Detroit Free Press.

THE INDUSTRIAL WORLD

—Whale-fishing has steadily decreased during the past ten years. This season, however, it has had a healthy revival.—*N. Y. Sun.*

—A grape-grower in the Allegheny valley, Pennsylvania, claims to have raised eighteen thousand pounds of grapes from five acres of ground this year.

—The yield of wheat this year on the sagebrush lands of Nevada, that were considered worthless for agriculture, has averaged fifteen bushels to the acre.

—China is beginning to yield to the popular appetite for industrial exhibitions. An international exposition is contemplated to be held at Shanghai in 1888.

—Minneapolis mills can make over 33,000 barrels of flour a day. Kept running all the time, they would furnish bread for one-fourth of the people of the United States.—*Chicago Tribune.*

—A man named Parker has invented a plan for sawing off trees close to the ground. Where there are no wind shakes this, it would seem, must save a good deal of valuable lumber.—*Troy Times.*

—Russia is going to have a railroad tunnel three miles long, at a cost of $3,500,000. She has 15,000 miles of railway, but her only tunnel is 700 yards long. More great works of this kind are contemplated, and as Russian engineers are ignorant of tunnel-making, there is a demand for foreign skill.

—Millions of washboards are made and sold in the United States every year, and at least 7,200,000 are sold yearly between the Allegheny Mountains and the Missouri river. There are two factories in Cleveland which turn out 200 dozen washboards a day, one in Toledo which turns out 300 dozen daily, and two in St. Louis which turn out over a million a year.—*Chicago Tribune.*

—It is claimed that in the production of cherry lumber McKean County, Pa., leads all the counties in the State and is second to Lycoming only in the manufacture of lumber of all kinds. There are forty-three saw-mills in the county, and they cut 100,000 feet of hemlock lumber annually. Three hundred and forty-three thousand dollars are paid in wages in manufacturing this lumber.—*Pittsburgh Post.*

—Miss Tammie Curtis, daughter of Jacob Curtis of Monroe, Me., distinguished herself during the last haying season as the champion mower and horse-raker. "She has driven the mowing machine to cut twenty-five tons of hay, and the horse-rake to rake the same," says the Belfast *Age*, "and, as her physical organization called for more exercise, she cheerfully pitched the hay one way, and stowed away the same in the barn. Mr. Curtis says he has not got his hay in in any better shape for many years, and in fact his field never was moved so well before."—*N. Y. Post.*

PUNGENT PARAGRAPHS.

—Forty-two new ice factories have been started in the South during the past nine months.

—"Keep your temper, my dear sir," said an old judge to an irritable young lawyer; "keep your temper—it is worth a great deal more to you than to anybody else."

—Misery loves company and company causes the good housekeeper a good deal of misery too, when she hasn't anything cooked in the house.—*Somerville Journal.*

—It has been remarked that the youth who wears the tallest collar and carries the largest stick wears the smallest hat; but why it is nobody seems to know.—*Philadelphia Call.*

—"My dear," said a mother annoyed at some incautious remarks of her little girl, "why can't you keep a secret?" "Because," said Little Mischief, demurely, "two of my front teeth are gone, mamma."

—The Sunday *Herald* has an article on "A Girl's Room—How to Make It Attractive?" But the article misses the best answer to its own question, to wit: Put the girl in the room.—*Lowell Courier.*

—It has been revealed that when Daniel Webster got stuck for a word he used to rub his nose with his finger. This is profoundly interesting, but not strange. Now, if he had rubbed his nose with his heel or even his elbow—but the subject is getting too deep.—*Philadelphia Call.*

—Boston has a young man with two hearts. It is supposed "they beat as one." Should he divide his hearts with two young ladies, we don't suppose either of the latter would be satisfied. They would call him a heartless wretch, despite his surplus of cardiac organ.—*Boston Post.*

—"George," she murmured fondly, "do you believe in supporting a monopoly?" "No, dear, I don't. I believe in helping a monopoly along just as little as I can. But why do you ask?" "O, I don't know, only I thought maybe if you didn't you would have turned down the gas."—*New Haven News.*

—Caller—"You are sure Mrs. De Bangs is not at home?" Maid—"Yis, ma'am." Caller—"I'm very sorry; I wanted to interest her in the Society for the Amelioration of the Wrongs of Servants, and shall not have time to call again." Maid (with sudden interest)—"Wait a minute, ma'am, and I'll thry her again."—*Tid-Bits.*

—Mr. Doubledollar—"O, yes, Minnie is very accomplished. Why, she sings in French, Italian and Spanish." Mr. De Smythe—"Yes, that is very nice; but I should think she would learn some of those pretty little English songs that are so popular n w-adays." Mr. Doubledollar—"Why, that's an English song she's singing now." Mr. De Smythe—"Indeed! I thought it was French, Italian and Spanish."—*Life.*

—Pretty girl—"An old woman told me to-day that I ought to get some love-powder and she said she guessed you kept it." Druggist—"You can mix it yourself by mixing half a teaspoonful of sugar with a minute quantity of powdered starch." "Yes, and how wil I give it to him?" "You must invite him to a supper which you prepare, and slip it into his coffee." "And wil that make him want to marry me?" "It will if the coffee is good and everything else well cooked."—*Chicago Tribune.*

Baby falls and bumps its head,
Baby bawls, they think it's dead,
Mamma gets St. Jacobs Oil,
Rubs the baby; stops turmoil!

Progress demands elevators. They prevent men from being kicked down stairs in business buildings.

A prominent farmer of Bowling Green, Howard county, Md., Mr. J. T. Ridgely, said his four children were sick with sore throats and coughs at the same time. Red Star Cough Cure cured them in a week. No opiates.

A KENTUCKY OPINION.

Mr. A. P. Baker writes from Friendship, Ky.: "I was so low down when I commenced, I was not able to use it regularly. I believe it would have cured me if I could have had a fair chance. It has done me good. The neighbors notice the improvement; some of them say I 'look so much better,' and others say, 'I never expected you to look as well as you do.' I have been sick so long. *It has cured my wife. She is fifty odd years old, and her general health is better than it has been since she was grown.* If she could see everybody that is afflicted, she would recommend your Home Treatment. *She thinks it will cure all diseases.*

Letters from patients in nearly every State and Territory appear in the January Health and Life, which, with the brochure of nearly 200 pages, can be had, free, by any applicant for it, by mail or in person, from Drs. STARKEY & PALEN, 1529 Arch street, Philadelphia, Pa.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

The advance agent of "A Rag Baby" company committed suicide. He could not keep far enough ahead of the show.

A VALUABLE MEDICAL TREATISE.

The edition for 1887 of the sterling Medical Annual, known as Hostetter's Almanac, is now ready, and may be obtained, free of cost, of druggists and general country dealers in all parts of the United States, Mexico, and indeed in every civilized portion of the Western Hemisphere. This Almanac has been issued regularly at the commencement of every year for over one-fifth of a century. It combines, with the soundest practical advice for the preservation and restoration of health, a large amount of interesting and amusing light reading, and the calendar, astronomical calculations, chronological items, etc., are prepared with great care, and will be found entirely accurate. The issue of Hostetter's Almanac for 1887 will probably be the largest edition of a medical work ever published in any country. The proprietors, Messrs. Hostetter & Co., Pittsburgh, Pa., on receipt of a two-cent stamp, will forward a copy by mail to any person who cannot procure one in his neighborhood.

The Minneapolis millers propose to combine and regulate the prices of flour. This will be a grinding monopoly indeed.

"CONSUMPTION CURE"

would be a truthful name to give to Dr. Pierce's "Golden Medical Discovery," the most efficacious medicine yet discovered for arresting the early development of pulmonary diseases. But "consumption cure" would not sufficiently indicate the scope of its influence and usefulness. In all the many diseases which spring from a derangement of the liver and blood the "Discovery" is a safe and sure specific. Of all druggists.

A writer says that "kind words are never lost." How is it when your wife puts them in a letter and gives them to you to mail?

"DON'T PAY A BIG PRICE!"

65 Cents pays for a year's subscription to the Weekly *American Rural Home*, Rochester, N. Y., without premium—"the cheapest and Best Weekly in the World," 8 pages, 48 columns, 16 years old. For **One Dollar** you have one choice from over 150 different Cloth-Bound **Dollar Volumes**, 300 to 900 pp., and paper one year, post-paid. Book postage 15c. Extra. 50,000 books given away. Among them are: Law Without Lawyers; Family Cyclopedia; Farm Cyclopedia; Farmers' and Stockbreeders' Guide; Common Sense in Poultry Yard; World Cyclopedia, Dancison's (Medical) Counselor; Boys' Useful Pastimes; Five Years Before the Mast; Peoples' History of United States; Universal History of all Nations; Popular History Civil War (both sides).

SINGING SONGS OF JOY.

"Hurrah for the Irish May Flower's bloom
That saved my Barney's life,
It kipt his liver from death's doom,
An' cured him for his wife.
Do ye blame me Mr. Delaney
For singin' songs of joy?
Irish May Flower, more's the power!
Cured my darlin' boy."

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

Irish May Flower, the king of discoveries.

It is noted that in Southern Prohibition towns men coming out of drug stores are generally chewing cloves.

How often is the light of the household clouded by signs of melancholy or irritability on the part of the ladies. Yet they are not to be blamed, for they are the result of ailments pecular to that sex, which men know not of. But the cause may be removed and joy restored by the use of Dr. Pierce's "Favorite Prescription," which, as a tonic and nervine for debilitated women, is certain, safe and pleasant. It is beyond all compare the great healer of women.

We don't hanker for burdens, but we should just like to hitch on to a fresh Comstock lode.

No Safer Remedy can be had for Coughs and Colds, or any trouble of the Throat, than "*Brown's Bronchial Troches.*" Price 25 cts. *Sold only in boxes.*

NOT ONLY THE NATIONAL DISEASE BUT MANY OTHERS.

It is said that dyspepsia is our national malady. Well, BRANDRETH'S PILLS will cure the national malady.

It is said that constipation is the curse of our sedentary life. Well, BRANDRETH'S PILLS certainly cure constipation.

It is generally conceded that rheumatism comes from acid stomach and sudden changes of temperature. BRANDRETH'S PILLS have corrected all this and will do it again.

Chronic diseases are cured by taking two to four of BRANDRETH'S PILLS every night for a month.

To feel free, pleasant and be healthy, use Irish May Flower. 75 cents at druggists.

The fashionable overcoats and their wearers remind one of the seashore—capes and heavy swell

RUPTURE, BREACH, OR HERNIA,

permanently cured or no pay. The worst cases *guaranteed.* Pamphlet and references, 10 cents in stamps. World's Dispensary Medical Association, 663 Main St., Buffalo, N. Y.

A great scarcity of the very small coins is reported. We are afraid the heathen have got all the very small coins by this time.

"Seal of North Carolina" Plug cut is the Boss smoking Tobacco. It is kept by every first-class dealer in town.

Get Lyon's Patent Heel Stiffeners applied to the new boots and they will never run over.

NATURE'S CURE FOR CONSTIPATION, WHAT IS IT GOOD FOR? **TARRANT'S EFFERVESCENT SELTZER APERIENT**

TARRANT'S SELTZER APERIENT

Cures Constipation, Sick Headache and Biliousness. It promotes the Appetite, and invigorates the stomach, to which it imparts tone and vigor, and enables the digestive organs to perform their functions with ease and expedition. It is pleasant to the taste, portable in form, and gives immediate relief in all ordinary ailments arising from a disordered stomach or constipated habit. Take no substitute, but demand the genuine **Tarrant's Effervescent Seltzer Aperient,** which can be found in every well-regulated drug store.

Sick-Headache, AND DYSPEPSIA

S F. N. U (First Series) No. 236.

THE GIANT OF MEDICINES.

The Most Effective and Popular Remedy Ever Discovered.

WHY IS IT SO EFFECTIVE IN SO MANY DIFFERENT DISEASES?

WHY one remedy can affect so many cases is this: The diseases have a common cause, and a remedy that can affect the cause, permanently cures all the diseases. Unlike any other organ in the body, the Kidney when diseased, may itself be free from pain, and the very fact that it is not painful leads many people to deny that it is diseased. But *Medical Authorities* agree that it can be *far gone with disease and yet give forth no pain,* because it has few if any nerves of sensation, and these are the only means of conveying the sense of pain; thus unconsciously diseased *it affects the entire system.* We do not open a watch to see if it is going or is in good order: We look at the hands, or note the accuracy of its time. So we need not open the kidney to see if it is diseased. We study the condition of the system. Now then, *KIDNEY DISEASE* produces Any of the *following Common and Unsuspected*

SYMPTOMS: Back ache; *Unusual desire to urinate at night;* Flattering and pain in the heart; Tired Feelings; Unusual amount of *Greasy Froth in water;* Irritated, hot and dry skin; Fickle Appetite; Scalding sensations; Acid, bitter taste, with furred tongue in the Morning; Headache and Neuralgia; Abundance of *pale, or scanty flow of dark-colored water;* Sour Stomach; Heartburn with Dyspepsia; Intense pain, upon sudden excitement, in the Small of the Back; *Deposit of mucous some time after urination;* Loss of Memory; Rheumatism, chills and fever and Pneumonia; Dropsical Swellings; Red or white brick dust, *albumen and tube casts in the water;* Constipation, alternating with Looseness; Short breath, Pleurisy and Bronchial affections; Yellowish pale skin, etc.

These are only the *chief disorders* or symptoms caused by a diseased condition of the kidneys. Now then, isn't it clear to you that the kidneys, being the cause of all these derangements, if they are restored to health by the great specific **"Warner's SAFE Cure,"** the majority of the above ailments will disappear? There is *NO MYSTERY ABOUT IT.* It does cure many bad states of the system precisely as we have indicated. Now when the kidneys are diseased, the albumen, the life property of the blood, escapes through their walls and passes away in the water, while the urea, the kidney poison, remains, and it is this *kidney poison in the blood,* that, circulating throughout the entire body, *affects every organ,* and *produces all the above symptoms.*

Therefore, we say confidently that **"Warner's SAFE Cure,"** is *THE MOST EFFECTIVE MEDICINE EVER DISCOVERED* for the human race. It is the common remedy which, overcoming the common cause, *removes the greatest possible number of evil effects from the system.* Let us note *a few* of these diseases and how they are affected by kidney poison, and cured by

"WARNER'S SAFE CURE."

CONSUMPTION: In a great many cases Consumption is only the *effect* of a diseased condition of the system and not an original disease; if the kidneys are inactive and there is any natural weakness in the lungs, the *kidney poison attacks their substance and eventually they waste away* and are destroyed. Dip your finger in acid and it is burned. Wash the finger every day in acid and it soon becomes a festering sore and is eventually destroyed. The kidney poison acid in the blood has *the same destructive effect upon the lungs:* For this reason a person whose kidneys are ailing will have grave attacks of *Pneumonia* in the Spring of the year, Lung fevers, Coughs, Cold, Bronchitis, Pleurisy, etc., at all seasons of the year. Rectify the action of the kidneys by **"Warner's SAFE Cure,"** as many hundreds of thousands have done, and you will be *surprised at the improvement in the condition of the lungs.*

IMPAIRED EYE-SIGHT: Kidney acid with some persons has an *especial affinity for the optic nerve,* and though we have never urged it as a cure for disordered eye-sight, many persons have written us expressing surprise that after a thorough course of treatment with **"Warner's SAFE Cure,"** their *eye-sight has been vastly improved.* In fact, one of the best occulists in the country says that *half the patients* that come to him with bad eyes, upon examination he discovers are *victims of kidney disorder.* We have no doubt that the reason why so many people complain of failing eye-sight early in life, is that, all unconscious to themselves, their *kidneys have been out of order for years,* and the kidney poison is gradually ruining the system.

OPIUM HABITS: It is a well-known fact recently shown anew, that opium, morphine, cocaine, whisky, tobacco and other enslaving habits capture their victims by their paralyzing effects upon the kidneys and liver. In these organs *the appetite is developed and sustained,* and the best authorities state that the *habits cannot be gotten rid of until the kidneys and liver are restored to perfect health.* For this purpose, leading medical authorities, after a thorough examination of all claimants for the honor of being the only specific for those organs, have awarded the prize to **"Warner's SAFE Cure."**

RHEUMATISM: Every reputable physician will tell you that rheumatism is caused by an acid condition of the system. With some it is uric acid, or kidney poison; in others, it is lithic acid, or liver poison. *This acid condition is caused by inactivity of the kidneys and liver, false action of the stomach and food assimilating organs.* It affects old people more than young people because the acid has been collecting in the system for years and finally the system becomes entirely acidified. These acids produce all the various forms of rheumatism. **"Warner's SAFE Cure"** acting upon the kidneys and liver, neutralizing the acid and correcting their false action, cures many cases of rheumatism. **"Warner's SAFE Rheumatic Cure,"** alternating with the use of "Warner's SAFE Cure" completes the work.

BLADDER DISORDERS: Gross and other high medical authorites say that most of the bladder diseases *originate with false action of the kidneys,* and urinary tract. Uric acid constantly coursing through these organs inflames and eventually destroys the inner membrane, producing the *intense suffering.* Sometimes this kidney acid *solidifies* in the kidney in the form of Gravel, which in its descent to the bladder produces *kidney colic.* Sometimes the acid solidifies in the Bladder, producing *calculous or Stone.* **"Warner's SAFE Cure"** has restored thousands of cases of inflammation and catarrh of the bladder and has effectively corrected the tendency to the formation of gravel and stone. It *challenges comparison* with all other remedies in this work. Buy to day.

"WARNER'S SAFE CURE."

CONGESTION: Congestion is a collecting together of blood in any one place. If there is loss of nervous action in any organ the blood vessels do not allow the blood to circulate and it stagnates. If this condition exists very long the collecting blood clots and eventually *destroys the organ.* Many persons are unconscious victims of this very *common condition.* The heart, determined as it is to force blood into every part of the system, has to work harder to get it through the clogged organ, and *eventually the Heart breaks down* and palpitation, excessive action, rush of blood to the head, distressing headaches, indicate that the *Congestion has become chronic* and is doing damage to the entire system. Congestion of the kidneys is one of the commonest of complaints and is the *beginning of much chronic misery.* **"Warner's SAFE Cure"** will remove it.

FEMALE COMPLAINTS: What we have said about Congestion applies with particular force to the above complaints. They are as common as can be, and as every doctor can tell you most of them *begin in this congestive condition of the system,* which, not being regularly corrected, grows into disease and produces these countless sufferings which can be alluded to but not described in a public print. Thousands have been *permanently cured.*

BLOOD DISORDERS: It is not strange that so many, many people write us that since they have given themselves thorough treatment with **"Warner's SAFE Cure"** their thick and turgid blood, their heavy, blotched, irritable skin have disappeared under its potent influence. The *kidney poison in the blood thickens it.* It is not readily purified in the lungs, and the result is the impurities come out of the surface of the body, and *if there is any local disease all the badness in the blood seems to collect there.* Our experience justifies us in the statement that **"Warner's SAFE Cure"** is "the greatest blood purifier known." The treatment must be very thorough.

STOMACH DISORDERS: Many people complain more or less throughout the year with stomach disorders: Dyspepsia, Indigestion, Waterbrash, heat and distress in the stomach, sharp pains, frequent aches, want of appetite, lack of energy. Now, these are *exactly the conditions* that will be produced in the stomach *when the blood is filled with kidney poison:* People dose themselves with all sorts of stomach reliefs, but get no better. They never will get better until they give their attention to a thorough reviving of kidney and liver action by means of the only specific—**"Warner's SAFE Cure"**

CONSTIPATION, PILES: These distressing ailments, more common among one class than the other, are not original disorders, but are *secondary to imperfect action of the kidneys and liver.* The natural cathartic is bile, which is taken from the blood by the liver. If the liver fails the bile is not forthcoming and the person gets into a constipated habit. This, eventually followed by piles, is almost always an *indication of congested liver,* and a breaking down of the system. Remove the congestion, revive the liver and restore the kidneys by the use of **"Warner's SAFE Cure,"** and these constitutional secondary diseases disappear.

HEADACHES: Many people suffer untold agonies all their lives with headache. They try every remedy in vain, for they have not struck the cause. With some temperaments, kidney acid in the blood, in spite of all that can be done, will *irritate and inflame the brain* and produce intense suffering. Those obstinate headaches which do not yield readily to local treatment, may be regarded quite certainly as of *of kidney origin.*

THESE ARE SCIENTIFIC FACTS, and, from the way we have set them forth, it will plainly be seen, that the statement we make, that **"Warner's SAFE Cure"** is the "most effective remedy ever discovered for the greatest number of human diseases," is justified. It is not a remedy without a reputation. Its sales for the past year have been *greater than ever,* and the advertising thereof *less than ever,* showing incontestibly that *the merit of the medicine* has given it a permanent place and value.

People have a dreadful fear of Bright's disease, but we can tell them from our experience that it is *the ordinary kidney disease that produces no pain* that is to-day *the greatest enemy of the human race:* great and all powerful, because in nine cases out of ten, its presence is not suspected by either the physician or the victim! The prudent man who finds himself year after year troubled with little odd aches and ailments that perplex him, ought not to hesitate a moment as to the real cause of his disease. If he will give himself thorough constitutional treatment with **"Warner's SAFE Cure"** and **"Warner's SAFE Pills,"** he will get a new lease of life and justify in his own experience, as hundreds of thousands have done, that 93 per cent. of human diseases are really attributable to a deranged condition of the kidneys, and that they will disappear when those organs are restored to health.

ASK YOUR FRIENDS AND NEIGHBORS WHAT THEY THINK OF

"WARNER'S SAFE CURE"

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS,

from a common **Blotch,** or **Eruption,** to the worst **Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin,** in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. **Great Eating Ulcers** rapidly heal under its benign influence. Especially has it manifested its potency in curing **Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck,** and **Enlarged Glands.** Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using **Dr. Pierce's Golden Medical Discovery,** and **good digestion, a fair skin, buoyant spirits,** and **vital strength,** will be established.

CONSUMPTION,

which is **Scrofula of the Lungs,** is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his **"Consumption Cure,"** but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for **all Chronic Diseases** of the

Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from **Indigestion, Dyspepsia,** and **Torpid Liver,** or **"Biliousness."** In many cases only part of these symptoms are experienced. As a remedy for all such cases, **Dr. Pierce's Golden Medical Discovery** is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

SOLD BY DRUGGISTS, at **$1.00, or SIX BOTTLES for $5.00.**

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, **World's Dispensary Medical Association,** 663 Main Street, BUFFALO, N. Y.

$500 REWARD

is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.

Dr. Sage's CATARRH REMEDY cures the worst cases of **Catarrh, "Cold in the Head,"** and **Catarrhal Headache.** 50 cents.

MOUNT VESUVIUS.

Appearance and Action of the Famous Volcano in the First Century.

The first century of our era, and doubtless for many previous centuries, Vesuvius was what would now be called an extinct volcano. Rising some three thousand feet above the sea, it formed a notable landmark in one of the fairest landscapes of the Roman Empire. Its slopes are richly cultivated, save around the summit, where the loose volcanic cinders had not yet been covered by the mantle of vegetation that during the previous centuries had been gradually creeping up the mountain. The barren crest surrounded a deep crater, whose rugged walls, tapestried with wild vines, inclosed the level space in which Spartacus and his three thousand companions encamped. Intelligent observers had noticed the probable volcanic origin of the mountain, and tradition spoke of its having formerly emitted fire. But to the surrounding inhabitants it gave no sense of insecurity. The peasants planted their vines up its slopes, and the wealthier Romans traveled to bathe in the warm springs that still issue not far from its roots, and to enjoy the balmy climate of that favored region. At last a succession of earthquakes, some of them of considerable violence, continued during a period of sixteen years to shake the Vesuvius Campania. Some of the towns around the mountain were considerably damaged. A Pompeian inscription records that the temple of Isis in that town had to be rebuilt from the very foundations. The subterranean commotion culminated in the great explosion which in the year 79 blew out the southern half of the upper part of the cone of Vesuvius. Seen from the west side of the Bay of Naples in the early hours of the eruption, the cloud of steam and fragmentary materials that issued from the mountain rose in a huge column, which spreads out at the top like the branches of an Italian pine tree. In the immediate neighborhood of the volcano cinders and pieces of "burning rock" fell in a continuous shower, gradually filling up the streets and open spaces of the town, crushing in the roofs, and driving the inhabitants to the fields. Violent earthquakes accompanying the successive volcanic discharges shook and shattered the houses and kept the sea in commotion. So vast was the quantity of ashes and stones thrown out that the country for miles around was covered with debris. For three days the air continued so loaded with fine dust that a darkness as of night overspread the landscape. When daylight returned the fields and gardens had disappeared under a deep covering of white ashes that lay on the ground like snow. The main portion of the volcanic detritus was no doubt ejected in the earlier stages of the eruption, as may be inferred from the fact that the body of the elder Pliny (who, after the courtyard of the house in which he had been sleeping was nearly choked up with fallen ashes and stones, had retreated to the fields) was found three days after, lying where he had fallen, and not concealed by the dust that had settled down in the interval. There is no evidence that any lava was emitted during the eruption. But the red-hot stones and the glare from the crater upon the overhanging pall of cloud probably show that molten lava rose to the surface in the vent of the volcano, while much of the impalpable dust that filled the air was no doubt due to the explosions of superheated vapors by which successive portions of the rising column of lava were blown out. Though the ill-fated region was spared the destruction which would have been caused by the outflow of streams of lava, it was in some places near the base of Vesuvius invaded by rivers of a thick, pasty mud produced by the condensation of the dense clouds of vapor and the mingling of the water with the fine volcanic ashes. These mud torrents swept over Herculaneum, burying it to a depth of fifty feet or more. At Pompeii, also, the heavy rain seems to have formed a similar mud, which ran down into the basements of the houses and quickly enveloped the human victims who had taken refuge there.—*Archibald Geikie, in Contemporary Review.*

AN ELECTRIC STORM.

Hair-Raising Experience of Two Members of the Geological Survey.

An Irishman, on being asked how he felt when struck by lightning, replied that he didn't have time even to feel astonished. The effect of electricity, taken in a milder, and yet not a very pleasant form, has been described by men who had time to observe it and wit to report it.

Two young men connected in the United States geological survey had a novel and not altogether pleasant experience. They were on the summit of a high peak near Dixie Butte. Mr. Walsh was stretched out on the shady side of a rock, while Mr. Tweedy was hurriedly sketching the topography of the surrounding country as a thunder storm was coming up.

Suddenly he heard a buzzing sound, as if a big fly were under his plane table. Reaching his hand under the paper, he received an electric shock that sent him staggering back.

The projecting rocks gave forth at the same time a humming, musical sound, and all the surrounding air was evidently surcharged with electricity. The peaceful slumbers of Mr. Walsh were disturbed at this time, and he jumped to his feet, but was content to lie down again, as, when standing up, the electric fluid caused a sensation like the pricking of needles. Their hair stood up like bristles, their muscles twitched, and not having a contract to serve as lightning rods for that peak, they gathered up their instruments and beat a hasty retreat down the mountain-side. Soon the thunderstorm broke, and the peculiar condition of the air passed away.—*Youth's Companion.*

—Kaiser Wilhelm is economical. He uses a second time nearly all the envelopes of the documents addressed to him.

PERSONAL AND IMPERSONAL.

—They do say that a girl never looks so pretty to a young man as when she has just refused to be his wife.—*Somerville Journal.*

—Pierre Lorillard has spent one million three hundred thousand dollars on Truxedo Park, on the Ramapo, in New Jersey.—*N. Y. Times.*

—G. B. Thayer, son of ex-Senator Thayer, of Connecticut, traveled 4,224 miles this year on a bicycle. He left his home in Vernon, Conn., last April.—*Hartford Post.*

—Frederick the Great in his youth was noted for his stubbornness and bashfulness and, we are told, showed this at his sister's marriage. Instead of appearing at the ceremony in court attire he came with the servants, dressed as one of their number.

—It is not generally known that President Lincoln was an inventor, but the first instalment of the "Lincoln Life" in the *Century* contains reduced fac-similes of the drawings in the Patent Office, on which was obtained a patent for "A. Lincoln's improved manner of buoying vessels."

—Blind Bill, a colored inmate of a Georgia poor-house, has a most remarkable sense of touch. He can tell any one whom he has met by feeling of his hand. A man whom he had not met for ten years shook hands with him the other day and Bill at once called him by name, though not a word had before been spoken.—*N. Y. Sun.*

—Jay Gould figures that if he should give fifty men five thousand dollars each to go into business for themselves one-half would fail and lose all within five years, and the other twenty-five would be mad because he was able to make it ten thousand dollars and didn't do it. He argues that men appreciate their own earnings far more than a gift.

—Mrs. Grant still takes special interest in one of her oil-paintings, a large canvas representing herself, the General and their children as they appeared just after the close of the war. "It may not be a work of art," she says, "and, indeed, some of my friends ask me why I let it hang in my parlor, but to me it is better than a work of art."—*Chicago Journal.*

—A St. Paul editor paid Emma Abbott a big compliment. He was sitting by the singer's husband while she was singing in "La Traviata," in which the heroine is dying of consumption. Emma was doing her best, cough and all, and the editor, turning to Mr. Wetherell, said most sympathetically, "Your wife seems to have quite a bad cold." As soon as Mr. Wetherell recovered he explained that the cough was part of the performance.

—Mrs. A. T. Stewart's immediate family was not very large. She had three unmarried half-sisters, Misses Anna, Julia and Emma Clinch, and a nephew and a niece, the children of Charles P. Clinch, her half-brother, who, for fifty years before his death, was a deputy collector of New York. The nephew was Mrs. Stewart's favorite. He is Charles J. Clinch, a resident of Paris, where he is President of the American Club.—*N. Y. Herald.*

—Two well-known characters among the Onondaga Indians have recently died. One was Aunt Cynthia Farrar, famous for her wealth. She kept a bank account at Syracuse, loaned thousands of dollars, and bought the land of her debtors when they could not repay her. The other celebrity was Aunt Dinah, an Onondaga of pure blood, and believed to be one hundred and eight years old when she died. She was feeble and totally blind, but had good use of her mental faculties.—*Buffalo Express.*

"A LITTLE NONSENSE."

—Which was Sir Walter Scott's greatest novel?" asks a correspondent of *Siftings*. Each one should judge for himself, Ivanhoe-tion.—*Texas Siftings.*

—Why does the camel know more about base-ball than the dromedary? Because he is a hump higher. Take this with your dessert.—*Commercial Bulletin.*

—"Come here, Walter, and let me shave you too," said Uncle Alfred, who was tonsorially employed, to his five-year-old nephew. "No," was the prompt reply; "my whiskers ain't ripe yet."—*Harper's Bazar.*

—Old lady (suffering from hiccoughs, to drug clerk)—Young——man, I want to——get some liquor—— Clerk (hastily)—Can't do it, madam. You've had enough alrea—— Old lady (frigidly)—Some liquorice.—*N. Y. Sun.*

—Customer (to waiter who has brought him a steak of the smallest dimensions)—Bring me a glass, please. Waiter—Glass of what? Lager or bitter, sir? Customer—No, a magnifying glass; I am afraid of cutting into the plate.—*N. Y. Telegram.*

—A Washington scientist has figured that the jar of street cars passing in front of brick buildings will reduce all the mortar to dust in about four hundred years. We always suspected that something would happen of letting the old horse stub along in such a reckless manner.—*Detroit Free Press.*

—He—From the wapt exprethion of your fathe, Mith Mawy, I know that thith autumnal thunthet awoutheth thoughth of deepetht thentiment in your mind. She—Y-e-s; I was thinking what a jolly good lot of colors they'd be, if I could only get at them, for my new crazy quilt.—*Harper's Bazar.*

—"Violet," said the young man with hair evenly balanced and creased breeches, "I have come to-night to ask you a question that has been on my mind for weeks." "Well, Victor," said the shy goddess. "I am anxious to know if you would take me for better or for worse?" "Well, Victor, to look at you I should say worse!" Victor is single yet.—*Yonkers Statesman.*

—The Sunday school teacher was impressing upon her class the importance of honoring their parents. "Now children," said she, "when you are naughty and cross, your mamma does not want you to be near her where she can see your naughty ways. But when you are good she loves to have you by her. Now, Tommy, when do you think your mamma loves you best?" "When I am asleep," replied Tommy, stoutly. "She says so."—*Mercantile Traveler.*

UNCLE GABE AT THE PARTY.

De twangin' ob de banjo an
De scrapin' ob de fiddle;
Tak' my arm, Mis' Dinah, an'
We'll sashay down de middle.
Dinah's jis' as fin' a gal as eber you did see,
I'se sumpin' ole, Mis' Dinah, wid a twitchin' in de knee,
But keep a-goin'!

Swing ya pardners, gen'lemen,
An' don't ya stop to t'ink.
Run aroun', Mis' Dinah, lik'
De turkey 'fore de mink;
Cæsar's aftah Dinah, an' 'e tryin' to ketch her sho';
I'd keep up wid 'em bettah, but I ain't so peert no mo',
But keep a-goin'!

'Pears to me de dancin' am
A-gittin' nighta fas';
Dinah's skitin' up de front,
An' I is mos' de las'.
Gosh! ole nigga, hurry up, dey'll leab ya 'way behin';
An' dere's dat Cæsar grinnin' lik' his teef was melonrin'!
But keep a-goin'!

De yaller moon's a shinin' on
Old Farmah Taylah's patch;
Wait until we'se 'gwine hom',
We'll take a leetle snatch.
Dese awful red, dese awful green, de seeds is black as Satan;
Jis' jump aroun' heah, chillern, fur de watermelon's waitin'!
Ur! he! he!

The Way of the World.

The good old rule, the simple plan,

That they may take who have the power,

And they shall keep who can

A Domestic Drama.

MAMMA. DAUGHTER. PAPA.

SCENE I.

DAUGHTER:
(Neatly)—He called last night at eight, mamma,
(Clearly)—But simply talked of stocks!
(Sweetly)—He thought men met their fate, papa,
(Dearly)—By dresses and by frocks.
(Teasingly)—I think him ill-disposed, mamma,
(Proudly)—And not like other men;
(Pleasingly)—You see, he's not proposed, mamma,
(Loudly)—And has not asked me when.

SCENE II.

(Brightly)—He said all girls should wed, mamma,
(Grandly)—I tried to lead him on;
(Sprightly)—If you had gone to bed, papa,
(Blandly)—I'm sure I would have won.
(Sighingly)—He told me all his woes, mamma,
(Truly)—And called his home "a den;"
(Cryingly)—But yet he won't propose, papa,
(Bluely)—And will not ask me when.

SCENE III.

(Coldly)—I used his Christian name, mamma,
(Dryly)—He'd smile—and—hem—and—cough;
(Boldly)—He thought it such a shame, papa,
(Shyly)—Some girls were not well off.
(Tearfully)—He's bashful, I suppose, mamma,
(Kindly)—And all that thing, but then—
(Tearfully)—Can't you make him propose, papa,
(Blindly)—And make him ask me when?

CURTAIN.

—DeWitt Sterry.

He Knew Moses.

It is very common now in the primary schools for teachers to entertain their little scholars with stories. A few days ago one of the teachers in a school not far from St. Paul was telling the children about Pharaoh's daughter finding the babe in the bullrushes. "Now, children," said she, "how many of you know anything about Moses?" Only one hand went up. "That's right, Jimmie; I'm glad to see there's one in the school who has heard of him before. Now who was Moses?" "He's the feller wot they wanted to know where he was when the light went out," exclaimed Jimmie with great gusto. That ended the Bible lesson for the day.—St. Paul Herald.

A Dilemma.

First Pastor—You have a paid choir, I believe?

Second Ditto—Yes, and a very good one.

First Pastor—I don't believe in them. It is wrong in principle and is an extravagance a church should not sanction.

Second Ditto—That's what I thought, my dear brother, but it got so in my church that we were compelled either to pay the people to stay and listen to a volunteer choir or pay a choir to sing, so on the score of economy we concluded to hire a choir instead of a congregation.—Washington Critic.

Put to Good Use.

"I've been hunting all over the room for a hairpin," said a young lady to her newly married friend, "and I couldn't find a single one to save me."

"Of course you couldn't, my dear," was the sympathetic reply. "I'm married now, you know."

"And what has that to do with it?" was the incredulous query.

"Everything, my dear," was the reply. "My husband straightens them all out for pipe cleaners."—The Judge.

Uncle Esek's Wisdom.

A good memory is no evidence of superior intelligence.

Those who have a great deal to say, say it in a few words.

We cannot spare any of the passions, for what are the virtues but the passions subdued?

All simple people are not great, but all great people are simple.

I believe in the immortality of the soul, not because I can prove it, but because I can't.—Century Magazine.

Profanity.

"Johnnie," said Johnnie's father, solemnly, "you musn't say 'By jinks.' That's swearing."

"Is it?" said Johnnie, inquiringly.

"Say, father," said he, "is by-stander swearing?"

"Yes," said his father, "he usually is when he is diminutive, and the crowd gets in front of him so that he cannot see the fight.—Cambridge Chronicle.

ABOUT TIME PIECES.

A Chicago Watch-Maker Gives Some Insight Into the History of His Craft.

"The history of the art of clock and watch making is an interesting one, and I often think how few of the many curious spectators and purchasers who stand daily around my windows understand any thing about it."

The individual who gave utterance to the above expression of opinion was the proprietor of an old-established jewelry, watch and clock store in one of main thoroughfares of the city.

"The invention of a clock driven by a weight is, by many, attributed to a famous Archdeacon of Verona in the ninth century," he continued, "and by others it is credited to Gerbert, afterward Pope Sylvester II., who made the clock of Magdeburg in 996 when he was an Archbishop. My belief, however, is that the invention of this prelate can not be set down in the category of clocks, for it is described in a very old history of inventions—Beckmann's I believe—as a 'time-piece which was set by looking at the pole star through a tube.' There is no doubt, however, that genuine clocks had been invented before the commencement of the twelfth century. It may seem strange, but it is nevertheless true, that watch making is the outgrowth or offspring of the older but ruder trade of blacksmithing.

"Although there is no watch-makers' union in Chicago, or indeed any city in the United States that I have ever heard of, it is nevertheless a fact that away back in the reign of Henry VIII. of England there existed in London a watchmakers' union which was one of the most powerful and famous of the trade guilds of that city.

"These ancient guilds originated, I believe, in the old Saxon law, which demanded sureties from every 'freeman' of the age of fourteen years for his good behavior. This custom, or law, which survived under Norman rule, compelled artisans and workmen of every description to combine into associations organized to meet expenses imposed upon members for violation of the law. The guilds were divided into two branches or sections, one of which was denominated the ecclesiastical and the other the mercantile. The ecclesiastical guilds were under the guidance and control of churchmen, and had for their principal object the advancement of religion and the cause of charity.

"The mercantile branch contained all the trades associations, and had certain rules for the improvement of the particular craft to which the members belonged. Ancient though the watch-makers' guild is acknowledged to have been, there were many whose inception was many generations older. Among these may be mentioned that of the weavers, which was the oldest trade guild in the world, its charter dating from the reign of Henry II. The skinners', bakers and fishmongers' guilds were also much more ancient than that of the watch-makers'. Twenty years before the watch-makers were chartered, in 1641, they were incorporated with the blacksmiths.

"Although in the international exhibition held in Paris in 1878 the French and Swiss exhibits formed fully four-fifths of the many hundred specimens of workmanship in the watch-making department, there is no doubt that America is rapidly coming to the front in the manufacture of this as in all other articles. At that exhibition the other countries which entered the lists with France and Switzerland in the horologe department were England, Austria, Spain, Denmark, Belgium, Holland, Sweden, Italy, Russia and the United States.

"Among the many curiosities in clock manufacture sent in from Switzerland were a variety of watches which would run for one month after being wound. A clock was sent there from Paris which was said to be able to go for fifty years, but this was totally eclipsed by a time-piece from Geneva in Switzerland, which was solemnly guaranteed to be capable of running for a thousand years. There is no one alive at present able to say whether this latter assurance has ever been carried into effect, and life was too short to wait to see whether the fifty-year promise would be fulfilled. The Austrians had a pneumatic apparatus that would work dozens, hundreds and even thousands of clocks in all parts of the city at the same time.

"The French showed a watch that told the days of the week and the month and marked the changes of the moon. They also exhibited time-pieces that would sound an alarm by the discharge of a pistol or work out problems of latitude and longitude. Among the curious pieces of handicraft turned out by these artists was an extraordinarily small watch which was exactly the size of a dime. This little article could strike the hours and half-hours in a clear and distinct tone."—*Chicago News.*

CURIOUS WATCH-DIAL.

The Very Ingenious Piece of Workmanship Owned by a Boston Gentleman.

A Boston friend of ours has a very ingenious and curious piece of workmanship in the shape of a watch dial. Each minute point is a word or part of a word, invisible to the naked eye, but discernable with a lens.

Commencing with the twelve, and going round, we find, painted with a brush, the following quotation from Shakespeare's "King Lear:" "Have more than thou showest. Speak less than thou knowest. Lend less than thou owest. Ride more than thou goest. Learn more than thou trowest. Set less than thou throwest." Also the words, "*Fait par Justin Raymond, painter, St. Jinier, Canton Berne, Suisse;*" and the motto, "God Save the Union." The hair stroke of the X forms the name of the owner, Edward Huntley. Under the numerals XII and VI, carved on the dial in a style of workmanship known as vermillion engraving, are two more names.

Mr. Raymond, the artist who painted the dial, was engaged ten days, and was laid up for two weeks from partial loss of sight. It is said to be the only thing of the kind in the country, and competent judges pronounce it to be the best piece of workmanship they have ever seen.—*Golden Days.*

HOME AND FARM.

—One drop of castor oil placed on warts every day for from ten days to two weeks, will remove them and leave no mark.—*Exchange.*

—Gravy ladles of china or granite ware have gone out of use very largely. A good sized spoon takes the place of a ladle, and is lighter and prettier.—*Chicago Journal.*

—The theory that fowls and turkeys injure the grain by roaming through it is not true, while the slugs they kill and their droppings made soluble by the rain increase the crop.—*Troy Times.*

—White Cake: Two cups white sugar and a scant cup of butter mixed together. Add the well-beaten whites of five eggs, one cup sweet milk, three cups sifted flour, in which stir two teaspoonfuls baking powder. Flavor with any thing desired.—*Boston Globe.*

—Milk Gravy: Put in your spider about one tablespoonful of fried meat gravy or butter; when hot add nearly one pint milk; when milk comes to a boil, add pepper, salt, one heaping teaspoon flour stirred in a little cold milk so it will not be lumpy.—*The Caterer.*

—Creamed Eggs: Boil eight eggs until hard, plunge into cold water, remove the shells without breaking the whites, put into a vegetable dish and cover with drawn butter made of a pint of new milk, two spoonfuls of butter, a little salt, and thickened with half a spoonful of cornstarch. This is an excellent breakfast dish.—*Housewife.*

—A contemporary says it is easy to get rid of black ants. Open a hill with a hoe, scatter on a handful of salt, sprinkle on a quart of water, and the ants will leave immediately. A few days ago the house was overrun with insects. The correspondent found eleven anthills within two rods of his building. After the above application not an ant was to be seen about the premises.

—The most popular remedy in England for the gapes in poultry, and the most succesful, is that which is known as the powder cure. Some prepared powder is placed in a bellows, and when the chicks or young pheasants are in the coop it is blown therein, so that the air becomes charged with it, and the birds breathe it. They begin to sneeze and cough, and in this way are able to get rid of the worms. It is much less dangerous than fumigation.

—Flaky Soda Biscuit: Mix together a quart of very dry flour, a teaspoonful of baking soda, two of cream of tartar and a saltspoonful of salt; pass through a sieve, then chop in two ounces of butter or lard, and mix quickly with milk to make a very soft dough. Flour the board well, roll out, sprinkle with flour, double it over and roll out again; cut into biscuits half an inch thick. Bake in a very hot oven about fifteen minutes.—*Boston Budget.*

—The *National Stockman* thinks colts are weaned too late. It says: "As a rule colts are weaned too late in the season. They should have time to learn to eat heartily of other foods before cold weather. A colt foaled in May should be weaned in September, which will allow both it and its dam to go into winter quarters in better shape than if the weaning is postponed until October or November. If the mare is kept breeding, and has not anything else to do but to breed and nurse her colts, she will get along if the colt is not weaned until December; but the colt will not do so well if put upon fodder and hay all of a sudden at that time of year. The young thing should be taught to eat before it is weaned."

FASHIONABLE FURS.

What the Leaders of Fashion Will Wear During the Present Season.

There is but little change to note in the fashion of furs. The most important this season is the introduction of a pelerine, with long "stole" fronts, very much after the style of the cape with very long square ends worn over a hundred years ago. This handsome garment will be worn by a number of leaders of fashion, who have brought it among their list of garnered treasures from abroad. There is great style, however, in the brevity of the back which displays the *tournure* and the rich fabric of the dress, and the long ends which, upon a stately figure, give an appearance of unusual distinction. In other elegant garments for more general wear are surtouts, pelisses, Newmarkets and paletots long and luxurious, and in short wraps which display the skirts of handsome costumes, are models in visite jacket, dolman and pelerine shapes, the latter reaching the waist line only. Upon new pelerines very rich ornamental clasps are seen, one at the throat, another a few inches below it. The ascendancy of dark furs this season is only in keeping with the preference for deep-hued colors in every portion of street attire, which with women of refined and cultivated tastes has passed beyond a caprice of fashion, and reached a fixed principle. Gray and golden-brown furs are about the only exception to the rule, and these are used as linings and trimmings. Natural beaver, otter fur and blue fox maintain their acquired position, and will be even more fashionable this winter than ever before. Sets of natural beaver—hat, cape and muff—are still in great demand, but otter, by nature of its cost, is used mostly for bands and caps. The quality of silk plush has reached such a degree of richness in effect that it can hardly be distinguished from seal skin, and its elegant appearance has had very much to do with reducing the widespread sale of fur, its really inexpensive cost (compared with the price of seal), added to its richness of effect in cloaks and as a garniture, establishing it as the only real rival to fur. Fur trimmings will be largely used this winter, the fashion even invading the ball-room and my lady's boudoir, where they certainly seem out of place. The plain gored skirts worn this season by many women have suggested the use of fur bands in narrow rows half way up the skirt, and many will be thus finished. These narrower bands are an improvement upon the one very deep shaggy band which for two winters past formed a weighty, cumbersome and useless finish to the foot of the dress skirt.—*N. Y. Post.*

WINTER-FEEDING.

Why Many Farmers Are Unable to Show a Clear Profit on Winter-Kept Stock.

The feeding of stock during the winter is the farmer's second harvest. If in sowing the seed in the form of fodder and cultivating the cattle crop by the most careful attention, the farmer can not derive some pecuniary benefit, his time, labor and feed are all lost, quite as much as if he should sow seed, work his land and reap no grain harvest at all. Many farmers, however, not looking at the spending of a barn full of fodder, the result of a good portion of a whole season's work, in this true light, feed their stock with so much waste and with so little care that instead of deriving profit from it they are really worse off in the spring than they were in the fall; their stock has barely existed and is poorer and in worse condition after having consumed all the feed which has cost so much labor.

To avoid this ruinous waste there should be some economical system of feeding the stock so that no feed is lost or consumed without deriving some benefit from it. Every farm has, and must have, some stock which has to be carried over through the winter for profitable use in the summer. This store stock is too often so badly cared for that it fails to repay in the summer the expense of wintering it. Cows used for summer dairying especially cost more in many cases for the winter feed than they come to in the next summer, not counting the cost of the summer feeding, and young stock, in like manner, often come out in the spring in debt to their owner for the food they have eaten through the winter, and having actually lost weight besides. A case in point might be mentioned. A farmer who has two cows and two yearlings and five tons of hay in a stack, is about to keep over these four head, and contemplates using the five tons of hay for their feed. The farmer has an open shed, in which he proposes to feed these cattle. There is a poor field where they run in the daytime, and they lie in the shed at night. The hay is thrown to them on the floor of the shed, and in the day they have the run of the stack. The cattle are worth not more than $50, and the hay is worth about $75. In the spring the cattle will be worth at the most, under the circumstances, not more than $75, and as the cows have been neglected and will not calve until late in the summer the owner will have very little income from them next year. If the farmer should sell his cattle now for what they would bring, and sell the hay, too, he would have something over $100 anyhow, which would replace his unprofitable stock with three profitable cows, and at the worst he would make a better start on a better course than he is following now. This is by no means a rare instance of the waste of fodder by keeping stock which is unprofitable and feeding it in a wasteful manner.

The first thing to arrange is to keep only stock that will pay for the feeding—young animals which will make growth and increase in value, or others which are in profit or will be in the spring and summer. With cows and pigs this should be constantly arranged far ahead as one indispensable means of avoiding waste.

The next arrangement should be for a proper way of feeding so that nothing is wasted. Corn fodder and all roughness should be cut up. A fodder cutter will pay for itself in one winter by saving waste. If no meal has been provided for the cattle, sprinkling it with warm water in which a little salt has been dissolved will make it more palatable. But it should be always arranged to have some sort of fine feed—meal, bran or middlings—to mix with the rough fodder and to secure its complete consumption and digestion.

Another indispensable arrangement is the provision of feeding troughs and racks. The troughs should be so made with bars across them that cows or horses can not throw the feed out and waste it, and that hogs can not get their feet in and scatter the feed about and foul it with their feet and so mix poisonous filth with it. No long hay should be fed excepting in racks, and there should be plenty of these provided so that each one of the stock can get its share without fighting for it or waiting until it has been picked over and made unpalatable by the stronger ones.

A very essential arrangement for feeding is a provision for comfortable shelter. This is a great economy. A well arranged stable or feeding shed not only saves fodder, but the cattle derive more benefit from their food when thus provided for. Another important point is the saving of manure. In some cases the manure is worth as much as the feed. At any rate it is invaluable when the farmer has to depend upon it for the fertilizing of his land and for the production of fodder. Many farmers would think it poor advice if they were recommended to sell their stock and feed in the fall, and buy other stock in the spring, and so put money in their pocket. They would make the reasonable objection that they would have no manure. But the making of manure should not be the first consideration. It should be an incident of farming and second profit, a bonus, as it were, for good conduct in managing the feeding. If the farmer has nothing but a heap of manure in the spring to show for his winter's feeding he is simply going around in a circle and making no progress. His arrangements for the feeding are not of the right kind and need reforming. He should be able to show a clear profit on the feeding after paying himself for his time and labor, or he is doing a very poor business, and unfortunately a large number of farmers are doing a poor business in this way.—*N. Y. Times.*

—Thomas Davis, of Clyde, has a right shoulder joint that will become dislodged by a small strain upon it. Within the past few years it has been thus dislocated several times. A few days ago it was again put out of place by some slight exertion on the part of Mr. Davis. What is somewhat singular in this case is that although the joint is so easily dislocated it requires the united strength of two or three powerful men to put the bone in the proper place again.—*N. Y. Herald.*

THE RECKLESS REPORTER.

His Tendency to Exaggerate and Magnify Persons and Things.

The yearning of Americans after titles has often been very properly ridiculed. If a man has never been on the bench since he was a school-boy, unless it was on the mourner's bench in the police court for being drunk and disorderly, he is in more danger than almost anybody else of being called "Judge." If a man has been gifted with sufficient strategetic ability to keep out of the war, that man is liable to go through life with "Colonel" or "Major" in front of his name. There is a disposition on the part of local reporters to enrank every man "General" or "Colonel" who happens to brighten the reportorial horizon with a cheap cigar. The readers take their cue from the newspapers; and the consequence is that, when men are sentenced to the penitentiary or arrested for taking clothes off a line, the judge and the constable address the convicted parties as "General," "Judge," "Colonel" or whatever may be the stigma that attaches to their names.

If a little one-horse corner-grocer finds favor in the eyes of the faber-pusher, he is denounced through the press as a merchant prince. It is more than probable that reporters, who are so liberal in conferring princely titles, have a very much muddled-up idea as to what kind of a coffee-mill a Prince really is. A real Prince never slaps a reporter on the back and calls him Bob or Dick, or whatever other name his sponsors in baptism have bestowed upon him. A *bona-fide* Prince never sits in his shirt-sleeves in front of his store and squirts tobacco-juice through his front teeth. A real Prince is always dressed in a most gorgeous military uniform, with a big silver star as big as a saucer on his breast, to let people know that he is the Prince, and no mistake. A Prince is always calm, reserved, dignified and surrounded by a glittering staff.

If a newspaper man were to run up to that kind of a prince and ask him for a pound of cheese and crackers on ninety days credit, half a dozen Dukes, Counts, Earls and like small fry would telephone for a policeman to show the journalist the road to the lunatic asylum. There is no such thing as a merchant prince.

The Western journalist persists in calling every stockman, who brands all the calves in his neighborhood that do not belong to him, a cattle king. No real King ever wore an old slouch hat and lived on bread and coffee. The real King sits upon a glittering throne—such as you see in circus processions—holding a golden scepter like a policeman's club in his hand, and a royal crown on his head. There is nothing in the appearance of a stock-raiser that leads one to suppose that he is a King.

It is this tendency on the part of the reporters to exaggerate that has created the wide spread impression that the average journalist rarely draws a sober breath.—*Alex. Sweet, in Drake's Travelers' Magazine.*

DUTCH PRISONS.

Description of One of the Most Famous Penal Institutions of Holland.

A prison in Holland is rather an embellishment than a disfigurement to a town, at least such is the fine new penitentiary at Leeuwarden, one of the most famous prisons in Holland, and a model of its kind. It is completely built of stone, bricks and iron, consequently fire-proof; stair-cases, halls and workshops are built with mathematical precision and in such manner as to permit of constant surveillance. The yards are large and spacious, all the rooms whitewashed from top to bottom and well ventilated, the inner and outer walls even bearing witness to the proverbial Dutch cleanliness. The steps and passages are equally clean, and you would look in vain for a soiled spot or grain of dust. Not a cracked or tarnished pane of glass can be found in the whole building. Every thing is washed, brushed and waxed with a care we might well envy in many of our American homes. The dormitories are regularly scrubbed every day, and well ventilated. Their aspect is, however, curious. Each consists of a large whitewashed, asphalt-floored room, in the center of which is an immense iron-trellised cage, armed on the inside with spikes. This cage is divided into over one hundred cells, each separated by sheet-iron walls; each has its bed, consisting of a thin mattress, a pillow, a pair of sheets of coarse texture, and two coverlets. Each night the prisoners are locked in these narrow cells, and thus repose perfectly isolated from each other. All around the dormitory run iron water-pipes, with taps fixed at intervals, at which the convicts are supposed to perform their ablutions. Water is general throughout the whole prison, and is to be met with on each story. Baths, which the prisoners are compelled to make use of at stated times, are on the ground floor. The prisoners have three meals per day. In the morning, lukewarm milk and water and a piece of dry bread; at midday, a soup composed of vegetables; in the evening, coffee and brown bread. Sometimes they are allowed a small quantity of fresh meat, but more often bacon. The prisoners, however, can improve upon this food by the money they earn. They have, in fact, a small interest in their work, four-sixths of which is at their disposal, the remainder being very properly capitalized and handed to them on their dismissal. Every thing is conducted with military discipline in a Dutch prison, which allows neither of ill-will nor question. The dungeons, a kind of subterranean cells, are for the unruly, and irons for the mutinous. No conversation is allowed between the prisoners during hours of work. Perfect order prevails, as a rule, and attempts at escape are events unknown.—*Brooklyn Magazine.*

—An Auburn, (N. Y.) father tied his daughter to a bed-post to prevent her leaving the house to marry the man she loved. Then he paraded the front yard with a revolver to make it certain that the young man should not carry her off without his knowledge.—*Buffalo Courier.*

MAKING MEXICAN GOLD-BUGS.

Unprecedented Demand for the Insects—How the June-Bug Is Utilized.

A short time ago the small boys of Evanston were thrown into a state of great excitement by the appearance of a strange old man in the town. The mysterious individual, clad in a linen duster, carrying a gingham umbrella, and wearing green goggles, was not long in gathering the entire male population about him by reason of the astonishing offer which he made. He agreed to pay 5 cents each for large-sized and well-formed June-bugs. If a firecracker as large as a flour-barrel had exploded in the school-room it would not have created near as much excitement as the offer of the strange old man. Not more than half of the youngsters went back after the noon recess, and a grand June-bug round-up was instituted. After school-hours the youngsters who hadn't played "hookey" joined the other hunters, and the result was a terrible shaking-up of June-bugs.

The mysterious stranger kept his word, and paid 5 cents apiece for all the able-bodied June-bugs which had not been maimed or wounded in the excitement of the chase. At nightfall he went back to the city carrying a cigar-box full of the finest June bugs in the land, while all the little boys in Evanston reveled in taffy.

The stranger with a penchant for June-bugs was found to occupy a little room on State street, which is strewn with bric-a-brac and articles sold by street-peddlers. In a glass case were the June-bugs, and on a little oil-stove a pot of fine shellac was kept in a liquid state. On some cotton-batting on a table were several magnificent golden beetles with golden wings and delicately shaped claws and nippers.

"Where did you get these?" queried the visitor. "They are Mexican gold-bugs, ain't they, and are worth considerable money?

"Mexican gold-bugs? Why, there can't any bug that ever buzzed match those fellows. I sold three of those to-day for $16, and the man that got them wants me to make a contract to furnish no one but him with them. I've got a bonanza here."

"How's that?"

"Why, haven't you heard about the gold-bug that Miss Folsom wore back from Paris. They are all the rage. Well, I put something on the market which discounts the genuine article.

"Under a pledge of secrecy I'll let you into the scheme, but it dosen't matter much, I guess you have got in already."

With that the man picked up a June-bug, fastened it in a steel bodkin, and then suddenly plunged it into the shellac. Reaching into the drawer, he drew forth a pad of lamb's wool, dashed it over the gummy June-bug, and in an instant there was a startling transformation. Writhing on the end of the steel bodkin was a golden beetle. He had washed a June-bug in gold dust.

"I make two kinds," continued the inventor, gazing at his handiwork admiringly, "the animate and inanimate. When I make the animated article I merely dip the wings and back in the shellac, which, by the way, is prepared especially for this purpose. It has to be very fine and just so thin. The inanimate specimens are made by plunging the whole body into the shellac. It kills them instantly and covers every speck of their bodies. Then I put on two coats of gold-dust and they are practically embalmed. They will last a life-time with proper care, and when I put them in front of jewelers they think they have struck a magnificent piece of jewelry work until they handle them. The weight gives them away then. I'm thinking of burying a buckshot in every June-bug and then they'll weight up to the standard. I don't suppose the live-bug craze will last much after the Folsom boom dies out, but the dead bug will become a fixture. I'm going to get a patent on the process. There are good American dollars in it."

Gold-bugs are in great demand just now and the mysterious man on State street is very busy. The American June-bug is certainly superior to the insect imported from Mexico. If the little boys of Evanston don't corner the market on June-bugs, Mexican gold-bugs will be cheap in a few days.—Chicago News.

Type-Setting Without Copy.

This has always been thought to be a difficult feat, and one to be classed with chess playing when the board is removed from sight, as Morphy and others have done, yet there are a good many proofs that it has been accomplished, and that repeatedly. The author of a "Typographier," printed in Cincinnati more than twenty-five years ago, composed the entire work without a scrap of copy, except that part which showed the imposition of forms. James F. Babcock, for many years editor of The New Haven Palladium, in his younger days used always to turn his thoughts into metal, without intervening paper; Horace Greeley did the same thing, and it was a common practice with Thurlow Weed.

There is not, when the practice is examined, anything of inherent difficulty in it, except how to keep the mind constantly upon the subject. Type-setting, after a practice of several years, becomes mechanical; there is no effort of thought required to punctuate, capitalize, or divide, for these problems have been determined by custom, and the only danger a compositor labors under is in having outs or doublets. A fluent or verbose writer usually will see an advantage in adopting this method, while a man whose thoughts come slowly will have time enough to turn them and enlarge their expression. It is doubtful whether any time is thus saved, as the compositor works more slowly. In country newspapers, for one reason or another, this is frequently done, but in the present day of division of employments the editor rarely gets to the composing-room, much less sets type.—American Bookmaker.

Cure for Pimples on the Face.

The cure consists in changing the diet, improving the habits, cutting off the "supplies" for these eruptions. Never check the necessary discharge, the purifying effects, but prevent the necessity for such an escape of putrid and offending matters. Eat less greese, butter, pastry, which is made specially unfavorable by the use of lard, with a diminished use of the sweets in general, particularly dark molasses. As a general principle, these pimples are most abundant in warm weather, the cold weather actually burning the carbon of the system, thus sustaining the animal heat, which must be kept at about 98 degress Fahrenheit, or death would result. If you do not like to have these about the face—as a young man—you can divert to some other place, running the matters off by producing "counter-irritation," irritating with mustard, or a common blister, or a sore, promoting the discharge by applying wet cloths.—Dr. Hanaford in The Household.

Dirt, debauchery, disease, and death are links of the same chain.

Delinquent Tax List

FOR 1886.

INYO COUNTY, California.

Aceularius, Wm, A J Shipley, Act—Patented N W ¼ S c 21 Twp 6 S R 31 E, M D M, 160 acres. Personal property ..... $ 27 28

Yandell, Martha A., Mrs—The S W qr Sec 21 Twp 7 S, R 33 E, M D M, 160 acres.. 6 30

Yaney W P—The E hf of S W qr Sec 10, E hf of N W qr, N W qr of N E qr Sec 15, Twp 7 S, R 33 E, M D M, 200 acres..... 7 87

Yerington, H. M. (A. R. Conklin, Agt.)—Mill and Mill site known as the Argus Range Mill, 15.0 ft in the Bonanza King mine, 1500 feet in the North Star mine, 1500 ft in the Natalia mine, 3 miles of water pipe, land belonging to spring, all of above described property being in Sherman Mining Dist..... 242 75

Zaun and Wife—House and lots in town of Lone Pine, lot 4 in blk 17, lot 1 in blk 20. Personal property..... 12 1

Public Notice

Is hereby given that unless the above taxes and costs are paid I will on

Monday the 28rd Day of February, 1887,

Between the hours of 9 o'clock A. M. and 4 o'clock P. M., to wit, at the hour of 10 o'clock A. M., commence to sell the above described real property at public auction in front of the Court House, in the town of Independence, County of Inyo, State of California, and that I will continue such sale from day to day according to adjournments until the whole real property above described, or so much thereof as may be necessary, shall be sold, and that I will sell the smallest quantity of each assessment of said property that will be taken by any person for the amount of said taxes and costs, in gold or silver coin of the United States.

Dated this 4th day of February, A. D. 1887.

S. G. GREGG,
Tax-Collector of Inyo County, California.
By R. C. SPEAR, Deputy.

How's Your Liver?
Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.
NEVER BEEN DISAPPOINTED.
As a general family remedy for Dyspepsia, Torpid Liver, Constipation, etc., I hardly ever use anything else, and have never been disappointed in the effect produced; it seems to be almost a perfect cure for all diseases of the Stomach and Bowels.
W. J. McELROY, Macon, Ga.

MARRIAGE GUIDE
260 PAGES. Illustrated, in Cloth and Gilt Binding, 50c. money or stamps. Same, paper cover, 25c. This Book contains ALL the curious, doubtful or inquisitive wants to know. Full of very interesting and valuable information. HEALTH, BEAUTY and HAPPINESS are promoted by its advise—who may Marry, who not, why; Medical Aid, when necessary, brought home to you. 50 Wonderful PEN PICTURES, true to life. Young or old, married or single, sick or well, should read it. Sent sealed by DR. WHITTIER, St. Louis, Mo. CUT THIS OUT AND SEND WITH ORDER.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, Bodie, Cal. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the north-east corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalk-stone monument, mineral monument No. 31 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 56 degrees 26 minutes E. distant thirty-six chain; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southwest corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W, and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

D. WALKER,
Register.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE, Bodie, California, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 55 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty-nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W, and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

D. WALKER,

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, FEBRUARY 5 .....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Mr. and Mrs. Collins, of Mason valley, Nevada, are at Independence.

Mrs. Wayland, of Bishop Creek, is at Independence on a visit with her daughter, Mrs. Brown.

Hay is reported to be rising in price in Reno. The ruling prices are $10 per ton in the stack, $12 delivered and $16 baled.

The Senate of Nevada has passed a bill to abolish all bonds of State and County officers. It is not likely that the measure will pass in the Assembly.

The Scotch members of the English Parliament have resolved to favor home rule for Scotland. The people of Scotland realize that what Ireland is claiming for herself is right, and that Scotland should have the same privilege.

Colonel Stevens is reported to be quite ill at his home at Lone Pine. Though aged nearly seventy-five years, the Colonel is full of energy, and his many friends hope he may speedily get well again and be spared to reap some of the fruits of the big ditch he is making and that is now so nearly completed.

Mr. A. Goodrich, of Round valley, has been at Independence some weeks; he was in very poor health and came here to place himself under the care of Doctor Woodin. Mr. Goodrich is gaining strength rapidly, and from present appearance will soon be quite well again. Cap. Smith, of Bishop Creek, who was shot in the leg some time ago and is yet under the care of Doctor Woodin, is almost entirely recovered.

San Carlos.

The San Carlos mine appears to be developing well. Very recently C. Hoole and his comrade made a shipment of ore from the mine, and now they have another lot ready for shipment.

The Bill Passed.

The bill for the formation of a new agricultural district, to include the counties of Alpine, Mono and Inyo, passed the Assembly last Saturday by a unanimous vote. In all probability the bill will fare equally well in the Senate. Mr. Gould has served his constituents well in this matter.

Rich Strike Reported.

It is reported from Darwin that a large and rich ore body has been struck in the extension of the Defiance mine. George Lewis is the lucky prospector. The ore body is reported to be very large and the ore of good quality.

We Tell You Plainly

that Simmons Liver Regulator will rid you of Dyspepsia, Headache, Constipation, and Billiousness. It will break up chills and fever and prevent their return, and is a complete antidote for all malarial poison—yet entirely free from quinine or calomel. Try it and you will be astonished at the good results of the genuine Simmons Liver Regulator, prepared by J. H Zeilin & Co.

Delinquent List.

The delinquent tax list is published this week. It is very gratifying to note that the list is much smaller this year than ever before. No better proof could be given that the county has been prosperous during the past year; farmers have had market at fair prices for all they had to sell, and merchants have done a good business. Not a workingman in the county has been idle if he wanted to work.

New Discoveries.

New discoveries of rich ore bodies continue to be made near the famous Lapanta mine near Hawthorne. Pat Shannon and Frank Thorn have recently discovered, about 3,000 feet easterly, and in the Lepanta belt, a ledge over two feet wide, which contains a twelve-inch streak of the crumbled white quartz ore, the same as that of the richest of the Lepanta ores. They are sinking upon the ledge and are taking out a considerable quantity of this ore.

Discovering Their Ways.

The people of the East are discovering the ways of the "gentle" Chinese. No. 566 Fulton street, Brooklyn, has been known as a Chinese tea store, but last Monday night the police battered down the doors and captured seventy-four Chinamen, who were gambling, and $50,000 in cash. Three persons had $7,000 each, and two $5,000 each. They came from San Francisco, St. Louis, Chicago, Pittsburg, Newark and Paterson, New Jersey, for the purpose of breaking the "bank."

A Good Year.

The State was very prosperous during the past year. The San Francisco *Journal of Commerce* of last Saturday issued its annual trade review for the last year. It presents a remarkably flattering showing for California. The wheat product for the year is shown to be 46,000,000 bushels; barley 18,000,000 bushels; beet root sugar product, 2,000,000 pounds; coinage at San Francisco Mint, $25,000,000; value of merchandise and treasure exported, $67,000,000; wool clip, 40,000,000 pounds; wine product, 20,000,000 gallons; quicksilver, 30,000 flasks; total value of products of the State during 1886, $202,000,000; banking capital of the State, $57,000,000; increase of immigration during the year, 21,686 persons.

Not Reforming Very Fast.

Senator Fair recently took his son, "young Jimmy" as he is called, to Washington, doubtless with the intention of severing him from his associations and changing the habits he had formed in San Francisco. Evidently young Jimmy is not reforming with as much celerity as the Senator might wish. About ten o'clock last Friday night Jimmy was in a bar-room in Washington when ex-Congressman Frank Page came in, and the young man asked him to drink. Page refused, and young Fair drew a pistol and fired it. Page luckily hit the pistol, and the ball struck the ceiling. Page took the pistol away from the Senator's son, and the latter was taken by a couple of servants across the street and taken to his hotel and put to bed. It is a terrible stigma upon our courts of justice, that there is a conviction in the public mind that if this drunken young ruffian should commit a murder the money of his father would save him from the gallows.

More Settlers.

Mr. Finley McIver arrived at Independence last Wednesday. He is the representative of eight families of Scotch people who want to locate in Owens valley. Mr. McIver is a professional landscape gardener, nurseryman and orchardist. He is well pleased with the country, and has made a selection of land about seven miles from Independence, which he is satisfied will suit the intending colonists, who are all trained farmers. Mr. McIver has been in California long enough to have a fair knowledge of all the farming regions of the State, and says he has not yet found any other place where there are so many and good advantages offered to settlers as in Owens valley. He went away this morning to report to his friends and expects to return in a few weeks to stay.

GHASTLY DISCOVERY.

The Remains of David Fralich Found.

It will be remembered that David Fralich mysteriously disappeared from Independence about two months ago. Nearly a week passed before his disappearance was noticed; then search was made, but no trace of him could be found. Last Monday Mat McDonald was riding between the Kearsarge mine and Independence, and when about four miles from town he discovered the remains of the missing man only a few yards from the trail. He at once gave notice of his discovery, and Mr. Matlack, the Coroner, went to the place and took charge of the body, or what was left of it, and had it buried. Coyotes and carrion birds had eaten most of the flesh from the thighs and body; but the hands and face had not been touched, except the eyes, which had been picked out. The old man had evidently strayed from the track; wandered around for some time and became exhausted and laid down and died when almost back again on the right way. For some time after Fralich disappeared there were surmises and rumors of foul play. The inquest held by the Coroner proves conclusively that all this talk was idle. The old man when he left Independence the last time he was seen alive was carrying a sack containing groceries and a few other articles. He had evidently got weak or tired on the way and laid down his burden and stuck his staff in the ground beside it as a mark, and then wandered on to where he died. The sack and staff were found just as he had left them.

Drink Gets Them.

Last Monday Raymond Belmont, son of August Belmont, the New York banker, shot and killed himself. Young Belmont lived with his father at 109 Fifth avenue, and was associated with the Belmont banking house, at 12 Pine street. In the evening Raymond went out to dinner. He returned shortly before 1 o'clock in the night. With him was Leonard Behr, a night watchman, with whom young Raymond was well acquainted, and who frequently accompanied him home. They went to the basement, where there was a shooting gallery, in which young Belmont, who was a very expert shot, frequently practiced. Here he also had revolvers and guns.

As they entered the room young Belmont picked up a double-acting Smith & Wesson revolver of thirty-two calibre, and turning to Behr said; "Now, I want you to go and hold up a gold collar button in your hand, and I will shoot it out." Behr, who had frequently seen the young man shoot and had great confidence in him, agreed to do this. Before taking up his position, however, young Belmont turned to him and said: "Oh, first close all the doors, so that the report may not alarm father, who is upstairs." Thereupon, Behr walked over to the door, and had just put his hand upon it when he heard the report of the pistol. Turning, he saw young Belmont falling to the floor, blood gushing from a wound in the right side of his head. "My God, Raymond," he cried, "what have you done?"

He leaned over the young man, who opened his eyes, and, looking at him, tried to speak but could not. Behr aroused August Belmont, the young man's father, who was all alone in the house. Young Belmont died soon after. The bullet entered his brain.

It was evident that young Belmont had taken considerable wine with his dinner.

Coroner Eidman said next day that he had no doubt the shooting of Belmont was due to the accidental discharge of the revolver. He made some inquiries and acquainted himself with the facts sufficiently to feel assured that the case was not one of suicide.

Over Again.

From Texas, Montana, Nebraska, Pennsylvania, New York and Connecticut, we have had inquiries during the past week about Owens valley. A very great number of similar questions have been put and answered during the year gone by, so that nothing new now remains to be said, and we can but repeat:—Snow very rarely falls in Owens valley; and so far as the white people know, on those rare occasions never lies on the ground longer than a few hours. The country is well suited to sheep; about half a million come into the valley each spring from the neighboring counties; the last of these usually leave the valley about the beginning of November. Owens river flows the entire length of the valley from north to south; it is a large, swift but placid stream of pure water, fordable only at a few places in the valley. Springs are numerous, and beautiful streams flow down the Sierra mountains at short distances apart the whole length of the valley. There is no better watered region in the State. All the fruits, grains, roots and vegetables of the temperate zone grow in perfection. Alfalfa yields two or three good crops each year. Farming is carried on independent of rain; the snows of the Sierras give a never failing supply of water. The average price of all kinds of farm produce is higher in Owens valley than anywhere else in California. The Carson and Colorado railroad affords an outlet to the mining regions of Western Nevada. There are good schools at convenient distances apart. No fault has ever been found with the climate except by the doctors, who say it is too healthy; nor with the people, except by lawyers, who complain that there is not litigation enough. From this ordinary people will conclude that climate and people are nearly perfect.

A well conducted dairy would pay, there is plenty of demand for butter at sixty cents per roll. Chickens and eggs are always in demand and bring good prices. There is yet a good deal of fine government land open for entry in the valley. A good deal of improved land has lately been bought by new settlers, and all of these are well pleased with their new purchases. The country is attracting a great deal of attention from intending settlers, and very soon all of the government land will be taken up, and all improved lands offered for sale will be bought by new settlers.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

Valentines.

An assortment of valentines of all kinds at Rhine's store. The valentines are all of the latest styles and include everything from the broadcast caricature to the most elegant designs. They will be sold at cost.

Defying Fire.

Mr. Rhine has got a large lot of big blocks of soapstone laid down at his store. This material was brought from near Benton, Mono county, and is now being put in place to make a fire proof vault in which valuable articles, books, etc., will be kept. This stone has been tested thoroughly as a fire resistant and has no superior.

Mines in Saline Valley

Messrs. W. T. Grant and E. Walker, of Olancha, own several silver mines in Saline valley, east of the Inyo mountains. These mines were leased on the 10th of January to Messrs. O'Keefe & Co., and a force of miners are now at work getting out ore. The ore will be packed across the mountains to the C. & C. railroad and shipped to Reno or San Francisco.

Board of Education.

The Regular Semi Annual Meeting of the Inyo County Board of Education will be held in Independence on Tuesday the 15th day of February, 1887. All applications for examination should be sent on or before that date. The examination will commence on Wednesday the 16th instant at 9 A. M.

J. H. SHANNON,
County Superintendent

Slight Earthquake.

About half past one o'clock last Sunday morning there was a slight shock of earthquake at Independence. Frame buildings were shaken as if by a rather strong blast of wind, but not more than this. People who were asleep at the time were not waked up by the shock and remained unconscious that it had happened till told of it next morning. The night was very clear and calm.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

On the Right Track.

The right track has at last been struck on the irrigation question. A bill has been introduced by Mr. Brierly, of Los Angeles, providing for such a Commission as was recommended by State Engineer Hall. The Governor is to appoint five Commissioners to hold office for two years, and to receive $5,000 each for their services, and necessary traveling expenses. This Commission is to make its report to the Legislature in 1889. It is to study the data in the office of the State Engineer and State Library, and to gather additional data by visiting every irrigation county in the State and holding public meetings in the leading places, to make a study of the laws of California and other States and countries bearing upon the subject of irrigation, and from the facts so gathered draft suitable codes and submit them to the Legislature of 1889. In October, 1888, it is to make a report to the Governor, which report shall be made public, and in November and December of that year it is to hold public meetings to hear suggestions and criticisms.

It is to be hoped that no hindrances will be put in the way to prevent this bill from becoming law as speedily as possible.

Sensible Indian.

There is an Indian in Owens valley who takes very practical ideas of things. A physician was passing the camp lately where this Indian lives; the Indian begged of the Doctor to enter the wigwam and look at a sick papoose; the doctor, who is a very tender hearted man, entered, but saw at once that the child would certainly die within a few hours, or a day at farthest. The Doctor said he could do nothing for the little one, but the Indian insisted that it must have some "white man's medis." To satisfy the anxious father the Doctor prepared a little simple medicine, told the parents how to give it to the child and came away. Next day the Indian called at the doctor's office and said: "Papoose dead, maybe so your medis heap kill um; you buy um box, make um grave; you kill um all same white man, put um in ground all same white man." The doctor declined to bear the expense of the funeral; but the hint given by the Indian should not be lost. As the Legislature is now in session the life insurance companies might procure the passage of a bill compelling all doctors to pay the funeral expenses of patients who die while under their care.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out: if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

AGENT FOR W. R. STRONG & CO.

S. A. DENSMORE,
Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, FRUITLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., Jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $1000."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

SUBSCRIPTION BOOKS.

How Agents are Trained to Do Effective and Profitable Work.

"The publication of an article on How Book Agents are Primed," said the manager of a well-known subscription-book publishing house, "has attracted wide attention, particularly as it was the first article that has treated the subject with reference to the instructions agents received from their employers. What we make a special feature of is systematic work. For instance, in canvassing in towns we instruct the agent to carry a pocket memorandum book, and after he has started his list with a sufficient number of the leading characters, to canvass each street in course. When beginning with a street he should mark a few lines to indicate the street, the line he is upon, on what block, etc., and note down all who are absent and those who he is to call on again. Very likely after the first block, his notebook will look like this:

North Street.

Main Street.
- Smith, out of town; back next week.
- Jones busy.
- Phillips, busy.
- McCoy, says call at noon.
- Davis, out.
- Williams, out.
- Peters, busy.
- Childs, out.
- Harrison, sick.

When through the first canvass he should go over the ground again and again until all have had a chance. This is the only way in which a thorough canvass of a town can be made, as it will not do to trust to memory. Yes, sir, it's a regular art to sell a subscription book, and there are but few avocations equal to this in requiring a knowledge of mankind. While there are certain general principles termed human nature common to all, the agent finds each specimen varied in minor points, so that if he feels disposed to observe he can adapt himself to the peculiarities of individuals and thus wonderfully increase his influence in the important art of pleasing. If it's like any thing, this business resembles fishing more than any thing else. Some days the agent will not obtain even a name, while on others his business will be first rate. I have known of an agent starting out fresh on Monday morning and working faithfully the first three days of the week without obtaining a name. But the three remaining days he got nineteen names."

"Are there no people whom you advise agents to avoid?"

"Yes, an agent should avoid as a pestilence men in groups, public gatherings and people at court. Very little can can be effected on such occasions. Walk up to any knot of three or four and one of them is sure to be either a joker or a grumbler, and if either, a laugh or a whine will be made at your expense, so that all hopes of getting subscribers will be lost. But call upon a man at his home or place of business and he feels himself particularly addressed; his mind is more free to act, and the chances of success are better, for he is but one, and you, if quick-witted, will soon see how to suit him. When all other arts fail the agent often wins by asking a gentleman or lady if the birthday of wife or husband or friend will not occur soon, and suggesting the nicety of his book as a birthday or Christmas present. People often tell an agent awful stories of having been cheated by book agents. An old agent, a perfect prodigy, the Napoleon of agents, in fact, who, although near seventy years of age, works unremittingly from morning until night, has a pet mode of meeting this cheating objection. 'Well,' he says to the complainer, 'you have sometimes bought a hat and found that it did not do good service and sometimes a pair of boots that wore right out, and you considered you had been cheated in both hat and boots.' 'Yes, that's a fact,' is the reply. 'Then,' says the agent, 'did you from fear of again being cheated determine to go hatless, and barefooted the rest of your days?' But one of the real arts in the business and which people outside of it don't have any idea of, is to deliver a book after it has been subscribed for. The majority of agents generally lose from five to ten subscribers in a hundred. The success in delivering all depends upon the agent. Some few agents whom we have known make out grandly in obtaining subscribers and miserably in delivering, losing one out of three and sometimes even worse. These were always very amiable men, of whose good nature advantage was taken. The fault was mainly their own. When they call upon a subscriber they acted just as if they expected he would refuse to fill his contract, saying something like this, 'I have brought your book; I hope you are ready to take it,' as it were, inviting him to make an excuse. To deliver well an agent should be pleasant, but firm and decided, acting just as if the subscriber was as anxious to procure as he to deliver the article, and he rarely will experience any difficulty."—*N. Y. Mail and Express.*

Life in London Lodgings.

Life in lodgings in London is hopelessly dull and dreary, the cooking generally atrocious. There is, of course, variation to this sweeping denunciation. It is a chep and private way of living, but one must accustom one's self to boiled mutton and Brussels sprouts and a terrible something, called a "sweet," named gooseberry tart. Then begins the battle of words again. Your landlady uses a different vocabulary from yourself, and only her pretty English voice reconciles you to her "haspirations." Here there is apt to be a faithful, good maid, however, whose respectful manners and willing service are delightful after the free and airy unsubserviency of home rule.—Mrs. John Sherwood in New York World.

The Wear of Niagara.

The American Association for the Advancement of Science, in session at Buffalo, listened to a paper by Professor R. S. Woodward, of Washington, on "The Rate of Recession of Niagara Falls." The professor said that the area of the rock worn away at the Horseshoe falls between the years 1842 and 1875 was 18,500 square feet, equal to .425 acres; between 1875 and 1886, 60,000 square feet, or 1.37 acres. The main length of the contour of the falls is 2,300 feet. The time required to recede one mile, if the rate is 2.4 feet per year, is 2,200 years.—Building.

An Indirect Vegetarian.

A—I thought you were a vegetarian, and now I see you eating mutton! B—Well, I am only an indirect vegetarian—I eat the meat of such animals only as live on vegetable food.—Fliegende Blaetter.

POVERTY IN LONDON.

The Hopelessness Which is the Curse of Improvidence and Want.

Poverty in London is increasing, both relatively and actually. Relative poverty may be lightly considered, but it breeds trouble as rapidly as actual poverty. The family which has an income sufficient to support life on oatmeal will not grow in good will when they know that daily meat and holidays are spoken of as "necessaries" for other workers and children. Education and the spread of literature has raised the standard of living, and they who can not provide boots for their children, nor sufficient fresh air, nor clean clothes, nor means of pleasure feel themselves to be poor, and have the hopelessness which is the curse of poverty, as selfishness is the curse of wealth.

Poverty, however, in London, is increasing actually. It is increased (1) by the number of incapable—"broken men, who, by their misfortunes or their vices have fallen out of regular work," and who are drawn to London because chance work is more plentiful, "company" more possible and life more enlivened by excitement. (2) By the deterioration of the physique of those born in close rooms, brought up in the narrow streets, and early made familiar with vice. It was noticed that among the crowds who applied for relief there were few who seemed healthy or were strongly grown. In Whitechapel, the foreman of those employed in the streets reported that "the majority had not the stamina to make even a good scavenger." (3) By the disrepute into which saving is fallen. Partly because happiness (as the majority count happiness) seems to be beyond their reach, partly because the teaching of the example of the well-to-do is 'enjoy yourselves," and partly because "the saving man" seems "bad company, unsocial and selfish;" the fact remains that few take the trouble to save—only units out of the thousands of applicants had shown any signs of thrift.. (4) By the growing animosity of the poor against the rich. Good will among men is a source of prosperity as well as of peace. Those bound together consider the good of the "whole" before the good of a class. Among large classes of the poor animosity is slowly taking the place of good-will, the rich are held to be of another nation, the theft of a lady's diamonds is not always condemned as the theft of a poor man's money, and the gift of £70,000 is looked on as ransom, and perhaps an inadequate ransom. The bitter remarks sometimes heard by the almoners are signs of disunion, which will decrease the resources of all classes. The fault did not begin with the poor; the rich sin, but the poor, made poorer and more angry, suffer the most.—*Nineteenth Century.*

MALARIAL POISON.

Its Existence Described as Long Ago as the Decline of the Roman Republic.

When we talk of the Roman climate we can not dissociate the theme from its distinctive characteristic—the malarial poison. What is this poison? Till the researches of Tommasi-Crudeli and Krebs, published in 1879, the most plausible answer was that of Dr. Leon Colin, who defined it as an "intoxication tellurique," an earth-poison generated by the surplus vegetative energy of an abnormally fertile soil, whose fecundity was very partially absorbed by the scanty sprinkling of herbage that overspread its surface. Cultivate this soil, render to this vegetative energy its appropriate pabulum, and you provide the antidote to malaria. Such, stated with extreme brevity, was the theory of Leon Colin, embodied in a work of great ability, which, appearing as it did, at the outbreak of the Franco-German war, encountered a public too preoccupied to give it the study it deserved. Tommasi-Crudeli combats this theory. He denies that the Roman Campagna possesses any thing like the exuberant fecundity with which it has been credited. Its really fertile tracts are few and far between, rarely compensating the agriculturist for his labor—as, indeed, was well known to ancient husbandmen. Then again, if the poison were gaseous, as Leon Collin's theory implies, the malaria-surcharged atmosphere ought to be at its maximum at noonday, when the exhalation from the soil is greatest; but on the contrary, the localities in which malaria is most pronounced reach their maximum of danger in the morning and evening—those periods of the day when the difference of temperature between earth and atmosphere renders the ascending aerial currents most powerful and most apt to transport the material of the poison. That material, according to Tommasi-Curdeli, is a living ferment, encountered equally on the mountain and plain, in dry soils and in humid. Its existence was suspected and unscientifically described as long ago as the decline of the Roman republic by the agriculturist Varro, and its nature and form are defined by Tommasi-Crudeli as a "Schizometes bacillaris." For its development it requires a temperature not lower than twenty degrees C. (a moderate degree of humidity) and the immediate contact of the atmosphere with the soil it infects. As the absence of a single one of these conditions prevents the development of the malaria, so certain localities exhibit at times a natural suspension of the poison. In winter, for example, the fall of the temperature below the required twenty degrees causes a thermic suspension; the loss of the necessary humidity under prolonged drought causes a hydaulic suspension; and the interposition of sheets of water or of a thick matting of turf on the laying down of a pavement, by preventing the immediate contact of the atmosphere with the infected soil, produces an atmospheric suspension of the malaria.—*London Lancet.*

A Remarkable Plaster Work.

In Paris, the sculptor Fremeit has a remarkable plaster work, life-size, for the Spring exhibition. It represents an orang-outang carrying off a woman. The animal is hideously majestic. The artist paid a fabulous sum for a skeleton of the beast, and the plaster cast in the Jardin des Plantes further aiding him, he has been enabled to obtain perfect proportions with the muscles, and the genera aspect also is perfect. The animal holds the woman in his right arm, while his left grasps a huge rock ready to hurl at an enemy. His face shows both anger and pain, for an arrow has entered his left shoulder. The exquisite figure of a woman is pressed against him, while her lacerated arms and hands vainly endeavor to push him off.—The Journalist.

Brevities.

A philosopher says: A girl should marry for protection—not for revenue only.

It looks as if somebody would have to be put on the Bulgarian throne and kept there.—New Haven News.

It is now understood why the French academy made M. de Lesseps an "immortal." They wished to give him time to construct the Panama canal.—Rehoboth Sunday Herald.

Young boys' stomachs are always in apple pie order.—Rochester Post-Express.

When you meet a defeated candidate talk of the crops—refer to the weather—inquire after his family—go back even to the revolutionary war, but don't speak of the election. Have some mercy on a fellow human being.—Detroit Free Press.

Kate Field asks: "How many women marry a good man?" Only one, Miss Field, only one, if the good man is true to his reputation.—Life.

"John," said the proprietor of the beach restaurant, "you'll have to take a spade and go down to the beach and try to find a clam. The one we made the chowder with is missing. Been eaten by some of the guests, I guess. By jingo, these city folks want the earth."—Boston Courier.

The fisherman's favorite musical instrument is castanet.—Yonkers Gazette.

Barnum has the greatest show on earth; but his chances in Heaven are no better than those of other circus people.—Picayune.

"This way, gentlemen, to the American dwarf, to be seen only through a hundredfold magnifying glass; totally invisible to the naked eye."—Fliegende Blatter.

They were at the circus: "Have you ever seen Mlle. La Rue's great feat?" "No," she replied. "Is she a Chicagoan or a St. Louis woman?"—Merchant Traveler.

Maternal instinct. Mamma (to Lucy, who has stumbled and smashed her doll's head)—Don't cry, my dear; it can't be helped. Lucy—Oh, mamma dear! you don't know how I feel; you've never lost a child.—Judge.

As for little Joe, he would eat the ripe peaches, in direct disobedience, too. His love for them overcame everything else. In despair his mother said: "Joe, if you will do so, I shall perhaps lose my little boy; for you will certainly be sick and die unless you obey me." "If I do die," Joey responded cheerfully, "I guess they'll be glad to see me come to heaven, I'll be so full of peaches."—Exchange.

Edison says that no experiment which he has tried at night ever failed. Now what we want to know is, did Mr. Edison ever try at night to find the matches in his bare feet without disturbing any of the furniture or stubbing his big toe against seventeen different obstructions?—New Haven News.

What we want is not to see ourselves as others see us. We want to have others see us as we see ourselves.—Somerville Journal.

She and he had been listening to the music of the insect world. "Arthur," she exclaimed, breaking the noisy silence, "how delightful, and yet how sad, is the monotonous chorus of those toadstools!" "Toadstools, my dear?" replied Arthur; "I think you mean crickets." "Yes, crickets; that's what I mean. I knew it was something to sit on."—Boston Transcript.

It is stated that funerals cost three times as much as they did forty years ago. Funerals may come high, but people will have them.—Life.

Why does the beauteous maiden seem
So wearied and so vexed?
She's just found out the tale will be
"Continued in our next."
—Merchant Traveler.

An hour glass is made smallest in the middle. It shows the waste of time.—The Critic.

"Liberty's mouth is just a yard wide," an exchange says. But the most notable thing about it is that she always keeps it shut. Observe, she!—Buffalo Express.

A LUCKY DRY GOODS MAN.

Henry L. Valencia, who presides over the hosiery department in Keane Brother's dry goods store, is a firm believer that there is good advice in the old saying, "If at first you don't succeed, try, try again." And that he is right in so believing is evidenced by the fact that after wooing the Goddess of fortune for years, she smiled upon him at the last drawing of The Louisiana State Lottery and in consequence he is $5,000 richer than when he purchased one-fifth of ticket No. 48,000, which drew the second capital prize of $25,000.

Mr. Valencia was happy and smiling yesterday afternoon when interviewed concerning his good fortune. "I bought a coupon in The Louisiana State Lottery every month for years," said Mr. Valencia, "and could hardly believe my good luck when I learned that I had won a prize at last. But when I received $5,000 in gold coin for my coupon last Monday, I began to realize my good fortune. I was able to return thanks with good grace Thanksgiving Day," said he, "and when Christmas comes I will count in the $5,000 as a neat little Christmas present."—[San Francisco (Cal.) Chronicle, Nov. 27.

SATISFACTORY TRIALS.

Experiments With the New Eight-Inch Thirteen-Ton Steel Gun.

The Ordnance Department is much pleased with the performance of the new 8-inch steel gun at Sandy Hook. This gun, which weighs 13 tons, and whose length of bore is 30 calibers, was manufactured at the West Point foundry. The tube and jacket were obtained from Whitworth, and the hoops and the breech mechanism forgings from the Midvale Steel Company. The gun was first tried with the German brown prismatic powder, when the following results were reached: With a charge or 100 pounds, and with a shot weighing 182 pounds, the muzzle velocity was 2,145 feet, and the pressure 29,500 pounds; with a 235-pound shot the velocity was 1,942 feet, and the pressure 32,250 pounds; with a shot weighing 286 pounds the velocity was 1,795 feet, and the pressure 32,800 pounds. The gun was next tried with Du Pont's brown prismatic powder, the charge being the same. The velocity with a 237-pound shot was 1,937 feet, and the pressure 32,950 pounds; with a 286-pound shot the velocity was 1,820 feet, and the pressure 35,450 pounds. The gun has been fired thirteen times, and will now be turned over to the testing board. It is worthy of remark that when this gun was designed, the computed velocity with the 286-pound shot was 1,825 feet, and the computed pressure 36,000 pounds. This is almost exactly verified by the firing with the Du Pont powder.—*Army and Navy Register.*

At the masquerade ball in Adin last week, St. Jacobs Oil took the first prize. Nothing strange in this, as it is highly prized in every family where used—especially in ours.—Bieber, Cal., *Mountain Tribune.*

There are three ways to fight slander—Laugh it off, fight it down, or keep quiet. It's a toss up to choose the wisest course.

Mr. Geo. Denterman, New York city, suffered nearly a month with a severe cough, and having tried several remedies without relief, finally used Red Star Cough Cure which, he says, proved "speedy and effectual."

ABANDONED!

A Picture of the Desert that Finds Its Application in Many Homes.

One of the most vivid pictures produced in recent years was that drawn for a London illustrated journal representing General Gordon seated in a sandy waste of Africa clutching his country's flag and his Bible in one hand and a trusty weapon in the other, while round about him, closely environing him on every side, perched a flock of lean and hungry vultures. Traced in the sand at his feet was the name "Khartoum," and under the masterly artistic conception, which events subsequently tragically verified, was the single word—"Abandoned!" The picture derived much of its force from the fact that the face of the solitary man, on which despair and hopelessness were written, was that of a hero whom all the world honored. In every town and city throughout this broad land are heroes who have become martyrs to medical science just as was Gordon a martyr to military art. They have been "abondoned" by their physicians and given up to death in the tenderest language that their genial practitioner can command. For years the sufferers have taken medicines of all kinds that did not cure. They have continued to grow worse, until Death was knocking at the door of the house. Drs. Starkey & Palen, No. 1529 Arch Street Philadelphia, Penna., no longer need to recommend their Compound Oxygen treatment for the cure of *lung and other chronic diseases.* It is already prescribed by hundreds of reputable progressive physicians of the old and new schools. It has entered many thousand homes in the neat and convenient form of the Home Treatment. In *Health and Life,* a quarterly published by them, they record in each number cases of patients who have been abandoned by other physicians. The number for October, 1885, had thirty such reports. This paper and a valuable pamphlet showing its manifold virtues in healing the sick by the natural and rational process of building up the shattered body will be sent free by mail or handed to those applying in person at their office.

If the London divorce scandals continue to be telegraphed over to this country the owners of the Atlantic cables will be obliged to take up the wires and disinfect them.

THE OYLY WAY TO CONQUER DYSPEPSIA.

It is perfectly preposterous to introduce pepsin and other artificial solvents into the stomach, in the expectation that they will assist digestion by acting on the food itself. They will not. Nor is it possible thus to overcome dyspepsia. The only way to conquer that disorder, and prevent the numerous diseases and disabilities which it assuredly provokes, is to renew the activity of gastric action by strengthening the stomach. Hostetter's Stomach Bitters eradicates the most inveterate forms of indigestion by restoring vitality to the alimentary organs, and those which are tributary to them. The liver, the bowels, the kidneys and the nerves, no less than the stomach, experience the invigorative effects of that standard tonic, which possesses alterative properties that greatly enhance its beneficial influence, and give a permanence to its effects which they would not otherwise possess.

Maud (gushingly)—Oh, Clara, my dear, do look at my engagement ring! Won't all the girls be dying of envy? Actually three solitaires!

YEARS TEACH MORE THAN BOOKS.

Among other valuable lessons imparted by this teacher is the fact that for a very long time Dr. Pierce's "Golden Medical Discovery" has been the prince of liver correctives and blood purifiers, being the household physician of the poor man, and the able consulting physician to the rich patient, and praised by all for its magnificent service and efficacy in all diseases of a chronic nature, as malarial poisoning, ailments of the respiratory and digestive systems, liver disease and in all cases where the use of an alterative remedy is indicated.

The United States Navy principally consists at the present of flag-ships, Rear Admirals and red tape.

For Coughs, Asthma, and Throat Disorders, use "*Brown's Bronchial Troches*"

To feel free, pleasant and be healthy, use Irish May Flower. 75 cents at druggists.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

HUMILIATING ERUPTIONS ITCHING AND BURNING TORTURES

And every species of Itching, Scaly, Pimply, Inherited, Scrofulous, and Contagious Diseases of the Blood, Skin, and Scalp, with Loss of Hair, from infancy to old age, are positively cured by the Cuticura Remedies.

Strange as it may seem, when money is close it is difficult to get very near it.

TESTIMONY OF A PAINTER.

No. 105 Carlton Avenue, Brooklyn, N. Y.,

Allcock's Porous Plasters are undoubtedly the best external remedy manufactured. I make this assertion to the public from my own personal experience of their wonderful virtues. Suffering from severe pains in my side and chest, contracted through a severe cold. I applied a couple of Allcock's Porous Plasters upon going to bed as night. The result was, that in eight hours after applying them I could get up and walk about with very little pain or ache, when the night previous I could neither get up nor down without help, nor stoop to remove my shoes. I have since used them in my family for various ailments, and have never known them to fail to give almost immediate relief. T. H. Backus.

SINGING SONGS OF JOY.

"Hurrah for the Irish May Flower's bloom
That saved my Barney's life,
It kept his liver from death's doom,
An' cured him for his wife.
Do ye blame me Mr. Delaney
For singin' songs of joy?
Irish May Flower, more's the power!
Cured my darlin' boy."

The Bartholdi Goddess of Liberty, with ice on her head in the morning, after being out all night, is not a pleasing spectacle.

A TOTAL ECLIPSE

of all other medicines by Dr. R. V. Pierce's "Golden Medical Discovery" is approaching. Unrivalled in bilious disorders, impure blood, and consumption, which is scrofulous disease of the lungs.

A vicar's little daughter, on visiting another vicarage, asked, "What does your pa want to study for? He doesn't smoke."

We call attention to the advertisement of the "Carbolic Smoke Ball," in this issue. We know that its popularity in the East and San Francisco is simply phenomenal, and the company is responsible. No one need hesitate about ordering by mail, their directions are full and complete and it is a thorough home treatment.

When getting your boot or shoe straightened use Lyon's Heel Stiffeners; they save money, give comfort and keep them straight.

"Seal of North Carolina" Plug cut is the Boss smoking Tobacco. It is kept by every first-class dealer in town.

Irish May Flower, the king of discoveries.

Try Germea for Breakfast

FOR THE BLOOD — BROWN'S IRON BITTERS

Combining IRON with PURE VEGETABLE TONICS, quickly and completely CLEANSES and ENRICHES THE BLOOD. Quickens the action of the Liver and Kidneys. Clears the complexion, makes the skin smooth. It does not injure the teeth, cause headache, or produce constipation—ALL OTHER IRON MEDICINES DO. Physicians and Druggists everywhere recommend it.

Mr. Hugh D. Latham, in office of Wells, Fargo & Co.'s Express, San Francisco, Cal., says: "I suffered with Impure Blood and Malaria for about four years, and tried almost every kind of medicine without relief. After using Brown's Iron Bitters for three months I was as well and strong as ever."

Alma Smith, Marysville, Cal., says: "I have suffered with Scrofula for the past two years and have tried many different medicines without relief. After taking two bottles of Brown's Iron Bitters I am entirely cured."

Mrs. E. A. Frost, Fresno, Cal., says: "I have suffered with Impure Blood for nearly five years. I have used three bottles of Brown's Iron Bitters and am now well."

Miss Ida Brinkerhoff, Dixon, Cal., says: "I have used Brown's Iron Bitters for Impure Blood with very beneficial results."

Genuine has above Trade Mark and crossed red lines on wrapper. Take no other. Made only by BROWN CHEMICAL CO., BALTIMORE, MD.

"CARBOLIC SMOKE BALL!"

TRADE MARK.

This remarkable and now famous remedy—"Carbolic Smoke"—has been used in the Eastern and Western States with the most gratifying results. It acts as a disinfectant upon all the mucous membrane, where the air cells exist, healing them up in a short time. It cures in nearly every case the most severe forms of

Catarrh, Hay Fever, Bronchitis, Neuralgia, Headache, Croup, Sore Throat, Deafness, Weak Eyes, Granulated Lids, Ulceration of the Lungs, Snoring, Cold in the Head, Cold on the Chest, etc.

This "CARBOLIC SMOKE" disinfects the poison in the mucous membrane of the Head, Throat, Bronchial Tubes and Lungs upon the same principle as Carbolic Acid would act upon the diseased and poisonous air arising from a patient in a sick room. It is PERFECTLY HARMLESS—eating up the poison that causes the disease.

It is put up in "LITTLE BALLS" that can be used at home, on the street, in the office or counting-room at any time with perfect ease.

A single application gives immediate relief in Catarrh, Asthma, Bronchitis, Diphtheria, Croup, Neuralgia, Colds, etc., removing in a very short time any diseased mucous of the Head, Throat or Lungs. It is used with the best of success in Ulceration of the Lungs.

"Carbolic Smoke" is so harmless and easy to apply that children three months' old can take it with perfect ease and safety. IT WILL CURE A COLD IN FIFTEEN MINUTES if taken in time. NEARLY ALL DISEASES OF CHILDREN ARISE FROM ONE COLD UPON ANOTHER.

The fatal rapidity with which SLIGHT COLDS AND COUGHS frequently develop into the gravest maladies of the Head, Throat and Lungs is an argument that should decide every parent to purchase a "CARBOLIC SMOKE BALL" for the home circle.

CATARRH—Cured in three months—Warranted.

ASTHMA—Cured in nearly every case—relieved in five minutes—in connection with package of "Deballator."

HAY FEVER—A cure guaranteed if taken in time. No symptoms of the disease returning. The "Deballator" package should also be used.

BRONCHITIS—Cured in EVERY CASE—Warranted. The "Deballator" package should also be used.

DEAFNESS—Cured in from three to six months, if the drums of the ears are not destroyed.

EYES—Granulated lids, weakness of the optic nerves, etc., cured in from four to six weeks. Relieved in five minutes.

CROUP—Relieved in three minutes and cured in twenty-four hours.

ULCERATION of the Lungs—Relieved in five minutes and cured in one week. The "Deballator" should also be used.

NEURALGIA—Cured after the third dose, and it will not return if the remedy is occasionally used.

DIPHTHERIA—Throat trouble immediately relieved.

COLDS—Relieved in ten minutes.

SNORING—Three doses every night removes. One "SMOKE BALL" will last from six weeks to ten years, according to use.

We prove our assertions by Home Testimonials. Notice that we do not go abroad for evidence of the efficiency of the "SMOKE BALL" in curing Catarrh, Neuralgia, Deafness, Asthma, Bronchitis, Eye Diseases, Snoring, Etc.

San Francisco, Dec. 14, 1886.

CARBOLIC SMOKE BALL CO., over 652 Market street—Gentlemen: Seven days ago I purchased at your office a "Smoke Ball" and a "Deballator Package" for DRY CATARRH and DEAFNESS. I have been under the treatment of eminent physicians of the United States and Europe for the past twenty years, and have expended thousands of dollars for treatment. They all failed. During the seven days in which I have been using the "

PINS BY THE TON.

Some Interesting Information Concerning Their History and Manufacture.

Among the many who read this article some are doubtless familiar with Grecian mythology, and they will remember the story of Cadmus, who sowed dragon's teeth, which sprung from the earth armed men.

In a similarly marvelous manner it would seem that pins must have come into existence, so numerous are they. Nor is it strange that a frequent question is: "What in the world becomes of all the pins?"—an inquiry not easily answered.

But a hundred years ago pins were so rare and expensive that school children never thought of sticking one into a mate "for the fun of it."

The need of some utensil serving the same end with a pin must, from the earliest times, have been felt, and to meet it recourse has been had to various devices. Most likely our uncivilized ancestors used thorns for holding their garments together, and in comparatively modern times Mexicans were wont to substitute thorns of the agave for pins.

When some knowledge of working metals had been acquired pins were made therefrom. In Exodus we read: "All the pins of the tabernacle and of the court—those used to fasten the gorgeous hangings—"shall be of brass." The pins of the ancient Romans were made of bronze, as are most of those that have been discovered in Egyptian tombs.

Until the beginning of the fifteenth century strings, ribbons, hooks, skewers—of such material as the "circumstances" of the wearer admitted—played the part of pins.

About 1483 pins were first made, from iron wire, in England, the importation of pins from continental Europe being then prohibited by law.

Toward the middle of the sixteenth century Catharine Howard, the fifth Queen of Henry VIII, introduced brass pins into England from France.

In 1626 the English began the manufacture of pins at Gloucester, and the industry so prospered that several factories for that purpose were erected, wherein employment was given to nearly two thousand persons.

Shortly after the war of 1812 their manufacture was attempted in the United States, as, owing to the interruption of trade with foreign nations consequent upon the war, a paper of pins interior to those for which we now pay six cents, cost one dollar. The attempt was unsuccessful. For the "head"—made by winding fine wire spirally about one end of the pin and fastened in its place by striking it when heated, with a hammer—was exceedingly rude and liable to come off most inopportunely. Such a pin, relic of days long past, lies before us as we write.

In 1831 Dr. John I. Howe of New York, invented a machine which made pins with "spun" heads, like those of European make, previously requiring fourteen distinct processes, at one operation—the first machine to do such work automatically. He subsequently devised numerous improvements, and in 1840 patented the "rotary" machine, which makes pins with solid heads.

The production of pins is by no means all there is to it. They must be whitened, polished, sorted, stuck into papers. A boiling in copper pans, with grains of tin, nitric acid and water for three or four hours deposite upon them a thin coating of tin. They are dried and polished by being rolled in a barrel of hot bran or saw-dust, usually the latter. The perfect are separated from the imperfect by swinging them on belts, which throw off the smooth ones faster than the others. A wheel, revolving horizontally and furnished with "fingers" adapted to the varying length of the pins, sorts them. Then they are stuck on papers by a machine, so simple in its construction that it is tended by two children, who can put up thousands of papers each day.

As good pins are now made in this country as abroad, and their principal factories are in Connecticut, some of them making a ton a day.

A ton of pins! Yes, it is a large quantity—in number about two millions. But the population of the United States is fifty millions, and twenty-five tons would be necessary in order that each person have one pin a day. Rather a small allowance, is it not, reader? So there is no need that we take especial pains to lose or destroy them from fear that the world will be glutted with pins and those engaged in their manufacture compelled to remain idle.—*Church and Home.*

The Camera in Medicine.

It is now suggested that photography may become a useful agent in medical diagnosis, disclosing symptoms of disease before they are otherwise perceptible. In a recent negative of a child the face was shown as thickly covered with an eruption, no trace of which could be seen on the child until three days afterward, when its skin became covered with spots due to prickly heat. In another recorded case, invisible spots were brought out on a photograph taken a fortnight before an attack of small-pox.—*Arkansaw Traveler.*

—Mrs. Fannie Clark and a young brother attended a riding school at Lewisville, Tex., one night recently, and there met her husband, from whom she had separated some time ago, owing to domestic troubles. When the school closed for the night Mrs. Clark found that some one had cut loose their horses, and accepted her husband's horse to ride home. Some one had placed burrs under the saddle, and the moment she mounted the animal dashed away, and as she fell her clothing hung to the pommel of the saddle and she was swung to and fro against trees, stumps, brush, etc., for a half-mile. She died the next day.

—"Did you gain flesh by going to the beach this year, Grantly?" "I did, indeed, Brownley; gained 125 pounds." "Pshaw! impossible!" "Fact, my dear fellow. Come up to the house and I'll introduce you to her. We were married last week."

NEW YORK'S MAYOR.

An Explanation of His Far-Reaching Powers and Responsible Duties.

The mayor of New York is elected for two years. His term begins at noon on January 1. His salary is $10,000 per year. He may be removed for cause by the Governor. In case of a vacancy arising during the term the President of the Board of Aldermen acts as mayor, either temporarily or until the vacancy is filled by special election.

The general duties of the mayor are thus prescribed by the consolidation act, which is the city charter:

1. To communicate to the Common Council, at least once a year, a general statement of the finances, government and improvements of the city.

2. To recommend to the Common Council all such measures as he shall deem expedient.

3. To keep himself informed of the doings of the several departments.

4. To be vigilant and active in causing the ordinances of the city and laws of the State to be executed and enforced, and for that purpose he may call for consultation and co-operation all heads of departments.

5. And generally to perform all such duties as may be prescribed for him by the city ordinances and the laws of the State.

The mayor has the sole power of appointing the heads of the various departments of the city government whenever the term of an incumbent expires or a vacancy occurs. He also appoints the police justices. But the comptroller is elected by the people. The chief officers to which the mayor's appointing power extends are: City chamberlain, corporation counsel, police, excise, charities and correction, public works, fire, park, taxes and assessments, street-cleaning and dock commissioners; also two members of the health and all the members of the board of education. The mayor has power to remove these officers for cause, provided the Governor approves. Except the power of appointment and removal, the mayor has no control over these departments—no right to interfere with their operation.

Formerly the mayor nominated and the Board of Aldermen confirmed or rejected. On account of the notorious abuse by the aldermen of the authority vested in them they were stripped of all share in the appointing power. The power, with the responsibility, was then centered in the mayor. This reform was carried by the Legislature of 1884, and took effect January 1, 1885. Mr. Grace was the first mayor under the new regime. At the same time the office of Comptroller was made elective instead of appointive, and it was provided that the President of the Board of Aldermen should be elected by the people instead of by his fellow-members.

The mayor is a member of the sinking fund, the board of estimate and apportionment, the board of street opening and improvement and (ex-officio) the emigration commission. These are important functions. With the Comptroller he was formerly a member of the aqueduct commission, but both were ousted from this by the Republican Legislature of 1868.

Among the minor functions of the mayor is to issue theatrical and certain other licenses. As a magistrate he may perform the marriage ceremony.—*N. Y. Herald.*

USE OF STRAW.

Its True Economy Lying in Its Comfort to Stock as Bedding.

Why not, when stock is put into the yards for wintering, cover the ground thickly with straw, and especially under the sheds? Thus liquids, the most valuable portion of the manure, instead of going to waste, would be soaked up by the straw, and at length become thoroughly moistened. In the spring the whole may be piled to be rotted into manure. The straw should be added to from time to time, especially after snow storms, so there may be plenty for cattle to lie on. Thus while serving their comfort at the same time it is increasing in value, for the ultimate value of straw is in proportion to its saturation with the liquid waste of the yards and stables.

Straw is of little value as food, except to properly distend the stomachs of animals that are fed grain. Rotted down by itself, many good farmers claim that its true economy lies in its ashes. There is good ground for this belief, unless in the case of tough soils that require to be lightened up mechanically. It may pay in such cases to plow it under while dry. Yet its value on such soils is as much enhanced by being first used as bedding as upon any other soil; for before serving its ultimate purpose in any soil it must first be brought into humup or mold. It is still more astonishing that many farmers having plenty of straw should refuse to allow the stock, stabled in humup, a full supply of bedding. Even where straw is scarce there is no economy in bedding light. No more is lost by deep bedding than by thin bedding. It is only the fouled portions that need be thrown out. Little if any more will become so when the bed is six or eight inches thick than when there is only a slight covering to the floor, and very much less feed is required when animals lie warm and are comfortable in other ways than they will be when they lie shivering and uncomfortable on nearly bare planking or on the hard ground. Stock never cluster so when allowed their freedom. Then they seek the woods where the wind is broken, and where there is the comfort of the leaves with which the ground is covered. Where straw is scarce it will pay to gather leaves for bedding. And even much of the soiled portions may be dried and again used as bedding if necessary.—*Chicago Tribune.*

On His Dignity.

Uncle Rastus—Kin yo' trus' me to er codfish dis mawnin, Mistah Sugarsand?

Grocer—Trust you to a confish, Uncle Rastus? No, sir. You owe me now for a codfish you bought nine years ago. Why don't you ask me to give you a codfish?

Uncle Rastus (with dignity)—Kase I'se too proud to beg, sah.—*N. Y. Sun.*

A BULGARIAN WEDDING.

The Way in Which the Eastern Folk Celebrate Their Nuptials.

Among these people marriage festivities appear to be a blending of both Greek and Turkish customs. The betrothal occurs three months before marriage, and in a most unromantic fashion; the preliminaries are all accomplished by proxy. On betrothal-day bride and groom separately entertain their own special circle of friends, the men of the party occupying one room, while the women have their pleasant little talks by themselves; to all guests, coffee, jelly, wine and sweetmeats are offered, and each individual receives a little roll containing candy, cloves and a kind of chewing-gum, the gift neatly inclosed in blue paper; this peculiar presentation is regarded as an invitation to the wedding. At this preliminary festivity many specimens of the bride's handiwork are shown to the company—towels of cotton and silk interwoven, embroidered undergarments, slippers and handkerchiefs; they are tastefully set forth upon solid silver salvers.

The three months' interim are occupied in making the household plenishing and the bride's outfit as varied and elegant as circumstances will permit; oddly enough, the materials or purchase money for a comfortable start in life are mainly furnished by the groom or by his father. Two days previous to the wedding (which is always on a Sunday) again occur merry gatherings; acquaintances are now included, and, as before, bride and groom "receive" at their respective houses. The bride, tastefully attired, as a distinguishing mark adds a peculiar headdress and a glittering train of tinsel fabric, eight inches wide and a yard in length; this is secured to a band of her new head-dress, and flows gracefully over her shoulders.

Each guest on entering is saluted by the bride; the offered hand she bows over, and in token of great respect presses it to her forehead. Music is furnished by a group of gypsies, with fiddles and tambourines, and young girls join in a queer sort of dance called choro, but the grand feature of this day's mirth is a formal procession of the bride and her female friends to the public bath set apart for women; this is, under usual circumstances, a great occasion for lively gossip, and upon this occasion five hours are given to chat, and perchance for rest and sleep; the musicians are on hand and fiddles are constantly pressed into service.

The groom at his own home holds an evening entertainment; the young men gather in an upper room, where an ample feast is set forth, while the master of the house receives the older men in a lower room.

On the morning of the wedding-day the bride, attired in a delicate silk, with many bracelets and necklaces, and upon her head the glittering tinsel fabric worn on Friday evening, and with musicians in attendance, receives her guests. Her girl friends gather about her, her parents, brothers, sisters, cousins, join the circle, all of whom are greeted, as she kisses a hand of each; then follows a mournful, solemn dance; a sort of farewell this, all of them shedding tears the while.

A procession of married ladies now file in, a delegation from the groom's house; at the threshold handfuls of rice are thrown over them; they acknowledge the courtesy by kissing the hand of the performer. Each delegate now receives a sprig of sweet basil, and a third person pours over it drops of rose water; now they approach the bride, who is attended by two little girls holding burning tapers. Suddenly an old lady appears upon the scene, bearing a beautiful broadcloth sacque-lined throughout with rich fur; all former helpers stand aside as the venerable relative solemnly robes the bride in this matronly garment, leading her to the door, where farewells are given to father and mother and a procession of guests follow, with neither a joke, laugh nor loud word, and so they walk to the house of the groom, who, surrounded by friends, awaits the coming of his lady-love, and stepping forth to meet her as she passes through the low gateway, halts a moment, as jointly they receive in token of welcome another shower of rice from the groom's mother; this, mingled with bonbons and coins, children eagerly seize.

The couple now enter a room where hangs a picture of the Madonna with a lamp before it, burning. On a table are wax candles, sweatmeats and two crowns made of artificial flowers and joined by green silk ribbon. A priest swings a censor filled with burning incense; another lights the candles, offers one to his associate, then to bride and groom each one, and one he retains. The service, in the Sclavic tongue, is given in alternation by both priests; responses are given by other men. A priest now takes a ring from the groom's finger, makes with it the sign of the cross upon the foreheads of the man and woman before him, puts it on the bride's finger, takes it off, changes it back and forth several times and finally places it on the groom's little finger. The pair then join right hands as candles are held over them; the crowns are blessed and crossed and by the priest put on their heads, then, by a lady standing behind the couple, are interchanged three times.

Into a hemispherical cup a priest pours wine, blesses it, then offers it to the couple, who drink, then walk around the table three times, preceded by the priest; guests meanwhile busy themselves showering bonbons upon the crowd. After salutations from all, a collection is made for the priests, and the ceremony is over. Not a pledge is asked from the couple, not even a question for response from them.

The mother may not see her daughter for a week, after which the bride, accompanied by the new mother and sisters, and on later Sundays by the groom, may make further acquaintance with the bride's relatives.—*Harper's Bazar.*

—A superior court judge remarked recently, extra-judiciously of course, that it was better to be absent when you were wanted than to be present when you were not wanted.—*Lowell Citizen.*

Yarns About Clergymen.

The late Rev. Joel Hawes, of Hartford, is remembered by many as a most eloquent divine. Singularly angular in person and quaint in manner, he preached truth in a most forcible way. On one occasion, after announcing that the usual collection would be taken for foreign missions, he added, in his most impressive manner: "And I would say to those persons who are in the habit of putting buttons into the box that I would thank them not to hammer down the eyes, for the Lord is not deceived, and as buttons they are valueless." It need not be said that there were no buttons that day.

A REMARKABLE MISTAKE FOR AN IRISHMAN.

A clergyman writes:

"A young man, a plain, good hearted Irishman, was about to get married, and he came to arrange all the difficulties he thought connected with the ceremony. I assured him there would be no difficulty; that I would see him through all right. 'But,' said he, 'what about the ring?' I explained; and then, with a blush, 'When must I kiss the bride?' I answered that at the close of the ceremony I would offer a prayer, and just as soon as I would say 'Amen' he was to kiss the bride.

The ceremony went through all right; I said "Amen," and looked at him in a knowing way. He suddenly remembered his duty, made a little jump, like a timid trout at a fly, and kissed—not the bride, but me. It was the heartiest kiss I remember ever to have experienced. He had a short cropped black mustache, and I still can feel the warm prickling of it on my lips. I understand since that why my wife has always teased me to raise a mustache.—Harper's Monthly.

The Angel and the Brute.

She was a young woman in Washington for the season, and was very fond of narrating her conquests and speaking of her powers over men.

He was a bachelor with a heart of stone and a cheek of cast iron.

They were talking of love and matrimony and cognate subjects.

"I've been engaged six weeks, Mr. X.," she said, with refreshing candor in view of the fact that the announcement had appeared in the society news the next day after the proposal.

"Ah!" he said, with a rosebud smile wreathed around an interrogation point. "How charming."

"Delightful, Mr. X.," she continued, radiantly. "He was an old friend of our family, and he was so persistent. How long do you think I kept the poor, dear fellow waiting for his answer?" and she giggled a real swell giggle.

"Um—um," he cogitated, as if calculating an equation of time between a sun dial and a Waterbury watch. "Um—well, I should say about a minute and a half; possibly two minutes."

There was an abrupt termination to the conversation, and the brute was left alone in the alcove where they had been talking.—Washington Critic.

Cured of Deafness.

Sir William told us the following delicious tale of simple unreasoning faith in quacks: An elderly man consulted him about stomach complaints, but there was a formidable obstacle to diagnosis in the patient being born deaf. "What do you have for dinner?" roared Sir William into his right lug. "Oh, no!" was the reply, "plenty of that—two miles regularly after breakfast, and two more before dinner." "How long do you lie abed of a morning?" "Well, doctor, I shall be 60 this day three weeks." Without further parley the doctor gave him some simple prescription, the form and manuscript of which he seemed much to admire for a little; and then, offering his fee, he retired. But at the door he turned round, and, in the loud, rattling tones of one long very deaf, called out, "Doctor, can you cure deafness?" Sir William bowed, shook his head and made his lips express "No." "I thought so! You have been very kind to me, therefore I make you welcome to this prescription," which he pulled from his pocket, adding, "It cured me!"—Pall Mall Gazette.

He Knocked the Governor Out.

Governor Porter, of Indiana, is noted for his childlike and bland methods when he goes out to speak during an electioneering tour. He always assumes the familiarity of knowing all people. On one occasion he went down to Franklin, twenty miles below Indianapolis. He arose to speak with his face wreathed in smiles and began:

"Ladies and gentlemen, it affords me great pleasure to meet my old friends whom I have known so long."

At this point some shrill voice in the audience shouted:

"Name 'em; name 'em, governor."

This so disconcerted the governor that he did not recover from it all the evening.—Kansas City Star.

A Suggestion.

Ladies, if you must wear tall hats in the theatre, give us something novel to look at.—Texas Siftings.

Mrs. Friskley's Ingenuity.

Friskley has fallen into the habit of taking a cocktail before his meals. He says his appetite is failing and requires a little gentle stimulus.

The other night when Friskley had arrived at home, and had kissed his wife, the following dialogue ensued:

"Thank you, John. Won't you (affectionatately) kiss me again?"

"Kiss you again, my dear?"

"That's what I said. Aren't you willing to, my love? Don't you love me well enough to?"

"Oh, yes; of course." (Kisses her again.)

She (sniffing the air)—Aha! Just as I supposed. You've been drinking again.—Boston Record.

Foolish Corpse.

It was at the morgue. Three ladies, whose dress and bearing showed them to be of the so-called better class, were gazing sadly at the body upon the marble slab. Two of the ladies were certain that they were those of dear George. The third was not wholly convinced. She stepped forward to make another examination. "No, girls," she suddenly exclaimed, "it is not George. George had false teeth." The ladies departed. The attendant gave the corpse a reproachful glance as he muttered: "Ye ould fool, if ye'd kept yer mouth shut ye'd had a foine funeral."—Boston Transcript.

MOSCOW CHURCHES.

A Unique City of Spires, Domes, Minarets and Gorgeous Palaces.

I am informed that there are in Moscow about one thousand Greek churches. They are a composite of Catholic, Mohammedan and Oriental architecture, and probably the most beautiful churches in the world. When the ornate and wonderful St. Basil Church was completed the architect was asked by his master, Ivan the Terrible, if that effort was his very best; if, under any circumstances or for any consideration with any amount of money, he could construct a more beautiful edifice. The reply was that he could not—to make a more beautiful structure would be impossible. Thereupon the architect's eyes were put out that even he should not copy this sublimely beautiful creation. I think that not one of those thousand churches has less than three minarets and domes. Most of them have five, some have twenty-five—always an odd number for a grand central effect—and some have in the neighborhood of fifty to one hundred. They are colored white, green, red or blue, or are covered with silver or gold. Most of them have chimes of bells, and I presume that there are in the city of Moscow eight thousand bells. It was but yesterday that I stood on the eminence—about six miles west of the city—where Napoleon stood that eventful day when he first beheld those five thousand minarets, spires and domes, and the Kremlin's golden roofs glistening in the sun, and whence he surveyed the treasures which he thought would soon be at his disposal. I traversed the same road which he took when he marched his 500,000 men to an expected victory that proved to be the most melancholy defeat recorded on the pages of history. The immense treasures of the museums in the Kremlin had been removed and the sullen Muscovites applied the torch to their own devoted homes. The sequel is well known. Moscow has been rebuilt and its treasures and relics has been returned, supplemented by the Emperor's cannons and flags and numerous trophies taken from the fleeing invaders.

To enumerate the wonders of those Kremlin museums is impossible. To describe any one of them is to select one jeweled crown out of many, one diamond out of millions. Silver and gold, malachite, lapislazuli, jasper, rubies, diamonds and sapphires are not only worked into crowns, thrones and vestments in almost endless profusion, but they are even formed into furniture and make fire-places, walls and ceilings. Just there is the tocsin bell which sounded the signal for plying the torch to the city. Here are the red stairs upon which Napoleon ascend to the throne of the Romeloff Kings. There is the sword with which the Terrible Ivan beheaded his own sons. Here the furs that once enveloped the form of Catherine the Noble. And here, again, are the tools with which Peter the Great worked when he builded ships and empires—for it was his knowledge of the wants of his people that gave them the mighty impulse which yet jars two continents.

Then we were shown through the great throne-room, the silver rooms, the gold rooms, the pink rooms, the blue rooms, the jasper rooms and the crystal rooms, and then we wound up intricate stairways to the secret-trial room—still higher, to the dungeon and execution rooms, where voices were stifled without remorse and where cries could not be heard by sympathizing friends.—*Cor. Brooklyn Eagle.*

DRILLING CORN.

Recent Experiments in Planting and Harvesting a Satisfactory Crop.

I planted my corn this year in drills instead of hills and can now report results. Although it was sowed with an ordinary wheat drill which did the work poorly, and in spite of the succeeding drought which caused it to come up very unevenly, it has matured a very satisfactory crop. I am well pleased with this method of planting. But two things are requisite to insure the greatest success. A good planter is needed so that the corn shall be evenly distributed, and then the smoothing harrow should be put over the ground at least once a week for the first five or six weeks. This thoroughly destroys all weeds when small, and renders the use of a hoe superfluous except to cut up thistles or other perennial weeds.

There can be but one objection raised to drill planting of corn, when treated as above described, and that is the increased labor of cutting. This can be entirely obviated by cutting it with a self-raking reaper, which will do it easily, putting it in fine shape for binding, if only a single row is taken at a time. By letting the corn lie one day in the gavel before binding, it will be so wilted that any stalk will answer as a binder.

When corn is so cut and bound in bundles and these are set into rather large shocks, it cures out nicely and is in the best possible shape for hauling into the barn or shed for husking. And by using the reaper it can be cut, bound and placed in shocks with less than half the labor of cutting by hand and standing in the ordinary stook. There are many things yet to be learned in farming.—*Cor. Rural New Yorker.*

—Missouri continues to attract attention on account of her marvelous products. In one issue of the Missouri *Republican* record is made of a six-months-old colt weighing 650 pounds; a pig of the same age born with but three legs; a calf that weighs but twenty pounds; a radish twenty-five inches around, twenty-two inches long and weighing 19½ pounds; the discovery of gold in Jasper County, and a man who in January last received at short range a pistol shot, the ball entering the left eye and going through the brain, and who now is as well as a man can be.

—"We can't all be President of the United States, Bobby," said the minister. "I know it," Bobby replied, and his clear, honest eyes shone with lofty ambition, "an' I don't want to be. I'm going to be a drum major."—*N. Y. Sun.*

BEHIND TIME.

A Few Wise Words About the Pernicious Habit of Procrastination.

There is a class of persons known of all men everywhere, whose peculiarity is that they are always behind time. If not always, so generally that the exception proves the rule. They are late to meals or late in having them ready for others, and so make others late; they are late to bed at night and late in the morning in getting up; they are late for the train, and come panting and blowing just in time to catch it, or to see it rolling away. They seem somehow to have lost an hour, more or less, out of their lives in infancy or early life, and are therefore compelled evermore to chase that lost period in vain.

When one hears these late people give an account of themselves he is impressed with the conviction that they think they have plenty of time to compass their plans and enterprises. They are in no hurry about any thing; so they take their ease and dawdle or get every thing done there is to do except a few "last little things" that "take only a minute" to do, and then are unconcerned and confident. The late housewife, having planned her dinner all out, and thinking that she can "rush" it if she gets in a corner, sits at her sewing longer than she ought to, and finds when she tries to make up for the lost time, that the fire won't burn, or some dish turns out badly, and she hasn't time to prepare another, or somebody comes in and detains her, and so the dinner is late. The tardy church-goer, enjoying the luxury of Sunday rest, reads a little too long, or occupies himself in something else than getting all ready for church, and when the last bell rings he is not in his place in the pew. Or, if it is the housemother, she thinks she can do a few more chores before she goes, and so she is late, and disturbs the worshipers by coming in out of time. The unpunctual traveler puts off to the last day or hour before he starts what should have been done the day before or the week before, and finds it impossible or next to impossible to crowd the last preparations into the fragment of time left him, and so he is late. All these people forget that the hands of the clock keep moving on "without haste, without rest," and that, however it may seem to them, there is only just so much time, just so much and no more, for them to use.

It is not to be supposed that persons who have the habit of procrastination, of being behind time, or any other mischievous habit, are going to drift out of it and become, without effort, forehanded and punctual, correct and exemplary. It takes mighty and persistent force to break any bad habit, but bad habits are broken and good ones formed, as we may observe almost every day. The thing for the person who is always behind time to do is to put all his hurry in at the beginning of any enterprise, to do whatever he can do at once, not to leave any thing until tomorrow that can be done to-day, or until this afternoon that can be done this morning, and to begin in season. He must not allow himself to be diverted from the main issue, to waste his time on side issues, or to forget just how the hands of the clock are moving on, moving on, and bringing the hour he is working toward. He must omit many things, perhaps, that seem desirable, but are not of vital importance to the end he is aiming at.

The routinist finds it indispensable to drive certain stakes, so to speak, along his course, and require himself to be at these stakes at a certain hour. Said a business man the other day: "If I can have my breakfast exactly at a quarter before eight every morning, every thing goes smoothly all day. I have time to eat my breakfast, time to get to my office in season, and time to look over my newspaper." The lady to whom he was talking replied: "If I can get breakfast in time to have it eaten, cleared away and the dishes all washed and put away before nine o'clock, then *my* day goes smoothly. There's time for all other domestic enterprises, but if breakfast is late and the dishes hang round till ten or eleven o'clock, the best part of the day is gone and every thing drags." An early breakfast means early going to bed and early getting up. We must begin at the right end if we would come out right in the end.

The peace of mind that naturally follows punctual and complete preparation for and accomplishment of stated tasks is beyond the comprehension of the man or woman who is always behind time. He has no breathing spells, he is always pursued by phantoms that moan "Too late, too late."—*N. Y. Tribune.*

The British State Crown.

In the imperial state crown of Britain there are 1,363 brilliant, 1,273 rose and 147 table diamonds. The brilliant was the crowning invention of the art, the work of Vincenzio Peruzzi, of Venice, in the century in which Mazarin had the crown jewels of France recut; the rose dates from 1520; it is the form chosen when the loss to the stone would be too great if the brilliant cut were selected, and is used chiefly for circular gems; the table is the method employed for shallow diamonds, and is the original cut. When Blood on May 9, 1671, made his attempt on the crown the historian relates: "A large pearl, a fair diamond, and a number of smaller stones were bulged from the crown in this robustious struggle, but both the former and several of the latter were picked up and recovered. The Ballais ruby, which had been broken off the scepter, was found in his accomplice's (Parrot) pocket."—*Cornhill Magazine.*

—A Lancaster (Pa.) grocer has adopted a rather novel way of collecting debts. The other morning he placed in his store window a list giving the names of persons who owe him money, with their places of residence. The sums range from one dollar to one hundred dollars, and the names are written in large, plain hand so that all who wish may read them. At the top of the list there is a notice stating that the accounts will be sold very cheap.—*Pittsburgh Post.*

A WORD TO MOTHERS.

How Home Influences Help to Mold the Characters of Girls.

It is conceded by all that the mother has a great deal to do with molding the character of her children, especially the girls. She has them under her especial care from their birth until they go out into the world to work out life's problem for themselves. Love is the first great ruling power. Consistent love, not the love that yields to the whims of a fretful child, but the love that stands firm as a rock and demands obedience. A wise mother with firmness and a little tact will soon teach her daughter to see as she sees. But this training must be commenced in the cradle. I have seen mothers who where under the control of their children, and when it became necessary for decency's sake, to demand obedience, a scene would ensue that would make any right-minded mother blush with shame.

Sympathize with your daughter, win her confidence, teach her to bring every trifling sorrow to you and be ready to meet her with sympathy and counsel. Her little headaches are sorrows for her, and you must come from your years of experience and gently soothe the troubled waves of her sorrow. Only think of the restless, unsettled mind of a girl from twelve to eighteen. So anxious to be, and to do; like the eaglet in the nest on the cliff, trembling, fluttering, so anxious yet so fearful. Do not, in the strength of your experience, think lightly of her trials, but like the mother-bird be ready to catch her if she wavers in her flight. Teach her her own capabilities, to know herself, to depend on herself, as soon as she is old enough, but be ever ready to take up the tangled threads and help the untried fingers to straighten the snarls that to her seem hopeless. The troubles of school girls appear to some people very foolish, but mothers must realize that these are real troubles, and a sympathetic heart should be ready to meet them and your daughter will have strength and courage to avoid the quicksands of the future. Do not teach her that woman's ultimatum is to marry, rather teach her to be self-supporting and independent, and she will settle that question for herself. Don't scold, oh! please don't. Mothers, do you snap and snarl at your daughter's mistakes, blunders, or willful wrongs? Can you afford to lose the confidence of your child? A girl will hide her faults and wrong doings from a scolding mother. I have known girls who lived in such abject terror of scolding mothers, that mates were taught to conceal every improper action out of pity for the girl. The mother was such an unreasonable scold that she lost the confidence of her daughter and the respect of every one who knew her. When our daughters grow old and are where we can not comfort them any more, it is pleasant to think that among all the cruel scars they carry in their hearts, there is not one that mother made. Mothers ask for wisdom.—*Toledo Blade.*

STYLES FOR CHILDREN.

Description of Some Pretty Dresses and Cloaks for Little Girls.

The large establishments show handsome dresses, frequently of two shades of silk and velvet combining both shades. For instance, a dress for a girl of eight had a skirt of tobacco brown, with a feodora vest of dust color. A long, open sack of velvet of both colors fell away to disclose the vest, and was shorter in the back, with plaits in the side body seams. The skirt was plaited in single box-plaits some three inches wide at the waist.

Another, of ultramarine blue, had a vest of sky blue and velvet jacket, faced with the light shade, which showed at the edges of the front and in the plaits. A decoration of cords in the light blue was around the left arm's eye, and the contrast was very pretty. With it was worn the little Dutch bonnet, the newest thing for wee folks. It has a straight brim, like a Shaker, only not coming over the face at all; and a high, flat, round crown, perfectly smooth, sometimes edged with cut beads. Sometimes the bonnet has pom-pons, and sometimes bows of ribbon.

Many of the little cloaks have short, straight-around bodies and full-gathered skirts.

Girls from five to ten wear quite short dresses, while younger ones wear the long dresses, which make them look like walking pictures.—*Farm and Fireside.*

FORCE OF PLANTS.

Insignificant Fungi Capable of Lifting Tremendous Weights.

The force exerted by growing plants is very great. Fungi are composed of soft tissues, yet a growing mushroom has been known to lift a large paving stone. The rootlets of pines and cedars growing on the sides of rocky declivities penetrate narrow crevices in the rocks and finally by their growth loosen huge masses and send them tumbling down the cliff. Years ago President Clarke, of the Massachusetts Agricultural College, put a pumpkin into harness and demonstrated that it was capable of lifting thousands of pounds. In a cemetery in Hanover a seed germinated in a crevice beside a tombstone which contained twenty cubic feet. The seedling, now a small tree, has lifted the stone over five inches. Not the least wonderful of phenomena of this class is the force exerted by the radicle of the germinating plant. Darwin has demonstrated that it exerts a force which, in proportion to its size, is astonishing. This force the plantlet utilizes in sending its root into the soil, and the strangest part of the strange phenomenon is that the little soft radicle is capable of penetrating soil very much harder than itself.—*N. Y. Post.*

—Over $100,000,000 was spent in building the 125 steamships plying between here and Europe. They employ 18,750 men, spend $1,000,000 a month for coal, carry 500,000 passengers a year, and earn $22,000,000 for passage money, exclusive of what is paid for freight.—*N. Y. Mail.*

INDEPENDENCE, CAL

SATURDAY, FEBRUARY 2 1887

AN IRONCLAD BABY.

"Alice," said I, suddenly, one evening, "let's borrow a baby."

"A what?" cried Alice, sitting bold upright in her chair, and suspending operations upon the stork she was working in Kensington stitch.

"A baby," responded I promptly. "It's just what we need to broaden our sympathies and draw us into closer communion with the human race; and there's Mrs. Lorenzo Squires going off next week with a Raymond excursion to Montreal, and I know she would be only too glad to lend us her useful offspring for a week or two. "Besides," I added, hastily, as I saw my sister's look of surprise exchanged for one of utter disapproval, "it isn't as if this were a brand-new baby, you know. They have had it for about a year and a half, and—"

But I got no farther, for Alice abandoned her gravity and burst out into a fit of laughter.

"How absurd you are!" she said presently. "Do you suppose Mrs. Squires could even be induced to listen to such a crazy scheme, even if I were to agree? Why, that baby is the very apple of her eye. She would go into spasms at the mere suggestion of leaving it in such inexperienced hands as yours and mine."

"Nonsense!" retorted I. "Doesn't Aristotle tell us that it is a part of probability that many improbable things will happen? Mrs. Squires' heart will melt before my sunny smiles and insinuating arguments, and within a week from to-day—mark this, O Alice mine!—within a week that baby is put into my possession."

And so it was. The maternal Squires won over by many fair promises, or worn out by my importunities, it mattered little which, at last consented to deliver up the much-coveted baby to our care during her absence. That picturesque disease, the mumps, had just appeared in the family of a sister to whom she had intended to confide her infant joy, and perhaps she had no alternative but to accept our proposition. However that may have been, it came to pass that on a fine April day the doting mamma consigned her small son to our charge, with many misgivings, and was whirled away by the eastern express train, bathed in tears and half inclined to return instanter and wrest the darling from our grasp.

We had undertaken to convey him home in the little wicker carriage in which he took his daily airings, and were charmed with our acquisition as we trundled him leisurely away from the station. How placidly he lay among his dainty cushions and pillows! How round and rosy was the baby face beneath the frilled and flushed border of his cap! How plump and dimpled the little hands that playfully sawed the air! Beaming with satisfaction, we pursued our triumphal way down the village street, the observed of all observers. Sage matrons shook their heads knowingly, and wondered that Mrs. Squires had ever had the heart to leave that precious child to the doubtful mercies of two reg'lar old maids; while old Deacon Brown, standing at his gate, breathed a benediction on us as we passed, and hurried in to inform his wife that them Appleby girls had gone stark, starin' mad, and were a-makin' off with Mrs. Squires' Lorenzo. But what cared we? We had the treasure for our very own, for two long weeks at least, and were even then en route for home with the latest addition to our family.

The road, however, was a long one, and after a while the small Lorenzo began to stir and grow restless in his little chariot. Alice ran up alongside, and peered anxiously under the carriage top which concealed him from our view.

"Arabella!" cried she, breathlessly. "If you'll believe me, he's growing dreadfully red in the face, and I'm perfectly certain that he is getting ready to cry."

I smiled incredulously. Had not Mrs. Squires assured me a thousand times over that hers was a most remarkable and unusual child and never cried? Loftily I tossed my head.

"My dear Alice, how little you know about children," said I, with dignity. "An angel is whispering some heavenly sentiment in his ear, and he is smiling to himself for joy."

Alice is unpleasantly pert at times. On this occasion she laughed, and cried saucily, "Well stick to your angel theory if you like. It's very pretty, but I wager a penny that in less than two minutes he begins to cry."

And he did. In less than one, the air was rent with fortissimo shrieks and screams, while the cherub grew red in the face and refused to be soothed by any of our blandishments. In vain I chanted melodious ditties, regardless of the admiring crowd that gathered round; in vain did Alice bark like the doggy and mew like the pussy, to the great delight of the great unwashed public, who listened and looked on. Louder he wailed and louder still, until in a happy inspiration, we set off at a breck-neck speed for our own rooftree, where on arriving, breathless and exhausted, we offered him a nursing-bottle, wherein he found a temporary solace for his woes.

Only temporary, however. At 7:30 p. m. he began again, and night grew tuneful with his sighs. For three mortal hours he kept it up to our unspeakable horror and dismay. We walked the floor with him; we rocked him energetically in an antiquated cradle produced from the attic for this emergency; we sang to him; we danced before him in the style of twenty years ago; we offered up our most cherished possessions in the way of bric-a-brac to this dreadful Moloch, and still he would not be appeased. Would he burst? His tiny body was convulsed by the violence of his sobs, and we really feared he would cry himself out of this world and into the next. "Advice to Young Mothers, by One of Them." We remembered seeing it that very morning on a shelf in the public library, and Alice threw on a shawl and ran across the way to procure it, to the scandal of the librarian, who gave it to her with a severe frown, and a remark as to the absurdity of such literature for maiden ladies. But it threw very little light on the subject in hand. Lorenzo bawled vigorously, and as it couldn't be pins—we had already instituted a vigorous search—it must be temper, so the authority said, and must be cried out. So we laid him once more in the cradle and settled ourselves for a night of noise when lo, and behold! to our infinite satisfaction, the tumult ceased and the naughty cause of it lay smiling at the ceiling with his thumb in his mouth, as serenely as if he had never shed a tear or howled a howl in all his brief existence.

Alice groaned that night as we sat down to recover composure after our prolonged struggle. "I'm afraid we shall have trouble with that child," said she reflectively. "He seems to have a dreadful disposition and grows more mischievous and trying every minute."

My own heart misgave me, but I resolved to brave it out manfully, and turn a bold face to the world.

Delinquent Tax List

FOR 1886.

INYO COUNTY, California.

Arcularius, Wm., A J Shipley, Agt.—Patented N W ¼ S c. 21 Twp 6 S R 31 E, M D M, 160 acres. Personal property ..... $ 27 28

Yaney W P—The E hf of S W qr Sec 10, E hf of N W qr, N W vr of N E qr Sec 15, Twp 7 S, R 33 E, M D M, 200 acres 7 87

Yerington, H. M. (A. R. Conklin, Agt.)—Mill and Mill site known as the Argus Range Mill, 1500 ft in the Bonanza King mine, 1500 feet in the North Star mine, 1500 ft in the Natolia mine, 5 miles of water pipe, land belonging to spring, all of above described property being in Sherman Mining Dist 242 78

Zaun an I Wife—House and lots in town of Lone Pine, lot 4 in bl'k 17, lot 1 in bl'k 20. Personal property 12 13

Public Notice

Is hereby given that unless the above taxes and costs are paid I will on

Monday the 28rd Day of February, 1887,

Between the hours of 9 o'clock A. M. and 4 o'clock P. M., to wit, at the hour of 10 o'clock A. M., commence to sell the above described real property at public auction in front of the Court House, in the town of Independence, County of Inyo, State of California, and that I will continue such sale from day to day according to adjournments until the whole real property above described, or so much thereof as may be necessary, shall be sold, and that I will sell the smallest quantity of each assessment of said property that will be taken by any person for the amount of said taxes and costs, in gold or silver coin of the United States.

Dated this 4th day of February, A. D. 1887.

S. G. GREGG,
Tax-Collector of Inyo County, California.
By R. C. SPEAR, Deputy.

IRWIN'S SALOON

Cor. Edwards and Market Streets,

Independence . Cal.

THE PUBLIC GENERALLY ARE RESPECTFULLY invited to call and inspect my establishment, which has been entirely rebuilt an furnished in a style second to none on this side of the mountains. A SPLENDID NEW BILLIARD TABLE provided for the amusement of patrons.

THE BAR

Is supplied with the most celebrated brands of pure Wines and Liquors and the Finest Havana Cigars.

JOHN C. IRWIN, Proprietor.

SIMMONS LIVER REGULATOR

Unfailing Specific for Liver Disease.

SYMPTOMS: Bitter or bad taste in mouth; tongue coated white or covered with a brown fur; pain in the back, sides, or joints—often mistaken for Rheumatism; sour stomach; loss of appetite; sometimes nausea and waterbrash, or indigestion; flatulency and acid eructations; bowels alternately costive and lax; headache; loss of memory, with a painful sensation of having failed to do something which ought to have been done; debility; low spirits; a thick, yellow appearance of the skin and eyes; a dry cough; fever; restlessness; the urine is scanty and high colored, and, if allowed to stand, deposits a sediment.

SIMMONS LIVER REGULATOR
(PURELY VEGETABLE)

Is generally used in the South to arouse the Torpid Liver to a healthy action.

It acts with extraordinary efficacy on the

LIVER, KIDNEYS, AND BOWELS.

AN EFFECTUAL SPECIFIC FOR

Malaria, Bowel Complaints, Dyspepsia, Sick Headache, Constipation, Biliousness, Kidney Affections, Jaundice, Mental Depression, Colic.

Endorsed by the use of 7 Millions of Bottles, as

THE BEST FAMILY MEDICINE

for Children, for Adults, and for the Aged.

ONLY GENUINE

has our Z Stamp in red on front of Wrapper.

J. H. Zeilin & Co., Philadelphia, Pa.,
SOLE PROPRIETORS. Price, $1.00.

MARRIAGE GUIDE

260 PAGES. Illustrated, in Cloth and Gilt Binding, 50c. money or stamps. Same, paper cover, 25c. This Book contains ALL the curious, doubtful or inquisitive want to know. Fullof very interesting and valuable information. HEALTH, BEAUTY and HAPPINESS are promoted by its advice—who may Marry, who not, why; Medical Aid, when necessary, brought home to you. 50 Wonderful PEN PICTURES, true to life. Young or old, married or single, sick or well, should read it. Sent sealed by DR. WHITTIER, St. Louis, Mo. CUT THIS OUT AND SEND WITH ORDER.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, Bodie, Cal. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the north east corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 56 degrees 26 minutes E. distant thirty-six chains; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence.

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, FEBRUARY 12.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Mr. J. R. Eldred was on hand last Monday and took his place as one of the Board of Supervisors.

Supervisor Harger went home on Thursday morning; he was too unwell to attend till the business should be finished.

Mr. Israel Luce, Superintendent of the marble quarry, has gone to Sacramento on a brief visit; he is expected back in a few days.

There will be preaching at Lone Pine this (Saturday) evening at 7 o'clock, and on Sunday at 4 o'clock P. M., by Rev. T. V. Scovil.

A good deal of rain fell in Owens valley this week. From the valley it can be seen that a great deal of snow has fallen upon the mountains.

White Smith came up from Darwin at the beginning of the week. He says the mining outlook of that region has not been so good in several years past as it is at present.

There will be a big crowd at Keeler on Monday evening; the new building will make a fine ball-room and Mr. and Mrs. Barnes will entertain with even more than their usual hospitality.

Hon. Jerry Schooling died at Carson on Thursday of last week. Death resulted from appoplexy, and was very sudden. Mr. Schooling was a merchant and politician, and in both capacities was an honorable man.

Last Saturday morning the people of San Francisco were treated to the somewhat rare occurrence of a fall of snow. It fell to a depth of about six inches and made as great a sensation as a big fire or an earthquake.

J. W. P. Laird, Esq., went to Bodie at the beginning of last week to remove the Land Office to Independence. He has not yet returned. His delay is reported to be caused by the absence of Mr. Walker, his predecessor, in San Francisco.

In the game between the Big Pine and Independence base ball clubs, played at Big Pine last Saturday, the Big Pine boys were again beaten, this time on their own ground. From the score it would appear that the victors won very easily.

It is very gratifying to find that an editor's thoughts are deemed worthy of republication by others; but the satisfaction of the writer will be much greater if the other fellow will give credit. The "other fellow" of the *News Reporter* may not have found this out yet.

Last Tuesday while Mr. Harger was engaged on duty with the Board of Supervisors, he suddenly sank down on the floor in a state of insensibility. Medical aid was called, restoratives were applied, and consciousness soon returned. Next morning he was able to resume his duty as Chairman of the Board.

The Valentine Social to be given at the Norman House, Independence, on Monday evening promises to be a very enjoyable affair. Those having it in charge will do all in their power to entertain and amuse the company. Some novel and funny features will be introduced. Everybody attending will receive a souvenir.

A much needed Act has been passed by the United States Senate. It prohibits Senators from acting as attorneys for subsidized railroads. Under cover of fees as attorneys, Senators have in more than one instance received from railroad corporations sums of money that looked much more like bribes for their votes as Senators, rather than for their services as attorneys.

Asher Cohn, of Marks & Cohn, Bishop Creek, was at Independence at the beginning of the week. Till very recently Mr. Cohn had his home at Quincy, Plumas county, but now he intends to stay at Bishop Creek. During more than twenty years Mr. Cohn lived and did business in Plumas county, and in all that time had the fullest confidence and respect of all the people there.

Court House Accepted.

The Board of Supervisors have accepted the new Court House from the contractor and the building is now in possession of the county. Some little dispute arose between the Board and the contractor about the style of finishing in some of the rooms. As provided in the contract the matter was referred to arbitrators, who decided that one hundred dollars should be deducted from the contract price. This was satisfactory to both sides and the building was then accepted.

We Tell You Plainly

that Simmons Liver Regulator will rid you of Dyspepsia, Headache, Constipation, and Billiousness. It will break up chills and fever and prevent their return, and is a complete antidote for all malarial poison—yet entirely free from quinine or calomel. Try it and you will be astonished at the good results of the genuine Simmons Liver Regulator, prepared by J. H Zeilin & Co.

Horses and Cattle.

This week Messrs. Sanger and Collins brought their horses and cattle from Kern county to their new homes near Big Pine. Their horses number three hundred head, nearly all being work animals. Among the number are a few stallions of the Clydesdales and Normans; these are very fine animals. The cattle are also all good stock. Teams loaded with all kinds of farming machinery and implements formed part of the train, which looked like a small army in motion.

SCHOOL BENEFIT.

A Party on St. Patrick's Day.

The present term of school at Camp Independence is so very successful, and so much interest is taken by the pupils and their parents that a very strong desire exists to prolong the term beyond the time when the school fund will be exhausted. In order to do this the ladies of the school district have decided to give a ball for the benefit of the school on the evening of Saint Patrick's Day, March 17th. A full programme and list of managers and committees will be published next week.

New Livery Stable.

This week work was begun on a new livery stable for O. I. Mairs. The building will be one hundred feet long by about forty feet wide; it will stand upon the site of the building destroyed in the big fire and west from the Court House.

Opened.

The new saloon belonging to J. C. Irwin was opened last Saturday evening. It is a large room; many very fine steel engravings are upon the walls; billiard table, mirror, bar and other furniture, are all of the best. Mr. Irwin keeps his place more like a respectable reading room than an ordinary bar room.

A Fine Hotel.

Few interior towns are better provided with hotels than Independence. In this respect the great fire was a great gain; it swept away the old rookeries and in their places we now have good buildings. The last completed hotel, owned by O. I. Mairs is called the Norman House. The ground floor is divided by a hallway, on one side of which is the barroom—and it is worthy of remark that this is the smallest room in in the house—behind this are a number of bedrooms. On the other side of the hallway and next the front is a large reading room; back of this is the dining room, and beyond that the kitchen. From the hall a large and handsome stairway leads to the upper stories. The second floor is divided by two hallways, on either side of which are bedrooms. All the bedrooms are furnished with solid walnut, ash and other hardwood furniture, and the floors covered with Brussels carpet. The dining room, reading room and hallways are supplied with elegant hanging lamps. The dining tables, in the abundance, variety and excellent cooking of the food, will compare favorably with hotels in large cities. In a word, the Norman House is a fine hotel and a credit to Independence.

Frightful Disaster

Few winters pass without a frightful railroad disaster in some of the Atlantic States. The accident that occurred on the Central Vermont railroad last Saturday morning was one of the worst in several years. A broken rail threw a train of passenger cars from the track at the end of a bridge across White river near Woodstock. Two passenger cars and two sleeping cars went crashing into the river fifty feet below. All four of the cars were filled with passengers. As usual in these great disasters, fire broke out immediately, and in a few moments all the cars were in flames. About sixty lives are reported lost; many bodies were burned to cinders. Several passengers without being otherwise hurt were fastened in the wreck and held till roasted to death. The accident happened about half past two o'clock on a very cold night. No human foresight can guard against such dreadful occurrences as this; in the bitter cold of an Eastern winter night rails become very brittle and may break at the first vibration caused by a passing train, and then comes the crash and the flames and all the usual horrors of such occasions.

Winning Its Way.

Inyo marble is rapidly winning its way to the chief place among marbles. The San Francisco *Chronicle* bears splendid testimony to its value as follows:

"Our attention has recently been called to the discovery and exploration of deposits of marble in Inyo county and the future prospects which this new supply of building material may afford. The Inyo marble is found, as far as the veins have been opened, in seven varieties of color, running from pure white through a series of yellows and browns to black. Some of the intermediate shades are very beautiful, one in particular being veined in almost the same way as moss agate. The white marble is of snowy purity and very fine texture, being said by those who profess to know to be fully equal to Carrara marble for statuary purposes. The black marble is exceedingly close grained and capable of receiving a very high polish. A peculiarity of this black marble is that it resists the action of acids to an extraordinary degree, and thus is especially available for out-door purposes, where softer stone will insensibly stain and in time crumble under the influence of the various chemicals held in suspension in the air.

The veins of marble have been traced for a distance of about three miles, while in the canyons adjoining the main workings outcroppings of marble are readily recognized. The work of opening a quarry has so far progressed that solid blocks fifteen or twenty feet in length, free from cracks or transverse veins, can now be worked. Transportation will be readily effected by means of the Carson and Colorado Railroad to the Mound House, near Virginia, Nev., and thence by the Virginia and Truckee Railroad to Reno, whence it can be shipped east or west by the Central Pacific.

It the quantity and quality of this marble should fulfill the anticipations with regard to it, it should soon mark a new era in building in California, especially in this city. The age of redwood shanties has been succeeded by that of brick houses, and that in its turn should give way to a material much more durable and infinitely more pleasing to the eye. No building material has yet been discovered which can compare with a good quality of marble for lasting qualities. The palaces and buildings of Rome and Greece, where left untouched by the hand of man, stand today as firm and solid as in the days of Pericles or Marcus Aurelius. Like the Pyramids of Egypt, they have seen nations come and go, dynasties rise, flourish and decay, the tide of humanity ebb and flow around their feet; but they stand serene and unmoved in conscious strength and silent dignity.

San Francisco has reached the point where the reproach of ugliness and hideousness which has attached to her architecture should be taken away. Of late years a genuine feeling of art in building has grown up, and only the paucity of material has prevented its rapid development. Red bricks, even with terra-cotta trimmings, do not give an architect much scope for esthetic construction, and so beauty of design and finish has necessarily been sacrificed to pure utility. But with the advent of a new material, possessing in the highest degrees the qualities of strength, durability and beauty, there will be no reason why the useful and the beautiful cannot be agreeably combined, or why the boast of the Roman Emperor Augustus that he found Rome brick and left it marble cannot be truthfully repeated in San Francisco."

SUPERVISORS PROCEEDINGS.

WEDNESDAY, Feb. 9, 1887.

On the above named day the Board of Supervisors of Inyo county, California, met at 9 o'clock a. m., all the members being present, Chairman Harger presiding.

The minutes of preceding day's session were read and approved. The Board took a recess to inspect the Court House, and on reassembling adjourned until 1 o'clock p. m., at which hour the Board reconvened, all the members being present.

The matter of accepting the Court House coming up, Mr. Stecker, the Superintendent of the Court House, reported that the contractor, M. E. Gilmore, had not complied with the terms of the contract and specifications; whereupon Mr. Gilmore selected Mr. McIntosh, as per contract, to decide in conjunction with Superintendent Stecker the disputed points and report to the Board Feb. 10, 1887.

The Board then proceeded to examine claims against the county, and allowed the following:

Thomas Boland	$ 20 88
Chalfant & Yaney	50 75
Fish Springs Election Board	30 00
C. Mulholland	122 66
A. W. Eibeshutz	420 12
J. J. Moore	15 00
P. H. McGrew	310 00
Nathan Rhine, ($46 14)	44 64
A. W. Eibeshutz	8 50
J. H. Shannon	77 00
W. F. Matlack	3 75
D. Stubblefield	20 00
Frank Lawrence	10 00
H. P. Cartier	27 50
Frank Fitzgerald	6 00
H. G. Plumley	16 90
G. M. Clark	13 00
M. E. Church	20 00
W. P. George, ($9.00)	6 00
John Mullane	21 00
R. L. Peeler	18 00
J. Ingraham, ($5.00)	2 50

During the afternoon session Chairman Harger called Mr. Robinson to the chair; the Board adjourned until 9 o'clock a. m., Feb. 10th, 1887.

E. ROBINSON,
Chairman.

Attest, P. H. MACK, Clerk.

THURSDAY, Feb. 10th, 1887.

The Board met at 10 o'clock a. m., pursuant to adjournment. All the members present except J. D. Harger, who was sick. E. Robinson was chosen temporary Chairman.

The Superintendent of Court House, A. Stecker, and D. P. McIntosh failing to agree on the disputed points of said contract for building the Court House, they selected C. S. Swan as the third party to settle the disputed points.

Claims allowed:

J. H. Horton, Road District No. 3	$98 00
J. W. Smith, " " " 7	27 00
T. McLeod, " " " 2	145 00
Walter James, " " " 5	170 94
J. G. Dodge, Hospital Fund	8 00

Whereupon the Board adjourned till 1 o'clock p. m.

The Board met at the hour named, same members present.

Motion made that the Board of Supervisors accept from A. W. Eibeshutz and other citizens of Independence the interest of M. George's estate in lots No. 5 and the north half of lot No. 7, in block No 22, in satisfaction of a bond given by them to deed certain ground to the county. Carried by the following vote: Ayes, Boland, Eddy and Robinson. No—Eldred.

Claim of A. Stecker allowed on General Expense Fund, $150.

The following is the report of the arbitrators on the Court House building:

"We the undersigned committee do hereby render as our final decision, that the Hon. Board of Supervisors of Inyo county, California, accept the Court House as it now is and deduct one hundred dollars from Mr. Gilmore's contract price for work not completed as specified.

Respectfully submitted,
A. STECKER,
D. P. MCINTOSH,
C. S. SWAN."

Which report was unanimously accepted.

Whereupon the Board adjourned till 9 o'clock a. m., Friday, Feb. 11th.

E. ROBINSON,
Chairman pro tem.

P. H. MACK, Clerk.

Wood Preservation.

About a year and a half ago some timber piles that had been immersed in Owens Lake a good many years were taken up and were found to be as sound as when put into the water. Further observation has established the fact that the lake water possesses in a high degree the property of preserving wood from decay. It is reported that the Carson and Colorado railroad company intends to utilize this quality of the water. Piles will be driven in the Lake to form a permanent retainining boom and the ties, which are to be used on the road, will be kept in the water for about a month. This bath will make them last twice as long as timbers which have not been subjected to the process. The growing scarcity and increasing demand for ties will make this property of the Lake water of great importance.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man
Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

AGENT FOR W. R. STRONG & CO.

S. A. DENSMORE,
Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SPURLOCK, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will put up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN E. DODGE, JR., jeweler, NORMAL, Ill., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

International Immigrant Union,

WHEN JENNY LIND SANG

"Home, Sweet Home" at Her Concert in Washington Many Years Ago.

Perhaps the most thrilling quarter of an hour of John Howard Payne's life was that when Jenny Lind sang "Home, Sweet Home," to him. The occasion was the Jenny Lind concert in Washington, the night of Dec. 17, 1850. The assembly was, perhaps, the most distinguished ever seen in a concert room in this country. The immense National hall, hastily constructed for the occasion on the ruins of the burned National theatre, was filled to overflowing. Among the notables present and occupying front seats were President Fillmore, Daniel Webster, Henry Clay, Gen. Scott and John Howard Payne.

Jenny Lind opened with the "Casta Diva," and followed with the "Flute Song" (in which her voice contested rivalry for purity and sweetness with a flute in the duet), then the famous "Bird Song," and next on her programme the "Greeting to America." All the pieces were applauded apparently to the full capacity of an enthusiastic audience, and Mr. Webster, who was in his most genial after-dinner mood, emphasized the plaudit by rising from his seat and making Jenny a profound bow, as if responding for the country to her "Greeting."

But when the "Swedish Nightingale" answered the encore by turning in the direction of John Howard Payne and giving "Home, Sweet Home," with all the wonderful tenderness, purity and simplicity fitting both the words and air of the immortal song, the difference was at once seen between the mechanical applause called out by a display of fine vocalization, and that elicited by the "touch of nature that makes the whole world kin." Before the first line of the song was completed the audience was fairly "off its feet," and could scarcely wait for a pause to give expression to its enthusiasm. People ordinarily of the undemonstrative sort clapped, stamped and shouted as if they were mad, and it seemed as if there would be no end to the uproar. Meantime all eyes were turned upon Payne, a small sized, elegantly molded, gray haired gentleman, who blushed violently at finding himself the center of so many glances.—Brooklyn Magazine.

The Height of Great Men.

A correspondent inquires of us if there is any truth in the general belief that the leaders of any particular age are large men, "or is it merely superstition?"

There is a modicum of truth in it. While there are numerous exceptions, it seems to be a fact that great poets, essayists, scholars and philosophical thinkers are, as a rule, small; while great generals, orators and politicians—those who are engrossed in doing rather than thinking—are, as a rule, above the average size of man. There is a reason for it; those who possess the most vitality are apt to make the biggest noise in the world. Washington was a large man; so were Cortez, Charlemagne and Wellington; so were Webster, Clay, Tom Corwin, Tom Marshall, Lincoln, Chase, Sumner; so are Gladstone, Bismarck, Ferry, Cleveland, James G. Blaine and Gen. Sherman. When men who have won distinction are not tall, they generally make it up in breadth, like Bonaparte, Stephen A. Douglas and Sheridan.

The thinkers of the world have generally been small; as Cicero, Aristotle, Bacon, Alexander Pope, Alexander Hamilton and Oliver Wendell Holmes. The members of the senate, ever since that body was established, have been, it is alleged, about an inch taller than the average height of American men. Successful American editors have generally been tall men, averaging six feet high and over 200 pounds, as the elder Bennett, Thurlow Weed, James Watson Webb, Horace Greeley, Wilbur F. Storey, Murat Halstead, Joseph Medill, Whitelaw Reid, Joseph Pulitzer, and Charles A. Dana—all fine specimens of full grown men.

Great orators are almost always large men, and such specimens as Joseph Cook, Henry Ward Beecher, Col. Robert G. Ingersoll, Mr. Moody, Roscoe Conkling and De Witt C. Talmage are familiar to the eye of the present generation of Americans. These orators are not only alike in weighing 225 pounds apiece, but they further resemble each other in possessing a keen sense of both humor and pathos, and in being coarse grained—of the earth, earthy. If they had not been coarse of texture they would have died young, and if they were not large they would have lacked the physical strength to surpass in the sharp competitions of their time. In New York it is proverbial that the great merchants outweigh their clerks.—Washington Post.

Giving the Pug Character.

I want to say with double-barreled emphasis that the pug is a canine idiot. He is of ignoble ancestry and is admitted to the parlors nowadays when his great-great-grandfather was forced to gnaw a bone in a quiet corner in the kitchen. The pug is the product of what is known as "in-breeding," or in plain English, the offspring of parents closely related. Originally he came from the English turnspit and the bulldog, which accounts for his flat nozzle and bow legs. His ferocious aspect belies his character altogether. I do not think the pug would bite anything but his daily supply of bread and milk and caramels. He is a pampered impostor. The pug—taking the average run—is not capable of learning the most ordinary tricks. His brain power is limited, and you have probably noticed that, as a rule, he hasn't sense enough to get in out of the rain. His instinct is about as kinky as his tail, and he is degenerating more and more every day.—New York Tribune.

Melancholy Herr Bismarck.

At the bottom Bismarck is melancholy and even misanthropic. Herr Busch reports that he once heard him complaining bitterly in 1877 of his fate. His life work, he said, had brought him little satisfaction and fewer friends. No one loved him for what he had accomplished. He had made no one any the happier—neither himself, his family nor any one else. Some one present suggested that he had secured that of a great people. "Yes," he replied, "but the misery of how many? But for me three great wars would not have taken place, 80,000 men would not have perished—fathers, mothers, brothers, sisters, widows would not be plunged in grief. I have settled all that with my Maker, but I have reaped little or no pleasure from my exploits—nothing but weariness, anxiety and grief."—New York Graphic.

Young Ladies' "Breathing Club."

New York has a Young Ladies' "Breathing Club," which meets every morning at the homes of the different members. The girls stand in a row and go through a breathing exercise which is intended to expand the lungs and chest. Twenty minutes is spent in breaths of all lengths and then they separate.—New York Journal.

Panama's Opium Privilege.

A Chinaman has purchased for $16,000 the exclusive privilege of selling opium in Panama. The money is devoted partly to hospitals and partly to reducing the government debt.—New York Sun.

GREAT BRITAIN'S BALLOT SYSTEM

An Outline Sketch of the English Law—Counting the Votes—Secrecy.

It is impossible to describe briefly the ballot system adopted in Great Britain in 1872, and only an outline sketch can be given. The public nomination is abolished, but the nomination day is preserved, the ceremony taking place in the presence of only a few designated persons. If only as many candidates are nominated as are to be elected, they are at once declared elected. If there are more candidates, there must be a ballot. The election officers procure the printing of the requisite number of ballots, which are bound in the same way as a merchant's check book; that is to say, there is a coupon which may be detached, leaving a part of the leaf still in the book. Upon the ballots are printed the names of all the candidates in alphabetical order. When the elector presents himself at the polls, he first satisfies the presiding officer that he is a legal voter. The latter then tears off a ballot, upon the back of which he puts an official stamp, after which he enters the registered number of the elector on the retained part of the ballot, or counterfoil, and makes a mark against the name of the voter on the registry.

The voters and ballots both being numbered, in case it become necessary to ascertain how any particular person has voted, as, for instance, if there is a contest on the ground of illegal voting, the identical ballot given by each person may be found and examined. The voter, having recieved his ballot, retires to a room provided for the purpose, where, unseen by any person, he makes a mark opposite the name of the person for whom he wishes to vote. He then folds the paper so as to conceal the printing and mark within, but to show the official stamp on the back, returns to the polling room and throws the ballot into the box. To use the words of Mr. Webster in quite another connection: "The deed is done. No eye has seen him; no ear has heard him. His secret is his own, and it is safe." He is obliged to keep it a secret, too. There is a serious penalty attached to the exhibition of a ballot after it is marked. The man may tell any one how he voted—and he may tell a lie—but no one can no whether he has told the truth or a falsehood.

When the ballots are counted no one but the presiding officer can possibly known one paper from the other, and it is crediting him with an extraordinary memory to suppose that he could keep in mind the two numbers that must be remembered in order to identify any ballot as that of a certain man. There is an infinite variety of detail in the regulations respecting the acts to be done, and there are quite as many prohibitions of things that must not be done before, during and after the polling, but into none of these can we enter. The law has had fourteen years' trial, and it is not only telling the exact truth to say that the Conservatives do not find it nearly so bad as they expected it to be; Liberals do not like it so well as they supposed they should; and the hordes of agents, at whose occupation it was meant to be a severe blow, are already finding ways to circumvent the nice contrivances of the act.—"B. C. M." in Brooklyn Eagle.

What Western Women Read.

Women are becoming greater readers, if I may judge by the eagerness with which they call for the latest books. But they crave novels, and the cheap novels, too. These "libraries" in paper covers are preferable to the ordinary woman reader for a very simple reason—they can bend the backs, roll them up so as to carry them conveniently in their hand satchels and throw them away when finished. I dare say the house of nearly every woman in good circumstances in the city has more or less of this paper cover literature in it, thrown aside like the daily papers after it has been read. I once made an experiment with these books. I bought two sets, one in paper covers, the other in stiff covers, and when I would offer the latter to the lady she would want to know if I had the same book in "library." "It's not as easy to read a stiff back book," she would generally say.—Bookseller in Globe-Democrat.

Hindostan's Wheat Crop.

Among the farmers of Hindostan sowing takes place the last of September. If the farmer is a Hindoo, a Brahmin is consulted to fix an auspicious day, and a man is appointed to do the first sowing, after which any one can sow grain, but not before. The average amount of seed per acre is 150 pounds, or two and a half bushels. In some districts the wheat is weeded, and the weeds serve as food for the farmer and the grass for fodder for cattle. The ground is watered once after germination, once when the wheat is in blossom, and once while in ear. The wheat is cut in April in the good old fashioned way with a sickle. The grain is threshed by driving cattle over it on an earthen threshing floor, and is trampled until the straw is broken fine to make "choosa" for the cattle. The grain is cleaned with a fan of about the same style as that in use 100 years ago.—Foreign Letter.

Doesn't Dash Them Off.

If any one should be told that Mr. Whittier dashes off poems and sends them to the press without emendation, he should before believing it examine some specimens of Mr. Whittier's manuscript poems that are in the possession of the editor.—Boston Herald.

Improvement in Business.

City editor to new reporter—Well, sir, have you found out anything as to the improved business outlook? We shall want that article to-morrow. Reporter—Yes, sir, I have learned something very encouraging about two very important industries. Editor—Very good; what is it? Reporter—They tell me that the horse car drivers are working full time, and that the electric lighting station is running nights.—Lowell Citizen.

Largest Wooden Structure.

The largest wooden structure in the world is said to be the government buildings in the capital of New Zealand. The block is four stories high and occupies an area of nearly two acres. The city itself is mostly wooden on account of the earthquakes of the region, and is called "The City of Packing-Cases," and "The City of Match-Boxes."—Chicago Times.

Count de Lesseps in Washington.

The count was in the best of form. His gray mustache was well waxed and drawn out at the ends as fine as a needle point. The count has a great nose which runs nearly the whole length of his face like a rabbit's nose, and when he smiles much, which is very often, the nose overshadows everything else, and his little eyes peer out peculiarly from a focus of wrinkles which seem absolutely to revel in the fun which brings them into play.—Washington Post.

WADING BIRDS.

Habits of the Heron, Stork, Crane, Ibis and the Smaller Waders.

From the long neck and the long naked legs of the heron we may form a pretty good idea of what to expect of all wading birds, no matter how much they may differ in size. The long toes spread out very far apart, and thus prevent the birds from sinking in the soft mud as they wade about in shallow water near the banks of rivers and marshes. Places like these are the favorite haunts of the herons, and here they stand patiently watching for fishes, frogs and small reptiles. Their long necks are admirably suited for reaching out to catch such creatures, and their slender beaks quickly seize the prey, seldom missing their aim.

Herons are found in all parts of the world, and they form one of the greatest ornaments of our Southern marshes and streams. Their flight, however, is not very graceful. These birds have no tail worth speaking of, so when flying they always stretch out their legs behind them to act as a rudder, while most other birds tuck their legs snugly away out of sight.

Another large and elegant bird is the crane, which is sometimes over four feet in height, but otherwise not especially remarkable, unless it be for its long migrations twice every year, and for the perfect discipline which is observed on these journeyings.

Those who have read the interesting stories about the storks that live in European and Asiatic cities, and perhaps have seen them there, may be surprised to learn that they are also waders. These city birds seem to have given up their aquatic habits since they came to live in town, and now they stalk about the streets amidst throngs of people, and are not the least disturbed by them. The presence of the storks in these cities is not only tolerated, but on the contrary, the birds are highly valued because they feed upon garbage and small vermin, and in this way help to keep the streets clean. On account of these services especial laws have been made in some countries for their protection.

Their nests, placed in tall trees, towers or chimneys, are coarse affairs, loosely built of sticks. In Holland persons sometimes make false chimneys to their houses on purpose for the storks to build on, and that family is considered fortunate that has a stork's nest upon the roof. These dignified birds are especially numerous in the eastern hemisphere. They assemble in large flocks before starting on their migrations, and it is a common belief that at such times they are consulting about their intended journey.

The beautiful ibises inhabit all warm countries. One species, the wood ibis, has gained for itself the reputation of being very greedy, and not without good cause. With its strong bill it kills a great many fishes, frogs, snakes, young alligators and other small animals, which form its favorite food. As these victims lie floating on the water round about the scene of their destruction, the ibis swallows as many as it can well take, and then stands stupidly on the edge of the stream, waiting until this meal is digested before it is able to indulge in another.

Then there is the sacred ibis, which was worshiped by the people of Egypt in olden times. Perhaps they loved this bird because it devoured the serpents which annoyed them so much, or else because it returned each year at the time of the overflow of the Nile, and the superstitious Egyptians may have thought they were indebted to the ibis for the fertility of the country which results from this overflow. It is at least certain that they were in the habit of embalming the bird with their mummies, and placing curious stiff pictures of it on their monuments.

Among the smaller waders are some of our pretty little shore birds, whose quick movements are so interesting to watch. Small flocks of these little birds on the beach may be seen running out eagerly after a retreating wave, snatching up tiny fishes and crabs, and hurrying along to gather as many of these dainties as possible before the next wave comes in. Then they all mount rapidly into the air to escape this coming wave, as if they were exceedingly anxious not to wet those slender toes. Their feast is interrupted but a few seconds, for they soon alight and go through the same performances.—*Sarah Cooper, in Harper's Young People.*

An Ingenious Contrivance.

The microphone is now being used in Germany for the purpose of detecting loss of water through leakage in town mains. The apparatus consists of a steel rod, which is placed upon the cock in the neighborhood of which the leak is suspected, and a microphone attached to the upper end of the rod. A dry battery and a telephone complete the equipment. No sound is heard in the telephone if the cocks are closed and no leak occurs; but a leak of even a few drops causes sufficient vibration in the pipe to affect the microphone and give audible sounds in the telephone. At the recent meeting of gas and water engineers in Eisenach it was stated that the apparatus is so simple to handle that with a little practice ordinary workmen are able to detect and localize any leak.—*N. Y. Post.*

—The Provincetown people say that the coast line of Cape Cod is continually undergoing changes, and the shores are gradually battening out and washing away. Pawet harbor, at Truro, which in old times was a busy place accommodating a large fleet of fishing vessels, has so filled up that it is almost impossible to enter the harbor with a five-ton fishing smack. Provincetown harbor is also steadily filling up. The shores of the cape are constantly changing, rendering them dangerous to mariners. While the sands are being washed seaward the wind is also sweeping them landward in large quantities, covering the bushes and trees. It is estimated that the sand hills have moved townward three-quarters of a mile in the past dozen years.—*Boston Herald.*

—Among the orange trees of Versailles is one more than four centuries old, which was planted by Eleanor of Castille, Queen of Charles III.

Mr. Jacob Froehlich, a well-known tailor of Cincinnati, O., after suffering for years with rheumatism, was cured in a short time by the use of St. Jacobs Oil.

"John Bright has written another free-trade pamplet, Jones." "Yes, Smith; free trade is Bright's disease."

Mrs. C. Kellogg, Edgwood, Cal., says: Red Star Cough Cure is the best medicine she has ever used for colds for the children.

THAT YELLOW COMPLEXION

Means biliousness; biliousness means a perverted liver. Some of the bile has gone wrong and entered into the blood instead of going into the bowels, where it was needed to do its legitimate work. For the want of it in the right place you suffer constipation, and because of its presence in the wrong place you suffer jaundice. Nothing will correct that perverted *liver* and restore it to right habits so effectively or so readily as Compound Oxygen. This is not a drug. It is easy and pleasant to take; simple in its operation, and certain in its results. It has proved a blessing to sufferers from liver troubles and other chronic ailments. If you have symptoms of a disordered liver or impure blood, or of failing digestion, you will find Compound Oxygen the remedy most sure to restore the diseased organs to healthy action. Drs. STARKEY & PALEN, of 1529 Arch Street, Philadelphia, Pa., publish a work of nearly two hundred pages, entitled *Compound Oxygen—Its Mode of Action and Results*, in which many cures are reported. They mail the work free to applicants.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews 615 Powell street, San Francisco.

"Ma, what is this coal pool I read about in the papers?" asked little Johnny. "I'm sure I don't know," was the reply, "unless it is where miners go in swimming."

THE OYLY WAY TO CONQUER DYSPEPSIA.

It is perfectly preposterous to introduce pepsin and other artificial solvents into the stomach, in the expectation that they will assist digestion by acting on the food itself. They will not. Nor is it possible thus to overcome dyspepsia. The only way to conquer that disorder, and prevent the numerous diseases and disabilities which it assuredly provokes, is to renew the activity of gastric action by strengthening the stomach. Hostetter's Stomach Bitters eradicates the most inveterate forms of indigestion by restoring vitality to the alimentary organs, and those which are tributary to them. The liver, the bowels, the kidneys and the nerves, no less than the stomach, experience the invigorative effects of that standard tonic, which possesses alterative properties that greatly enhance its beneficial influence, and give a permanence to its effects which they would not otherwise possess.

"I see young Quinine has gone out of the apothecary business and become a letter-carrier." "Yes, he was fairly driven by poverty 'from pillar to post.'"

THE POOR LITTLE ONES.

We often see children with red eruptions on face and hands, rough, scaly skin, and often sores on the head. These things indicate a depraved condition of the blood. In the growing period, children have need of pure blood by which to build up strong and healthy bodies. If Dr. Pierce's "Golden Medical Discovery" is given, the blood is purged of its bad elements, and the child's development will be healthy, and as it should be. Scrofulous affections, rickets, fever-sores, hip-joint disease or other grave maladies and suffering are sure to result from neglect and lack of proper attention to such cases.

Jeff Davis' daughter has captured the North. What a help she would have been to the Confederacy!

"DON'T PAY A BIG PRICE!"

65 Cents pays for a year's subscription to the Weekly *American Rural Home*, Rochester, N. Y., without premium—the cheapest and Best Weekly in the World. 8 pages, 48 columns, 16 years old. Girls between seven and fourteen years of age were found in a Chinese den raided at Victoria, B. C., Wednesday night.

Henry J. Lucas of San Rafael killed a gray eagle last week that measured 7 feet and 3 inches across the wings and weighed 11½ pounds.

Oranges have been sent from Sage Hill, Placer county, to the Citrus Fair. The elevation of that place is at least 3,000 feet above the sea.

The barn of P. V. Brokaw, about four miles east of San Fernando, was burned Wednesday and thirty-three head of horses were lost in the fire.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

RELIEF FROM INDIGESTION.

221 SECOND AVE., NEW YORK, Jan 9, 1886.

I deem it my pleasure to testify to the phenomenal effects of BRANDRETH'S PILLS, upon myself in eradicating from my system the most agravated form of indigestion, the attacks of which were nearly as severe as spasms. After a costly medical treatment two boxes of BRANDRETH'S PILLS have put me in a better condition than I have been for years.
FRANK W. GILLETT.

Profanity always seems foolish to the man who doesn't want to swear just then.

A LOVELY COMPLEXION.

"What a lovely complexion," we often hear persons say. "I wonder what she does for it?" In every case the purity and real loveliness of the complexion depends upon the blood. Those who have sallow, blotchy faces may make their skin smooth and healthy by taking enough of Dr. Pierce's "Golden Medical Discovery" to drive out the humors lurking in the system.

A man about to be hung in Wisconsin exclaimed, "Just think of it! In a minute what a lot I shall know!"

WHY go limping around with your boots run over, when Lyon's Heel Stiffeners will keep them straight?

To feel free, pleasant and be healthy, use Irish May Flower. 75 cents at druggists.

OVER WORKED Women.

For "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and overworked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Weaknesses and Diseases peculiar to women. The treatment of many thousands of such cases, at the Invalids' Hotel and Surgical Institute has afforded a large experience in adapting remedies for their cure, and

Dr. Pierce's Favorite Prescription

is the result of this vast experience. For internal congestion, inflammation and ulceration, it is a Specific. It is a powerful general, as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It cures weakness of stomach, indigestion, bloating, weak back, nervous prostration, exhaustion, debility and sleeplessness, in either sex. Favorite Prescription is sold by druggists under our positive *guarantee*. See wrapper around bottle.

Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO. 106 Wall Street, N. Y.

THE BEST

FOR TABLE USE. FOR DAIRY USE.

REGISTERED HOLMES' EXTRA SIFTED SALT PREPARED WITH NEW AND IMPROVED MACHINERY EXPRESSLY FOR BEST DAIRY AND TABLE USE. CHESHIRE ENGLAND.

It is more highly refined than any Salt. All harmful ingredients found in most Salt are removed; therefore, it is the safest to use.

It is free from lime and pan scales, requires no sifting. It is the strongest, and altogether the most economical.

It dissolves very easily, therefore does not spoil butter by the gritty particles, as often happens with other Salt.

Common Salt is too risky for anybody to use in making Butter. The poorest families use so little Salt on their table that they can afford to get that that is the most healthy and the best.

HOLMES' EXTRA SIFTED SALT is used by the best dairymen in California, and has never failed to please better than any other brand whenever tried.

Packed in 230, 100 and 50 pound Pure Linen Bags; also, in 5 pound Cotton Bags and Cartons.

Insist on having this brand from your Grocer.

WATER IN WINTER.

Why Pieces of Ice Should Not Be Allowed to Melt in the Trough.

A large proportion of the food of our animals is used to keep up the temperature of the body to about one hundred degrees. Cold weather, damp barnyards, cracks in the barn or sheds, want of bedding and exposure to storms, greatly increase the consumption of food to no good purpose. Much more regard is now paid to the comfort of our stock in these respects than formerly. We think, however, many fail to realize the loss of food sustained by compelling animals to drink ice-cold water. Water as it comes fresh from the well has a temperature of about fifty-five degrees. When allowed to stand until frozen over and the ice then broken, and pieces of ice suffered to remain in the water, the temperature speedily falls to thirty-five degrees. Experiments are reported which seem to show that it pays to artificially warm the drinking water for milch cows. Be this as it may, no one can doubt that water at fifty-five degrees is cold enough for health. The water that an animal drinks has to be raised to the temperature of its body, say one hundred degrees. And, of course, it requires much more fuel in food to raise a pailful of water from thirty-five degrees to one hundred degrees than a pailful of fresh water from fifty-five degrees to one hundred degrees. If the heat required to warm the pailful of water twenty degrees was derived from hay or straw, or grain, the loss would not in many cases be severely felt. But, as a matter of fact, this heat is obtained from the consumption of fat and flesh, or butter and cheese. This is expensive fuel. We are well aware that it is not always easy to furnish animals water free from ice. We fill the trough with water, and the cows, and sheep, and horses do not drink as much as we expected, and the next morning there is a thick layer of ice upon the water. In such a case, break the ice in as large pieces as possible and pull them out with a potato hook or rake. Do not leave them to melt in the water. Pump plenty of fresh water for the animals.

With horses there is little trouble, because they are accustomed to drink at once if they need water. But cows and sheep may be very thirsty, and you may fill the trough with water and yet they will require considerable time before they will drink. Sheep especially seem to be very fond of running water as it comes fresh from the spring or pump. In cases where a small trough conducts the water from the pump to the tubs or troughs, while you are pumping you will see the sheep drink with avidity from the running water in the small trough, while they will scarcely touch that which has been standing for some hours in the watering trough. There is a great difference in water, and sheep know it just as well as we do.—*American Agriculturist.*

WAR PANORAMAS.

Description of the Process and Progress of Battle Picture Painting.

The central platform is, of course, the standpoint from which visitors will view the panorama—and therefore the artists are obliged to go to it frequently as the painting nears completion, in order to observe the effect and progress of their work. This, too, is the place of conference, and despite the signs of "No Admittance" within and without, visitors are frequent and usually welcome. These visitors are often veteran soldiers who took part in the action represented and who often make helpful suggestions. The army stories that are told on the central platform, when old soldiers meet and discuss the old days, would, if collected, make a prodigious volume. The floor of the platform is chalked and rechalked with diagrams, some referring to the panorama itself, but more to illustrate occurrences upon other fields. The strong pine rail surrounding the platform is penciled all over with kindred decorations, while scraps of paper, upon which are memoranda of incidents and a variety of data, as well as names and addresses, are pinned to the convenient timber with thumb tacks. The artists paint steadily, every individual being mainly occupied in perfecting his own work, though never hesitating to ask or extend aid in some special direction. One artist, for instance, has an excellent figure of a mounted officer, all complete excepting the portrait, a photograph for which is pinned to the canvas. While this artist goes to strengthen a line of battle, another one will rapidly paint in an admirable portrait for the incomplete figure. Soon another brush is busy with the horse, while still another artist calls for some special saddle and bridle to be brought to the platform that he may paint the trappings. Now, look at the back of the photograph which is pinned to the canvas—a faded carte de visite of a young officer; upon a slip of paper we read the following: "Colonel K., now on General Sheridan's staff; then Captain General Thomas' staff, H 47 (meaning section H, square 47 of the panorama);" French cap, blouse, Captain's straps—staff—dark blue trousers, gold cord, cavalry boots, staff sword, McClellan saddle; Shabrack—black horse; see sketch." This instance will give an idea of the way in which facts are preserved when a panorama is painted by artists who conscientiously strive to make of the work a great historical painting.—*St. Nicholas.*

Down With the Diploma.

"Bessie, I hear your sister is sick. What ails her?"

"I don't know, ma'am. May be it's the diploma."

"The what, child?"

"The diploma. I heard mother say that she took it at school."—*Philadelphia Call.*

—M. Tack has been elected Vice President of the Belgian Chamber of Deputies. The opposition will not dare to sit down on him.—*Philadelphia North American.*

METALIZING THE DEAD.

Interment, Cremation and Embalming Outdone by This New Art.

At the great electric exhibition in Paris in 1881 there were to be seen parts of a corpse that resembled a most elaborate casting of copper or bronze, retaining at the same time their natural forms. At the subsequent exhibition, in April, 1885, this art of galvanizing organic frames had been improved inasmuch as they did not only seem to be electro-galvanically coated but metalized throughout, the surface of the subject even being copper, bronze, or whatever the alligation consisted of. These preparations proved suggestive to the engineer, J. Vergovatz, who quite seriously, made the proposal to enshrine all human corpses galvano-plastically in a metallic husk, thus putting the question of the disposal of the dead in a new, unprecedented phase. "Interment he said, "is condemned from a sanitary standpoint, without mentioning the most dire feelings of survivors. Cremation is even more repugnant to some and deprives justice of the means of discovering crimes and prosecuting their perpetrators; embalming, finally, is too expensive for the great bulk of men. It is galvano-plastic art that has all the disadvantages of the present mode of burrying or cremating the dead, and is, at the same time, within the reach of all. Poor people will be put in zinc, the wealthy will suffer to be coppered, the very rich can afford to be silvered and gilded."

The process itself is simple. The organic body to be metalized is washed with alcohol and covered with fine graphite powder. This will be rubbed all over the surface of the body with a cloth of cotton, so that it obtains the appearance of glittering coal, or looks like a finger on which a lead pencil has been rubbed. The body, now able to conduct electricity, is suspended in an earthen vessel filled with a concentrated solution of sulphuric oxide of copper, or, if it is to be silvered, nickeled, covered with zinc, gilded with appropriate solutions of these metals. In this vessel, furthermore, is put a plate of metal proportionate in size to the body to be metalized and connected with the positive pole of a dynamo machine or a strong galvanic battery, while its negative pole is connected with the body. The action of the current causes now a wonderful transformation. The metal of the plate, the positive pole, gradually comes off while the negative pole, represented by the graphited body, attracts metal out of the solution covering, corresponding to the prior form, the whole surface with remarkable firmness and evenness. The longer the current is suffered to act the thicker the coat will be. It makes the cover of the organism air-tight so that, in consequence of this perfectly hermetical sealing, putrefaction can not take place. The body thus secluded dries up, turns into a mummy, whereas the metallic coat remains unaltered in the original shape of the deceased.

The expense of making such a metallic coat is small. It is represented by the value of the metal, the labor expended, and the cost of the coal necessary to set a dynamo machine in motion, if steam-power is used; the value of gas, if a gas-motor, or that of chemicals, if a battery is applied. If this very simple method of conserving the dead should be carried out, it would afford a similar instance to the work of the Egyptians, who preserved the original form of their dead by embalming them and depositing them in great vaults. Electricity, which of late has opened to the living such a manifold and unforethought field of activity, would now even after death lend us its services by preserving the form and shape of once living creatures.

The inventor of this new art has tried it successfully on eleven human corpses and over a hundred cadavers of animals.—*Chicago Tribune.*

ORIGIN OF MOLASSES.

Sugar a Commodity Known to and Used by the Ancient Jews.

As molasses first came to us from the West Indies, where sugar was one of the great products, it is probably a Portuguese or Spanish word. The Spanish spelling is malaza, the z being sounded like th in bath, which would hardly cause the sound of ess, so that in this case it may come from the Portuguese melaço, where the ç is sounded like ess. The Spanish word for molasses is miel-za, the Italian melassa, the French melassa, the Latin mellaceus—made with honey, hence honey-like. Portuguese melado—mixed with honey. Molasses proper is that which drains from the sugar while in the process of making. Treacle, or known in America as sugar-house molasses, is the fluid result that comes from the process of refining sugar. In the seventeenth century the spelling of the word was nearly always melasses (by English-speaking people,) as shown by old records and invoices. In connection with this it will prove interesting to know that sugar was well known to the ancient Jews. Nearchus, one of the Admirals of Alexander, who was a great wanderer, found sugar cultivated in the East Indies B. C. 325, and brought quantities of it back with him.

The seed cane was first introduced into Europe from Asia, A. D. 625, and although active efforts were made to cultivate it in Italy and Southern Spain, the results were not at all satisfactory. In 1510, sugar cane was introduced in the West Indies, by Columbus. In 1751, sugar culture was actively begun in what is now known as the State of Louisiana, but no report of the product is on record earlier than 1823. The cultivation of sorghum in China dates back beyond record. This was used entirely for making sirup, the same as is now produced largely in the States of Illinois, Wisconsin, Ohio and Iowa. Sorghum sirup very seldom granulates or crystalizes, and for this reason it is very much appreciated by the Celestials in the manufacture of their preserves and candied sweets.—*Robert M. Floyd, in Chicago Journal.*

—Contentment is better than money and just about as scarce.—*Altoona Sunday Morning*

LINCOLN AS A SOLDIER.

His Achievements During the Famous Black Hawk Indian War.

Among those who enlisted at the first tap of the drum was Abraham Lincoln, and equally to his surprise and delight he was elected Captain of his company. The volunteer organizations of those days were conducted on purely democratic principles. The company assembled on the green, an election was suggested, and three-fourths of the men walked over to where Lincoln was standing; most of the remainder joined themselves to one Kirkpatrick, a man of some substance and standing from Spring Creek. We have the word of Mr. Lincoln for it that no subsequent success ever gave him such unmixed pleasure as this earliest distinction. It was a sincere, unsought tribute of his equals to those physical and moral qualities which made him the best man of his hundred, and as such was accepted and prized.

As soon as he was mustered out of his captaincy, after several uneventful weeks, he re-enlisted on the same day, May 27, as a private soldier. Several other officers did the same, among them General Whiteside and Major Stuart. Lincoln became a member of Captain Elijah Iles' company of mounted volunteers, sometimes called the "Independent Spy battalion," an organization unique of its kind, if we may judge from the accounts given by one of its troopers. It was not, says Mr. George W. Harrison, "under the control of any regiment or brigade, but received orders directly from the commander-in-chief, and always, when with the army, camped within the lines and had many other privileges, such as having no camp duties to perform and drawing rations as much and as often as we pleased," which would seem to liken this battalion as nearly as possible to the fabled "regiment of brigadiers." With this elite corps Lincoln served through his second enlistment, though it was not his fortune to take part in either of the two engagements in which General Henry broke and destroyed forever the power of Black Hawk and the British band of Sacs and Foxes at the Wisconsin bluffs and the Bad Ax.

After Lincoln was relieved of the weight of dignity involved in his captaincy the war became a sort of holiday, and the tall private from New Salem enjoyed it as much as any one. He entered with great zest into the athletic sports with which soldiers love to beguile the tedium of camp. He was admitted to be the strongest man in the army, and, with one exception, the best wrestler. Indeed his friends never admitted the exception, and severely blamed Lincoln for confessing himself defeated on the occasion when he met the redoubtable Thompson and the two fell together on the turf. His popularity increased from the beginning to the end of the campaign, and those of his comrades who still survive always speak with hearty and affectionate praise of his character and conduct in those rough yet pleasantly remembered days.

It was on June 16, a month before the slaughter of the Bad Ax, that the battalion to which Lincoln belonged was finally mustered out at Whitewater, Wis. His final release from the service was signed by a young Lieutenant of artillery, Robert Anderson, who, twenty-nine years later, in one of the most awful crises in our annals, was to sustain to Lincoln relations of prodigious importance, on a scene illuminated by the flash of the opening guns of the civil war. The men started home the next day in high spirits, like school-boys for their holidays. Lincoln had need, like Horatio, of his good spirits, for they were his only outfit for the long journey to New Salem, he and his messmate Harrison having had their horses stolen the day before by some patriot over anxious to reach home. "But," as Harrison says, "I laughed at our fate and he joked at it, and we all started off merrily. The generous men of our company walked and rode by turns with us, and we fared about equal with the rest. But for this generosity our legs would have had to do the better work; for in that day this dreary route furnished no horses to buy or steal; and whether on horse or afoot, we always had company, for many of the horses' backs were too sore for riding." It is not hard to imagine with what quips and quirks of native fancy Lincoln and his friends beguiled the way through the forest and prairie. With youth, good health and a clear conscience, and even then the dawn of a young and undefiled ambition in his heart, nothing was wanting to give zest and spice to this long, sociable walk of one hundred leagues. One joke is preserved, and this is one at the expense of Lincoln. One chilly morning he complained of being cold. "No wonder," said some facetious cavalier, "there is so much of you on the ground."—*Nicolay and Hay, in Century.*

A Conscientious Man.

Nathaniel Ripley Cobb, of Boston, one of the merchants of the earlier days was generous-hearted and conscientious in the highest degree. In fact, he was so benevolent that in November, 1821, he drew up the following remarkable document: "By the grace of God I will never be worth more than $50,000. By the grace of God I will give one-fourth of the net profits of my business to charitable and religious uses. If I am ever worth $20,000 I will give one-half of my net profits, and if I am ever worth $30,000 I will give three-fourths, and the whole after my fiftieth thousand. So help me God, or give to a more faithful steward and set me aside." He adhered to this covenant with the strictest fidelity.—*Boston Herald.*

Exceedingly Polite.

"Well, sir, did you succeed in collecting that bill?"

"No, sir."

"It's just as I expected. That Jones never pays any thing. He's a perfect boor."

"Why, sir, I found him very polite."

"In what way?"

"He asked me to call again."—*Philadelphia Call.*

An Account of the Explosion.

Liza Simmons was summoned to testify concerning the explosion of the boiler of a sawmill.

"Now," said a lawyer, representing parties who had brought suit for damages, "state what you know concerning the case."

"Wall, sah, it wuzer Thursday erbout 10 er'clock; mout er bin Friday at 9 er'clock"——

"That makes no difference."

"Yas, sah; didn't low it did. Wall, we'll say it wuzer Thursday. I wuzer standin' in my back yard when dat came er mighty 'sploshun. I looked ober toward de mill, I did, an' seed Aunt Rose, what cooked fur de mill han's, er gwine way up in de a'r. I turned 'round ter my darter Cindy, an' 'Cindy,' says I, 'look yander at ole Aunt Rose gwine way up in de a'r. W'y she er mighty ole pussen to be gwine up so high, an' I wonder how she think she gwinter git down widout cripplin' her ole self, when she's dun got de rheumatiz anyhow.' Cindy, she 'lowed dat de Lawd would provide fur de ole critter, an' den I says, says I, 'Ef He do, Cindy, He got ter do it mighty peart, fur de ole critter is comin' down,' an' jes' erbout dat time de po' ole critter struck de groun' like she wuz in earnest, sho' nuff. Me an' Cindy we put out an' run ober dar, an' says I, 'W'y, Aunt Rose, what make yer go climbin' 'way up yander like er boy?' But bless yer life, de good ole soul couldn't talk, an' jes' erbout dat time 'bip' suthin' struck de groun' 'side me, an' lookin' roun' I seed ole Abner's son Phil, ez black er child ez eber libed, stretched out. Bless yer, I didn't see him when he went up, an' it wuz er mighty s'prize ter me, so I says, 'Look heah, boy, what yer come s'prizin' er body dis way fur? W'y'n't yer he'p dis po' ole lady come down 'stead er hangin' 'roun' up dar till arter she'd dun struck de groun'? De ole boy gwine ter git yer one o' des days,' but he didn't make no 'ply, fur de po' black chile wuz dun dead. Dis is all I knows erbout de erfair, an' I ain't gwinter answer ernuder question. Lemme git outen heah."—Arkansaw Traveler.

A "Genuine" Munkacsy.

Munkacsy, the Hungarian painter, who has just come to New York, met with an amusing adventure which he told with some astonishment to one or two of his friends. He strayed into a region of second hand shops and found one where very old and dilapidated paintings were offered for sale. Some of these he priced, and finally asked the Hebrew proprietor about a wretched monstrosity which looked as if some gamin had made it, and then becoming disgusted with his work had thrown it in an ash barrel. "Dot's a chenuine Munkacsy," said the dealer. "it was 500 years olt. I zell him for $250, schoost nodings at all."

"Munkacsy! Munkacsy!" said the visitor. "Why that can't be, for Munkacsy is alive yet. He is here in this city now." "Vot, dot vellar!" exclaimed the dealer scornfully, "vy he's a fraud. All de kreat artists here say dot."—Savannah News.

Odds Fish.

"What do you think our fathers were?" asked the lecturer. And then we left the hall, because the conundrum was so easy and the subject so commonplace. Our fathers were not very good all round swearers. They swore most wretchedly "od zooks" and "odds fish," "gadzooks" and "fore gad," "zounds," "sleath," "byrlady," and a lot of such rubbish. Still, they may be pretty good words to swear with. Certainly they aren't fit for anything else.—Robert J. Burdette in Brooklyn Eagle.

In Our Modern Society.

He—What beautiful teeth you have, my dear. What do you use on them?

She—The ashes of my first husband; he was cremated, you know.—L. Price Randall.

Queer Wrinkles.

"Does the razor hurt, sir?" asked the barber of Lighthead.

"No," replied Lighthead, "the razor doesn't hurt, but my face does, awfully."

HE SEEMED TO FORGET.

Unreasonable Old Man (to bruised and maimed son)—There you are, with one eye gouged out, both ears gone, a dislocated shoulder blade, broken arm and fractured leg, with whisky enough in you to start a liquor store, and all for a college game of football. It's outrageously disgraceful!

Bruised and Maimed son (reproachfully)—Father, you seem to forget that you were a young gentleman yourself once.—New York Sun.

Not a Philanthropist.

At a late meeting of a debating society in Kansas City the question was discussed: "Is Jay Gould a Philanthropist, or What?" The discussion was a hot one, and lasted an hour and a half, and then a vote was taken and it was decided by four majority that he was a "or what."

"Gentlemen," said a big man who looked into the room after the question was settled, "allow me to congratulate you. There's a crowd of fifty of us out here who were waiting for the verdict, and if it had been 'Philanthropist' every blamed one of you would have been carried home on a shutter."—Wall Street News.

He Didn't Want Any More Sisters

She wasn't very young, but she had money. He didn't want the earth.

"Dearest," he began, but she stopped him.

"I anticipate what you are about to say, Mr. Sampson," she said, "and I would spare your feelings, for it can never, never be. I esteem you highly and will be a sister to"——

"I have four sisters already," he replied bitterly, "four grown sisters, and life is a hideous burden. But, oh Clara," he went on passionately, "if you cannot be my wife will you not give me a mother's protecting love? I'm an orphan."—Life.

Starting in the Wrong Place.

A stranger, who was quietly looking over a water power in a Western village was sought out by the mayor, who said:

"I hear you think of starting a factory?"

"Yes."

"It's a good place, and you'll find our people all right. We don't put on any great amount of style, nor don't aim to. Here's a pair of suspenders I have worn for over forty years, though I'm worth $50,000."

"Ah! Um!" muttered the stranger; "but it was a suspender factory I was thinking to locate here."—Wall Street News.

Great Legal Truth.

A father may succeed in cutting off his son without a cent, but he can't cut off the lawyers.—Kansas City Journal.

FLOWER LORE.

How the Philosophy of a People Imprints Itself on the Surroundings of Life.

To this day the flower lore of Europe remains strongly associated with Christian mythology, and from the way flowers mixed themselves with legends of the Virgin or St. John the Baptist we may learn how, in an earlier epoch, they entered into the stories of Zeus, Hercules, Indra or Osiris. As the caroub bean came to be called St. John's bread, gooseberries his grapes, and the wormwood his girdle, so in the Vedas, one plant is known as Indra's food, and another as his drink. Just as in Roman times numberless plants were named after Hercules, it would be difficult to enumerate all the plants which claimed to be Our Lady's tears, her tresses, her mantle, or her smock. Thus does the general philosophy of a people tend to imprint itself on the common surroundings of life. In the flax fields of Flanders grows a plant called the rodselken, the red spots on whose bright green leaves betoken the blood which fell on it from the cross, and which no subsequent rain or snow has ever yet been able to erase. In Palestine the same account is given of the colors of the red anemone, and in Cheshire of the spots on the *orchis maculata.* The crown of thorns has in Germany given to the holly (holy tree) the name of Christdorn, while in France it has caused the hawthorn to be called the "noble thorn," (*l'epine noble,*) and in Italy it has been associated with the barberry. Catholic fancy believed that the St. John's wort showed red spots on the anniversary of the beheading of the Baptist, and perceived in the passion flower of Peru the resemblance of nails. In the same way the Turks see in the geranium a mallow that was touched by the garments of Mohammed, while the Chinese see in tea leaves the eyelids of a pious hermit, who, to resist his inclination to sleep, cut them off in despair and threw them away. There is, however, a rather remarkable monotony in the poetical fancies about flowers to which their various peculiarities have given rise. White flowers, as a rule, spring from tears, red ones from blushes or from blood. Thus in Bion's Idyl, anemones represent the tears shed by Venus for Adonis, while lilies-of-the valley are in France the Virgin's tears. Catullus has it that the rose is red from blushing for the wound it inflicted on the foot of Venus as she hastened to help Adonis; but, according to Herrick, roses lost their whiteness when, after being worsted in a comparison of their whiteness with that of Sappho's breast, they blushed and "first came red." So in Ovid, the fruit of the mulberry was originally white, till, after witnessing beneath it the sad suicide of Pyramus and Thisbe, it blushed for shame forever. In Germany the heath owes its color to the blood of the heathen slain in the sanguinary conversions of Charlemagne; the inhabitants of the uncultivated fields, where the heath (*heide*) grew, coming to be called heathen, (*heide,*) much as in South Europe the inhabitants of the villages remote from the influence of the church came to be called pagans from *pagus,* a village; so that our word heathen appears to be a derivative from our word heath.—*Gentleman's Magazine.*

VALUE OF ACTIVITY.

The Effects of Idleness Upon the Condition of Young Women.

Wholesome regular occupation of some sort is a necessity. You can not afford to be idle. Physically you can not afford it. Not while you are a creature of flesh and blood can you escape the law that activity means growth and health, and that idleness means deterioration.

In the mere matter of beauty idleness is a loss as truly as excessive drudgery. The erect, dignified carriage, the firm, elastic step, the well-rounded arm, are not to be won by days passed on the sofa or hammock with a novel in the hand; nor are the maiden bloom, the clear, fresh complexion, the modest, thoughtful, yet animated glance, to be kept amid late hours in heated rooms and exciting pleasures.

Idleness invariably gives rise to a craving for excitement which may drive away the *ennui* which is its penalty. But excitement persistently followed is the source of all manner of nervous disorders, resulting at last in the production of the languid, nervous, hysterical creature, into which the gay young woman so often degenerates.

This craving for excitement is a prevalent characteristic of the young woman of to-day, especially in our cities. So marked is it that, as a thoughtful woman whose life has been devoted to the training of young women observed to me, even church work has little charm for many of those who engage in it, unless done in a kind of theatrical way.

The effect of idleness, too, is to turn the thoughts in a morbid degree upon one's own condition, to magnify trifling ailments into grave maladies, and eventually, by sheer force of the mind's influence upon the body, to convert the vigorous, energetic girl into an interesting invalid.—*Womanhood.*

Restoring Faded Ink.

A useful discovery is announced whereby the faded ink on old parchments may be so restored as to render the writing perfectly legible. The process consists in moistening the paper with water and passing over the lines of writing a brush, which has been wet in a solution of sulphide of ammonia. The writing will immediately appear quite dark in color, and this color in the case of parchment it will preserve. On paper, however, the color gradually fade again, though it may be restored at pleasure by the application of the sulphide. The explanation of the chemical action of this substance is very simple; the iron which enters into the composition of the ink is transformed by reaction into the black sulphide.—*N. Y. Sun.*

—It is now proposed to make the Los Angeles river, California, navigable by the construction of a series of locks.

ROMANTIC RETREATS.

M. Quad's Experience Among the Grangers Along the Atlantic Sea-Shore.

There is a great deal of sentiment connected with the sea. There is also a great deal of lying connected with the seashore. At Asbury Park there were a great many omnibuses bearing the sign: "To Shark River." Shark river should have been named after at least one shark. He ought to have been at least ten feet long. If he died after they named the river in his honor, some other shark, even if only three feet long, should have dropped around once in a while to see that the river was all right.

After those signs had stared me in the face for four days I paid the sum of one dollar to be taken to Shark river. I found it to be a rivulet, with just about enough water to rinse the whisky out of a shark's throat.

"Who named this river?" I asked of the driver.

"Some college gals, I believe."

"Was a shark ever seen here?"

"No."

"Did you or any of the rest of you swindlers ever see a shark within fifty miles of the place?"

"No."

"Do you ever expect to?"

"No, but you don't want to take it that way, stranger. You see, when they named the old saw-mill down there 'The Castle,' and that frog puddle up there 'Lake Como,' they couldn't consistently call this Mud creek any longer. They called it 'Dolphin Sound' at first, but finally changed it to 'Shark river' to catch greenhorns."

I heard a good deal about "Silver Dale," "Mount Grant," and "Surf Retreat," and a couple of us rode one day to hunt them up and see if it wouldn't be best to change hotels. Silver Dale was a farm-house about a mile from the worst piece of beach on the coast. There wasn't a dale on the farm. There wasn't a spot where a dale could have been constructed at a million dollars' expense.

"You take boarders, don't you?" we asked of a raw-boned youth who hung over the fence with his tongue out.

"Yaas."

"How much per week?"

"We go by the sezun, and if they sticks up their nose and is too durned pertickler they doan' git it here 'tall."

"Who named the place?"

"Mam."

"What did she call it 'Silver Dale' for?"

"So's to git seven dollars a week for board."

From there we drove to Mount Grant, a mile away. There was a farm-house and a mountain. The mountain was six feet above the level of the sea and as much as a rod long. The farm-house was warranted to have been built in 1778, and to have reduced the price of board to summer visitors every season since, until the price had now dropped to eight dollars a week. They didn't charge for board, but for the presence of Mount Grant, which was the only mountain of that name any where on the coast. The woman hadn't any boarders just then, but was expecting a preacher, a retired professor of music and a rich man's son with sore eyes.

Surf Retreat was half a mile below. The Retreat consisted of a double farm-house, occupied by a father and son, with their families. It was eighty rods to the surf, and there wasn't any surf when you got there. The old man took us aside and warned us not to think of securing board on his son's side of the house, owing to the fact that Jim and his wife were great hands to fight and jaw before company, and she didn't know enough to boil potatoes with the hides on. Then Jim took us aside. He didn't want to say any thing against his father, of course, but if we took board with the old man we must run the risk of being robbed and murdered. Both followed us down the road as we Surf Retreated, and the last thing the old man said was:

"You'd better close with me at ten dollars a week. The name alone is worth half of that, and we don't object to smoking or swearing."

And Jim added:

"I'll give you a room looking out to'rds the sea, and furnish you dime novels and plug tobacco free gratis. If you can't come, please give the snap away to some of your friends."—*Detroit Free Press.*

Iced Water in Japan.

Although the Japanese never stored or used ice until the advent of foreigners, they have taken to the use of it since then with alacrity, and are as bad as Americans for drinking ice water. Men with portable stands slung over their shoulders perambulate the streets night and day crying: "Kori! kori! kori!" (ice! ice! ice)! Their chief patrons are the jinrickisha men, who have most ready money and are spendthrifts by nature. The kori man, when called, sits down his stand, produces a lump of ice, shaves it as fine as snow over a plane. It is then mixed with sugar and sold at two or three rings (an eighth of a cent) a glass, to the panting jinrickisha men. This mixture, which they themselves aptly call shiro uki (white stuff or snow), is not bad, and the newly arrived foreigner, when out of the sight of other foreigners, is not averse to indulging in it.—*Christian at Work.*

—The mania for collecting postage stamps seems to be gaining more ground than ever in France, writes the Paris correspondent of the London *Daily Telegraph.* Among the most famous collectors in France is a man who has over a million postage stamps preserved in thirteen richly bound volumes, and another who keeps two clerks employed in classifying and arranging his enormous collections. Added to this, there are in Paris about one hundred and fifty wholesale firms employed in the trade, and one of the best known of these has lately offered from twenty to forty pounds for certain stamps.

—If a dealer in grave-stones were to fail, some newspaper would be sure to refer to the disaster as "a bust in marble."

CONSTANTINOPLE.

Some of the Sights and Customs of the Far-Famed Queen of Cities.

The City of Two Continents dates back to 667 B. C., when some Greeks, emigrating from Megara, who had been told by the Oracle at Delphi to found their colony opposite that of blind men, lighted on the little town of Chalcedon, established seventeen years before by their fellow-countrymen, and seeing how blind they were to live there when they might live at Stamboul, settled at the latter place, in obedience to the god. Their little colony of Byzantium grew and became an important city.

With the advent of the year 330 A. D., the entire history of the city is changed. Constantine the Great, who needed a capital for his Eastern empire, being struck with the commercial and strategical advantages of the place, took possession of it, and changed its name to Constantinople. From A. D. 330 to A. D. 1453 we have Constantinople a Roman city, closely bound up with the fortunes of the Roman empire, sharing the greatness of Constantine the Great and the littleness of Constantine Palæologus XVI., her last Christian sovereign. At length it fell before the flood of Turkish conquest in its progress from the southeast to the northwest, an easy prey to Mohammed II., in 1453. The name Constantinople is taken to denote the city at large, thus including Pera (the city "beyond" the city proper), Galata (probably called from the Galatæ, or Gauls, who founded a colony here before its occupation by the Genoese in the Middle Ages), Tophane (the place of the "gun factory") and Stamboul (a supposed corruption of *eis ten polin*). Scutari may rightly be included in the city, being divided only by a water street of a mile across. Pera lies along the top of the plateau which descends to the Bosporus and Golden Horn by Tophane, Galata and Kasim Pasha, and farther off to the Valley of the Sweet Waters. Pera bears something of the same relation to Galata as the West End of London does to the City and Dock streets. Here European "society" and the best shops are to be discovered. The Grand Rue of Pera is as much Pera as Paris is France. Every thing collects in or about it.

Galata is the least pleasant quarter of Constantinople, and the journey to Pera from the sea takes one through the worst part of Galata. These unfavorable first impressions are responsible for much that has been said in a parrot fashion upon the filth and smells of the Queen of Cities.

Tophane lies between Galata and Sali Bazar, at the corner where the waters of the Golden Horn have become altogether lost in those of the Bosporus. It is remarkable for its gun foundry, barracks and fountain. The general aspect of the place is military. The main street is a continuation of the tramway street that begins at the far side of Galata, and skirts the Bosporus to Ortakeni. Tophane is Mussulman, Galata is Frank, and at Tophane we have an example of the fact that the quarters inhabited by Turks are invariably cleaner than those inhabited by Europeans. The narrow street, with its smell of frying fish, which is the main thoroughfare of Galata, here broadens out into a pleasant road, the cobbles are replaced by something like macadam, and a short walk brings one to the palace of Dolma Bagtche and the foliage of the Sultan's Park.

From Pera, Stamboul is reached by the Galata "stair-case" and the Galata or New Bridge. Or by going a little out of the way and crossing over the inner bridge, it may be entered below the Mosque of Sultan Mehmed and the Valens Aqueduct. From the Galata Tower below and around is the best panorama of the city—one of such profusion that in any way to render it justice a photograph fifteen feet long, such as is to be seen in the Club de Constantinople, is required; but from the center of the Azap Kapoi Bridge another prospect of a different character, scarcely inferior, may be obtained. Galata Bridge is as typical of Constantinople life as London Bridge is of London city life. All day long it is traversed by a bright-colored, jostling throng. The toll is ten paras, or a half-penny, and an immense sum is taken daily by white-robed collectors, who stand at intervals across the bridge.

Of the Constantinople spaces, which are irregular areas, the Mt-Meidan, or Hippodrome, is chief. It is encroached upon by the most graceful of the mosques, that of the Sultan Achmed, with its six minarets. Here *inter alia* is to be found the Brazen Column, a relic from Delphi, priceless in its two thousand and three hundred years, but in itself a mere stump. St. Sofia, the model of all the mosques, a spoiled Christian church lying vastly in the shape of a Greek cross, with its flat dome, columns, marbles, mosaics, texts and sense of awe, majesty and immensity, can not be described in a few lines of a paragraph, but deserves (and has received) a volume to itself.

Shopping in the bazars is a proceeding Turkish ladies seem to take considerable delight in. It is the only place in which they can brush with leisure against the outer world. They may sit and bargain over a small purchase for a considerable time. The Oriental system of trade is quite different from any thing European. Articles are not marked in plain figures, nor is there any fixed price. About ten times more than the seller will eventually close at is asked for, the buyer fencing up and down the scale till, after much gesticulating and coffee, and much reiteration on the part of the merchant of the loss he is selling at, both parties at last separate, mutually satisfied with the transaction.

The Persians have a quarter, with a mosque all to themselves, in one of the few Hans still remaining in Stamboul. The Persian, even more than the Turk, lingers over a business transaction, and like the Meslem thinks it necessary to bargain over some beverage; but instead of coffee, tea is handed round to customer or seller in little glass tumblers, with lemon and sugar. This is an indispensable act of hospital on the part of a Persian merchant when he is trading.—*Harper's Bazar.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY, FEBRUARY 19 1887

SUPERVISORS PROCEEDINGS.

Mr. Eldred offered in explanation of his vote on motion to accept deed from A. W. Eibeshutz and others, in satisfaction of their bond, for conveyance of lots in Blaney estate. That said motion was for the acceptance of less than the amount of land agreed to be conveyed to Inyo county by the said Eibeshutz and others.

E. ROBINSON,
Chairman pro tem.

FRIDAY, Feb. 11, 1887.

Board met at 10 o'clock a. m., Thomas Boland was elected temporary chairman.

Claims allowed:

M. E. Gilmore	$120 00
O. I. Mairs	7 50
W. W. Yandell	6 66
C. S. Swan	5 00
D. B. McIntosh	7 50
J. W. Harvey	6 00
Thomas Boland	2 00

Report of A. Stecker, Superintendent of Court House, accepted and approved. P. A. Chalfant, County Assessor, was allowed a deputy for two months; $200 for the period.

Petitions of the citizens of the several road districts praying for the appointment of Road Overseers to the several road districts were granted as follows:

G. W. Parish, Road District No. 6.
Walter James, " " " 5.
Henry Evans, " " " 1.
Thos. McLeod, " " " 2.
M. S. McLeod, " " " 3.
S. J. McMurry, " " " 4.

The application of Joseph Saely asking the Board to fix the water rates for Lone Pine water Company was granted as follows:

Each and every hotel or restaurant, $1 per week; Brewery, $1; Public stable, $1; Wash House, 75 cts; Family, 50 cts. To irrigate a garden under cultivation of the dimensions of a town lot, 25 cents per week, and for each additional town lot irrigated and under cultivation 25 cts. per week.

The petition for change of boundary line between Independence school district and Union school district be changed to the south line of U. S. Township 13, so as to include the residence of John W. Symmes, was approved.

The petition for change of school boundaries between Warm Springs and Bishop Creek school districts approved, and the boundary of said Warm Springs district changed as prayed for. Whereupon the Board adjourned till 1 o'clock p. m., at which hour the Board reassembled, same members present. Mr. Eibeshutz and J. S. Pelton appearing in the matter of furnishing a safe for County Treasurer, it was ordered that J. S. Pelton's safe contract be accepted. Whereupon the Board adjourned till 10 o'clock Saturday the 12th, inst.

THOMAS BOLAND,
Chairman pro tem.

Attest, P. H. MACK, Clerk.

SATURDAY, Feb. 12, 1887.

Board met at 10 o'clock. Minutes of preceding day read and approved.

J. C. Eddy was unanimously chosen temporary chairman.

Petition for jail building at Bishop Creek laid over till next regular meeting.

Ordered that the County Treasurer refund to Wm. Rowan, purchaser for rebate on payment of money on State school lands the sum of $161.75 as follows:

For principal	$150 00
Interest	8 75
Certificate of purchase	3 00
	$161 75

The petition for a new road in road distsict No. 3, was granted. Wm. Powers, James Chamberlain and the County Surveyor were appointed viewers to lay out said road.

Whereupon the Board adjourned till 1 o'clock p. m. At which hour the Board assembled, same members present as at morning session, except Supervisor Robinson.

The following amounts were ordered transferred to the Special Building Fund.

From the Contingent Fund	$635 92
From the Interest and Building F'd	186 54
From the Floating Debt Fund	77 54
Making	$900 00

Ordered that the County Auditor draw a warrant for balance due M. E. Gilmore, contractor on building Court House as per contract, said warrant to be drawn on the Special Building Fund for $2,036.13.

Balance due as follows:

Contract price of building Court House	$11,000 00
Amount paid heretofore	7,936 13
Less amount deducted by arbitrator from contract price	100 00
Balance due	$2,963 87

Report of County Auditor and Treasurer approved.

Pursuant to law and upon an order of the Superior Judge, the Board proceeded to select forty Grand Jurors, and eighty Trial Jurors, to serve for the term ending January 1st, 1888.

Board adjourned till 7 o'clock p. m. Ordered that the Auditor draw two warrants in favor of the Treasurer, one for $425 for a safe and the other for amount of freight on same.

The Clerk was ordered to procure books for the Assessor's office.

The Clerk was further ordered to procure a set of indexes for books in his office, and transcribe the entries from old indexes.

The Clerk was further ordered to have published a notice for contract for care of indigent sick, and also a notice for boarding prisoners.

Ordered that a committee of two members of the Board be appointed by the Chair to procure furniture for the Court House. E. Robinson and J. R. Eldred were appointed said committee.

A special meeting was ordered to be held March 8th, to provide for payment for new furniture for Court House. An order was made for the usual per diem and mileage for Supervisors, and the Board adjourned.

Signed,
J. C. EDDY,
Chairman pro tem.

P. H. MACK, Clerk.

Public Notice

Is hereby given that unless the above taxes and costs are paid I will on

Monday the 28rd Day of February, 1887,

Between the hours of 9 o'clock A. M. and 4 o'clock P. M., to wit, at the hour of 10 o'clock A. M., commence to sell the above described real property at public auction in front of the Court House, in the town of Independence, County of Inyo, State of California, and that I will continue such sale from day to day according to adjournments until the whole real property above described, or so much thereof as may be necessary, shall be sold, and that I will sell the smallest quantity of each assessment of said property that will be taken by any person for the amount of said taxes and costs, in gold or silver coin of the United States.

Dated this 4th day of February, A. D. 1887.

S. G. GREGG,
Tax-Collector of Inyo County, California.
By R. C. SPEAR, Deputy.

SIMMONS LIVER REGULATOR

FAULTLESS FAMILY MEDICINE

"I have used Simmons Liver Regulator for many years, having made it my only Family Medicine. My mother before me was very partial to it. It is a safe, good and reliable medicine for any disorder of the system, and if used in time is *a great preventive of sickness.* I often recommend it to my friends, and shall continue to do so."
"Rev. James M. Rollins,
"Pastor M. E. Church, So. Fairfield, Va."

TIME AND DOCTORS' BILLS SAVED *by always keeping Simmons Liver Regulator in the house.*

"I have found Simmons Liver Regulator the best family medicine I ever used for anything that may happen, have used it in *Indigestion, Colic, Diarrhœa, Biliousness,* and found it to relieve immediately. After eating a hearty supper, if, on going to bed, I take about a teaspoonful, I never feel the effects of the supper eaten.
"OVID G. SPARKS,
"Ex-Mayor Macon, Ga."

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE,
BODIE, CAL. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the northeast corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 6 degrees 26 minutes E. distant thirty-six chain; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sand-stone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE,
BODIE, CALIFORNIA, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particuarly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 55 degrees 26 minutes W. distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W. thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty-nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

SHADE TREES.

Good, Thrifty Trees
One and One-half
Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, FEBRUARY 19.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

The Supervisors took no notice of several recommendations of the Grand Jury.

Mrs. Rhine, accompanied by her son Bertrand, has gone to San Francisco. Mrs. Rhine will stay in the city some weeks; Bert is expected back next week.

J. H. Prince, of Hawthorne, arrived at Independence last Monday. He is here with a view to make improvements upon land he has located near Independence.

A welcome stranger came to Lone Pine lately, he is a Geraldine, and Frank is happy. May he have all the virtues and none of the misfortunes of Lord Edward, and be as elegant and accomplished a gentleman as Silken Thomas.

A very heavy snow storm blockaded the Central Pacific Railroad last Monday. At Blue Canyon the show was nine feet deep and at Summit fourteen feet deep. The *Enterprise* reports that two feet of snow fell at Virginia City during the storm. Our local trains were all on time, except the down train Monday, which was detained nearly three hours at Belleville.

The party at the Lake View House, Keeler, last Monday evening proved quite as pleasant as had been expected, and that is saying a good deal. The new building made a splendid ball room; and the music was delightful. Those who had not before enjoyed the hospitality of Mr. and Mrs. Barnes experienced a new pleasure, and all present are determined not to miss the next opportunity.

Washington's Birthday.

A party will be given at Mairs' hotel, Independence, next Tuesday evening, in honor of Washington's birthday.

School Benefit.

For the benefit of the school at Camp Independence, a ball will be given on the evening of Friday, March 18th, 1887. See the advertisement.

Snowed In.

Mr. Laird, who had gone to Bodie to bring the Land Office to Independence, got snowed in there for several days. Doctor Walker turned over the books and records to Mr. Laird, but the office will not be brought here for a week or two yet. Mr. Laird left Bodie last Thursday for Sacramento, and will go to Bodie again on his way back and bring the office along.

Birthday.

Last Saturday Mrs. A. W. Eibeshutz gave a birthday party on behalf of her little daughter Elsie. A large number of the schoolmates of Elsie, girls and boys, were invited. No company of children ever were treated with greater kindness, and their enjoyment appeared to be perfect. No better evidence of a kind heart can be given than promoting the happiness of children.

Storm.

During several days stormy weather prevailed, culminating in a fall of snow last Monday night. At daylight, Tuesday morning about two inches of snow had fallen at Independence; about noon it had melted and the ground was again clear. A very great deal of snow has fallen upon the mountains; as seen from the valley, the higher canyons appear to be drifted full, ensuring an abundance of water for the coming summer. This is the only snow that has fallen at Independence this winter, and is about one third of the amount that fell at San Francisco ten days ago.

Settlement.

Mr. Finlay McIver is back again at Independence. When he made his report on Owens valley lands to the parties on whose behalf his first visit was made, they requested him to return at once and have surveys made of the lands on which they intend to settle, and also for irrigation ditches. He is now engaged in this work. The head of the ditch will be about four miles above Independence station, on the east side of the river. The ditch will be very easy to build; there is no heavy cutting nor any embankments to build. This settlement will cover about 6,000 acres.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

An Explanation.

When the vote was taken by the Supervisors on the question of accepting from Mr. Eibeshutz and others the lots belonging to the George estate, said lots to become part of the Court House yard, Mr. Eldred voted against accepting the ground. In justice to Mr. Eldred an explanation should be given of his reason for so voting. As an inducement to the Supervisors to rebuild the Court House upon the site of the former building, a proposition was made to buy the George lots, and deed the same to the county for the purpose stated. This proposition was agreed to by the Supervisors. Now, when the building is finished, the parties who had given a bond to deed the lots as stated, came before the Supervisors and asked that a part of the ground be given back to them. Mr. Eldred insisted that the whole of the ground belonged to the county by the terms of the bond, and that said bond should be complied with in all of its provisions. For this reason, when the acceptance of the ground was put to a vote, with the proviso that a part of said ground be given back to the parties who gave the bond, Mr. Eldred thought it would be unjust to the county to agree to such a proposition and voted against it.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

Music in the Air.

A meeting of the young men of the town was held a few evenings ago for the organization of a brass band. Enough names were enrolled to form a large band; committees were appointed to secure a teacher and provide instruments. The citizens will stand in with the boys and help them on to success.

We Tell You Plainly

that Simmons Liver Regulator will rid you of Dyspepsia, Headache, Constipation, and Billiousness. It will break up chills and fever and prevent their return, and is a complete antidote for all malarial poison—yet entirely free from quinine or calomel. Try it and you will be astonished at the good results of the genuine Simmons Liver Regulator, prepared by J. H Zeilin & Co.

School Board Meeting.

The County Board of Education met at Independence last Tuesday. Certificates were granted to Mr. Janvier, now teaching at Lone Pine, and to Mr. Terry, teacher at Big Pine. Both hold life diplomas from the State Board of Education. At the preceding regular meeting of the Board, a resolution was adopted, ordering the printing in pamphlet form of the rules of the Board, and the course of studies to be taught in the county schools. This has not yet been done, and at this meeting the subject was again discussed, with the further recommendation of a list of books to be bought for the school libraries.

BORN.

FITZGERALD—At Lone Pine, Feb. 5, 1887, to Mr. and Mrs. Frank Fitzgerald, a son.

ROSSIE—At Lone Pine, Feb. 5, 1887, to Mr. and Mrs. G. Rossie, a son.

DIED.

STEVENS—At Lone Pine, Inyo county, Cal., Feb. 16th, 1887, Sherman Stevens, a native of New York, aged 76 years.

In the death of Sherman Stevens Inyo county has lost a good and useful citizen. Though seventy-six years old, up to within a week or two of his death his energy and industry would put to the blush many a man not half so old. He had a very ardent desire to complete before he died the large irrigating ditch on which he was engaged, and there can be little doubt that the anxiety he felt and the labor he bestowed on this work hastened his end. The ditch is so far along that its completion will be an easy matter, and it will be his best monument. Several sons and daughters survive him; one of his daughters was the wife of John C. Heenan, a man of great notoriety in his day. Colonel Stevens was highly respected in Inyo county, and his death will be widely and deeply regretted.

"AH, THERE!"

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SHORTLAND, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st, It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d, If you run shoes, you can not buy ours for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

THE EUCALYPTUS.

Imported as an Ornament, It Has Been Turned to Practical Use by Americans.

When a mail steamship line was established between San Francisco and the Australasian islands, enterprising persons sought to transfer some of the wild products of the latter region to the California soil. One thing attracted the attention of the admirers of nature, and that was the eucalyptus tree, which formed ninety-nine per cent. of the forest vegetation of Australia. This tree grows very rapidly in that country, with a straight stem reaching commonly two hundred and fifty feet in height, and having a circumference of seventy feet at the base. It was believed that as this tree produced a great mass of leaves it could be utilized for shade as well as ornamentation, if the soil of the Pacific States should be found suitable to its growth. The experiment was tried, and slips of the Australian forest giant transferred to California, where they soon took root and thrived in the prolific soil of the Golden State. The tree was found to furnish honey to bees, and in this way alone the foreigner was soon ascertained to be a valuable addition to the honey-giving products of that now extensive honey-producing State.

It was ascertained that the eucalyptus globulus, or blue gum, could be further utilized as a remedy for marsh and other fevers. So valuable, indeed, is it that it will destroy and feed upon the animalculi of marshy regions and help to eradicate mosquitoes by destroying the food on which they exist. Its value by being efficacious in such fevers has given to the tree among many persons, especially the Spanish Americans, the name of the "fever tree," and it is therefore somewhat revered by the natives of Spanish American countries along the Pacific coast. The tree produces an essential oil which is valuable, and a resin like the resin of cinchona. An extract made from the tree yields a substance capable of neutralizing strong acids and forming crystalline salts. The leaves, dried and powdered, have been found useful as a medicine for certain maladies, and the bark and wood have also been utilized for the same purpose. But the discovery of the most remarkable use to which this tree can be put was the result of an accident a couple of years ago. The eucalyptus tree had flourished on California soil and had been employed as an ornament and shade tree in many of the cities and settlements along the Pacific coast. It will be remmbered that for a long time past the engineers all over the country suffered from scale forming in their boilers and from corrosion. About a couple of years ago Mr. George Downie, the proprietor of a flouring mill at Salinas City, California, was in the habit of filtering water in an old heater in order to free it as far as possible from the mineral qualities that formed scale in his boiler. Chemical compounds supposed to prevent the formation of scale had been used without effect, and Mr. Downie resorted to the filtering of water as a partial preventive. His process was to run the water through the heater and let it drain through straw. One day he happened to be out of straw, but as the leaves from one of the eucalyptus trees which stood near the mill were handy he employed them instead. To Mr. Downie's surprise the formation of scale in the boiler stopped and that which was already there began to be removed. He thought it well to continue his experiments with the eucalyptus leaves, and on proving the result informed others what he had discovered. In a very short time the leaves of the eucalyptus tree fell into very general use among the engineers on the Pacific coast for removing scale from all boilers and for preventing corrosion. The value of the tree to American industry having thus accidentally been developed, its rapid growth having been demonstrated, and its usefulness in destroying the pests and maladies arising from marsh lands being proved by eminent physicians, a strong desire has arisen among the keepers and cultivators of park lands, as well as those who take great interest in ornamenting their grounds with forest vegetation entirely different from the native productions, to reproduce this tree in various parts of the country, not only as a curiosity, but also as one of the valuable additions to the productive resources of the United States in both an agricultural and commercial sense.—*N. Y. Mail and Express.*

Indignant Parisian Opera Goers.

The Parisians, as represented by their journals, are still indignantly distressed about the constant appearance of Englishmen at the opera in morning dress. Nightly the stalls exhibit a great preponderance of many colored suits over the decent shiny black demanded by respect for the first lyric stage in the world, and within the last months "an English duke" and "a peer" (two very different persons) were seen in the front row attired in checks which, besides being gray, were peculiarly and offensively ugly. But the sticklers for etiquette have to own themselves beaten. It would be easy for the directors of the opera to enforce evening dress, but in that case it is foreseen that the Englishman would be more conspicuous by his absence than he is now by his "suitings;" and as the majority of the audience in the best seats consists of Englishmen, the directors decline to sacrifice business to sentiment. So the journals have to fall back upon moral persuasion and satire. The keen edge which the latter weapon can be made to take in so sacred a cause is seen in the suggestion of one paper that the unmannerly English will shortly look on at the play in their flannels "du lawn tennis," leaving their racquets in the cloak room.—St. Ja mes Gazette.

Martial Decorations in Chili.

The soldiers here are of the regular army of Chili. They are of all shades of complexion, fairly drilled and equipped, rather under sized, but vigorous and hardy looking. A large part of them saw active service in the late Chilian-Peruvian war, and wear decorations for their services—to my mind rather too generously bestowed, for it does not seem likely that every fifth or sixth man can have so personally distinguished himself as to deserve from one to three showy medals and clasps. It must be remembered, however, that both by land and sea the Chilians fought with great courage and tenacity.—Chili Cor. Detroit Free Press.

Improving on Nature.

"You can't improve on nature," said old Hardhead. "O, yes you can," said Young Hyson; "a man may be born a natural fool, but if he keeps on, like some men I know, by the time he's 50 he's a bigger fool than all the babies in the world. Nature can't make a fool equal to the man who makes a fool of himself." And then old Hardhead growled that he wasn't talking politics, but art.—Burdette.

Lehigh university has a "Mustard and Cheese Dramatic club."

FOREIGN GOSSIP.

—Thin plates of metal in the backs of books are a new London notion.

—There is a plot afoot to crush poker in Europe. The *St. James' Gazette* and also certain officials are encouraging it.

—Out of 700,000,000 passengers on British railways last year only 100 were killed; in addition 857 employes, trespassers, or suicides were killed.

—British Guianea is making large shipments of gold to England, and the prospects are that the shipments will rival in value the great exports of sugar, molasses and rum.

—Two years ago Baroness Alquier left $1,200,000 to the City of Paris for an asylum to be named after her. The municipality has now purchased a park of 275 acres and will erect the asylum therein.

—Herr William Herz, the famous Berlin manufacturer of ladies' cloaks, recently celebrated the completion of the 100,000th cloak of this season's make with a grand banquet to all his employes.

—A most astonishing phenomenon of the Japanese earthquake was the splitting of the Paupundayang mountain. In a flash of time it was split into seven parts. Where the lone mountain had stood, loomed up seven peaks, each some seven thousand feet high.

—The discovery of a new variety of coffee-plant in West Africa is reported. The berry greatly resembles that of Arabia in appearance and flavor, but grows on a rapidly-developing and very productive tree nearly seven feet high instead of on a shrub.

—An experiment was recently made of a female omnibus conductor on the new line between Piccadilly Circus and King's Cross. She only lasted a day. Most probably she met with an offer of marriage and closed her connection with one bus to get another as legitimate.—*London Court Journal.*

—A strange effect of light transmitted through a solution of sulphate of quinine upon the blossoming of plants has been made known by Sachs. From a series of experiments he has shown that plants germinated and grown under the influence of such light, while thriving otherwise, develop only small, imperfect, and speedily perishable flowers. Light transmitted in a similar way through pure water impaired in no way the blossoming powers.

—Fred Archer is still talked about. While at Newmarket the other day the Prince of Wales made a pilgrimage to his grave, where he sent for Archer's sister and baby daughter and sympathized with them. Patriotic indignation has been expressed because French papers have said that English ladies loved Archer for his fine eyes as well as for his riding. A proposition to perpetuate his memory by founding a reading and reception room for stablemen and boys at Newmarket is meeting with much favor.

—In the vault of the Capucine Church at Vienna, where the Austrian sovereigns have found their tombs, is a splendid and enormous sar ophagus raised by Joseph II. over the remains of his mother, Maria Theresa, and at its foot a plain iron box, in which are the bones of Joseph himself, with the inscription, often repeated by him in life: "I have got so far that I love nothing on earth except my mother and the State." Near by is the tomb of the unfortunate Maximilian of Mexico, by the side of which the Emperor often spends an hour in meditation and prayer.

AGE AND EXPERIENCE.

The Intellectual Force of Men Who Are Old in Years and Wisdom.

We make a great mistake in America when we lay our old men on the shelf while they are still in their prime as counselors. Benjamin Franklin was sent to France as a Minister when he was seventy years old, and the best work he did for his country he did between his seventy-first and seventy-eighth years. The State of New York had an absurd statute which removed Chancelor Kent from the bench because he was sixty-five. After that time he wrote and published his Commentaries, a book recognized by every lawyer and statesman as one of the most important books in the study of our jurisprudence. So much good did the country gain from one of the frequent absurdities of New York legislation. In England, Lord Palmerston and Mr. Gladstone are recent instances, well remembered, of the force which statesmen gain, almost by the law of geometrical progression, from the memory of the experiments which fall, from what I call organic connection with the national life of the last two generations.

The truth is that the old analogies and some of the old saws deceive us in our social conditions of to-day, in which life is longer, and the human frame in better order generally, than it was a hundred years ago. Perhaps the lower races of mankind, and the worst fed orders of society, do not show much improvement in the passage of centuries. But in the class of men and women from which leaders are drawn, from which come teachers, authors, law-givers, inventors, or, in general, directors of society, these people are on the average in better condition at seventy than their ancestors were at sixty. They have a better chance for life, they have ten years more experience, by the measure of time, and by the measure of amount, they have a hundred times more. One might not take the risk of conducting a great war, with the Count Von Moltke at the head of one's armies, when he is over eighty years old. But so far as intellectual force goes, and immense experience, with the knowledge of men and certainty what they will do—so far as these go—the Emperor William has been wise in trusting his affairs to Bismarck, though Bismarck be counted such an old man. Bismarck is no older at eighty than Richelieu was at three score.—*Edward Everett Hale, in Chautauquan.*

Agreeable to the Invalids.

Queen Victoria has sent to the Longmore hospital for incurables, Edinburgh, £50 and copies of her portraits for each of the rooms in the hospital. In forwarding them the dowager Duchess of Roxburgh wrote "The queen thinks it will be agreeable to the poor invalids of each room to see this memento of her majesty's visit.—New York World.

"Literary Men" in Name Only.

There is, I fear, a prosaic set growing up among us, editors of booklets, bookworms, index hunters or men of great memories and no imagination.

—A good-sized hog which jumped overboard in Lake Erie when the steamer was a mile off shore landed in a little over an hour in pretty good condition.—*Buffalo Express.*

ASPARAGUS CULTURE.

Observations and Experiments Made by a Successful Cultivator.

It seems to me that the method of deep setting this crop is a mistake. I have spent money carting dirt on to asparagus beds, but it was labor lost; the yield was no better. We live and learn. Studying the habit of the plant I found much that is interesting. Plowing an old meadow I found roots of asparagus that had sprung from seeds, and the clumps of roots when turned up were about eighteen inches long and had in all cases grown by inches toward the south, adding a new bud each year, the old buds or roots being connected together with the power to reduce an upward growth only in the new bud. Another bed, in bearing over thirty years and for the last fifteen without manure, has shown signs of running out. The stalks are of good size, but very thinly scattered over the ground, so that one-fourth of the two-acre lot was ploughed up. This was done with little difficulty, as the roots were not strong in the land.

The decay and decreased production was laid, not so much to the lack of fertilizing as to the fact that of late years the ground had been worked twice each season with a light one-horse plow, instead of by the old method of hand-digging with the six-tined fork; the roots were probably cut off below the bearing point from time to time by the plow, and the part of the lot worst affected was where the plants were deepest in the soil. Another bed was set in rich land ten years ago, not very deep. This, when a small part of it was plowed up to make room for hot-beds, proved a very tough job—the hardest plowing I remember. The roots here seemed to grow in all directions as to points of compass, but always with the terminal shoot only, ready for the spring trade.

A bed of one-fourth acre set in the spring of '85 with two-year-old roots of the Moore's Crossbred variety had last spring staks all along the rows from one-half to one inch through, large enough to cut; but none of them were cut this season, as it is not considered advisable to cut much till the third season after planting. This bed is on a side-hill sloping east that had received an annual manuring for twenty years. The land was heavily manured at the time and the manure worked into the soil. The plants were set in rows three feet apart. The plants were about a foot apart in rows and not more than four or five inches below the surface; in fact, set in the rich surface soil of the garden without subsoiling or any such trenching as is usually recommended. Next season this bed will yield an abundant cutting of splendid shoots, and if worked with a fork and not with a plow will remain in bearing at least thirty years.

As for manure, I believe for asparagus, as for rhubard, that the manure should be applied in the fall. Our alluvial soil does not respond to commercial fertilizers; but wood ashes, leached or unleached, and horse manure are our dependence. This put on in the fall and worked into the soil early in spring, the ground cleared of weeds about July 1, and then left till November, when the beds are mowed down and burned to kill seeds. There is absolutely no "best time" to set a bed, but either fall or spring, as suits. The fall is better on some minor accounts—the land is in better condition to work, the plants are dormant and there is more leisure to do that job well. The plants are best for setting at two years, for then you get the plants in fresh soil, free of weeds and strong enough to make a vigorous growth at once. One-year-old plants are good if the best ones be chosen and you can raise your own seedlings and in the meantime prepare the land for the future bed by crops which will leave the soil in good condition to set the asparagus.—*W. H. Bull, in N. Y. Tribune.*

SMART YOUTH.

How a Keen-Witted Young Man Pacified His Angry Employer.

I guess young Jones will get on. He's in an office on California street, or somewhere thereabouts. He's careless, and had made so many mistakes that he knew the one he made last would prove fatal. He went back from lunch the other day and a fellow-clerk met him on the stairs.

"You'll get it, Jones. The old man's just boiling, and he's been calling for you for the last fifteen minutes."

Jones stopped on the landing and cogitated. He must head off the old man somehow. He ran down-stairs and up the street as hard as he could go to a florist's. There he purchased a little fifteen-cent boutonniere and marched gayly back.

"Mr. Jones!" came in a loud tone from the private office as he entered.

"Yes, sir," and he deposited his hat, hid the flower in his coat, walked into the private office, and closed the door carefully.

"Mr. Jones, I have frequently—"

"I beg your pardon, sir, but I have a private message for you."

"Mr. Jones, you've been—a private message! What is it?"

His tone changed as Jones quietly laid the flower on the desk before him.

"What is this?"

"It's a little bouquet. A lady came in while you were out—a young lady—and inquired for you. 'He is not in,' I said.' 'Can I do any thing for you?' 'Can I trust you?' she asked. 'With the utmost confidence,' I said. 'Will you give this flower to Mr. Johnson? And don't let anybody see you, and tell him it was left by the lady in the blue bonnet.' And here it is, sir."

"Dear me! that's odd." Jones saw a beam come in his face and he knew he was all right. "The lady in the blue bonnet! Bless my soul, Jones, that's curious. I don't know any—what was she like?"

"She was very pretty."

"Pretty! Very well, Mr. Jones, you'll really have to be a little more careful. You've been making another—by the way, Jones, if you can find out any thing about the lady—you needn't mention, of course—you can let me know." And the old man's been looking fixedly at every woman in a blue bonnet he has met since.—*San Francisco Chronicle.*

Mr. Buchter, a well-known citizen of Lancester, Pa., has used St. Jacobs Oil, and considers it an excellent remedy in cases of swellings, bruises and burns.

The crusade against pool selling is said to be a "race" prejudice.

A man named Wiggins has died in Boston, but this only partially satisfies the public sense of justice.

The publisher of Baltimore, Md., *Every Saturday*, Mr. T. J. Wentworth, says his child aged six months, was suffering from a severe cold, and he gave it Red Star Cough Cure, which acted like a charm. No morphia.

ACTION OF THE HEART.

In restful sleep the heart slows up and its beats number ten less every minute—six hundred less every hour, and in the usual time allotted to sleep, eight hours, four thousand eight hundred less than the number given in the same period of wakefulness. This means rest to that wonderful organ, a rest that restores its powers and enables it to discharge its functions in a more healthful and vigorous manner. The cases of heart disease which have been cured by the use of Compound Oxygen, as administered by Drs. Starkey & Palen, are a very interesting study. They all report insomnia relieved as a beginning and then go on to tell how the palpitation gradually was relieved, and the action of the heart became regular and comfortable. It is the action of the heart be kept up to full working capacity by wakefulness the time cannot be far off when it will wear itself out, and the palpitation and flutter which cause so much trouble may therefore, with good reason, be feared. A treatise on Compound Oxygen, giving the mode of action and results of this remarkable curative agent, will be sent free. Address DRS. STARKEY & PALEN, 1529 Arch St., Philadelphia, Pa.

One of their patients, Rev. L. H. Morey, Seneca Falls, N. Y., says, in a letter dated October 12, 1885: "I think it must be a year or more since I purchased a Compound Oxygen Home Treatment, and used it up. I am confident it did me a great deal of good in throat and heart troubles; the fluttering and pain frequently experienced in the heart, have not touched me for months. I did not think of Compound Oxygen for that trouble, but used it for throat catarrh. The distressing heart trouble has certainly left me." In a letter dated October 30, 1886, he adds: "With the exception of a cold, contracted since I last wrote you, I am in perfect health. What gratifies me most is my complete deliverance from pain in the region of the heart, and from frequent and distressing fluttering or palpitation of the heart, from which I suffered for years; it used to trouble me so much that I could not sleep on my left side; and frequently I would start up in bed, and have to sit up till the sensation had passed; the sensation was usually accompanied by faintness. *Now I sleep on either side, and have not for months, had a return of either the pain or the fluttering.* I used the Compound Oxygen for possible help to lungs, throat, and catarrh, especially the latter. I believe the Compound Oxygen to be a nerve and brain restorer; at least, I work professionally with surprising and unwonted freedom from exhaustion."

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

The illustrous traveler looked contemptuously at the mountains. Nothing very steep about here," he said scornfully. "Make out his bill," said the noble landlord, turning to the gallant clerk.

THE OYLY WAY TO CONQUER DYSPEPSIA.

It is perfectly preposterous to introduce pepsin and other artificial solvents into the stomach, in the expectation that they will assist digestion by acting on the food itself. They will not. Nor is it possible thus to overcome dyspepsia. The only way to conquer that disorder, and prevent the numerous diseases and disabilities which it assuredly provokes, is to renew the activity of gastric action by strengthening the stomach. Hostetter's Stomach Bitters eradicates the most inveterate forms of indigestion by restoring vitality to the alimentary organs, and those which are tributary to them. The liver, the bowels, the kidneys and the nerves, no less than the stomach, experience the invigorative effects of that standard tonic, which possesses alterative properties that greatly enhance its beneficial influence, and give a permanence to its effects which they would not otherwise possess.

When a man becomes firmly convinced that he is a genius, it is then that the fringe slowly begins to form on the bottom of his trousers leg.

BLOWING UP HELL GATE

has been a laborious and costly work, but the end justifies the effort. Obstruction in any important channel means disaster. Obstructions in the organs of the human body bring inevitable disease. They must be cleared away, or physical wreck will follow. Keep the liver in order, and the pure blood courses through the body, conveying health, strength and life; let it become disordered and the channels are clogged with impurities, which result in disease and death. No other medicine equals Dr. Pierce's "Golden Medical Discovery" for acting upon the liver and purifying the blood.

The plumber in love may not do very much cooing, but he ought to be great on billing.

For Catarrhal and Throat Disorders, "*Brown's Bronchial Troches*" are renowned and marvelously effective, giving immediate relief.

SINGING SONGS OF JOY.

"Hurrah for the Irish May Flower's bloom
That saved my Barney's life,
It kipt his liver from death's doom,
An' cured him for his wife.
Do ye blame me Mr. Delaney
For singin' songs of joy?
Irish May Flower, more's the power!
Cured my darlin' boy."

WEAK LUNGS MADE STRONG.

Persons who stay in doors all the time and lean over a counter or a desk, sooner or later discovers that their lungs are giving out. Editors are often thus afflicted. Erastus R. Sutherland, editor of *The Eastern State Journal*, White Plains, New York, writes:

"I have used ALLCOCK'S POROUS PLASTERS in my family since 1868. In that year I had an attack of pneumonia from which I was not expected to recover. My lungs were left in a very weak state. I commenced using ALLCOCK'S POROUS PLASTERS, wearing them constantly three months, two on the breast and two on the back. The result was surprising, at least to me. The pains in my lungs had lest me, and I felt like "a giant refreshed with new wine."

BEAUTY of Skin & Scalp RESTORED by the CUTICURA Remedies.

NOTHING IS KNOWN TO SCIENCE AT ALL comparable to the CUTICURA REMEDIES in their marvelous properties of cleansing, purifying and beautifying the skin, and in curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair.

CUTICURA, the great Skin Cure, and CUTICURA SOAP, an exquisite Skin Beautifier, prepared from it, externally, and CUTICURA RESOLVENT, the new blood purifier, internally, are a positive cure for every form of skin and blood disease, from pimples to scrofula. CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers.

Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, $1; SOAP, 25c. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases."

HANDS Soft as dove's down, and as white, by using CUTICURA MEDICATED SOAP.

Beauty

MRS. E. G. D., AGED 31, FROM PHOTOGRAPHS.

Full address given to ladies privately by permission. Call on or write to her, if you wish. Portraits show the delightful change by 30 days treatment, using the SPANISH SYSTEM OF PHYSICAL CULTURE.

GUARANTEED a superb development of the bust in young or middle aged ladies, and after nursing (see portraits above); fine shoulders; rounded, symmetrical limbs and arms; a pure, lovely complexion free from sallowness, freckles, "blackheads," eruptions, &c., brilliant eyes and perfect health. That "tired" feeling and all female weaknesses promptly cured. Spanish women owe their celebrated beauty to this System.

$5 WORTH of the treatment free to any responsible woman to prove my confidence in it. See Book, page 8.

BOOK Giving all details, mailed free, sealed. Strict professional confidence. References.

HOME TREATMENT; delightful results guaranteed. Permanently established in 1881. Book, portraits, references, &c., free. DR. L. C. HARMON.

Mention this paper. 313 Haight St., San Francisco, Cal.

S F N U (First Series) No. 239.

In England at this particular time it is hard to get public men to accept office. England is not America by about 3,000 miles.

"THE PROPER STUDY OF MANKIND IS MAN,"

says the illustrious Pope. If he had included woman in the list, he would have been nearer the truth, if not so poetical. Dr. R. V. Pierce has made them both a life study, especially woman, and the peculiar derangements to which her delicate system is liable. Many women in the land who are acquainted with Dr. Pierce only through his "Favorite Prescription," bless him with all their hearts, for he has brought them the panacea for all those chronic ailments peculiar to their sex; such as leucorrhœa, prolapsus and other displacements, ulceration, "internal fever," bloating, tendency to internal cancer, and other ailments. Price reduced to one dollar. By druggists.

A drummer gives it as his opinion that the chickens of which they make pies in most hotels are hatched from hard-boiled eggs.

You get more comfort for 25cts. in Lyon's Heel Stiffeners than in any other article.

To feel free, pleasant and be healthy, use Irish May Flower. 75 cents at druggists.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

Colonel Yerger—Well, Uncle Mose, I expect you have seen a good many Christmases? Uncle Mose—Yes, sah; tousands and tousonds ob 'em.

NO TROUBLE TO SWALLOW

Dr. Pierce's "Pellets" (the original "little liver pills") and no pain or griping. Cure sick or bilious headache, sour stomach, and cleanse the system and bowels. 25 cts. a vial.

Alarmed Wife (to husband, who has just come in)—Why, John, dear, you look ill! Husband—I may (hic) look ill, m' dear, but (hic) I feel firs' rate.

Best, easiest to use and cheapest. Piso's Remedy for Catarrh. By druggists. 50c.

Irish May Flower, the king of discoveries.

THE BEST TONIC.

This medicine combines Iron with pure vegetable tonics, and is invaluable for Diseases peculiar to Women, and all who lead sedentary lives. It Enriches and Purifies the Blood, Stimulates the Appetite, Strengthens the Muscles and Nerves—in fact, thoroughly Invigorates.

Clears the complexion, and makes the skip smooth. It does not blacken the teeth, cause headache, or produce constipation—*all other Iron medicines do.*

MRS. CHAS. A. SUMNER, 1366 Ninth Ave., East Oakland, Cal., says: "I have used Brown's Iron Bitters for Headache and Weakness with much benefit. Before using the second bottle I felt better and stronger. I recommend it as a most valuable tonic."

MRS. MARY DRANEL, 54 Ora St., San Francisco, Cal., says: "I used Brown's Iron Bitters for Nervous Headache and it cured me."

MRS. M. A. PRESTON, Forrest Grove, Oregon, says: "I suffered for years with Weakness. Brown's Iron Bitters has made me well. I would not be without it."

Genuine has above Trade Mark and crossed red lines on wrapper. Take no other. Made only by BROWN CHEMICAL CO., BALTIMORE, MD.

The New East Ajax Tinners' Shears.

50 CENTS EACH FOR TRADE 16 CENTS.

Length of Cutting Edges, 2 Inches.

HARD AS STEEL. Equal to the best Steel Goods in Cutting qualities.

OSBORN & ALEXANDER, 628 Market St., S. F. Mechanics' Tools, Hardware and Machinery

—"Some idiot has put my pen where I can't find it," growled Asperity this morning, as he rooted about his office desk. "Ah, aw, yes; I thought so," he added, in a milder tone, as he hauled the writing utensil from out behind his ear.—*N. Y. Graphic.*

—Richard Comstock, of Monroe County, Oregon, wore boots whose soles were fastened on with brass wire. Recently the leather shrunk and exposed a piece of the wire. A small particle of the wire entered his foot and made its way up toward the knee. Blood-poisoning set in and Comstock died.—*Chicago Mail*

—The latest industry developed in New York is a search of the street-car tracks and the gutters after midnight with a dark lantern for lost articles. One man says he makes a fair living by picking up things in the street, and that he has found as much as seven dollars in small coins of a single morning. It had been dropped by people hurrying and crowding upon the horse-cars. Besides money, watches, knives, keys, trinkets, hand satchels, revolvers, bundles, opera glasses, etc., sometimes reward the search of the gatherer.—*N. Y. Sun.*

—A young man in Lancaster, Pa., before going to bed the other night, hung his pantaloons upon the gas jet. The weight of the clothes opened the stop, letting the gas out and the young man was found dead the next morning.—*Pittsburgh Post.*

—While Mrs. Rebecca Phillips, of Blairsville, Ga., was milking, recently, she fell back with a pain in her head and died in great agony that night. The cow, apparently perfectly healthy, was similarly stricken and died at the same time.—*Atlanta Constitution.*

—Grapes are now recommended as a remedy for obesity. A pound of grapes is given the patient to be eaten the first day, and this amount is increased until he can eat five or six pounds a day. Other food is gradually lessened, and the diet at last consists wholly of grapes.—*Chicago Times.*

—Fashionable Parisians are wearing a new charm. It consists of a little crystal locket, in which is inclosed a four-leaved clover, which, as we all know, infallibly brings good luck and the fulfillment of every wish to its wearer. This charm comes from Austria, where four-leaved clovers abound, so it seems.

—The public is reminded by the New York *Evening Post* that Adam and Eve first saw the light of day on the 28th of October, 4,004 B. C., and, says the *Post*, "it is curious that the anniversary should have been unwittingly selected for the unveiling of the marvelous statue of Liberty, the fairest of Eve's daughters."

ROYAL

BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO. 106 Wall Street, N. Y.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

J. R. GATES & CO., Proprietors.
417 Sansome St., San Francisco.

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS,

from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.

CONSUMPTION,

which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the

Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

SOLD BY DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD

is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.

Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

IRISH MAY FLOWER

THE GREAT BOWEL REGULATOR.

IRISH MAY FLOWER is the best remedy for Constipation, Biliousness, Dyspepsia, Malaria, and Headaches. Acts without detention from business or pleasure. It has no equal for Children, hence the Family Favorite. Sold by Druggists at 75 cents. Yaqui Co., Agents, office, 614 Montgomery St., S.F., Cal.

HER TESTIMONY.

What Aunt Liza Simmons Knew About a Boiler Explosion.

Liza Simmons was summoned to testify concerning the explosion of the boiler of a saw-mill.

"Now," said a lawyer, representing parties who had brought suit for damages, "state what you know concerning the case."

"Wall, sah; it wuzer Thursday erbout ten er clock; mout er bin Friday at nine er'clock——"

"That makes no difference."

"Yas, sah; didn't 'low it did. Wall, we'll say it wuzer Thursday. I wuzer standin' in my back-yard er watchin' er pig dat my son Amus cotch outen de riber——"

"Never mind the pig.'

"Yas I will mind him, fur he's wuth er dollar an' er quarter right now. Wall, while I was er standin' dar, not thinkin' erbout nuthin' in purticuler, dar came a mighty 'sploshun."

"And Aunt Rose was killed, eh?"

"Wall, lemme tell yer. Dar came er mighty 'sploshun. I looked ober toward de mill, I did, an' seed Aunt Rose, whut cooked fur de mill hands, er gwine way up in de a'r. I turned 'round to my darter 'Cindy, an', 'Cindy,' says I, 'look yander at ole Aunt Rose gwine way up in de a'r. W'y she er mighty ole pusson to be gwine up so high, an' I wonder how she think she gwinter git down widout cripplin' her ole se'f, when she's dun got de rheumatiz anyhow.' Cindy, she 'lowed dat de Lawd would provide fur de ole critter, an' den I says, says I, 'Ef He do, Cindy, He got ter do it mighty peart, fur de ole critter is comin' down,' an' jes' erbout dat time de po' ole critter struck de groun' like she wuz in earnest, sho' nuff. Me an' Cindy we put out an' run ober dar, an' I says, says I: 'W'y, Aunt Rose, whut make yer go climbin' 'way up yander like er boy?' But, bless yer life, de good ole soul cou'dn't tack an' jes' erbout dat time, 'bip,' suthin' struck de groun' 'side me, an' lookin' roun' I seed ole Abner's son Phil, ez black er child ez eber libed, stretched out. Bless yer, I didn' see him when he went up, an' it wuz er mighty s'prize ter me, so I says: 'Look heah, boy, whut yer comes s'prizin' er body des way fur? W'y'n't yer he'p dis po' ole lady come down 'stead er hangin' 'roun' up dar till arter she'd dun struck de groun'? De ole boy gwine ter git yer one o' dese days;' but he didn't make no 'ply, fur de po' black chile wuz dun dead. Dis is all I knows erbout de erfair, an' I ain't gwinter answer ernuder question. Lemme git outen heah."—*Arkansaw Traveler.*

LITTLE THINGS.

How We May Contribute Largely to the Happiness of Our Neighbors.

The round of life's duties is made up of little things. But few persons have either the ability or the opportunity to do any great act, by which their country and their race are especially benefited and their own names rendered illustrious. Such acts are reserved for the few, and the occasion for them but seldom occurs. They are exceptional in their character, and are not connected with the every-day duties of life. The things which constitute the sum of duty and enjoyment are little things connected with our ordinary pursuits and daily and hourly intercourse with each other. Considered separately they may appear to be insignificant, but regarded in the aggregate, they exert the most powerful influence upon our own character and happiness, and also upon the character and happiness of others. A second of time is a very little thing, but seconds multiplied constitute the mighty ages. The invisible particles of vapor ascending from the river, lake and sea, are very little things, yet they form the rain that descends in copious showers to refresh and cheer the earth. The rills that murmur through a thousand vales are but little things, yet they constitute the majestic rivers which form the mighty ocean. And so with the little things of life; however trifling they may appear, our happiness and usefulness depend almost exclusively upon them.

In our daily intercourse with each other, in the family and in general society, we can not estimate the effects produced by little acts of kindness, by words of sympathy and encouragement, looks of interest and approval, and by a thousand little attentions expressive of the kindly feeling of the heart. It is these little things that imperceptibly draws us to each other and make sunshine on our pathway. Any one may perform these little acts of kindness, and in so doing become a real philanthropist, and contribute largely to the happiness of others.—*Baptist Weekly.*

HEDGE FENCES.

Osage Orange Said to Be the Most Useful For Ordinary Use.

From time to time some one inquires about the responsibility of certain hedge companies and the merits of hedge fence. This fence question is a "burning" one and needs to be discussed in season and out, much the same as the clover problem. For permanent fence, as along the highway and for division fences, along banks of streams, etc., there is no fence, in my estimation, that equals Osage orange, when properly grown. The great principle that underlies the making of a good hedge, claimed by the hedge companies, is never to bend the canes, but give them the proper inclination (forty-five degrees) beneath the ground. Curving or binding the canes ruins them. I had a mile of this hedge put in for me over seven years ago, so that my opportunities have been good for finding out the easiest ways of doing things and the merit of the fence.

The Osage orange is the best material for permanent fence, along roads, streams and division lines. The wire and picket fence is an excellent one, easily and cheaply made, durable and effective, turning all stock, from a chicken to a bull. With Osage hedge for permanent outside hedge, and wire and picket for fields, it would seem as though we had little to desire in the way of fences.—*Dr. A. T. Johnson, in Ohio Farmer.*

MR. AND MRS. BOWSER.

Mrs. Bowser Objects to Her Husband's Playing Doctor.

Another of Mr. Bowser's hobbies is a family medicine chest. A few days after our marriage he said to me:

"Mrs. Bowser, half the deaths in this world are the result of negligence and carelessness. I shall have a family medicine chest, and I shall write down some directions for you to follow in certain cases. Mrs. Bowser, what would you do in case I had a congestive chill?"

"Send for a doctor, of course."

"Just like a woman, and by the time he got here you would be a widow. I shall begin tomorrow to lay in a stock of family medicines."

He brought up a package of mustard, a box of salve and twelve different brands of pills, and every week since then he has added something to the store. Before I found him out I used to have headaches, a sour stomach, sore throat and other ailments, and was foolish enough to let him know it.

"A headache, eh?" echoed Mr. Bowser, as he softly rubbed his hands and regarded me as a dog does a choice bone. "Very well, Mrs. Bowser. While there are various causes for headache, the most frequent cause is from a disordered stomach."

"This can't be."

"It must be. I shall first give you a dose of sulphur to sweeten your stomach, and will follow it up with a mustard plaster between your shoulders."

"Why, my mother nev"——

"Your mother, Mrs. Bowser, could get up a rag carpet in elegant shape, but what did she know about the ills of the human body? If you are no better after trying these remedies I shall recommend something else."

I refused to accept his remedies, and he waived himself out of the room with:

"Very well, Mrs. Bowser; I wash my hands of the whole affair. If your mulishness leads to your death, don't blame me."

When we got to housekeeping and had servants Mr. Bowser was in his glory. He gave the girls to understand when they engaged that medical attendance would be free, and it meant a great deal more than they thought for. If one of them as much as uttered a groan she was marked for a victim. He would recommend quinine, mustard, ginger, porous plasters, salts, cod liver oil and what not, and the poor things had to get better or quit the house within a week. He frightened some of them half to death by declaring that they had consumption, and others cried all night because he saw the first symptoms of typhoid fever in the corner of their eyes. When I gently remonstrated with him he turned upon me in a ferocious manner and exclaimed:

"Mrs. Bowser, if I can save one of these poor girls from going to the hospital to die a lingering death it is my duty to do so, and your interference simply shows what a cold, cruel hearted creature you are."

We had a cook named Sarah, and Sarah fell down stairs one morning. She was at her work at noon when Mr. Bowser came home, but he rushed into the kitchen and talked to her about internal injuries until she went into hysterics. Then he dosed her until she came to, and when she hesitatingly admitted that she believed she had a pain in her side he sent her to bed for three days and ordered me to attend to her and do the kitchen work in addition.

All the recent troubles in our family have arisen from Mr. Bowser's fell determination to doctor the baby, and from my firm determination that he shouldn't. The little dear was only 2 months old when Bowser sat down by the crib one day, felt of its pulse, raised its eyelids and remarked to me:

"Mrs. Bowser, are you planning the death of this child? If not, why didn't you notify me of its condition?"

"Condition! Does anything ail baby?'

"Humph! I should remark! It must have some blood purifier at once. If it is too late no one but yourself is to blame!"

"The doctor was here only two days ago, and he said baby was getting along splendidly."

"The doctor! Mrs. Bowser, haven't you lived long enough in this world to know that doctors can't be depended on. I shall give young Launcelot some prickly ash tea for his blood."

"You shan't do it! The baby is all right, and you shan't touch him!"

It was awful the way he took on, and he drank two quarts of the stuff himself to spite me.

It was only three days later that I ran down town on an errand, leaving the baby with Maggie. When I got home Mr. Bowser was there, and he had Launcelot laid out on the sewing table, one of his legs bared to the hip, and was experimenting with some newly invented splints.

"You see," he explained to me, "we can't tell what day he may break his leg, and I want to be posted on what to do and how to do it."

Maggie says I hit Mr. Bowser a cuff on the ear as I snatched baby off the table. Perhaps I did. For some reason he hasn't spoken to me since.—Detroit Free Press.

Delightful Muscular Contraction.

Miss Lottie (to Cousin John, trying a galvanic battery for the first time)—How does it affect you, Cousin John?

Cousin John (bashfully)—He! He! It makes me squeeze my hands.—Harper's Bazar.

Knew Him by His Grip.

"Sullivan's in the box," said an excited gentleman at the door of the theater the other night.

"How does he look?" asked another equally excited fellow.

"Fine—splendid. I tell you he looks way up. He's got a dress suit on—a bird coat, dont' you know, an' shirt front an' all the style, an' a white neckktie an' a crush hat, an' patent leather boots—I'm blowed if you'd know it was Sullivan unless you shook hands with him."

Then he began to straighten out his fingers.—San Francisco Chronicle.

An Interesting Man.

"I've become quite interested in that poor man," said a philanthropic old lady to the sheriff, as she pointed to one of the prisoners. "He tells me I would be surprised if I knew all he had gone through."

"I guess you would, mum," said the sheriff; "that fellow is the most expert pickpocket in the country."—Judge.

THE THREE WILLARDS.

Brothers Who Have Grown Rich and Famous in the Hotel Business.

"The Willards" in Washington are three Vermont brothers, Joseph, Henry and Caleb, named in order of their ages. The latter is proprietor of the Ebbitt, worth one or two millions. Henry owns much property and bonds. With Joseph, the elder, he is joint owner of the Willard hotel, which they kept for years. His estate is away up in the millions and growing. Joseph is the richer as well as the elder of the three, and is said to spend much of his time cutting coupons from bonds. He is in no active business. He is a widower, and one son is the only heir. He lives the life of a recluse. If he is not a good lover he is a good hater. He has little to do with mankind in general, albeit he has the appearance of a mild-mannered, benevolent-minded gentleman of sixty-five years. He and Caleb have not spoken for years. Joseph does the hating and Caleb the grinning and bearing. The latter owns a long row of property on F street, beginning with the Ebbitt. Only one strip of twelve feet interrupts his continuous ownership from Thirteenth to Fourteenth street. It is next to the Ebbitt. This strip Joseph owns. Caleb has tried every means to buy it. Joseph holds it solely to spite his brother. It is occupied by a tenantless one-story structure. Not a great while ago a suave, business-like gentleman called upon Joseph and stated that he was looking for a location to establish a candy manufactory. He was impressed with the F street location, and wanted to know if it was in the market. Joseph Willard replied that he would sell if he could get his price. Then his visitor asked the terms. Looking up and catching the business man's eye, he said: "My price is $500,000. You go back to C. C. Willard who sent you here, and tell him that." It is said that Joseph has so fixed it in his will that the property can never fall into Caleb's hands or the hands of his heirs. That he is insane is not suspected. He loves his mother, and makes a daily visit to her in the house of the brother he hates. He and Henry, though not alienated, have little intercourse. There is nothing the matter between Henry and Caleb. The singularity spoken of is lodged specially with Joseph. He dresses neatly, does not seek intercourse with his fellows, and only a few persons have dealings with him. General Boynton has his confidence and is sometimes the medium of communication between him and others in business transactions. He appears to be as happy as any one and attends the church of which he is a member. He is tall and handsome and active. His wife was one of the handsomest women in Washington.

Henry and Caleb are enterprising citizens and loving brothers. Both contribute liberally to benevolent objects, especially to the churches to which they belong.—*Cor. Pittsburgh Times.*

USES OF STRAW.

How It Can Be Made One of the Important Items of Farm Economy.

The value of straw is too little taken into account either on or off the farm. Too many farmers seem to act on the principle that it should be fed to cattle. This is the least important of its uses. Its value as food is so slight that cattle fed exclusively on straw would die about as soon as when fed on any such substance, as dead leaves, for instance, the only use of which is to properly distend the stomach. The feeding use of straw, therefore, is only in connection with concentrated food.

But there are other uses of the straw of cereal grains which render it an important integer in farm economy. One of these is the covering of sheds. Another and the most important is its use as bedding for animals. Another use to which it may be profitably used when cold and winds are severe, is in forming an impervious barrier, by filling a space a foot wide between two rough walls of sheds. These walls may be made of any rough material, as slabs, poles, but near enough together to prevent the pulling out of the straw by the animals. Thus sheds and stables may be rendered as warm as much more costly structures.

The use of straw is too much ignored as a means of comfort used as bedding for animals. Under sheds it should be laid a foot thick, and in the yards not less than six inches. In stables that are regularly cleaned it should be not less than six inches in thickness. Thus it will fully soak up and hold the liquids and retain them while spread on the land to be plowed under. It takes no more material as bedding six inches in thickness than less, for only the soiled portion need be removed. The added value to the animals in conserving warmth is not generally estimated.

It not only keeps animals comfortable, but as manure straw is valuable principally in proportion to the liquid manure it has soaked up. It will pay to use liberally in the directions we have mentioned, and less so as a food in winter than is generally practiced.—*Farm, Field and Stockman.*

Story of a Mad-Stone.

W. R. Sonner, of Fort Worth, Tex., has a mad-stone that has been used over one hundred times and with success. It has a history. In 1818 Captain Wilson, of Alabama, killed a white deer, and, knowing the Indian theory, looked in its stomach, and there found a stone as large as a goose egg that resembled a petrified sponge. This was the mad-stone. The Indian theory is that the white deer is more susceptible to vegetable poisons taken into the stomach when eaten with grass than other animals. To preserve the life of the animal nature has placed in the stomach this porous stone, which absorbs the poison, neutralizes it, and saves the deer's life. The stone, applied to a bite into which poison has been injected, at once draws it out, and when its pores are filled drops off. Being soaked in milk, the stone is made pure again, and ready for another application.—*N. Y. Sun.*

—Nearly $25,000,000 worth of candy was made in California during the past year.

KILLED BY OPIUM.

A Cincinnati Druggist Tells About the Fatal Results of the Drug.

"One of my customers, who, three years ago was a large, vigorous, healthy man, is in his grave to day because of opium, or rather what was in his case, a preparation of opium, morphine. He was a book-keeper in a large manufacturing house, received a big salary, had a pleasant home and a happy family. Three years ago he had an attack of sciatica, which confined him to his home for several weeks, and caused intense suffering, to relieve which his physician administered hypodermic injections of morphine. The effect was instantaneous and delightful. The suffering passed away and instead there came a peaceful calm, an ecstatic condition of mind which was the more pleasurable because vividly contrasted with the days of pain that had gone before. The gentleman continued to use the injections during his illness, and when the disease had been cured he was loth to part with his morphine. One day, however, I gave him a good talking to, explaining that he was committing suicide—that death was inevitable if he continued to use the terrible drug, and at last I got him to promise me that he would give it up. He did quit buying it of me, and I supposed that he had ceased to use it, but for prudential reasons said nothing more about it. In the course of a year my customer, who was a friend also, and for whom I had a high regard, began to waste away—I can not explain it any better. His complexion became sallow, his eyes sunken, his form attenuated, his step got to be feeble and his vitality seemed to have gone. I spoke to him about his emaciated condition on three or four different occasions, begging him to consult his physician, but he always declared that he was feeling all right and that he would soon be looking all right. One evening he came in my store to have a chat with me and I opened out on him with all the persuasion I could command, and I entreated him to either go to his physician or let me give him some tonics. My manner was so serious that it had its effect, but the effect was far different from what I had expected. The poor fellow broke down, and with tears in his eyes made a horrifying confession to me. He told me that he had become a victim to morphine, and that when he tried to quit the use of it a year before he had found it impossible to do so. The confession upset me completely, and I did all that I could then and for weeks after to get my customer to stop using the fearful stuff, but he had got into a morbid condition of mind and body and nothing could save him. About a year after that he died a perfect wreck, and to-day his cold and senseless body lies beneath a beautiful monument in Spring Grove Cemetery, itself covering the hidden monument of clay that warns every one to never touch that horrible drug. Better had my customer suffered the tortures of his disease. His widow and orphans would not to-day be without a protector."

"And yet physicians will go on prescribing morphine?" remarked the newsman.

"Well, the physician who prescribed it for my customer will never give it to any one again."

"It is bound to kill, is it?" asked the newsman.

"In time it will. There is no help for it. The use of narcotics of any kind will undermine the constitution until the victim becomes a wreck and the wreck breaks up. I have a customer now for sulphate of morphine, a lady, and a young lady, too, who was married only two years ago, and who has a fine baby boy. Some time ago she took some sort of a "patent" medicine for neuralgia. There was morphine in the stuff, and she took the medicine long after the neuralgia was cured to procure the dreamy effects of the drug. Then when she discovered what it was that gave the effects she got to taking the morphine itself, and she comes to my store and buys it by the drachm. She knows that she ought not to use it; she knows it is ruining her, but the habit is firmly fastened upon her and she can not shake it off. I warned her long ago, but she said she could not do without her morphine, and so she uses it day after day, always increasing the dose. Her husband does not know of her weakness; it is a secret between her and myself, but within the next three years I know she will die, and that morphine will have caused her death."—*Cincinnati Times-Star.*

WHAT WAR IS?

A Kind of Superstition Encouraged by Kings and Demagogues.

War is a kind of superstition; the parade of arms and badges corrupts the imagination of men. How far more appropriate would be the symbols of an inconsolable grief, muffled drums and melancholy music and arms reversed, the livery of sorrow. When men mourn at funerals for what do they mourn in comparison with the calamities which they hasten with all circumstance of festivity to suffer and to inflict? Visit in imagination the scene of a field of battle or a city taken by assault. Collect we into one group the groans and the distortions of the innumerable dying, the inconsolable grief and horror of their sorrowing friends, the hellish exultation and unnatural drunkenness of destruction of the conquerors, the burning of the harvests, and the obliteration of the traces of cultivation. To this in civil war is to be added the sudden disruption of the bonds of social life, and "father against son." If there never had been war there could never have been tyranny in the world. Tyrants take advantage of the mechanical organizations of the armies to establish and defend their encroachments. It is thus that the mighty advantages of the French revolution have been almost compensated by a succession of tyrants; for demagogues, oligarchies, usurpers and legitimate Kings are merely varieties of the same class from Robespierre to Louis XVIII.—*Shelly's Philosophical Views of Reform.*

—The San Francisco *Chronicle* remarks that it is a great pity that women ever grow up. We didn't know they did grow up. We always laid that to the girls.—*Lowell Courier.*

PRETTY HARD JOB.

A Tramp Fires a Locomotive for an Hour and Then Expresses an Opinion.

"I don't know of a harder-worked man than the locomotive fireman," said an old engineer. "The average man thinks that all the fireman has to do is to ride in the cab and occasionally throw in a stick of wood or a shovelful of coal. The truth is that from the time the fireman leaves his out-going station until he reaches the end of his run it is almost a constant struggle to keep up steam. One cold sleety night, some time ago, a man climbed up into my cab while we were lying on a side-track, and wanted to fire his way to Little Rock, some one hundred and fifty miles distant. My fireman had just been taken ill, and I hailed the appearance of the applicant with pleasure.

"'Did you ever fire?' I asked.

"'No, but I am strong, and know that I can keep the pot boiling. I've walked all the way from St. Louis, and I am about worn out. I don't feel that I can walk another step, especially during such weather as this.'

"'All right.'

"I gave him instructions, and he went to work. The road was in bad condition, and it so happened that we were nearing the heaviest grades on the road. My man, after filling the fire box, said: "Ah, this beats struggling along in the mud and sleet. I'd like to get a steady job of this sort.'

"'Fire up,' I said.

"'I've filled her up.'

"'Fill her up again!'

"'What!'

"He filled the fire-box, seeming surprised as he did so, and then remarking that he would take a nap, stepped back and lay down. A minute later I called him.

"'What's the matter?' he asked.

"'Fire up,' I said.

"'You're joking.'

"'Hurry up. This is no joking matter.'

"He filled up the box again, sat down, and dozed off to sleep.

"'Fire up,' I called.

"He got up, looked in the fire-box and asked:

"'How far have we come since I got on?'

"'About fifteen miles.'

"'How far do you go before you stop again?'

"'I don't know. Forty miles, probably.'

"'Will you do me a favor?'

"'What is it?'

"'Slow up so I can jump off.'

"'My gracious, man, you don't want to get off here. There are no houses along here and you'll freeze to death, besides, the ground is so slick you can't walk. Don't get off.'

"'I'm much obliged for your advice, but I don't want to die this way. I don't mind working in a coal mine and can stand it to pitch cord-wood all day, but I don't propose to shovel my life into that infernal suck hole. Well, so long,' and before I could detain him he had jumped off. Two days later, while I was on my return trip—while we were receiving freight at a station—up came my friend.

"'Hello, cap'n,' said he.

"'How are you?'

"'Oh, I've been doing first-rate since I got out of the railroad business. Used to fire an engine, you know.'

"'Say, didn't you regret getting off that night?'

"'Regret!' he exlaimed, in astonishment, 'why, I had nothing to regret. I pulled up the grades without having to wear myself out firing, and I could lie down under a tree and take a nap without having some one grab me and tell me to snatch up a shovel and commit suicide. I'm sorry for you,' nodding at the fireman. 'I'm sorry that you've got to wear yourself out that way. Let me give you the advice of an experienced man. Get off and walk.'"—*Arkansaw Traveler.*

STORY OF A UNIFORM.

How Mr. Ward Received the Pigtailed Officials of China.

The conversation here drifted to diplomatic etiquette, and I asked Mr. Ward how he got over the dress-coat question when he was our Minister to China. He replied: "At the time I was in China the ordinary dress of the American citizen would hardly have been a fit one in which to have appeared on a State occasion. The Chinese knew little about the Americans at that time, and it was perhaps more necessary to create a good impression there than at other places where our diplomatic relations had long been established. For several decades I have been the Captain of the Chatham Artillery, a little company in a New Jersey village. I was Captain of it at this time, and I had a Captain's uniform, a part of which was a dress coat with military lace on the sleeves, and with brass buttons upon which were the letters C. A., meaning the Chatham Artillery. On my way to China I stopped at Paris, and had the military lace taken off and diplomatic lace put on. This coat was buttoned up close at the throat, and on the whole was not a bad looking uniform. In China I wore it upon all State occasions, and it was generally admired. The Chinese often asked me what the letters 'C. A., stood for. I replied that the suit was meant as an honor to China, and that these letters stood for China and America, and in order to show how much our country thought of China we had honored her by putting the C. before the A. This explanation was taken in good faith, and the uniform was a success."—*Cor. Cleveland Leader.*

—Speaking of gaining and holding popular favor, "I know, said Christine Nilsson, "of only one talisman—will."

A Fair in Ancient Rome.

"Good day, Servius. I suppose I shall see thee at the temple to-night?"

"At what temple, noble Lucius?" asked the young Roman, gazing inquiringly into the face of his companion, an aged and gray bearded veteran of many wars.

"How now, boy!" exclaimed the old man. "Hast thou not heard of the fruit and floral festival under the charge of the Ladies' Aid society at the temple of the Feretrian Jupiter on the Capitoline?"

The youth shuddered.

"I had forgotten, good Lucius," he said. "One of the priests had received a call elsewhere, and this festival is for the purpose of raising funds to increase his meagre salary, and thereby induce him to remain. Am I not right?"

"Yes, thou art, O Servius."

"I shall not be there. I attended one entertainment of this sort some time ago. I had six scrupuli in my possession when I went in, but when I departed I had not so much as a sestertius."

"Nay, nay, my boy," interposed the old man, "this parsimony becomes thee not. It costs but one denarius to enter——"

"But what does it cost to get out?" moodily muttered the youth.

"In the temple," continued Lucius, "thou wilt find a large and attractive assortment of fancy goods and toilet articles at prices far below their market value, for they have been donated by various tradesmen and artificers."

"But is it not taking an unfair advantage of these same tradesmen and artificers," said the young man, "to sell their goods at prices less than their value?"

"Thou art too scrupulous," said Lucius, angrily. "But, by Jupiter, I will persuade thee yet. Know, then, that the fair Tullia will have charge of a table. Ha! thou changest color, boy!"

"Listen, my Lucius," cried the youth, "and thou shalt know my secret. It is my purpose to espouse the maiden whom thou hast named. It, therefore, behooveth me to guard well the goods which the gods have bestowed upon me. Were I to visit the fair I should be despoiled of all, and my hope of wedding Tullia put forever to flight."

"Nay, Servius, thou wrongest them, and by the gods I will prove it too thee, if thou wilt but go with me to the temple. Why, boy, a golden lyre of the most exquisite workmanship and worth 100 scrupuli is to be drawn for, and the tickets are but a sestertius each. Who knows but the gods will bestow this treasure upon thee?"

"Enough, O Lucius," said the youth. "I will visit the fair, but I shall remain only a short time."

"Thou hast decided wisely, Servius. And now I must away; I'll see thee later."

That evening young Servius donned his dress toga and a pair of red sandals and hastened to the temple of the Feretrian Jupiter. With his pleasurable anticipations was mingled a vague presentiment of evil, which he found it impossible to banish. He was warmly welcomed by all, including the fair Tullia, who, when the first greetings had been exchanged said:

"Servius, you see yonder statue of Minerva; it is to be given to the priest who receives the largest number of votes. How many shall I put you down for?"

"Five," replied the youth, with a sinking heart. "What is the cost?"

"Ten sestertii each."

The youth handed her a treble scrupulum and waited for his change. When he got tired of waiting he walked moodily away and was immediately captured by a noble Roman matron, who did not release him until she had sold him an embroidered toga three sizes too large for him, and various other more or less useful articles. And so it went, until at last Servius had spent all his ready money and given notes for what he had at home. But one hope sustained him: he might draw the golden lyre, which he could sell for 100 scrupuli. His ticket was numbered cxviii, and he fancied that it had a lucky look.

Finally the hour of the drawing arrived. The tickets were all placed in a helmet, and the infant child of Lucius thrust in her hand and took one out.

No. cxviii, announced the priest. "Young Servius has drawn the prize." Servius' melancholy was now changed to joy; but while he was indulging in manifestations of glee he was approached by Tullia, who said:

"Thou knowest, I suppose, Servius, that it has been generally expected that whoever drew the lyre would donate it immediately to the temple. It would be very bad form not to do so."

"Take it, then," exclaimed Servius, as with a gesture of despair he rushed from the temple.

A few minutes later he was found lying dead just outside the door. He had fallen upon his own sword, and had perished instantly. The next week his goods were sold to discharge his indebtedness to the Ladies' Aid society.—Tid Bits.

Away with the Bird Trimmings.

A HAT DESIGN FOR A YOUNG MOTHER.
—Fliegende Blaetter.

The Smallest Part of It.

Mr. Greathead (sententiously)—My dear, family government is the base of our whole social and political fabric. It must be like the pyramids of Egypt, solid and enduring, or the whole structure will topple to ruin. The family must have a head, and necessity and tradition have made the husband and father occupy that position.

Mrs. G. (slyly)—Yes! And very properly too. I believe the head of a pyramid is the very smallest part about it, isn't it, my love.—Chicago Ledger.

A Dreaded Firework.

"You shall not make fireworks in my house," said an irate red nosed parent to his 10-year-old boy. "I am exceedingly angry at your having bought this quantity of gunpowder, and I will set my face against it." "Oh, please don't, pa!" said the trembling boy, with tears in his eyes, "or we shall both be blown to blue blazes." Shr'll cries!—Judge.

AN OCCULT SCIENCE.

Remarkable Experience of a Man Who Read His Fate From His Hands.

For many years past I have been a firm believer in the truth of palmistry, but I recently made an experiment which has shaken my faith in the art of hand-reading, in a measure. For the benefit of the public, I have kindly consented to relate my experience so that the matter may be satisfactorily explained, if such a thing be possible. There are a few slight contradictions in the result my experiment brought out, which I am somehow unable to reconcile. I will therefore give my readers an opportunity to see what they can do to restore the lost harmony.

A few days ago, after attending a lecture upon hand-reading, by Prof. A. Stork-Edward, the famous British *savant*, at Pickering Hall, I bought a book containing a key to all the lines of the hand, defining them and describing their significance for weal or for woe. I then made an exact chart of the lines of my hand, showing the precise location of each lump on my palm, and all the other distinguished characteristics of its surface. Then I consulted the book with the following extraordinary result:

I am nervous and sensitive.

I have a phlegmatic temperament, and my feelings can never be hurt.

I shall live to be ninety-seven years of age, six months and five days.

I shall die before I am forty from cholera infantum.

I shall marry a rich woman when I am twenty-one.

I shall be the mother of twins.

My husband will have red hair and a wooden arm. He will not be rich, but my eldest daughter will marry a rich Italian nobleman.

I shall never be a parent, but my wife will be a widow with eight fatherless children.

I shall never marry, but my second cousin James will go out West and be a Mormon.

I have no second cousin James, but if I persevere in living, I may have one before I die.

I am best fitted for the ministry or for bank-burgling, and will make a great success at either.

I am very talkative, but as I never say any thing of importance, I need not worry about this symptom.

I shall never be President of the United States, but the Czar has it in his mind to make me Prince of Bulgaria. I had better not accept the position, though, because the trident on the Mount of Jupiter warns me that I would suffer from cold feet, if I ever became Prince of Bulgaria.

I shall always be rich.

My will will be contested by a lawyer with one glass-eye, and a sallow complexion. I need not worry about that, though, for he will not win the case.

I shall die in a poor-house and intestate.

I shall be drowned in the Arctic Ocean while I am traveling there to see my daughter, who has eloped with an Eskimo seal-hunter.

This is all.

Do you blame me, gentle reader, for being suspicious?

Can you reconcile the contradictions?

If you can, you have my best wishes.—*Benjamin Northrop in Pack.*

AN INFANT IDEA.

Little Ethel's Graphic Description of a Regulation Society Lady.

"Mamma, I think I will be fashionable," quothed the youngest daughter of a society woman.

"In what way, Ethel?"

"Oh, in the usual way."

"Do you know what constitutes a fashionable life?"

"Oh, yes, mamma. I shall just go to a lot of luncheons and receptions in the daytime and eat a whole lot of stuff that does not agree with me. Then in the evening I shall dress as immodestly as possible and go to a ball and hop around a room until I get all tired out. Then I'll eat a lot more stuff that does not agree with me and hop around some more. About two o'clock, when I'm very warm, I'll throw a little wrap over my shoulders and come home. In the morning I'll have breakfast served in bed, and spend the day on the sofa telling my friends what a lovely time I had, and wondering what I have done that should give me a headache and a bad cold. After a year or two I will get pneumonia or consumption, and wonder how I got it. Oh, I know how to be fashionable."

And then the mother went off and thought very hard.—*Chicago Rambler.*

The Chestnut Didn't Work.

A young man with an expression of confidence on his face entered a Michigan avenue clothing-store yesterday and asked:

"I am straight business. I want a suit of clothes. There are seven of us who will buy our clothes at the same place. I have been sent on ahead to get prices."

"Humph!"

"If I bring the other six here to buy what will you make this $20 suit for?"

The clothier went over and sat down by the stove with a disgusted look on his face.

"You didn't answer my question."

"My frendt, please go oudt. You make me werry tired!"

"What's the matter with you? Don't you want me to bring the party here?"

"No, my frendt, I don't. All my sales to-day goes to an orphan asylum, and I like to keep 'em down to a summer coat and a pair of second-hand pants! Better try der man two door below."—*Detroit Free Press.*

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and reference.

Public Notice

It is hereby given that unless the above taxes and costs are paid I will on

Monday the 28rd Day of February, 1887,

Between the hours of 9 o'clock A. M. and 4 o'clock P. M., to wit, at the hour of 10 o'clock A. M., commence to sell the above described real property at public auction in front of the Court House, in the town of Independence, County of Inyo, State of California, and that I will continue such sale from day to day according to adjournments until the whole real property above described, or so much thereof as may be necessary, shall be sold, and that I will sell the smallest quantity of each assessment of said property that will be taken by any person for the amount of said taxes and costs, in gold or silver coin of the United States.

Dated this 4th day of February, A. D. 1887.

S. G. GREGG,
Tax-Collector of Inyo County, California.
By R. C. SPEAR, Deputy.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE,
BODIE, CAL. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the north-east corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 56 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" on the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 6 degrees 26 minutes E. distant thirty-six chains; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3 being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D J, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 53; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground on the top of which is securely fastened a brass plate marked "N. S. E. W. S. E M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 49 minutes E. Telescope Peak bears S. 29 degrees 45 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 412 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat platted notes and other papers on file in the U. S Land Office at Bodie, Mono county California for a further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE,
BODIE, CALIFORNIA, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 56 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C.D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67," thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 66 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty-nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. E. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, FEBRUARY 26.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Mr. J. G. Birchim, of Round Valley, was at Independence a few days this week.

Miss Minnie Lasky and Miss Blanche Meysan, of Lone Pine, were at Independence last Wednesday.

Mr. F. W. Hicks was at Independence a few days this week. Mr. Hicks owns a saw mill near Bishop Creek.

A child is surely deserving of training as much as a flower or a vine or fruit tree; send the little ones to Sunday school.

Enormous losses of cattle are reported on the cattle ranges, the cattle perishing by thousands in the recent heavy snow storms.

August Schnoke and Heinrich Ehlers arrived at Independence from Ventura last Thursday. They will locate land and settle here.

Last Monday night about half an inch of snow fell at Independence, making the total snowfall for the season about two and a half or three inches.

Mr. Ford, the music teacher, came down from Bishop Creek to Independence this week and with the young men of the town organized a brass band.

The broken arm of John L. Sullivan is all right again, and the champion is about ready to resume punching Boston "culchа" into any heads that offer.

After an interval of a whole week the first mail from San Francisco was received at Independence and other post offices in the county last Monday. The delay was caused by snow blockade on the Central Pacific railroad.

A bill has passed the Legislature providing for two more Superior Judges for Los Angeles county. This will give some idea of the extraordinary growth of the county in population. A. W. Hutton and and K. R. S. O'Melveny have been appointed to fill the office for the first term.

Mrs. Clark, of Marysville, has bought a place near Bishop Station. She has gone back to her former home to prepare for moving to her new home, and will return here in a short time. In all probability she will be accompanied by a few friends with their families.

The Senate of Nevada has committed the very great folly—might it not be called crime?—of passing a bill for the establishment of a State lottery. Nothing could more certainly work the utter ruin of the young than a law to foster gambling, and such a law is this. Should this bad bill become a law fathers and mothers will curse its authors and every man who voted for it, and the Governor who signed it.

Palmer & Rey, of San Francisco, have issued a new specimen book. The latest improvements and most beautiful designs in type are represented in the book. Every variety of type that can be needed in book, job, or newspaper printing may be selected from this book and can be ordered by reference to numbers as well as if the purchaser should go to San Francisco.

We notice by the Sacramento papers that Weinstock & Lubin, the well known Dry Goods and Clothing house of that city are making extensive improvements in their store, one of the new features being two thirty feet plate glass windows.

They have also purchased the adjacent property for the accommodation of their out of town mail order business, which is said to be many times the largest of its kind on the coast.

Even in bondholding England there are many who favor silver coinage. A London dispatch to the *Enterprise* of last Friday says:

"An influential meeting at Leicester this evening indorsed the action of the silver party at Washington, unanimously adopted a resolution declaring that nothing short of the free coinage of silver would support prices in the interest of the laboring classes, and that the influence exerted by Beck, Jones, Teller, Weaver and Bland was of the utmost importance."

The New York *World* of recent date published a long article urging the nomination of William T. Coleman, of San Francisco, as the Democratic candidate for the Presidency. It is too much to hope that a man so well qualified for the office as Mr. Coleman could be nominated. His knowledge of the world and decision of character, and his sterling honesty, make him a man that party bosses could not control; for this reason they will oppose his nomination. Nevertheless it is gratifying to Californians to find that the merit of our fellow citizen is recognized in the East.

Society must protect itself against the murderous wretches who attempt the wholesale destruction of human life by dynamite. Hodges, who exploded a mass of dynamite in San Francisco, in a building containing hundreds of human beings, many of them women, should be put out of life with as little hesitation as a mad dog. It would be in the interest of civilization to provide by law for the use of the surgeons knife upon all criminals convicted of such crimes as highway robbery, burglary, criminal assault upon women, and so forth, and thus effectually check the propagation of criminals. It has long since been proved that criminals beget criminals: this is the meaning of the passage of scripture which says that the sins of the fathers shall be visited upon the children, even to the third and fourth generation. The one thorough remedy is to stop criminals from becoming fathers.

The present Legislature would appear to be the most extravagant and wasteful of public money the State has had in many years. Great sums are wasted on an army of useless hangers on; the members run to and fro over the State at public expense, without learning anything useful or doing anything good, and much time appears to be wasted in senseless horse play in the House, the members acting more like school boys in the absence of the master than like men met for earnest work. A few schemers appear to manage both branches of the Legislature, many of the members in either House being too ignorant and stupid to know that they are being so managed; they are bought and sold like animals in a market without having the least idea that they are being put up for sale, or receiving a cent for voting against the interest of their constituents. They are corrupt through ignorance more than through avarice.

ROUGH TRIP.

Nearly Died in the Snow.

One day last week Mike Lasky started from the Keynot mine to go to Lone Pine. Part of his way lay across the summit of the Inyo mountains; he is quite familiar with the way, but as the snow is deep on the summit a man accompanied him from the mine a short distance over the ridge; here they parted, the man went back to the mine and Mike pushed on down the mountain. The snow was deeper on the west side than on the east, and soon Mike was floundering through where it was as high as his shoulders. The toil was very severe and in a short time he was taken with "snow cramp"; he laid down and rolled about in great agony for some time, till the pain abated and he was able to go ahead again. The trail is excessively steep, and as this was in his favor a short distance brought him down where the snow was not so deep; progress was then more rapid and easy and soon he got out of the snow entirely. He got to Lone Pine before dark thoroughly tired out, but otherwise not any the worse. There is now more snow in the Inyo mountains than for several years past.

Reduced Salari s Accepted.

Part of the county officers of Mono accept the low salaries without question. The *Chronicle-Union* says: "Monday last was the first pay day of our new officers, and County Clerk Kister was the first to draw his monthly installment under the Act of 1885, and known here as the "Low Salary Bill." Sheriff Morgan, District Attorney Virden and Treasurer Tinkum also drew theirs under that Act, thus standing by the Republican pledge of "low salaries and reform." None of the other officers have drawn their salaries. Our new officials attend strictly to business; nothing is put off that should be done at once, and the business of the county is being done as economically as possible. The Board of Supervisors approved the sale of county bonds to the amount of $35,000, to run 20 years at 5 per cent. interest, the county having the right to pay them at at any time it sees fit to do so. The money is to be used to take up the old 7 per cent. bonds.

New Edition Settler's Guide.

Henry N. Copp, the land and pension lawyer of Washington, has just issued the twelfth edition of his Settler's Guide. It is an indispensable book for all who are, or expect to be, interested in public land. Settlers will save money by purchasing it, and all who expect to take up land should get posted on the several laws under which land can be entered. A chapter, illustrated with numerous cuts, shows how to tell township, section and quarter-section corners, and explains the system of surveys. It gives Commissioner Sparks' orders and late decisions and instructions, and full information about the homestead, pre-emption, timber culture, desert land, and other laws. The price of the book is only 25 cents.

Beautiful Work.

Anyone who finds pleasure in looking at beautiful house painting will be gratified by calling at the new building of Mr. J. C. Irwin, on Main street. The work is not merely mechanical, but is truly artistic. The various shades, lines and curves in the grain of walnut, ash and other hard woods are represented with the closest fidelity to nature. Graining, as done by the average house painter, is little better than daubing on splashes and streaks of different shades; but this work done by Mr. Nelligan is as truly art as if the subject had been a piece of landscape. No one can do such work unless born with a natural taste for art. Some of the panels in Mr. Irwin's place are as truly pictures as if done on canvas, put in expensive frames and exhibited in an art gallery.

Conceit Versus Selfishness.

Self conceit is a weakness; selfishness is a vice. A vain person may be laughed at, yet liked; a selfish person must be hated. A selfish person seeks gratification utterly regardless of how others may be made to suffer; a vain person may be distinguished for self-denying kindness. A self conceited person may develop into a noble character; a selfish person is far more likely to sink to the lowest depth of degradation; the one may become a saint or hero, the other is almost certain to become a demon. The existence of selfishness in a creature who can reason is a strong proof of the existence of hell; only eternal misery is sufficient punishment for selfishness.

Why So Silent.

Some ten days ago the members of the Independence Base Ball Club mailed a challenge to the Bishop Creek Base Ball Club to play a match game at Independence on the 5th proximo for $200 a side, and in the event the Bishop Creekers should lose they would allow them $50 toward paying their expenses. No answer has yet been made, nor any reason given for its non-acceptance. This challenge proves that the Independence boys are not afraid of Bishops skill, but on the other hand, are only too anxious to meet them and test same.

Golden Star Mine.

Further sinking in the shaft of the Golden Star mine has been postponed for the present. At a depth of about 230 feet quite a strong flow of water was encountered, and Mr. Paterson then stopped sinking and is now drifting in ledge matter. No regret is caused by finding the water, or the contrary it is quite welcome, and is regarded as a very favorable indication of a good ore body.

Mexican Veterans Pensioned.

Congress has passed a bill granting pensions to Mexican Veterans. Eight dollars per month will be paid to all officers and enlisted men who served sixty days in the United States Army in Mexico, or on the coasts or frontiers of Mexico, or were on the way there during the war with that country. The widows of all such officers and men are also to receive the pension, provided they have not married again.

Possibilities for Inyo.

The area of the State of Rhode Island is 1,085 square miles, and its population is about 276,500. The land in Owens valley that would produce heavy crops of all kinds of grain, alfalfa, grasses, vegetables, fruits of the finest kinds and the choicest wines and raisins is of greater area than the whole State of Rhode Island. Inyo county has a big future before it.

Cheap Land.

One thousand acres of choice land for sale. No better grain or grass land in the State. An abundance of water at all times; a perfectly healthy location; title without a flaw. Five hundred acres or over, twenty dollars per acre; small lots, forty acres or more, thirty dollars per acre. Apply to the office of the INYO INDEPENDENT.

Be Careful.

Mining prospectors should give particular attention to a recent decision of the Supreme Court. By this decision it becomes necessary to mark by some monuments easily seen, the sides as well as the ends of a mining location. If this is not done another locator may locate a claim running across the first, and if the second locator is careful to mark the sides as well as the ends of his location, the law will make his title good, no matter how the first claim may be cut up. It is necessary to explore a ledge with a good deal of care, in order to be sure that its boundaries, sides as well as ends, may be clearly marked; inability or ignorance on the part of the prospector to do this will not be any excuse for failure.

Unexpected Recovery.

For a year or so past Mr. A. Goodrich, of Round Valley, had been ailing. He got gradually worse, till at last his friends despaired of his recovery, though everything they could do for him was done, and he was under constant medical treatment. About five weeks ago he was brought to Independence and put in care of Doctor Woodin. The treatment adopted brought about a speedy change for the better, and the recovery of Mr. Goodrich was so steady and rapid that last Wednesday he was able to leave for home, in company with his neighbor Mr. J. G. Birchim, who came down from Round Valley to take him back. All who know Mr. Goodrich and were fully informed of his condition when put under the care of Doctor Woodin, will be a good deal surprised that he recovered at all, not to speak of his recovery and restored strength being so complete as it is.

Meteorological Summary for January, 1887, Keeler, Cal.

Mean actual barometer.....26.393 inches.
Mean temperature .....43°
Highest temperature Jan. 15th.....64°
Lowest temperature Jan. 10th.....25°
Absolute range of temperature.....39°
Mean relative humidity 46 per cent.
Prevailing direction of wind S. W.
Maximum velocity of wind, direction and date 35 miles N. W. 27th.
Mean Cloudiness 19 per cent.
Precipitation 0.00
Number of clear days..... 22
Number of fair days 8
Number of cloudy days..... 1
Number of rainy days..... 0
Frosts occurred as follows:
Killing, 2, 7, 9, 14, 17, 20, 21.
Light, 1, 18, 26.

D. C. GRUNOW,
Observer, Sig. Corps, U. S. A.

An Opening for Good Settlers.

During his recent visit to Los Angeles Mr. James R. Moffett became convinced that if a live representative from Owens valley were in that city, who would truthfully represent the country, a large number of men who have five or six thousand dollars to invest would come here to settle. Land is now so high priced in Los Angeles county that only those can afford to buy who are not obliged to have any return from their investment. The man who has but a few thousand dollars and must make a living from the investment, cannot buy land in Los Angeles. These are the very men who are needed in Owens valley, and the cheap and fertile lands here afford such opportunities for homes as cannot be found elsewhere in the State. The prices of all kinds of farm produce, hay excepted, are better here than in Los Angeles, while land can be bought here for twenty dollars per acre, the like of which in Los Angeles county would be eagerly snapped up if offered at three to five hundred dollars per acre.

Something More Needed.

The bill for the creation of our new agricultural district is still in the Senate. Without something more than is provided for in the bill it will matter but little to the people of Alpine, Mono and Inyo counties if it never leaves there. During six years these counties have formed part of districts in which the fairs were held west of the mountains. Of course we got no benefit from the fairs, nor from the funds appropriated by the Legislature for their support; it is impossible that we ever could get any benefit from them, yet we are taxed for their support, and will continue to be so taxed, even should our new district be established. This bill contains no provision for an appropriation for the new district and without this it is useless. We don't need the bare consent of the Legislature to hold fairs, we can do this already. In the general appropriation bill an item might be inserted for a sum for the new district, but there is strong probability that such an item would be stricken out on the final passage of the bill, and in any event this would not be the proper place for it. The original bill for the creation of the district fairs—passed in 1880—provided for an appropriation for each district; the new bill should have been formed in the same way. It may now be too late to remedy the defect. The vast area of California east of the mountains does not get one dollar from the State outside of the School Fund.

Our Friends.

They Want to Help Us

The State Immigration Association, of San Francisco, is composed of many of the best known men and leading capitalists of the City. The Association is doing service to the State of incalculable value, and nearly the whole expense is borne by the members themselves, who contribute liberally for the public good. In the work of the Association Inyo county is not overlooked. It will be remembered that some samples from the display made at Bishop Creek last fall were sent to the Association. In reference to this the Secretary writes as follows:

DEAR SIR:—Some time ago you promised us a lot of printed matter, descriptive of your county, its resources, lands, etc., to enable us to send such out with our mail, but we have not heard from you since. Please do all you can for getting up a circular or pamphlet very soon, as people seeing the Inyo exhibit at our office, always desire to learn more about the county. We can distribute to your advantage from 1,000 to 20,000 copies.

Respectfully yours,
C. H. STREET, Sec.

A pamphlet on the resources of the county was published last spring and fifteen hundred copies were distributed. For a small sum another edition of the pamphlet could be printed and published. It is now plain, even to the dullest intelligence, that the cost of the first edition was money well spent. Other counties are spending money by the tens of thousands of dollars in advertising their resources, and keen business men find their money so spent a good investment. We ought to do a little to help ourselves when such an influential body as the State Immigration Association is asking a chance to help us.

The State apportionment of school money for each child of school age is five dollars and eighty-eight cents.

Mr. James R. Moffet returned home last week after an absence of four months in Los Angeles and San Diego counties. They were accompanied by Mr. W. D. Aiken, the father of Mrs. Moffet, who will stay a few weeks. Mr. Aiken has been engaged in mercantile business at Guaymas, Mexico, during the past sixteen years.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address

JAMES HINES,
Independence.

We Tell You Plainly

that Simmons Liver Regulator will rid you of Dyspepsia, Headache, Constipation, and Billiousness. It will break up chills and fever and prevent their return, and is a complete antidote for all malarial poison—yet entirely free from quinine or calomel. Try it and you will be astonished at the good results of the genuine Simmons Liver Regulator, prepared by J. H. Zeilin & Co.

MISCELLANEOUS

How's Your Liver?

Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.

NEVER BEEN DISAPPOINTED.

As a general family remedy for Dyspepsia, Torpid Liver, Constipation, etc., I hardly ever use anything else, and have never been disappointed in the effect produced; it seems to be almost a perfect cure for all diseases of the Stomach and Bowels.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, STOUTSAN, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, Ill., writes: "You ask what I think of the Washer I bought last summer. Pat. It is the best machine ever invented by man. Pat. We have just as good dinners on Monday as on any other day. Pat. If you run short, you can not buy ours for $1000."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

Secure A Homestead For Your Family.

CALIFORNIA.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

International Immigrant Union,

STEALING A COAT OF ARMS.

What Makes up the Library of a Carriagemaker and How it is Used.

It is not generally known, but it is nevertheless a fact that every large carriage manufacturing establishment in this country has a library. The work of only two authors are in this library and these are the production of Mr. Burke and Mr. Lodge. "Burke's Peerage and Baronetage," Lodge's book of the same title and "Burke's General Armory" are all that is needed, but they are indispensable.

A man on whom fortune has smiled is having a carriage built. It is to be a heavy lumbering affair and guaranteed to have a look of ancient respectability about it before it comes out of the shop. Now he, sensible man, had intended to have his cipher on the panels but the ladies of the family are more ambitious and keep at him until, in a moment of weakness, he consents to decorate his family carriage with a coat of arms. The next question is how to get one. Heretofore he and his ancestors have struggled along without armorial bearings and never especially felt the need of them. But now things are changed. If he lived in Brazil he would endow a hospital and the emperor would make him a baron with a coat of arms of great complexity. If he were an Englishman he might do a hundred things less expensive and get a pedigree and coat of arms from the College of Heralds and write Sir before his name.

But being an American there is no way for him to get a coat of arms except to steal it, and so the respectable old gentleman is driven to the first theft of his life. The New York College of Heraldry being no longer in existence, he confides in the carriage manufacturer. The carriage man brings out his library and in the seclusion of his private office the coat of arms of some more or less noble lord is appropriated, to be subsequently transferred to the rich man's family coach. These people are rather particular about their arms when they once get started in the selection. Say, for instance, that the man who wants a coat of arms is named Smith. The carriage man opens his heraldic record and reads: "Smith, Edward Augustus Patrick Peter, First Baronet of Mudtowne, County Kerry, Ireland." "No, no," says the rich man. "Our family are English by descent."

A few more pages are turned over and then under a menagerie of heraldic animals the carriage manufacturer reads: "Billingsgate, Marquis of (Smith Fitz Plantagenet), James Augustus Douglas George, Marquis and Earl, Baron Smith of County of York. The marquis assumed in 1876 by royal license the additional surname of Fitz Plantagenet for himself and his issue and quartered the Plantagenet arms with his own."

"Ah! that must be the one," says the seeker after a coat of arms. "I have heard that our family came from Yorkshire."

And so the arms of the Marquis of Billingsgate blaze on the panels of the new carriage when it rolls along the avenue.

Appropriators of coats of arms would make themselves less absurd if they would read a rudimentary book on heraldry before they made the appropriation. For instance, Mr. Smith, in appropriating the coat of arms of the "Most Honorable the Marquis of Billingsgate," takes not only the arms of Smith but the arms of Fitz Plantagenet and likewise the supporters which can only be used by a peer of the realm. He surmounts the whole with the cap and coronet of a marquis and any one versed in such matters would suppose that a peer was riding in the carriage instead of plain Mr. Smith. Now if Mr. Smith did really belong to the family of the marquis, as he did not, he would be entitled only to the arms for Smith without the coronet, the supporters or the motto.—New York Tribune.

Curious Experience in the Courts.

"An old woman called on me to-day," said an old lawyer to a reporter, "who had a curious experience in the courts a good many years ago. Her husband and his relatives made an exchange of some farms, and with the carelessness usual to people who trusted each other in that day no deed was made at the time, although it was intended that one should be made. Her husband died suddenly, and afterward an attempt was made to take the farm from her by a suit in ejectment. She could show no papers to show her title, but gave a plain, straightforward statement of her case in a manner that convinced every one that she had a moral if not a legal right to hold the property. Judge Greer, who was then on the bench, was not sentimental and charged the jury in favor of the plaintiff, according to the strict rules of the law. To his surprise the jury brought in a verdict in favor of the defendant. Judge Greer ordered a new trial immediately. When the case came up again substantially the same testimony was presented and the jury again brought in a verdict for the defendant.

"I want you to understand," said Judge Greer to the jury, "that it takes thirteen men in this court to steal a man's farm," and he directed that the case be again put down for trial. When, in the course of time, it was called, Judge Greer asked the defendant's attorneys what they proposed to prove, and when they outlined simply what had been presented before, he refused to let them examine their witnesses, and ordered a verdict for the plaintiff. The case was appealed to the supreme court, and was reversed and sent back for trial by reason of Judge Greer's refusal. When it came up for trial again Judge Hampton was on the bench, and although he ruled just as Judge Greer had during the past trials, the jury found for the defendant. A new trial was again ordered, but it never came up, and the widow now lives in peaceable possession of the farm, having acquired a legal title by reason of adverse possession. It is one of the most remarkable assertions of power on the part of a jury that ever occurred in this state."—Pittsburg Press.

An Instance of False Economy.

I met a woman on the street the other evening. It was raining and there was a blustering wind abroad that made progress a difficult thing.

"Going to the train?" said I.

"I wish I was," said she, "but I am afraid I will lose it. I have to go around for my sugar."

"Why don't you buy your sugar in the store you pass to go to the depot?" queried I.

"O, I can get it half a cent cheaper at So-and-So's," replied she.

I passed on, musing. If that woman buys ten pounds of sugar, thought I, she will save 5 cents but she will lose her train, get a late supper and perhaps consequent indigestion. She will certainly wear out a cent's worth of shoe leather in the wet and slushy streets, and she will get cold and lose her temper with rain and horrible wind. Is it true economy to take such a course? Would it not be better to let the 5 cents go and cancel it with the gain in peace of mind and general comfort? Don't you know that there are hosts of people who manage in this way? They will chase all over the earth to save a penny and get a poor bargain at last. They are always flying to auctions or cheap stores for special sales and expect to purchase sealskin gloves for a quarter or genuine diamonds at the price of imitation. Such people tire me easily.—"Amber" in Chicago Journal.

The greatest strawberry shipping place on this continent is Norfolk, Va. A farm of 440 acres near that city is the largest one in the world.

The Largest Farm in the World.

In the extreme southwest corner of Louisiana lies the largest producing farm in the world. It runs 100 miles north and south and twenty-five miles east and west, and is owned and operated by a syndicate of northern capitalists. Their general manager, J. B. Watkins, gives an interesting account of this gigantic plantation, which throws the great Dalrymple farm of Dakota into the shade completely. He was cornered by a reporter at the St. James hotel last night and asked to give the particulars of his gigantic enterprise. "The million and a half acres of land in our tract," Mr. Watkins said, "was purchased in 1883 from the sate of Louisiana and from the United States government. At that time it was a vast grazing land for the cattle of the few dealers of the neighborhood. When I took possession I found over 30,000 head of half wild horses and cattle. My first work was to divide the immense tract into convenient pastures, establishing stations on ranches every six miles. The fencing alone cost in the neighborhood of $50,000. The land I found to be best adapted to rice, sugar, corn and cotton.

"All our cultivating, ditching, etc., is done by steam power. We take a tract, say half a mile wide for instance, and place an engine at each side. These engines are portable and operate a cable attached to four plows, and under this arrangement we are enabled to plow thirty acres a day with only the labor of three men. Our harrowing, planting and other cultivating is done in like manner. In fact there is not a draught horse on the entire place. We have, of course, horses for the herders of cattle, of which we now have 16,000 head. The Southern Pacific railroad runs for thirty-six miles through our farm. We have three steamboats operating on the waters of our own estate, upon which there are 300 miles of navigable waters. We have an ice factory, a bank, a shipyard and a rice mill."—Missouri Republican.

Ready Cooked Sunday Meals.

The commonest sight of early Sunday morning in the cheaper quarters of an English city is the people carrying their dinners to the bakers to be cooked in their ovens. When the last batch of bread is drawn the ovens are filled with joints and poultry, which are delivered, at a moderate price, piping hot for the table. Years ago, in smaller communities, the practice was observed here, but I never encountered it in New York until the other Sunday. It was on the east side, in a populous tenement district, that I came on a procession of women, girls and boys carrying all styles and sizes of baking dishes into a bakery. The economy of the practice is obvious. It saves the building and the keeping of a fire and the trouble of housework on what is possibly the housewife's one holiday of the week. The baker told me that he does a brisk trade in dinner cooking in hot weather. When the mercury becomes dispirited and fires become a necessity, the business experiences a sensible diminution, but there is still considerable of it going the year round.

The providing of ready cooked meals is another growing trade. The cooked meat shop is as notable a feature of Paris as the bakery dinner is of England. It has existed and thriven here for a long while, principally by the patronage of the French and German population. Latterly, however, it has taken a wider popularity among the natives. One dealer in cooked meats now runs several shops in various parts of the city, and new men in the business are constantly springing up. Many people who live in flats rely on these shops for the solid portions of their meals, only cooking vegetables or fancy dishes at home. It does not save any money directly, probably, but I fancy it is made to serve the purpose of dispensing with a servant, and so is a definite gain in the long run.—Alfred Trumble in New York News.

Archer and the Surgeon.

Archer, having been bitten or otherwise injured by a horse on one occasion, called on Sir James Paget. The eminent surgeon having bound up his wound, Archer requested to know how long it would take to heal. "Oh," said Sir James, "I think in three or four weeks you will be all right."

"But shall I be fit for the Derby?" asked Archer.

"Yes," was the reply. "Oh, yes! I think you may go to the Derby."

"No, but you don't quite understand me, Sir James," persisted the jockey. "I mean shal I be fit to ride?"

"Well, I don't know," was the answer. "Better drive, better drive!"

Archer, rather taken aback by this very innocent and unexpected rejoinder, had to explain. "I am afraid, Sir James, you scarcely realize who I am!"

"No," said the surgeon politely, referring to the patient's visiting card. "I see I have the honor of receiving Mr. Archer, but'——

"Well," said Archer, "I suppose I may say that what you are in your profession, Sir James, that I am in mine," and proceeded to tell him what that profession was.

The famous surgeon, on learning the status of his visitor, was at once greatly interested and asked him eagerly many questions, among others: What would be his loss supposing he should be unable to fulfil the Derby engagement? to which Archer replied: "About £2,000." His average annual income he stated to be about £8,000; upon which Sir James is said to have remarked: "You may well say that what I am in my profession that you are in yours. I only wish that my profession were half as profitable as yours."—Pall Mall Gazette.

A Fall and a Rise.

A farmer who had been doing business with some one on the second floor of a building near the market yesterday made a slip at the top of the stairs and came down in spread eagle fashion and was for the moment rendered unconscious. He was taken into the office of a livery stable for temporary examination and treatment, and as they opened his coat and vest and chafed his hands he opened his eyes and said:

"Boys, I believe I'm done for!"

"Oh, no—you'll soon be all right," they replied.

"Boys," he continued as he tried to raise up, "one of you go over on the stand to my old woman."

"Who is she?"

"Her name is Potter. There's a white hoss in the team. You'll know the wagin by a barrel of cider in the back end. There's also a crock of butter."

"We are to find Mrs. Potter and tell her you are hurt, and"——

"One of the hosses is blind, and the old woman has got a red feather in her hat."

"Yes, we know. We are to tell her that you are hurt, and"——

"And one of the fore wheels of the wagin has got two new spokes in it," continued the man.

"All right, and we are to bring your wife."

"No, sir! You jist tell her that I've broken both legs and forty other bones in my body, but not to sell one durned ounce of that butter less'n twenty cents a pound. Butter has riz, and the old woman sits there chawin' gum and don't know it!"—Detroit Free Press.

—Chinamen are making money in California by going over stacks of straw abandoned by farmers and clearing out the mustard seed in it. One Chinaman will save one hundred pounds or more a day, and make better wages from what the white man throws away than farmers have made from their grain crops.—*San Francisco Call.*

General Grant's Horses.

"General Grant's death," says Harrison, his servant, "was undoubtedly caused by the Grant & Ward failure. Ward treated him badly during the whole connection, and I remember that afrer Grant hurt his hip he lent Ward one of his horses. Ward sold it for $2,500, and Grant never got a cent of the money. General Grant kept six horses in New York up to the time of the failure. He had two fine teams for Mrs. Grant and two good trotters for himself. He liked to drive alone, and nothing pleased him better than to pass every thing on the road. He was very proud of the Arabian steed which the Sultan gave him, and both of these horses are still alive. One is on the farm of General Beale, and the other is somewhere in the country. They are both, I think, still in the hands of the Grant family."—*Carp, in Cleveland Leader.*

No Apology Required.

On a Tremont street car the other morning the Saunterer was a witness of an episode that well illustrates the extremes of the English language as a medium of courteous expression. A Boston gentleman, as well known for his dignified hearing and uniform courtesy as for his great legal attainments, entered, and, slightly losing his balance as the car started, was jolted against a young urchin who occupied a seat near the door. "I beg your pardon, my little man," said the gentleman, as he regained his equilibrium; but the boy, instead of accepting the apology in the spirit with which it was rendered, with a withering glance of contempt, replied: "What are yer givin' me!" The antithetical nature of apology and response convulsed the passengers, while none seemed to enjoy it more than the gentleman so effectually sat down upon.—Boston Budget.

"Ain't you a little dear," said Jones to the young lady behind the counter who had just told him the price of a pair of gloves." "I presume so," responded the young lady, coyly; "at least all my gentleman acquaintances tell me so."—Pittsburg Dispatch.

FICKLE FORTUNE'S FAVORS.

THE COLORED RACE IN LUCK.

Ex-Governor Warmoth's Former Coachman Secures One-Tenth of the Capital Prize of $150,000 in The Louisiana State Lottery.

In the recent drawing of The Louisiana State Lottery Co., held on the 14th inst., No. 93,174 won the capital prize, and part of this ticket, it was announced, had been sold in the city of New Orleans. Next day Mr. Benernagel, an esteemed local notary public, announced over his signature, that he had been paid, "on account of one of his clients," the amount due for one-tenth of the capital prize. There was a find, but it was evident from the tenor of the certificate that the winner did not desire the publication of his name. Was it only a bluff? Here was the rub. But the *Pelican* is a fly bird, and not easily caught with chaff. It had determined to probe the mystery to the bottom, and it was going to do it. It meant to beat the daisy reporters of the great daily papers, and it has done it. It instituted a still hunt, and after patient search it succeeded. The man who won the $15,000 lives, exists, and has a being. His name is Daniel Jones. He is a colored man of excellent reputation, and resides on Gasquet street, and can be seen at his place of business at Theo. Dumas' furniture store, No. 257 Royal street, where he is at present employed. The *Pelican* regrets not to have as yet made the acquaintance of a man upon whom fortune has so deservedly smiled, but it did the next best thing to it by seeing his wife, Mr. Jones not being at home. Mrs. Jones, who was just moving into her new residence, was found to be a comely and intelligent lady of perhaps 35 years of age. She received the *Pelican* very kindly, and cheerfully furnished all the information in her power. Her husband, who is 57 years of age, had not told her where he purchased his ticket, nor anything about it, until the golden shower poured into their laps so unexpectedly, and just in the nick of time, a mortgage upon their property of $1,200 having been foreclosed, and they having been in imminent danger of losing it. Her husband was born in Louisville, Ky., but had lived in this city for many years. He had always been a hard-working, laboring man, had worked for railroads for many years, and had been employed in the Custom-house and United States Mint. He had also been the private coachman of ex-Governor Warmoth, but Mrs. Jones did not care to have this fact mentioned, as it might hurt their reputation as old and respectable citizens. The *Pelican*, however, begs pardon of the lady for mentioning the fact, even against her wish, it being fully germine to the subject, and whatever may be the ex-Governor's merits or demerits, there could no disgrace attach to honest labor, even in his employ. Mrs. Jones herself was born and lived in this city, and was a Miss Jones before she married. They had been married for a number of years, and had two children, boys, of 16 and 12 years respectively, who have been attending Straight University.

While grateful to a kind Providence for this bountiful gift, these good and deserving people appear to have in no wise "got above themselves" by their good luck. They have kept right on working, and have not even as yet marked out any plan for the employment of their wealth, except that Mr. Jones has resolved upon a visit to Louisville, where resides his only living relative, a sister, whom he has not seen for twenty years.

It would thus appear that fortune although described as blind, has not made a mistake this time, but that her blessings have fallen into the hands of worthy people, who will know how to make a good and sensible use of them.—[New Orleans (La.) Pelican, Dec. 25, 1886.

FROM "THE NEW SOUTH."

COLUMBUS, MISS., Oct. 30, 1885.

DRS. STARKEY & PALEN:—The remarkable success of your Compound Oxygen Treatment in my mother's case induced me to adopt it in my own. For more than fifteen years I have been troubled more or less with *Dyspepsia*, and for over six I have suffered intensely and continuously from Indigestion, Constipation and Hemorrhoids. I had severe headaches almost every week, and was compelled to use morphine for relief from this, as well as purgatives for the former.

I had tried all the usual remedies for these, but with only temporary relief, and my condition steadily grew worse. In July last I was prostrated for ten days by an attack of hemorrhoids of unusual severity. After partial recovery I resorted to your Compound Oxygen, which more than met my expectations. I have no headaches, and no symptoms of Dyspepsia of any kind. In a word, my restoration to health I regard as complete.

Respectfully,
W. H. WORTHINGTON, Editor.

A volume of nearly 200 pages entitled "Compound Oxygen, Its Mode of Action and Results," will be mailed free to any address on application to DRS. STARKEY & PALEN, 1529 Arch Street, Philadelphia, Pa.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

They say it's hard to teach
Old dogs to do new tricks,
But still you'll have to write
The 7 for the 6.

THE ONLY WAY TO CONQUER DYSPEPSIA.

It is perfectly preposterous to introduce pepsin and other artificial solvents into the stomach, in the expectation that they will assist digestion by acting on the food itself. They will not. Nor is it possible thus to overcome dyspepsia. The only way to conquer that disorder, and prevent the numerous diseases and disabilities which it assuredly provokes, is to renew the activity of gastric action by strengthening the stomach. Hostetter's Stomach Bitters eradicates the most inveterate forms of indigestion by restoring vitality to the alimentary organs, and those which are tributary to them. The liver, the bowels, the kidneys and the nerves, no less than the stomach, experience the invigorative effects of that standard tonic, which possesses alterative properties that greatly enhance its beneficial influence, and give a permanence to its effects which they would not otherwise possess.

NEVER OPEN YOUR MOUTH

except to put something to eat into it, is an excellent motto for the gossip and the sufferer from catarrh. But while the gossip is practically incurable, there is no excuse for anyone's suffering longer from catarrh. Dr. Sage's Catarrh Remedy is an unfailing cure for that offensive disease. It heals the diseased membrane, and removes the dull and depressed sensations which always attend catarrh. A short trial of this valuable preparation will make the sufferer feel like a new being.

Dakota rejoices in the publication of three newspapers, each known as *The Blizzard*. It must be a cold day for journalism out there.

"DON'T PAY A BIG PRICE!"

65 Cents pays for a year's subscription to the Weekly *American Rural Home*, Rochester, N. Y., without premium—"the cheapest and Best Weekly in the World," 8 pages, 48 columns, 40 years old. For **One Dollar** you have one choice from over 150 different Cloth-Bound **Dollar Volumes**, 300 to 900 pp., and paper one year, post-paid. Book postage 15c. Extra. 50,000 books given away. Among them are: Law Without Lawyers; Family Cyclopedia; Farm Cyclopedia; Farmers' and Stockbreeder's Guide; Common Sense in Poultry Yard; World Cyclopedia; Dancison's (Medical) Counselor; Boys' Useful Pastimes; Five Years Before the Mast; People's History of United States; Universal History of all Nations; Popular History Civil War (both sides).

For the Cure of a Cough or Sore Throat, "*Brown's Bronchial Troches*" are a simple remedy.

Ask your druggist for Irish May Flower.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

Will you try it? Irish May Flower, 75 cents.

AN UNDISPUTED TEST OF MERIT.

A medicine that has been a household remedy for over fifty years and used in that time by more than 150,000,000 persons must have great merit. Such a medicine is found in BRANDRETH'S PILLS. This fact illustrates the value of these pills better than any statement of the proprietors. It will be observed that the dose required to cure is small. One or two pills taken every night for ten or twenty days will cure dyspepsia, costiveness, rheumatism, liver complaint, all female complaints and weaknesses.

No Opium in Piso's Cure for Consumption. Cures where other remedies fail. 25c.

If afflicted with Sore Eyes, use Dr. Isaac Thompson's Eye Water. Druggists sell it. 25c.

Try Germea for Breakfast.

Cuticura
A POSITIVE CURE
for every form of
Skin and Blood
Disease
from
PIMPLES to SCROFULA

SKIN TORTURES OF A LIFETIME INSTANTLY relieved by a warm bath with CUTICURA SOAP, a real Skin Beautifier, and a single application of CUTICURA, the great Skin Cure.

This repeated daily, with two or three doses of CUTICURA RESOLVENT, the New Blood Purifier, to keep the blood cool, the perspiration pure and unirritating, the bowels open, the liver and kidneys active, will speedily cure

Eczema, tetter, ringworm, psoriasis, lichen, pruritus, scall head, dandruff, and every species of torturing, disfiguring, itching, scaly and pimply diseases of the skin and scalp, with loss of hair, when physicians and all known remedies fail.

Sold everywhere. Price, CUTICURA, 50c; SOAP, 25c; RESOLVENT, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., Boston, Mass.

Send for "How to Cure Skin Diseases."

PIMPLES, blackheads, chapped and oily skin prevented by CUTICURA MEDICATED SOAP.

THE INDUSTRIAL WORLD.

—Honey-raising is gradually becoming the chief industry in Nevada.

—The yield of one Dakota farm is given as 60,000 bushels of wheat, 8,000 bushels of barley and 12,000 bushels of oats.

—A Trenton (N. J.) firm has used more than one thousand tons of copper during the past season in the making of telegraph wire.

—Maine has during the last year put up 10,701,600 cans of corn, over 840,000 cans of succotash, and over 144,000 cans of lima beans. Three Portland firms have done most of this business.

—In railroad building the United States far outstrips all other nations. Up to the close of 1884 there were throughout the whole world about 291,000 miles of railway, of which nearly one-half was in the United States.—*Chicago Journal.*

—The amount of wool going into consumption in Europe is much larger this year than previously, while the demand in this country is also increasing, which gives an encouraging outlook for wool growers.—*Cincinnati Times.*

—Rochester parties are going into the frog-raising industry on an extensive scale. They have purchased a large tract of land on the western shore of Lake Cayuga, near Canoga, N. Y., on which they will erect improvements necessary for the carrying on of such a business.—*Buffalo Express.*

—There is more wool grown on each sheep than formerly, the average having doubled in twenty-five years. In 1860 the product was two and one-half pounds per sheep, while in 1885 it had risen to five pounds. This is due to the grading up of the common flocks and improving them with the use of merino rams.—*N. E. Farmer.*

—A corn harvester has been patented in which, combined with a frame and platform, is an elevator and its driving mechanism, with receiving box, all so constructed as to remove the ears of corn from the stalks and deposit them in the receiving box as the machine is drawn along the rows of corn, the stalks being left in the field.—*North Dakota Farmer.*

"What a polite man Mr. Geestring, the violinist, appears to be!" "Indeed? I hadn't noticed it." "Oh, yes; bowing and scraping all the time."

Don't take that "cocktail in the morning." If you have a "swelled head," nauseated stomach, and unstrung nerves resulting from the "convivial party last night." The sure and *safe* way, to clear the cobwebs from the brain, recover zest for food, and tone up the nervous system, is to use Dr. Pierce's "Pleasant Purgative Pellets." Sold by all druggists.

It takes more talent to run one's own business than it does to direct the affairs of an entire neighborhood.

"Pa" Ma says, "bring home a bottle of Irish May Flower to-night." Only 75 cts. a bottle.

Try one bottle now; Irish May Flower, 75c.

A QUESTION ABOUT
Brown's Iron Bitters
ANSWERED.

The question has probably been asked thousands of times, "How can Brown's Iron Bitters cure everything?" Well, it doesn't. But it does cure any disease for which a reputable physician would prescribe IRON. Physicians recognize Iron as the best restorative agent known to the profession, and inquiry of any leading chemical firm will substantiate the assertion that there are more preparations of iron than of any other substance used in medicine. This shows conclusively that iron is acknowledged to be the most important factor in successful medical practice. It is, however, a remarkable fact, that prior to the discovery of BROWN'S IRON BITTERS no perfectly satisfactory iron combination had ever been found.

BROWN'S IRON BITTERS does not injure the teeth, cause headache, or produce constipation—**all other iron medicines do. BROWN'S IRON BITTERS cures Indigestion, Biliousness, Weakness, Dyspepsia, Malaria, Chills and Fevers, Tired Feeling, General Debility, Pain in the Side, Back or Limbs, Headache and Neuralgia**—for all these ailments Iron is prescribed daily.

BROWN'S IRON BITTERS, however, does not cure in a minute. Like all other thorough medicines, it acts slowly. When taken by men the first symptom of benefit is renewed energy. The muscles then become firmer, the digestion improves, the bowels are active. In women the effect is usually more rapid and marked. The eyes begin at once to brighten; the skin clears up; healthy color comes to the cheeks; nervousness disappears; functional derangements become regular, and if a nursing mother, abundant sustenance is supplied for the child. Remember Brown's Iron Bitters is the **ONLY** iron medicine that is not injurious. *Physicians and Druggists recommend it.*

The Genuine has Trade Mark and crossed red lines on wrapper. **TAKE NO OTHER.**

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhœa, Eructation, Kills Worms, gives sleep, and promotes digestion, Without injurious medication.

THE CENTAUR COMPANY, 182 Fulton Street, N. Y.

Lost the Train.

"I say, brakeman, is this my train?"

"N—no, I guess not. It seems to belong to the Great Central Railroad company. Their name is on it, anyway."

"No, no, I mean I want to find my train"——

"All right, sir; where did you lose it?"—Chicago Ledger.

—Bagley—"Say no more, Aurelia. I forbid the match. Young Spriggs may be a gentleman, but he is poor." Aurelia—"But he is one of the heirs to the great Hogg estate of sixty-four millions." "Nothing of the sort, girl! He is deceiving thee." "Why, pa, I'm sure he told me that he is one of the lawyers engaged to defend the will.—*Philadelphia Call.*

—Mrs. Mushby—"I met Mrs. Motherwell this afternoon. What a tedious thing she is! Forever talking about that baby, you know." Martha—"But aunt—now don't be cross; did it ever occur to you that Mrs. Motherwell might think you a grain tiresome when you get talking about Rover?" Mrs. Mushby—"That's an entirely different thing. A dog is so interesting, you know."—*Boston Post.*

—Rich but penurious hostess to poor society friend—"I notice that square dinner plates are the thing now, and I've ordered ten dozen; but I'm worried about one point in serving a dinner with them." Friend—"What are you in doubt about?" "Ought I to serve round steak on these square plates?" "That depends. There may not be enough to go round, judging from the dinner you gave the other day."—*Boston Record.*

ROYAL

BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO. 106 Wall Street, N. Y.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

Invalids' Hotel and Surgical Institute

Staff of Eighteen Experienced and Skillful Physicians and Surgeons.

ALL CHRONIC DISEASES A SPECIALTY.—Patients treated here or at their homes. Many treated at home, through correspondence, as successfully as if here in person. Come and see us, or send ten cents in stamps for our "Invalids' Guide-Book," which gives all particulars. Address: WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main St., Buffalo, N.Y.

OVER WORKED Women.

For "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and overworked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Weaknesses and Diseases peculiar to women. The treatment of many thousands of such cases, at the Invalids' Hotel and Surgical Institute has afforded a large experience in adapting remedies for their cure, and

Dr. Pierce's Favorite Prescription

is the result of this vast experience. **For Inflammation and Ulceration, it is a Specific.** It is a powerful general, as well as uterine, tonic and nervine and imparts vigor and strength to the whole system. It cures weakness of stomach, indigestion, bloating, weak back, nervous prostration, exhaustion, debility and sleeplessness, in either sex. Favorite Prescription is sold by druggists under our *positive guarantee*. See wrapper around bottle.

PRICE $1.00, OR SIX BOTTLES FOR $5.00.

Send 10 cents in stamps for Dr. Pierce's large Treatise on Diseases of Women (160 pages, paper-covered). Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main Street, Buffalo, N. Y.

GREAT DISCOVERERS.

Sample of a Regulation Dialogue Between a Druggist and His Victim.

Nearly every druggist has discovered some compound that will cure every disease. This discovery, stopping at respectable advertisement of its merits, is well enough, but the inventive druggist stops not at advertising, in fact rarely goes that far, but adopts a more importunate method of selling his compounds A man who has read much of the merits of Dr. Ballrigg's Balm, and who believes it will cure him, enters a drug store and asks:

"Have you any of Ballrigg's Balm?"

"Yes, sir, we have it. Suffering with a cough?"

"Yes."

"Well, we've got plenty of the Balm, but we also have something much better. Now here's something (taking down a bottle) which we make ourselves. It's much supe——"

"I want Ballrigg's Balm."

"Yes, I know, but this preparation, as every sensible man in this town will agree, will knock a cough higher than a kite. This bottle will only cost you——"

"I want Ball——"

"Yes, I understand. This medicine is made of the purest drugs and will only cost half——"

"Well, give me a bottle."

"Two bottles? only cost half——"

"Yes, two bottles."

"Thanks. Any thing else?"

"Have you got any of Nuggleton's Bed-bug Annoyer?"

"Yes. Bothered with bugs?"

"Somewhat."

"Yes, I've got Nuggleton's, but we also have some Bed-bug Murderer which we manufacture ourselves. Every man in this town will tell you that our——

"I want Nuggleton's"

"Yes, I understand, but this wonderful preparation which we prepare ourselves only costs half what the other does and is much better. We spare no pains in the manufacture and——'

"Well, give me a package."

"Two, did you say? only cost half——'

"Yes, give me two."

"Thanks. Any thing else?"

"I'd like to get some of Jackson's Chill——"

"My dear sir, when it comes to chills, we make a preparation that——"

The customer rushes from the store —*Arkansaw Traveler.*

A TIGER'S BLOW.

Crushing the Skull of an Ox at a Single, Terrible Blow.

A man-eater which for six months had been the terror of the neighborhood had been traced down and was seen to creep into a ravine. The beaters were at once ordered off, as they could not be of service and might be charged by the tiger, which had already been rendered furious by a wound. Unfortunately, these men are in the habit of half intoxicating themselves with opium before driving the tiger from his refuge, and one of them who had taken too large a dose refused to escape, and challenged the tiger, drawing his sword and waving it defiantly. In a moment the animal sprang upon him, dashed him to the ground with a blow of his paw, and turned at bay. After a series of desperate charges he was killed. The hunters then went to the assistance of the wounded man, but found that he was past all aid, the lower part of his face, including both jaws, having been carried away as if by a cannon-ball.

The terrific effect of the single blow indicates the power of the limb which struck it. Had the blow taken effect a few inches higher the whole of the head would have been carried away. By a similar blow a tiger has been known to crush the skull of an ox so completely that when handled the broken bones felt as if they were loose in a bag. The wonder at this terrific strength diminishes when the limb is measured. The tiger which killed the foolhardy man was by no means a large one, measuring nine feet four inches from the nose to the tip of the tail; yet the girth of the forearm was two feet seven inches. The corresponding limb of a very powerful man scarcely exceeds a foot in circumference.

Not until it becomes a man-eater is the tiger much dreaded, especially in the case of those natives who do not possess flocks or herds. Indeed, when an Englishman has offered to kill a tiger whose lair was well known he has been requested not to do so, as the tiger did no harm and killed so many deer that it supplied the neighbors with meat. The tigress is much more to be dreaded as a man-eater than the male animal.—*Rev. J. G. Wood, in Good Words.*

An Insect Tramp.

A supposed house-fly parasite *(Hypopus muscarum)* has been found by a French naturalist, P. Megnin, to be in reality no parasite, preying upon the fly's body, but simply the common cheese-mite *(Tyroglyphus scio)* availing itself of the first means of transportation to new sources of food supply. The creature, with a remarkable power of adaptation to environment, becomes greatly changed on attaching itself to the fly or other animal, but assumes its original form and multiplies rapidly, on reaching suitable feeding-grounds. This discovery explains how fresh cheese can become infected with mites, even when carefully placed on a shelf away from all suspected sources of contamination.—*Arkansaw Traveler.*

—Judge to the plaintiff—"Who was present when the defendant knocked you out?" Plaintiff—"I was."—*Chicago Herald.*

—Sam Bear, of Santa Fe, owns the champion cinnamon bear of the Territory, but they are not related.

PITH AND POINT.

—Terrapin, canvasback duck, and brook trout, chopped fine, with plenty of seasoning, make a very nice hash. Cut this out and paste it on your landlady.—*Puck.*

—Jakey—Fader, dere's a fly in der soup. Mr. Cohn—Vell, eat all but der fly before you show it to der vaiter; den you can get some more.—*Rambler.*

—It costs twelve dollars a night to illuminate "Liberty Enlightening the World." This is another evidence of how costly it is to make a woman look attractive.—*N. Y. Graphic.*

—"Smile when you can," warbles a new-fledged poet. We can do that easy enough, but what we are anxious to know is how a fellow is going to smile when he can't.—*Warren (Pa.) Mirror.*

—Holding a skein of yarn for a young lady is universally considered one of the lightest and pleasantest of occupations, but "holding yarn" for a fellow's sister gets awful tiresome.

—Anastasia (about to be married): "Ned, see if this reads all right for the invitations: 'Your presence is requested ——' " Devoted brother: "Stop there, sis! It isn't grammatical. You mean: 'Your presents are requested.' "—*N. Y. Independent.*

—Thirty-two hundred babies are born in the United States every day, but a man never thinks of the other thirty-one hundred and ninety-nine when he is confined in a railroad car with a cherub that wants to see if it is possible to howl louder than the engine can whistle.—*Boston Budget.*

—"Oh, my dear, generous husband!" murmurs the fond wife. "How grand you are! I only wish I could be you for just one day." "Why, dearest?" asks the unsuspecting man. "Because then I would buy a new bonnet for my loving little wife," replies the designing creature.—*N. Y. Ledger.*

—First Omaha man—Have any success on your hunting expedition? Second Omaha man—Yes, considering the weather, I did admirably. By the way, you remember Simpkins, the poet; he lives near where I was and I called on him. "Well! Well! Did he read any of his poetry?" "O no! I had my gun along."—*Omaha World.*

—"Dere am t'ree t'ings," says Uncle Ned, "w'ich ebery young pusson mus' keep in mind good, an' dem t'ree t'ings am dese: De wise man an' de fool doan quarrel, but two fools or two wise men kain't get along so well. De man what marries a 'oman 'cause she's got more sense den he has is neber allowed ter lose sight o' dat fack. De chile dat too soon shows signs of smartness doan turn out ter be de smartest man."—*Toledo Blade.*

THE RAT'S INCISORS.

A Never-Ceasing Action of the Rodent's Teeth Necessary to Its Existence.

The sagacity and ingenuity of the rat are as curious as remarkable. When he is hard pressed for food he will attack any thing weaker than himself. Goldsmith says frogs had been introduced into Ireland some time before the brown rat and had multiplied abundantly, but they were pursued in their marshes by this kind of rat and eaten clean out of the Emerald Isle. A rat which attempted to capture the chicken of a game fowl found the pluck of the game fowl to his sorrow, for he was killed by the mother with beak and spur in twelve minutes. The hen seized it by the neck, shook it violently, put out an eye, and soon made an end of the contest. Farmers are often puzzled to account for rats in wheat stacks, where the grain is fixed so closely together and with such compactness, but the rat gets there, being tossed up with the sheaves to the rick; where they multiply to such an extent that what seems fair on the outside is like a rat-pie on the inside. The propensity of the rat to gnaw is not so much to get food or to get through from one place to another, but the never ceasing action of his teeth is necessary for his existence. The rat has four small, long and very sharp teeth, two of which are on the upper and two on the lower jaw. If one of the teeth be removed from any cause the opposite tooth will continue to grow upwards, and as there is nothing to grind it away, will project from the mouth and turn upon itself; or if it be an under tooth it will even run into the skull above. The ceaseless working of the rat's incisors against some hard substance is necessary to keep them down, and if he did not gnaw for his subsistence, he would be compelled to gnaw to prevent his jaw being gradually locked by their rapid development. Nobody has any pity for this whiskered vermin race; as of the pauper boy in Oliver Twist, "Hit him hard, he ain't a got no friends."—*Philadelphia Call.*

Reuniting Portions of Fingers.

Numerous instances have been recorded of late in the medical journals of the complete reunion of portions of fingers which had been cut off from the hand, in some cases by the knife, and in others by the axe. In one case a man, in cutting kindling for the morning fire, accidentally cut off the end of his thumb. He had gone from the place some twenty feet, when he returned, picked up the end, wiped it and replaced it, binding it in its original place as nearly as possible. The wound united; and the finger is now as good as ever, save that its sensibility is somewhat diminished. In another case a boy chopped off the end of three fingers. He was seen by a physician three or four hours after the accident. The ends of the fingers had been found in the snow, and were brought to him. He attached them, and two of the three united.—*Science.*

SHOWY SOLDIERS.

The Crack Troops of France on Duty at Their Country's Gay Capital.

If all the soldiers of France were as good looking as the men in the regiment of the "Garde d'honneur du Government de la Republique," then would the army of this country be the finest body of warriors in the world. Of course I do not mean to say that the troops would be any braver or would fight better if all were as handsome as the Paris guards, but style and good looks go for a great deal in the excellence for food and gun-powder. Those who have visited the capital will bear me out in the assertion that on the whole, the French army is an ugly dressed and badly-set-up body of men, but that the Garde Republicaine is as splendid-looking, well-disciplined and neatly uniformed legion as any of the Guards, Grenadiers or Black Watches of the United Kingdom. Now, the particular corps of which I am speaking is not only an admirable military organization, but it is also the finest exemplification of what a public force ought to be—the army in the service of the civil law—that I know of. The Garde Republicaine is a brigade of gendarmes charged with the maintenance of public order in the French capital. Gendarmes and the guards are picked soldiers belonging in reality to the same branch of the public service, differing only in the color of their trefoil shaped epaulettes, which from time immemorial have been white for the former and orange for the latter, and in their head covering. The infantry of the guard, instead of the classic cocked hat worn as Napoleon I. wore his legendary *bicorne*, wear the African shako, a stiff, light cap with visor, while the cavalry sport helmets very similar to those of the regular cuirassiers.

The "Garde d'honneur du Government de la Republique," as the Minister of War calls them, is composed of two divisions—the infantry, in which there are three battalions, and the cavalry, consisting of three squadrons. The legion is commanded by a Colonel who belongs to the gendarmerie, and who as a general thing is only promoted to the position after having filled that of chief of legion in the gendarmerie of his department. He is assisted in his duties by two Lieutenant-Colonels—one for the mounted men, the other for the "doughboys." Besides these there are six Chiefs of Squadrons, thirty Captains, six Captains-Adjutant, forty-eight Lieutenants for the infantry and twenty-four Lieutenants for the cavalry—total one hundred and seventeen officers, who command about twenty-eight hundred men, of whom six hundred are cavalry. Formerly this legion was known by the name of Garde Municipale; then the name of the corps was changed to Garde de Paris, and both of these had the merit of defining more exactly than the one it now officially bears the functions for which it was established. The protection of good order in the capital was the real *raison d'etre* of this *corps d'elite*, and the city pays half the cost of its maintenance. According to a decree issued by Louis Napoleon in 1854, and by which they are governed, the gardes are, so to speak, a part of the Prefecture of Police, while in all relating to the execution of the laws they are also an auxiliary of the courts of justice. This double line of duty has led to a division of the service of the corps into two branches, that of the prefecture and that of the courts, and I must therefore define what these distinct duties consist of. Those which it performs as an auxiliary of the Prefecture of Police are of two sorts—a daily duty and an extraordinary one. The daily duties consist of mounting guard at the Grand Opera, the theaters, the circuses and the public balls. To each place of amusement a platoon or squad is detailed every evening, and their marching through the streets is one of the pretty sights of the capital. Often, too, some of the gardes are sent to assure good order wherever a crowd has assembled for any lawful purpose. —*Paris Cor. San Francisco Chronicle.*

JAPANESE SWORDS.

An American Resident of Tokio Pronounces Them the Best Made.

With all its boasted excellence in manufactures the Western world has still something to learn from the Eastern. Neither Sheffield nor Birmingham, with all their skill, are able to turn out a sword-blade which can begin to compare with the wonderful sabers of Japan. For fineness of temper and keenness of edge they are unequalled in the modern world, and can scarcely be matched by the blades formerly forged in Damascus and Toledo. A common feat for a Japanese soldier is to cut a pig in two at a single blow, and I have seen bars of lead, and even of iron, divided by these weapons without a notch of imperfection being visible on the blade. While not possessing the marvelous dexterity of the Sikh swordsman, the Japanese would be most formidable adversaries in hand-to-hand fighting. On the occasion of the murder of Richardson and his party, a fate which, by the way, they brought on themselves, a horse's hind leg was completely severed from the body by a stroke from one of the terrible two-handed swords. A sword of superior excellence is preserved as an heirloom in the Satsuma family, and with this blade I have seen a leaf floating on the stream cut in two by merely being allowed to drift against the edge. The Japanese understand the tempering of sword-blades better than any other people, and all the efforts made by the British Government a short time ago to produce as fine an article failed utterly.—*George E. Denison, in St. Louis Globe-Democrat.*

BILL NYE.

An Instance of Warm Hearted Poverty and Cold Blooded Corporation.

"We have some delicate questions to answer once in a while," said a conductor to me the other day. "I used to run on the Pacific roads years ago and they required everybody to get a ticket before they got on the train. Well, you know how that works, of course. One man out of five don't get there in time to buy a ticket, and then there's trouble. We had to charge a man twenty-five cents extra if he didn't have a ticket. Then we had to give him a drawback check that he could present at the general office and get his quarter back, or something like that. It was done to make people more business like, and was also a delicate hint to the conductor to whack up with the road occasionally. It made a good deal of trouble, though.

"One day a man with no legs rode up with me a distance of fifty miles or so, and just had the exact change to take him there. However, he had just barely got to the train in time to be put aboard. He didn't have the twenty-five cents extra, and I talked as severe to him as I could, and I told him I'd have to refuse to take him. You see, if I'd taken a quarter out of my pocket and given it to him to put up, the genial, unhung pirate known as the 'spotter' would have charged that I had loaned the cripple a quarter from the company's money. So I pulled the bell cord and the train stopped. It was a question of whether I'd obey orders or get the Royal G. B. in a minute.

"Just then an old miner from the last wild-cat stampede, busted, but still generous, woke up and got the drift of the conversation. When he found out what the train had stopped for he went down in his old duck overalls, fished out his ticket and gave it to the legless traveler. 'There,' said he, 'pardner, you go on with your infernal old train and I'll git out and walk. I'm in something of a hurry, anyhow, and I've got pretty well rested, so adoo. So long, Mr. Hireling, of a bloodless corporation. Tell the baggage shatterer to jest be kind enough to fire my chist off most anywhere, but to do it as easy as he can. It's got some joint powder into it that I had left when I failed. It belongs to the Brindle Tom Cat Consolidated Mining, Milling and Smelting company, now deceased. Fare thee well, gentle brakesman, with the clarion voice. Bon joir, Mr. Peanutter, with the prime fresh figs just out of quarantine, with a prize worm in each and every package. Adios, gentle railroad, with varnished cars and a hat box. If I don't see you agin, hullo!' He was just getting off the train with a roll of blankets when a young man from New York passed the hat and collected $50. This was handed over to the man with no legs and the ticket was returned to the vice-president and general manager of the Brindle Tom Cat Consolidated Mining, Milling and Smelting company."—Detroit Free Press.

An Old Fable Retold.

Da' wuz once er flock ob skee'd sheep whut run'd down enter de ribbah 'n drownded. I dunno weddah dem sheep wuz ob de one kin' er de uddah; I dunno weddah dem sheep wuz white er black—weddah dey wuz shea'd er onshea'd—hongery er fat; dunno nuffin 'bout dem sheep 'cepp'n dis: Dem sheep—eb' las' one—wuz drownded, 'n dis de way et happen. De ole ram, he sez, sezze—kin' a-soshble-like, sezzee—"Gwine t' de ma'ket t'day, Mars Fahmah?" "Nope," sez Mars Fahmah, "ain't a-gwine." Ole ram cu'ous t' know fo' why; 'low'd da' wuz too much dus'. "Nope," sez Mars Fahmah; "right sma' showe' jes' fo' day." Ole ram 'low'd mebbe dat showe' lay de dus' too much? Mars Fahman shake he head 'n say de road on prime cundish'n—all time look'n ve'y mys-te-ous. Et las' de ole ram he up'n ax 'im, k'plump, fo' w'y he wuz'n' a-gwine?

"Well, ef yo' mus' know," sez Mars Fahmah, "kase da's sich a mighty sight ob wolfs. I's r'ally 'fea'd ef I 'temp' t' druv yo' t' ma'ket dat dem wolfs jump out 'n et yo' all up, hide 'n hoofs—'n dat's de troof! Des on'y las' week one ob de nabe's wuz a-druv'n ob de nices' passel ob sheep—mos' ez nice es dis'n, Miste' Ram—w'en—you' see dem woods jes' behin' de furdes' co'nfiel' obe' yan? Yes, on de lef'. Dem's de woods. Yes, sah, dem's de woods—right da'! Well, sah, Miste' Ram sca'cely mo'n ez fer ez a runn'n' jump f'um de fus pos' 'n rail fence, on de off side ob de road—'n en broad day, min' yo' "—(Well! yo' shed a seen de ole ram's eyes; dey wuz mos' a-popp'n' out.) "Den whut?" he says, a-trembel'n' like de agy; "den whut?" "Den whut?" sez Mars Fahmah, "nebbe you' min' whut I's done tol' yo' oncet, 'n I ain't a-gwine t' tell yo' no mo', 'n I ain' a-gwine t' no ma'ket t'day; no, siree! 'spech'ly 's I's got some plowin' t' do." An' 'way he goes a-laugh'n t' hese'l fit t' kill.

Well, de ole ram, he sez, a-tu'n'n' t' de sheep, sezzee: "Dem wolfs mighty bad! Dey am big 'n dey 'm hongery; 'n like ez not dey come a-sneak'n' up yer w'en Mars Fahmah a-snooz'n' 'n clumb right obe' dis yer fence. Run! run!" 'N so dey did; dey run'd. Dem po' skee'd sheep tuk right afte' de ole ram, dey did, 'n dey run'd, 'n run'd, 'n run'd te dey fotch up, k'chug! ente de deepest catfish hole en de ribbe'.

'N dat whut Mars Fahmah git fer a-tell'n dat fool ya'n t' dem po' skee'd sheep.—Izim Judge.

Near Sighted.

Mrs. Hauton (who feels that she has condescended in coming to the Newgold's ball)—Extremely ordinary people here; common looking woman over there, and what a dress she has on. (Suddenly discovers that she is facing a mirror.)—Life.

Politeness in Poverty.

"I wish to propound one simple interrogatory to you, provided you do not regard as presumptuous my venturing to address you without the empty conventional formality of the introduction prescribed by social etiquette," said a seedy looking person yesterday, who found the pavement of Brush street a world too narrow. "Is it quite consistent both with your policy and principles to advance to a fellow creature, suffering from temporary financial embarrassment, the small sum of 10 cents, when with entire frankness he tells you in advance that the same is to be applied to purposes of imbibition, rather than falsely asserts, as is so commonly done, that it is required for sustentation?"

He got it.—Detroit Free Press.

WILD WEST LAW.

How a Kansas Judge Rewarded Two Jurors Who Didn't Agree With Him.

We sometimes growl about the way the modern lawyer attacks and insults a witness on the stand, but there has really been a great improvement in the last twenty years, especially in the West. In 1855 the writer was a juror in the case of Adams vs. Paige, tried in Kansas. Adams was a Boston speculator, who was trying to oust Paige from certain lands. The lands clearly belonged to Adams, and Paige was clearly a squatter, but the latter resisted and the former appealed to the law. The judge was a squatter, and therefore a sympathizer, while Paige was likewise a cousin of his. When Adams came to take the stand Paige's lawyer, whose name was Britt, began:

"Now, Mr. Adams, you say you bought this land from a party in Boston?"

"Yes, sir."

"And you paid him $480?"

"Yes, sir."

"Now, sir, isn't it a fact that while this Davis, the bogus claimant to this land, lay dying you robbed him of his deed?"

"No, sir!"

"Be careful! We want no perjury in this case! How often have you been sent to State prison?"

"Never!"

"Look out! Ah! see the guilty blush on his face! Notice his confusion? Your Honor, that man is deliberately lying!"

"I object to all this!" exclaimed Adams' lawyer as he jumped up.

"Steve Bullock, you sot down!" shouted his Honor. "I've known you ever since you started out driving a mule team, and you was allus objecting to every thing. If this man has been in State prison this court wants to know it. Let him answer the question."

"I never have been," replied Adams.

"Have you ever robbed a widow?" asked the lawyer.

"Your Honor, what has all this to do with the case on trial?" asked Adams' lawyer.

"Heaps, your Honor," replied Britt, "If we can show that this man is a thief, murderer and land pirate it's our business to do so. If a wolf in sheep's clothing sneaks into our innocent community it is our duty to expose him."

"I should say it was," answered the court. "The witness must answer the question or I'll lock him up for contempt."

"I never did," replied Adams.

"Then your looks belie you. Didn't you set a store afire in St. Louis?"

"No, sir."

"Nor rob a bank in St. Louis?"

"Your Honor, I must object," said Bullock. "This is a case——"

"Steve Bullock, sot down!" exclaimed the court. "You quit driving mules a year ago and went into law, but you don't know everything yet. This court can give you half a mile the start and beat you in. If this man has robbed a bank we want to know it. We want to know what sort of a man has come among us to skeer our wimmin and children."

"I did not rob a bank," said Adams.

"O, you didn't!" sneered Britt. "How about burning a barn in Illinois?"

"Your Honor, I did not come here to be insulted," said Adams, as he turned to the court.

"Answer the question!" commanded the judge. "I've got a barn of my own, or am going to have next spring, and if we've taken a barn-burner to the bosom of this community I want to know it."

For two long hours Britt continued to ask such questions, and the judge obliged the witness to answer. Then the case for the defense was closed without a word in regard to its legal aspects. Britt contended, in his speech to the jury, that it was a plot to rob a big-hearted, good-natured citizen of his all, and Bullock was so disgusted that he refused to examine a witness or make an argument.

"Gents," said the court when he charged us, "we don't want no fooling in this case. That 'ere land belongs to Bill Paige, and you want to return a verdict to that effect."

We went out, and ten of the twelve were read to agree with the court. Two of us hung out, and to reward us for producing a disagreement his Honor sent us to jail for thirty-six hours apiece.—*Marion Smith, in Detroit Free Press.*

ENGLISH JOURNALISM.

The First Country Newspaper Published in Great Britian and Ireland.

In 1695 appeared the first country newspaper as the *Lincoln, Rutland and Stamford Mercury.* The prospectus of one of these early county papers, the Salisbury *Postman*, "or pacquet of intelligence from France, Spaine, Portugal," etc., September 27, 1715, ran thus: "This paper contains an abstract of the most material occurrences of the whole week, foreign and domestic, and will be continued every post, provided a sufficient number will subscribe for its encouragement. If two hundred subscribe, it shall be delivered to any public or private house in town every Monday, Thursday, or Saturday morning by eight o'clock in winter and by six in summer for 1½d. each. Besides the news, we perform all other matters belonging to our art and mystery, whether in Latin, Greek, Hebrew, algebra, mathematics, etc.," By 1782, the number of provincial papers had increased to fifty. A vivid description of the state of the roads in this country in winter time two centuries ago is given in the following extract from the "Collections for Husbandry and Trade," March 10, 1693: "The roads are filled with snow, we are forced to ride with the pacquet over hedges and ditches. This day seven-night my boy with the pacquet and two gentlemen were seven hours riding from Dunstable to Hockley, but three miles, barely escaping with their lives, being often in holes and forced to be drawn out with ropes. A man and woman were found dead within a mile hence, and six horses lie dead on the road between Hockley and Brickhill smothered."—*Longman's Magazine.*

CARD-SHARPING.

Some of the Principal Tricks Practiced by Professional Rascals.

Card-sharping is the easiest thing going. It only requires a good presence, though even that can be dispensed with a quick eye, a certain amount of coolness and practice. There are several ways. The principal things are, no matter what the game may be, to "ready" the pack, and to avoid or neutralize the cut. Take ecarte. The object to be attained is to get the eighth, ninth, tenth and eleventh cards from the top to be of the same suit. The "readying" always occurs after the first hand and out of the eleven cards which lie with their faces uppermost on the table, it is not difficult to spot four good cards and place them on the top of the pack. In the course of the shuffle seven more cards are placed on the top of these. The next thing is to avoid or neutralize the cut, which is not so difficult as may appear when accompanied by pleasant "patter," which is necessary to all tricks. The pack is now "readied," and when dealt it will be found that the tenth, ninth and eighth cards, which are in the dealer's hand, are of the same suit as the eleventh card, which he turns up as trumps.

The means of neutralizing the cut, when it can not be avoided, are called the "bridge" and "pass." When the pack is "readied," and the sharp sees he can not avoid the cut, he takes some fifteen cards from the bottom of the pack, which he holds in his hand. These fifteen cards he bends slightly lengthways, so as to form a slight curve and throws them carelessly on the pack. The odds are about one hundred to one that his adversary will cut the fifteen bent cards and leave the "readied" pack in its original position. The trick is sometimes performed backwards, as if the sharp were cutting himself, by mistake, after shuffling.

The "pass" is not so easy, and is performed by sleight-of-hand. When the cards are "readied," the pack is presented to be cut. When this is done two portions are on the table, and it is for the sharp who is dealing to readjust them into one pack. This he does in the following way: He takes up the "readied" cards in his right hand and passes them to his left hand. He then takes up the remaining cards with his right hand, apparently as if to place them on top of the "readied" cards. Instead of doing so, however, he, by a sleight-of-hand which is performed with the tip of the little finger of his left hand, and a quick movement of the other fingers, which could not be explained in print, manages to reverse the two portions, thus leaving the "readied" cards in their original position on the top, as they were before the pack was cut.

Another way of sharpening is very popular in baccarat, and is called the "slip" or "second pulling." This is performed with marked cards, or what are called "readers." The most important cards—namely, the eights, nines, tens and court cards—are marked in a way that no one but the people "in the know" could possibly discover. A great deal of skill is necessary in dealing, so that the grec can deal himself, if required, the "second pullers" or marked cards from even the second, third or fourth cards down, while all the time appearing to help himself honestly from the top. These marked cards or "readers" are made and sold largely in America by circular, and a single pack costs as much as a "fiver." Recently a well-known club man received a circular from one of these scoundrelly firms, in which they offered him a large commission on all orders which he obtained.

One of the best recognized, but most risky modes of sharping at cards, is what is called "the drunken mug." The best way of explaining it will be to give an example which occurred a few years ago at a well-known watering-place. The "mug" was induced to play in his own rooms with three sharps, who had singled him out for slaughter. The game was not for ready money, and the "mug" was made drunk by dropping salt in his liquor. The next morning one of the sharpers called on him and proffered him $60, which he professed to have lost overnight to the "mug." The "mug," not suspecting or remembering any thing, took the money, and thought the sharp a very decent fellow. Not very long after, however, the two other sharps called upon him and presented winning accounts for $500. The "mug" saw the game immediately, and was on the point of refusing to pay, when he remembered that he had incautiously accepted the other man's $60, and had put himself out of court. The sharps knew with whom they were dealing, and had risked the $60 to catch the $500. The "mug," to avoid further trouble, wrote a check for $500, but found out afterward that the men were well known as flash sharpers.—*Town Topics.*

—A patent has been obtained by a gentleman of San Francisco for what is claimed to be a fire and collision-proof railway car. It is made wholly of iron and steel, and the weight will range from sixteen to twenty tons for ordinary passenger coaches and from twenty-two to twenty-five tons for sleepers. The floor is a single sheet of metal, and the roof also a single sheet. The beams are of rolled steel.—*San Francisco Chronicle.*

—In a recent lecture Henry M. Stanley related the details of his exploration of Lake Victoria Nyanza, in Africa, fifty days being spent on it to prove it to be a single body of water 21,500 square miles in extent.—*Boston Globe.*

THE WORLD'S CENTER.

An Interesting Tale Told by the Brahmins of the City of Delhi.

About seven hundred miles northeast of Bombay, and about the same distance northwest of Calcutta, stands the ancient and very important city of Delhi, the former metropolis of the Great Mogul. Its walls, gates, palaces, tombs and other great works, are wonderful for size and for beauty of architecture, and would require a large book thoroughly to describe them, while the history of the great city, which once contained two millions of inhabitants, would almost form a library. Not many miles from Delhi stands an enormous tall tower, but by whom that tower was built, and for what purpose, no one can tell. The Brahmins say, however, that it marks the center of the world: and the story they tell about it is this,

Once upon a time a certain King of Delhi, being anxious to reign long and to leave his throne to his family, and being disturbed by doubts about it, called a council of pious Brahmins, who informed him that just under where they were in consultation, and just where the great tower, called Kootub, now stands, was the head of the great serpent which supported the world. "Now," they said, "if the King will drive down a great iron into the earth, at that spot, in such a way as to transfix the head of the great serpent, he may be sure that he would reign long, and his children after him." The King made the great iron and the tower, and drove down into the earth and transfixed the serpent's head—or at least the Brahmins told him that he had; but, doubting the word of these holy men, and wishing to see for himself that such was the case, he had the iron pillar pulled up again. Lo, and behold! it was covered with blood, showing that the holy men had been right; but, unfortunately, when he wanted to drive it down again the animal very sensibly got out of the way, and very shortly afterwards the King was beset by enemies and lost not only his throne but his head. This signal confirmation of the Brahmins' story causes the natives to believe that the head of the great serpent is still there, supporting the world, although, as they say, it may not be *exactly* under the tower since the attempt of the King to transfix it a second time.

Not far from this wonderful tower is a wonderful well. It is about thirty feet square and one hundred and twenty deep, and generally contains about forty feet of water. In addition to its use for drinking purposes, the natives make another use of this huge well whenever there are visitors attracted by the fame of the tower which is the center of the world. To jump from the top into the darkness of the pool, eighty feet below, would be like leaping from a six-story house, and would appear to be certain death. Yet the Hindoos of the village close by will make the jump for a very few pence. A dozen men and boys, with nothing on but the very smallest waist-cloth, will stand upon the curbstone, ready to jump.

An old gray-headed fellow will balance himself, and then leap. For the first fifty feet or so he extends his arms and legs widely, then he brings his feet close together, puts his hands close to his side, and strikes the water with a crash which echoes up the stony sides as his head disappears in the inky-looking pool. You think he is gone! But no—in a instant his gray head appears, he swims to the wall, climbs up the side to a square hole which leads to a reservoir, and is at the top again in a moment, to claim his half rupee.

Next, perhaps, jumps his grandson, a naked imp of nine or ten. You shudder because the little fellow appears to have jumped too far, and to be in danger of striking the stone-work. But no! He misses the rocky side by less than a yard, arranges his feet and hands just as his grandsire did, and falls like a stone in the water. You wait a long time—one minute, two minutes—but the little round, bare pate does not appear. Will they make no effort to save him? Is the boy drowned? Not a bit of it! In another moment, the grinning imp, dripping with water, is by your side. It turns out there is in the well another communication with the reservoir, under the water, and to this the boy has dived, and thus come out; the silence and pretended alarm of those at the top being only another trick to excite sympathy and extract more money. Then, as fast as possible, the whole lot will begin to jump, pell-mell, on top of each other almost, through the openings,—up again, and down again—as long as there is a chance of extracting any coin from the strangers.

The village people do not seem to think the water at all spoiled for drinking purposes by being thus turned into a bathing-pool.—*Golden Days.*

—The chaplain on board one of our men-of-war tells how a chance ministration of his was directed to a good end. Observing a sailor one day overhauling his effects, he inquired: "Where, Smith, are those tracts I gave you the other day?" "Here they are," he replied, producing them, "all but that one on stealing; I gave it to Joe Miller. I never steal myself."—*Chicago Standard.*

—In Philadelphia women make a good living as professional "lampers." They contract to call each day and trim and keep in perfect order the lamps of the household. The metal, the chimneys, the shades, and the wicks are kept immaculate and the oil fresh, and the relief to the average housekeeper is worth more than the slight fee required.—*Philadelphia Record.*

TOO MUCH WATER.

Great Evil and the Remedy.

In a pamphlet written by Professor Hilgard, of the State University, the evils of irrigation without drainage are strongly presented. In lands containing a comparatively small amount of alkali, if irrigation is continued from year to year without drainage, the evaporation brings the alkali to the surface and the lands in the end are ruined. Even where no damage is caused by alkali, but where the land is level, water accumulates and comes to, or so near the surface, that crops cannot be raised. One of the most observant farmers in Owens valley recently said that some of the best land near Bishop Creek is already very seriously damaged by too much water. This land before being cultivated was covered with sagebrush; when cleared alfalfa was planted, and for several years it produced splendid crops. Now the soil is full of water to within a few inches of the surface and the alfalfa is dying out; this farmer thinks it will cost more to drain the land than it cost to clear it and bring water upon it. But the greatest damage is done where the soil contains alkali; by alternate wetting and drying of the surface the alkali is brought from deep in the ground and is left as a hard crust by evaporation. This goes on till at last the land becomes utterly barren and no vegetation will grow upon it.

Professor Hilgard says: "When plains of Fresno, Tulare, and Kern were first settled, it was often found in digging wells that no perceptible moisture existed at depths from thirty to forty feet below the surface. 'After the region had been irrigated here and there for several years, the level of moisture, and with it the water table, gradually rose by the leakage through the pervious bottoms and sides of the ditches, so that one half to one third of the water previously needed sufficed for a grain crop; and, as the ditches were increased in number and extended in length, the whole country gradually filled up from below, until now in any of the lower ground, e. g., near Fresno, water may be found at from three to five feet, and near the ditches frequently at the surface. The parched depths have ceased to exist, but now the superabundance of water threatens to force all the roots of trees and vines near to the surface, and by rendering it impossible for them to live at the greater depths in which they naturally would seek their nourishment in such pervious soils, they are confined to, and have to subsist upon, a relatively thin surface layer, even if no direct injury accrues fram the contact of water. Thus deep soils are rendered shallow, and whatever of alkali has accumulated within them during ages is brought near the surface, and will, unless forestalled, surely bring some or all of the evils so well set forth in the report of the Indian Rch Committee.

Fortunately the remedy is as yet within easy reach, provided those interested fully understand and promptly act upon the suggestions conveyed by common sense, as well as by the experience already had both in California and in India.

Whatever laws regulating irrigation are enacted, should simultaneously provide for a proper collocation and construction of the ditches or canals with respect to drainage, since otherwise no one whose land lies lower than that on which another can bring water will be safe from downright ruin. The loose and irregular manner in which ditches have been laid and distributed, will have to be rectified, at whatever expense may be required, for the protection of the rights of owners on the lower levels, and the sooner such a rational system is introduced the less will be the ultimate expense and damages. It may be that in bringing about this reform, some of what is now considered "vested rights" will have to be rudely shaken, in order that they may not become, more and more, vested wrongs toward the community at large. It is idle to suppose that California will escape the necessity of adopting, in the main, the principles which, after centuries of experience, govern irrigation in other countries; or that any custom that permits a wasteful use of irrigation water, to the direct or indirect detriment of others, will be permitted to prevail and assume a permanent form."

CROPS FOR ALKALI SOILS.

In alkili soils the formation of a surface crust must of all things be avoided. In other words, deep and frequent tillage is one of the foremost needs in such soils. And as this condition cannot be fulfilled in the case of broadcast crops, the conclusion is that broadcasting, and with it practically grain-growing, must ultimately be abandoned in the alkali regions, and hoed crops substituted, which will admit of the ground being kept in perfect tilth throughout the season.

"The condition of preventing evaporation from the surface is also measurably fulfilled by such crops as alfalfa, which not only thoroughly shades the ground, but in addition causes almost the entire evaporation water to pass up through its deep roots to the leaves, so as not to reach the surface at all. Such accumulation of alkali in and around the roots as can occur under such circumstances is too much diluted to hurt the plant. The fact that the alfalfa succeeds perfectly on ground too much charged with alkali to grow grain is notorious, only care must be taken to prevent injury to the root-crowns while the plants do not yet cover the surface, by timely irrigation."

Hemp, jute and ramie are suggested as good crops for alkaline soils. Ramie being a perennial the alkali would not interfere with the germination of its seed, and it would, like alfalfa, prevent the accumulation of alkali near the surface by so shading the ground that nearly all evaporation would pass through the plant itself.

"The culture of fruits, both large and small, that can be shipped in the dried condition, or in the shape of jellies etc., is also an available industry, scarcely yet touched in the alkali regions. Raisins and prunes, especially, deserve attention as pretty certain of success."

The points brought out by Professor Hilgard, and that should be steadily kept in mind, are:—That irrigation should not be done without some provision for drainage; this applies to all lands, but in a particular degree to lands containing alkali. That grain crops are the worst suited to alkaline soils, as these do not admit of the ground being often tilled. This objection would not appear to lie against corn. That deep rooting plants, such as alfalfa, and what are commonly called "root" crops are well suited to such soils, and that they are well adapted to fruit growing.

There is not much probability that the timber culture, desert land and pre-emption land acts will be repealed at this session of Congress. Conference committees were appointed from both houses to consider amendments, and these have disagreed. The session is now so far advanced that it is not likely anything more will be done.

The investigation of charges made against clerks of the Assembly appears to be very inefficient. The fact is fairly established that attempts were made to have some bills advanced and others retarded on the files; this is a serious crime yet no one is likely to be punished for it. If a large proportion of the members of the House were not men having no experience in legislation such gross frauds would not be attempted. Every member may easily keep the run of the files from day to day, and then bills could not be displaced unless the members themselves were a party to the crime.

It will be a sore grief to Queen Victoria if the rumors should prove true that there will be a divorce suit between her daughter Louisa and the Marquis of Lorne. The Princess never seemed to care much for her husband, she has evidently shunned his company since a short time after their marriage. At the time of the marriage it was said that Louisa preferred Lord Hartington, heir to the Duke of Bedford, but Hartington declined the honor. Poor Lorne has been snubbed unmercifully by his wife's relatives ever since the marriage, and Louisa is said to be a good deal of a shrew.

State Expenditures.

The general appropriation bill for the expenses of the State for the next two years foots up a good round sum. The estimates of the Controller of the money necessary to cover the items of an Appropriation bill are $3,073,940. The committee on Ways and Means has figured up $3,937,360. In addition to the above figures of the Controller, the estimated $2,800,000 for the schools, $400,000 for interest and $560,000 for the support of orphans, half-orphans, abandoned children and foundlings, aged persons in indigent circumstances and inmates of the Veterans' Home, which amounts are fixed. This makes a total of $6,833,970 as the sum to be raised for the next two fiscal years. The figures given by the Committee on Ways and Means increases this total to $7,697,360.

Of the great improvements going on in the southern counties of the State, San Bernardino is getting a good share. The extension of the Atchison & Topeka system of railroads has been mainly instrumental in securing the prosperity of San Bernardino; the Courier says:

"That the Atchison & Topeka system will extend their operations to San Francisco is now settled. Southern California will furnish the base of operations for the great march to the North.

Meantime, Southern California will be gird-ironed by trunks and local feeders, and San Bernardino valley will be especially well supplied with railroad facilities.

San Bernardino city as the headquarters and base of operations, will be benefitted to an extent, even during the present year, which the superficial observer will not discover until after the year is out. No city in California will be more influenced by the advent of these railroads to the State than San Bernardino.

We have already keenly felt the stimulus. Property has enhanced on an average 150 per cent. since the day the first stone was laid in the foundation of the depot. The population, if we include the suburbs touching the city proper, has increased fully 50 per cent. The population of the town and its immediate suburbs is, to-day, certainly over 6,000, perhaps 8,000. Three years from to-day, and in all probability it will reach 25,000, if the present influx of people and general development continue. And all this, we owe to our railroads; much of it to the fact that we have a system of great roads converging here, whose policy is to foster and build up local interests."

The whole southern part of the State must be benefitted by this railroad extension, and Owens valley with the rest.

By the death of Cardinal Jacobini the Pope has lost one of his wisest and ablest counselors. The Cardinal died at Rome last Saturday.

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.

Mineral Application No. 274.

UNITED STATES LAND OFFICE, BODIE, CAL. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the northeast corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence.

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 3 degrees 20 minutes E distant thirty-six chain; thence.

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence.

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D 3, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence.

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence.

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33;" thence.

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W, and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winters Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39, posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.

Mineral Application No. 275.

UNITED STATES LAND OFFICE, BODIE, CALIFORNIA, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 54 degrees 26 minutes W, distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty-two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west, ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 56 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W, and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

SHADE TREES.

Good, Thrifty Trees

One and One-half Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

☞ These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 3 feet high, prices on application.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, MARCH 5.....1887.

Eleven feet of snow lies on top of the snow-sheds at Cisco.

Mining location notices at the office of the INYO INDEPENDENT.

There is good demand for beef cattle in Nevada, and prices are advancing.

Mr. A. K. Briggs, of Bishop Creek, was at Independence at the beginning of the week.

According to the *Chronicle-Union* there is very little chance to travel in Mono county except on snowshoes.

Mrs. Druse was hanged at Herkimer, New York, last Monday for the murder of her husband, George Druse.

Erin E Pluribus, Unum go Bragh; remember the ball to be given at Camp Independence is for the benefit of the school.

Frank Lawrence has exchanged his house and lot in town for the farm lately occupied by Charley Green, near the railroad station.

Stecker and Weichart are doing the cabinet work in the rooms of the new Court House. The Sheriff and District Attorney have already moved into their new rooms.

A handsome cottage residence is being built by Mr. M. E. Gilmore, north of the residence of A. R. Conklin, Esq., on Main street. The building is now nearly enclosed.

Clerk Smith who is accused of falsifying the Assembly files is also accused of beating his wife as well as the Legislature. He has been dead beating the State for a living for years past.

District Attorney Forbes has gone to Bishop Creek on business, and will be absent a few days. Till his return the business of the office will be attended to by C. Mulholland, deputy.

Few men would care to offer $125,000 for a mare; yet this figure has been offered and refused for Maud S. Mr. Bonner, the owner of the mare, is a newspaper man, this is why he was able to refuse such a big price for her.

The United States Senate has passed a bill to check a system of robbery now widely practiced. The bill prohibits the mailing of newspapers and other periodicals containing lottery advertisements. This bill should become a law.

There is some reason to believe that Mr. Bertrand Rhine during his stay at the Bay has not been unmindful of the ladies in their wants of pretty things, and they will no doubt give him numerous calls on his return home, which is expected about the middle of this month.

Virginia City would be a nice place to visit just now. The *Enterprise* says: "C street, with slush in the center and mounds of snow, topped out with black sediment from the gutters, on either side, now presents rather a dilapidated appearance. The sleighing is about over, and wheeling has not yet come.

Sheriff Gregg is moving his family and household from Big Pine to Independence. The illness of Mrs. Gregg has hindered the removal till this time, but she is so far recovered as to be able to bear the trip. The family will occupy the house where ex-District Attorney Laird lived for several years.

One thousand acres of choice land for sale. No better grain or grass land in the State. An abundance of water at all times; a perfectly healthy location; title without a flaw. Five hundred acres or over, twenty dollars per acre; small lots, forty acres or more, thirty dollars per acre. Apply to the office of the INYO INDEPENDENT.

In Montana the wolves are descending from the mountains to the plains in great packs to feast on the dead cattle. They attack and kill all the live cattle they meet with, preferring them to the frozen carcasses. Most of the cattle left alive are too weak to defend themselves against the ravenous raiders from the mountains.

The Land Office will be in the building so long occupied by the INYO INDEPENDENT at the south end of Main street. Mr. Laird, the Register, has had the building thoroughly overhauled and repaired; the family moved into their new home this week. Mr. Laird has not yet returned, but is expected back about a week hence.

Henry George had one sincere admirer, or New Jersey had a very cranky crank. George Hutchins, of Camden county, died recently and willed his estate, valued at $30,000, to Mr. George for writing and publishing "Progress and Poverty" and other books on social subjects. It is not reported that Mr. George has made any objection to this progress from poverty.

The City Council of Los Angeles has determined to proceed at once with paving the streets. This improvement will be duly appreciated by those who have hitherto been forced to wallow through such mud holes as the streets become in rainy weather. The *Express* intimates that a few old fogies oppose this needed improvement. Such people are opposed to all improvements.

Frequent reports have recently been made of the prevalence of smallpox in Los Angeles. According to the *Express* the disease is not so prevalent as reported; that paper says there are a few cases of smallpox in the city of a mild type; and it would be but a reasonable act of caution on the part of parents to have their children vaccinated, and indeed all, old or young, who have not been vaccinated should take that precaution. Rumors have been circulated quite extensively for several days, greatly exaggerating the number of cases, and it is better that the public should know the exact situation. There has thus far been but one death. There is nothing at all alarming in this fact, as there are nearly every year a few sporadic cases of smallpox in most cities. The health officers are on the alert, and they will undoubtedly keep the few cases isolated and prevent a spread of the disease. At the same time the public should take such precautionary measures as medical science affords and as common sense dictates.

Especially should precaution be taken in the public schools. The Board of Education should instruct principals to require from scholars a certificate of vaccination from a competent physician, as a condition of attendance. An ounce of prevention is worth a pound of cure.

During the past few weeks grass has been making good growth on the open land in Owens valley, and cattle men report stock looking very well.

Train loads of excursionists continue to arrive in the State from the East. Most of these people are business men and capitalists. One party that arrived this week filled two trains and contained 500 people.

The Supervisors of El Dorado county have made an appropriation of one thousand dollars from the county treasury to cover the expense of writing and publishing a pamphlet on the resources of the county.

Terrible loss of life was caused by an earthquake in Italy on Wednesday of last week. The disturbance occurred chiefly around the shores of the Gulf of Genoa. Hundreds of people were killed and a vast amount of property was destroyed.

Good Trapping.

Last week Mr. H. Clark caught in traps, at his place three miles south of town, four coyotes, two wildcats and four skunks.

Unclaimed Letters.

The following letters remain unclaimed at the Postoffice at Independence: Miss Emma Christian, Jack Clark, M. S. Nixon, Richard D. Van Kluck, 2.

Changed Hands.

Mr. E. Robinson has sold out his butcher shop to Julius Roeper. Mr. Roeper is now in possession and will attend to all matters in connection with the business.

A Former Pastor Dead.

Rev. George Jennings died and was buried at Reno last week. Mr. Jennings served as pastor at Independence about ten years ago; he was a thoroughly good man; he was aged nearly seventy-four years, and of these over fifty were given to the ministry.

It is Needed.

Something that was very much wanted in the town is being supplied by O. I. Mairs; this is a Town Hall. It will be in part modeled after the style of the Opera House in Reno; there will be a stage with rooms adjoining at one end of the hall; so that accommodation can be afforded for theatrical performances, balls, meetings or other public gatherings. The hall faces the Court House on Main street, and will be a nice improvement to that part of town.

A Valuable Report.

The report of Professor Hilgard, of the State University, on the viticultural work of 1885-6, ought to be in the hands of every person in the State who attempts to make wine, or even grow grapes. The subject of wine making, now of such vast importance to the State and destined to become still more so, is treated in a thoroughly scientific manner, and yet so plain that any person of ordinary common sense may understand it. Professor Hilgard by his labors and reports is doing as much as any other living man to benefit the State.

Restoring Shade.

Everybody is busy planting trees in town; At Camp Independence trees of four or five years growth are dug up; these are brought in and planted along the streets and in two or three years will replace the trees destroyed by the big fire. Most of these trees are locusts, they make very rapid growth and afford good shade. Independence was rich in beautiful shade trees before the fire, and the citizens deplored their destruction almost as much as the loss of property.

The Mating Season.

Surely the mating season is at hand, the signs are unmistakable. In the spring a young man's fancy lightly turns to thoughts of love, and the gay trio of bachelors, Lank, Kehoe and Barnes, are all fixing up as if they meant business. All three have been busy for weeks past, building new, repairing old, painting, paper hanging and new furniture inside; flower beds, fruit trees and vines outside; the boys must intend getting married; for even in Eden "Man, the hermit, sighed till woman smiled." The Justice will agree to perform the ceremony free of charge to the first of the three who gets married.

Report of State Mineralogist.

The report of State Mineralogist, William Irelan, Jr., is a great improvement on the reports hitherto issued from the Mining Bureau. Mr. Irelan wastes no time or space on names and descriptions of "minerals" that are of little or no value, and about which miners know little and care less; but he tells how mines are actually worked, including pumping machinery, ore crushing, concentrating, amalgamating and other matters of interest to practical miners. The smelting of silver bearing ores is not described in the report. This is a subject that would be of much interest to miners in Inyo county and other parts of the State. Doubtless Mr. Irelan will deal with it in some future report.

Shorthorns.

In a communication to the *Stockman*, Mr. W. J. Marsh, of Nevada, states that during the year 1886 he sold eleven head of young animals from his herd, the average price being $300 each. Recently eight animals from the same herd have been sold in Inyo county. Andrew Clark, of Bishop Creek, took three heifers and a bull, all less than one year old, price, $350 each. Oscar Hilton took a bull, less than eleven months old, for $250; Mr. Turner and S. J. Newlon each took a bull, same age and price. These animals will tell on the stock of Owens valley. Last Spring Mr. W. L. Hunter, of Georges Creek, got a three-year-old bull from the herd of Mr. Marsh. Mr. Hunter has now several calves from this bull, and their very great superiority to the offspring of the ordinary "scrub" bull is seen at a glance.

An Appropriation Granted.

Mr. Gould, our Assemblyman, writes that the general appropriation bill as it passed in the Assembly, contains an appropriation of four thousand dollars for Agricultural District No. 18. This is the new district composed of the counties of Alpine, Mono and Inyo. The appropriation is to cover two years, being two thousand dollars for each year. As compared with the aid given to other districts this appropriation is liberal enough. The bill has yet to pass the Senate, but is likely enough to go through without this item being changed. These three counties are probably the only ones in the State that have never had any benefit from the appropriations made for district fairs, and in all probability the Assembly gave some consideration to that fact when this item was inserted in the bill.

LOOKOUT MINES.

Rich Developments. Men Wanted.

Very good reports of mining interests come from Lookout. The late snow storms have blocked the roads so that teams cannot haul ore to Keeler. At the Modock mine thirty-five tons are sacked ready for shipment and about ninety-six tons more are packed to the furnace. At the end of December a prospect drift was started from tunnel No. 3; on Monday a week ago this drift broke into a chamber of high grade silver and lead ore; at date of report this body had been cut into a distance of thirteen feet with no sign of a wall and very little waste in the ore. This is the most favorable looking prospect seen in the district since 1876. The furnace is prevented from starting up only for want of coal; it will not be possible for teams to reach the coal for three weeks yet. At the Fitz mine three men are taking out ore; at the Kentuck mine three men, and at the Modock mine seven men are at work. In each of these mines several more miners could be employed but there are no idle men a the camp.

Smith and Wallace are working the Minnetta mine with five men; they are taking out very rich ore, all of which will be shipped away as soon as roads are open.

A Colonization Scheme.

During the past few months a number of people from Virginia City have visited Owens valley with a view to settle here. Several have already settled and are now owners of homes. A movement is now on foot to promote the location of a colony; the *Enterprise* says:

"Several prominent Comstockers are working on a scheme to establish a colony of 20 families in Owens valley. The promoter will entertain the applications of only those heads of families who can put up $1,500 each, the idea being to raise $e0,000 and take up in the valley named 20,000 acres of land. At least $18,000 of the money thus raised is to be expended in constructing a large irrigating ditch, the balance to go toward other improvements for the common good of the colonists. The scheme is a practical one, and if properly engineered ought to win."

These people can find land enough on the east side of Owens river from Independence station southward, where they can all locate near each other. Samples of the soil have been analyzed by able agricultural chemists and the land has been examined by practical farmers and orchardists and all agree that it is of first class quality. An abundance of water can be taken from the river at a very moderate cost.

Working Tailings.

An experiment has been made in the Douglass mill, at Dayton, Nevada, in working over tailings with electricity by a process invented by Doctor Rae. In his report of the experiment W. A. Rulison, Superintendent of the mill, says:

"Number of tons worked (old method) 17; bullion produced, 611 50 ounces; fineness, 52-100; value, $41 09; fineness of gold returned, 30-1000.

Rae process, 52 tons produced 1219 80 ounces of bullion, the fineness of which was 115-1000, valued at $181 38. Increase in bullion product over old process, 47.11 per cent.; increase of fineness of bullion, 63 1000; fineness of gold returned, 4-1000; gain on returns of gold product over old method, 33.33 per cent.; saving of quicksilver, 83.33 per cent.

This test was made by daylight, in order to guard against any mistakes that might occur during the night, and also to make it possible to give it my attention.

In conclusion, I unhesitatingly pronounce the trial a most perfect and emphatic success."

Would Fight For It.

A few days ago two young Germans called at the printing office at Independence and said they had come to stay in Owens valley. The question was asked "Suppose that such land as you see near Independence could be found in Germany, where people could have it for settling upon it and improving it, what do you think would be the result?" Promptly one of the young men answered "The people would fight for it." The father of this young man owned forty acres of land in Hanover; he sold it, getting two hundred dollars per acre for it, and now is here with his three sons, two of them being aged about fourteen and twelve respectively. They have rented a place near Independence and are now all busy with plowing and other work. They will select land for themselves and make their own home where they can move at the beginning of another season. These people will make excellent citizens.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Indispensable to the Toilet.

Darbys Prophylactic Fluid cures chafing, eruptions, and inflammation of all kinds; cures inflamed or sore eyes; relieves pains from bites or stings of insects and sore feet; destroys all taint of perspiration or offensive smell from the feet or any part of the body; cleanses and whitens the skin. Used as a dentifrice it purifies the breath; preserves the teeth and cures toothache; sore gums and canker. A little of the Fluid in the Water used in bathing is very refreshing and especially beneficial to the sick.

Should Try Owens Valley.

A bill has been introduced in Congress appropriating money to pay the cost of boring 3,000 artesian wells in various parts of the United States. Should this bill become a law one or more of the wells should be bored in Owens valley. There is no other region where there is greater certainty of finding good wells, nor any where they would do more good.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

In Preparation.

An entertainment will be given at Easter by the children of the Sunday-school at Independence. Every spare hour will be devoted to preparation. The school is in a prosperous condition, and no more pleasing sight can be found than the bright, happy faces of the children who meet in the church every Sunday morning. Every parent should go and share the enjoyment.

MISCELLANEOUS

SIMMONS LIVER REGULATOR

Unfailing Specific for Liver Disease.

SYMPTOMS: Bitter or bad taste in mouth; tongue coated white or covered with a brown fur; pain in the back, sides, or joints—often mistaken for Rheumatism; sour stomach; loss of appetite; sometimes nausea and waterbrash, or indigestion; flatulency and acid eructations; bowels alternately costive and lax; headache; loss of memory, with a painful sensation of having failed to do something which ought to have been done; debility; low spirits; a thick, yellow appearance of the skin and eyes; a dry cough; fever; restlessness; the urine is scanty and high colored, and, if allowed to stand, deposits a sediment.

SIMMONS LIVER REGULATOR

(PURELY VEGETABLE)

Is generally used in the South to arouse the Torpid Liver to a healthy action.

It acts with extraordinary efficacy on the

LIVER, KIDNEYS, AND BOWELS.

AN EFFECTUAL SPECIFIC FOR

Malaria, Bowel Complaints, Dyspepsia, Sick Headache, Constipation, Biliousness, Kidney Affections, Jaundice, Mental Depression, Colic.

Endorsed by the use of 7 Millions of Bottles, as

THE BEST FAMILY MEDICINE

for Children, for Adults, and for the Aged.

ONLY GENUINE

has our Z Stamp in red on front of Wrapper.

J. H. Zeilin & Co., Philadelphia, Pa., SOLE PROPRIETORS. Price, $1.00.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

The Man Who Spends Money

For advertising in newspapers in the hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

FINAL HOMESTEAD PROOF.

AGENT FOR W. R. STRONG & CO.

S. A. DENSMORE, Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, STOUTLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, Ill., writes: "You ask what I think of the Washer I bought last summer. Ist. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $1000."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for it the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

THE BUBBLE AT THE BRIM.

Oh, see it gayly smiling and lightly dancing up,
How winsome and beguiling it peeps across the cup!
Beware, or 'twill enchant you as it beckons from the rim—
"Come, kiss me, darling, can't you?" laughs the bubble at the brim.

How tenderly it flushes, how modestly it flies!
It apes a maiden's blushes when dreams of love arise;
It softly sings and glistens, like the shining seraphim—
But woe to him who listens to the bubble at the brim.

Perhaps 'tis beauty's finger that fills the rosy glass;
How sweet it is to linger, how hard it is to pass!
Tis late to curse the revel when the lights are burning dim,
You are bartered to the devil by the bubble at the brim.

—Samuel Minturn Peck.

Pulmonary Diseases in Berlin.

The death rate from pulmonary diseases increases alarmingly in Berlin from year to year. The climate is certainly unfavorable for all with the least tendency to weak lungs. The atmosphere has a greater percentage of moisture than that of almost any other city on the continent. Rain and fog alternate. In the early morning the mist is so dense that one's clothes become damp and his skin unpleasantly moist. The streets, even in the hot months of summer, are seldom dry, but usually dank and wet, emitting a vapor which frightens the weak lunged. Catarrh has been called the curse of America, but Berlin people easily hold their own in that complaint. It is safe to say that every one has a cold from the beginning of October till the end of April, and even during the summer months, owing to the changeable weather, few are entirely exempt. Though the weather has been exceedingly damp, as already stated, no snow has yet fallen, and winter underclothing has been unnecessary. Last year several inches of snow lay on the ground on Thanksgiving day.

The country for miles about Berlin is flat and unbroken as a western prairie, and the ground being very sandy—Berlin, in fact, is built upon sand—the roads are very heavy where not well cared for, which, however, is the exception rather than the rule. The statistics of the Moabite hospital, recently published, show that no less than one-fifth of the inmates are consumptives. In this hospital alone the number of lung diseased patients reached 550, being seventy-four more than last year, and 13.5 per cent. of all who had been under treatment against 10.5 per cent. in 1885. The death rate rose as high as 42.2 per cent., only 33 1-3 per cent. being discharged as cured. Upon the whole, the number is not encouraging for the inhabitants of Berlin, and certainly deplorable considering the annual increase of the population.—Berlin Cor. New York Tribune.

Mechanical Salutations in Germany.

Nothing can possibly be more mechanical than the way the Germans in ordinary life make use of these expressions, especially domestics and employes of hotels and public places of all kinds. Being in your chamber in a German house, there is a rapping at the door loud enough to wake the seven sleepers. You open it. It is only the chambermaid. She stands bolt upright and as rigid as a corpse. Her face is the utter vacuity of expression. She says "Guten tag" or "Guten abend" in a sudden way that is not exactly explosive. It gives you the impression that she has dropped something very heavy, and you involuntarily recoil and look down to see what it is.

If you go to buy a glass of soda water in the Unter den Linden the woman in the kiosk fires off an unexpected "Guten tag" to you. If you enter a shop it is flung at you on all sides. So also when you go in or out of your hotel, when you go to public institutions, such as baths, or when you go into the hotel dining room. Everybody utters the salutation appropriate to the time of day; and, as the employes are numerous, you are thundered at in front and rear and on either flank till your entrance or exit seems like the advance or retrograde movement of the light brigade. It is simply perfunctory. Nobody smiles; no one moves the body or nods the head, as in France or in Italy. In Austria it is even more so. The salutations of employes are more numerous and quite as mechanical. The Hungarians are somewhat more mobile, but, except in the cities, are neither refined nor polite.—San Francisco Chronicle.

Ella Wheeler Wilcox.

"She writes with the utmost facility; I never saw anything like it," said Mrs. Leslie, from among her books and letters as she sat at her great desk, at once the very picture of businesslike industry and the figure of a woman of fashion. She sat upon either a platform or very high chair, and was clad in a rich and striking costume. She wrote constantly, yet listened and put in a pertinent sentence here and there in the interview between the poet and reporter. She called her guest "Ella," and they were on delightful terms of companionship. "She can write in a room crowded with persons all talking," she added.

"Yes," said the vivacious poetess, "I learned to do that at home. I was brought up in a humble home and wrote in the sitting room, where it was simply a question whether my comfort or that of the rest of the family was to be considered. I easily acquired the faculty for writing in a room in which the children were at play and the older folks were talking or reading or at work. I began to write at 14, you know. Not long ago I was visiting a friend in Connecticut and there were several persons in the room, but none expected anything of me, so that when I was seized with an idea for some verses I cleared a little space on the center table and sat down and wrote my poem."

"And was it finished without revision?"

"Oh, yes; I seldom need to alter what I write. I have what I want to write well in mind, and I write it as I have formed it mentally."—New York Sun.

A Poet's Precocious Offspring.

Juanita Miller, the 6-year-old daughter of Joaquin Miller, the poet, is an unusually interesting little maiden, gifted by nature with a truly remarkable memory. She can repeat, without changing or misplacing a single word, every line which her father has ever written. This is not done in parrot fashion, as would be the case with most children. Her declamation is clear, comprehensive and charming in every respect. She has a quaint manner and an odd way of making observations upon people and things which evinces thought far beyond her years. As a matter of course she is the special pride and admiration of her father, who never tires of descanting upon her perfections and achievements. Juanita and her mother are passing the winter with Joaquin Miller at his log cabin, beyond the Boundary and Sixteenth street, Washington.—Pittsburg Dispatch.

A Triple Array of Figures.

The St. Louis type foundry proprietor says: Here we are on the eve of 1888, which creates a triple demand for the figure 8. This triple use of figures in the annals of time will not occur again till 1911, 1999, 2000, 2022, 2111, 2122, 2202, 2212, 2222, etc.—Detroit Free Press.

England's Wheat Imports.

England, it is stated, now imports from Russia 5,000,000 hundred weight of wheat, against 10,000,000 fifteen years ago. In the same interval the import from America has increased from 12,000,000 hundred weight to 20,000,000.

THE NEW SOUTH.

WHAT JUDGE KELLEY SAYS OF ITS WONDERFUL DEVELOPMENT.

A Look at Nashville and Chattanooga. Railroads and Mineral Regions—Cotton Raising and Its Drawbacks—An Incident at Anniston—Towns.

Judge Kelley has come back from his southern trip, full of its wonderful development. He says the new south is entirely different from the south of twenty years ago. Said he:

"Certain parts of the south are going ahead faster to-day than in any parts of the north. The country about Birmingham and Anniston is on the boom, and their appearance is that of the fast growing western frontier town rather than the old villages of the south. Nashville is a magnificent city. Chattanooga has, I think, the largest tannery in the world, and is doing a great deal of manufacturing. It ships its lumber in every direction, and it has all the enterprise of a northern city. About Chattanooga the farmers are making a great deal in the raising of fruit, and it is a curious thing that on one side of Mission ridge there are vast strawberry beds which run up the side of the mountain, and over the hill are great fields of grapes. These strawberries are shipped all over the country by the car load and by train loads. They are eaten in Cincinnati, Cleveland and Chicago, and, coming as they do early in the season, they bring high prices. I cite this as an example as to how the south is investigating its resources. The land will raise something else than corn and cotton, and the people are beginning to find it out."

DEVELOPMENT OF THE COUNTRY.

"How about railroad building?"

"Several thousand miles of railroad were built in the south during the past year, and everywhere the railroad goes the country develops. In the newly developed part of the south the condition of the lower class is rapidly improving. The laborers of Chattanooga, Birmingham, Anniston and the fast developing mineral regions of the south live in good houses, and they make fair wages. I estimate that one bachelor laborer is of more good to the storekeepers of the southern community than four families who are engaged in the work of raising cotton. I assert this without fear of contradiction, and am able to maintain it. The south has been divided up into small farms and these farms are almost universally devoted to cotton raising. Each farmer's product amounts to about one or two bales a year, seldom more than two and often not more than one. He sells these bales for about $40 apiece, and these $40 constitute his annual income and support. Long lines of these poor farmers come to market with their yearly load of cotton. Sometimes they have two steers attached to a cart, sometimes a mule and a steer, and at other times a horse. The head of the family drives the cart, back of him is the bale of cotton, and behind in the wagon or cart sit the women of the family.

"I saw hundreds of such scenes and I found that the women of the family always come along. This was in order that they might lay in their yearly supplies of clothes and provisions. This $40 represented the entire money outlay for the year, and their entire purchasing power for household conveniences. Hence they came along to advise their husbands and fathers as to the use of the money.

A BITTER COLD NIGHT.

"One night that I spent at Anniston was bitter cold. A large number of these small planters and their families had come in to sell their cotton, but they had arrived too late for the dealers to buy. They were too poor to go to a hotel, and they had to sleep in their wagons or huddle around a fire which they kindled out doors to keep themselves warm. Some of these farmers travel twenty, thirty and forty miles to market. The roads are not good, as there is little intercommunication among them. The cotton trip is the big trip of the year, and, I doubt not, is talked of for weeks before it is undertaken. The large landowners, who, in some cases, rent out small farms to these planters, graduate their charges and the expenses of raising by the extent of the crop, and, as a rule, it makes not much difference whether the crop amounts to five bales or three. The poor farmer gets enough to live upon, and this is about one bale. Now, a laborer at $1 a day will make $300 a year if he works steadily, or, even in a slipshod way, he is sure to make $120. This, as a rule, he spends, and this amount is three times that of the average small farmer."

"How about the new towns in the south?"

"They are growing up along the different lines of road, and they are showing all the signs of modern civilization. Many of the new store buildings which are erected are of brick, and I found good churches and schools in many of them. In Anniston I noticed the children going to school. They seemed as well dressed as our northern little ones, and I visited a number of both white and colored schools and found them very well conducted."—Frank G. Carpenter in Cleveland Leader.

"Horse Bread" in Sweden.

Horse bread is still commonly made in Sweden. It is still commonly made and used in Tyrol, and in certain parts of Switzerland—the Engadine, for instance. Your driver stops at a roadside inn, and, before he buys anything for himself, he buys for his horse a large cake of brown oat bread, circular, flattish, the size and shape of a Yorkshire yule cake. The strong, quiet, steady horse—or mare very likely—knows well what all this means; looks on with eager eyes as he slices the cake into strips; munches slice after slice with keen enjoyment; and finally, perhaps, lays its lips upon his palm to suggest the possibility of another loaf. Some drivers, indeed, themselves desirous of a meal, are content to crumble the bread into a trough; and in that case the horse will not only eat all the large pieces, but will with teeth and tongue take up every morsel and crumb that strews the floor of the trough. Such are his views as to the merits of oaten bread.—Notes and Queries.

A "Humaniphone" at a Fair.

At a recent church fair in Worcester there was great curiosity to see and hear the new musical instrument, the humaniphone, which was exhibited in the large anteroom of the hall. The instrument proved to be young ladies representing the tones of the scale, arranged behind a screen, showing only their heads and shoulders. They wore white masks reaching to the mouth, and around the neck of each was suspended by a ribbon the number of the scale represented. A young lady stood in front, who, with a wand, played tunes by pointing to the one whose number was the tone wanted, which was promptly uttered. Rounds and other pieces were sung, making a unique and amusing affair.—Boston Transcript.

The Bull's-Eye of the Nation.

Many epigrammatic things have been said of the capital of the nation by the statesmen who have been lucky enough to be sent there by their constituents; but to Congressman Tim Campbell has been awarded the credit of describing the home of congress with a piquant and suggestive terseness that is unique. "Washington," said the leader of the Eighth district the other day, "Washington, sir, is the bull's eye of this nation, and you aim high when you want to get there."

THE INDUSTRIAL WORLD.

—It cost $300,000 to harvest the immense cranberry crop around Cape Cod (Massachusetts) this season.

—The culture of tobacco in Germany is progressing, 1,986,597 acres having been planted this spring.

—It is estimated that 300,000 head of mutton sheep have been driven from Oregon this year to Wyoming and Nebraska to be fattened for the spring market.

—The census of the Island of Cuba shows "1,200 sugar plantations, 5,000 tobacco plantations, 160 coffee plantations, 25 cocoa plantations, 5,000 grazing farms, 20,600 small farms, 90,000 warehouses, factories, etc."

—Persons who are undertaking to raise carp in artificial ponds must be careful to keep other kinds of fish as well as aquatic animals and turtles out of them. During the past summer the young carp in many places have been destroyed by the above-named creatures.—*Detroit Tribune.*

—Prof. Roberts, speaking of the great efficiency of moderan labor-saving implements and machines, says: "The boy of to-day, with his sulky-plow and self-binder, can rob the soil of more plant food in a year than his grandfather could in all his lifetime, though his muscular grandfather might have carried off with ease two such boys, one under each arm."—*Chicago Times.*

—The Territory of Alberta, in the Canadian northwest, contains, it is computed, 76,325 cattle, 10,025 horses and 21,300 sheep. Thus, at $40 per head, $3,053,000 is invested in cattle, $601,500 in horses at $60 per head, and $85,200 in sheep at $4 per head. This is a very good beginning, considering it is only three or four years since the first attempt was made to establish ranches in the territory.

—According to the crop report issued by the Department of Agriculture at Washington, the largest yield per acre of buckwheat during the past season was in the New England States, where as much as twenty bushels per acre was obtained. Maine and Vermont each produce as much as all the rest of the New England States together. New York and Pennsylvania grow two-thirds of the product of the United States. The entire crop for the country is 11,000,000 bushels, and the average yield per acre is thirteen bushels.

—An idea of the extent of the milling business at Minneapolis, Minn., can be got from the following extract, taken from the *Northwestern Miller*, of November 3: "The flour output touched high figures last week, being the largest for any single week of the year—157,270 barrels, averaging 26,211 barrels daily, against 90,500 barrels for the preceding week, and 161,650 barrels for the corresponding time in 1885. The same number of mills (nineteen) are in operation this week, and the product promises to reach as high a point as last week. The daily output is fully 26,000 barrels. Another 1,500 barrels will be added to the active list next week."

Old 'Squire Pollock gave out "pussley" and the new teacher spelled it "purslane." "Set down," said the 'squire, and how everybody did yell.—*Burdette.*

—Country Uncle—"Next summer, Fannie, you must come out and spend a month with us on the farm, and see us every morning go out into the field with our hoes on our shoulders." Fannie—"Humph, that's the last place in the world I'd think of wearing my hose."—*Texas Siftings.*

—Catharine Owen has published a book called "Ten Dollars Enough." She may think so now, but by the time she gets all the jet trimming and stuff for the overskirt she will find that about ten dollars more is necessary, not including the dressmaker's bill. Ten dollars is enough for the material, but the trimming and making cost like sixty.—*Norristown Herald.*

—"Bessie, I hear your sister is sick. What ails her?" "I don't know, ma'am. May be it's the diploma." "The what, child?" "The diploma. I heard mother say that she took it at school"—*Philadelphia Call.*

—"The shades of night were falling fast," read the teacher, "what does that mean?" And the smart bad boy reckoned "the women were pullin' down the blinds," for which he got ten minutes in the merry birch woods.—*Burdette.*

AN INVESTIGATION INTO THE LEGAL STATUS, FAIRNESS AND HONESTY OF THE LOUISIANA STATE LOTTERY COMPANY.

NEW ORLEANS, (La.) December 15.

California has been a large patron of the Louisiana State Lottery. It may be added, parenthetically, that it has been also particularly fortunate in its investments in this direction, winning many of the capital prizes. The chances of winning in the schemes of this company are thoroughly understood by its patrons. It would be a waste of time and of space to analyze the schemes; the only questions that interest the lottery ticket-holder are: Is the scheme honestly drawn? and, Is the company financially responsible? To satisfy itself on these points a member of the *Chronicle* staff was sent from San Francisco to this city to investigate the affairs of the Louisiana State Lottery Company, and to witness the extraordinary drawing which took place yesterday.

LEGALITY OF THE LOTTERY.

The first duty of the *Chronicle* reporter was to ascertain the legal status of the concern. "Does it have a legal existence?" was the question he put to a leading member of the Louisiana Bar, and a gentleman who will soon occupy a high judicial position in the State.

"Of course it has," he replied very promptly. "Its franchise is now unquestioned in law. In 1868 the Legislature of Louisiana enacted a law entitled 'An Act to increase the revenues of the State and to authorize the incorporation of The Louisiana State Lottery Company, and to repeal certain Acts now in force.' This Act provided that no foreign lottery tickets should be sold within the State, and gave to certain citizens named authority to organize a corporation 'to protect the State against the great losses heretofore incurred in sending large amounts of money to foreign countries for the purchase of lottery tickets, to establish a solvent and reliable home institution and to insure perfect fairness and justice in the distribution of prizes.' The capital stock was fixed at $1,000,000 in shares of $100 each. There were provisions for a Board of Directors and all the corporate rights to sue and to be sued, etc. The duration of the lottery was to be for twenty-five years. It was to pay $40,000 a year to the educational fund, and was required to give bonds to carry out these provisions. The Constitution of Louisiana adopted in 1879, touches the lottery question as follows:

ARTICLE 167. The General Assembly shall have authority to grant lottery charters or privileges; provided, each charter or privilege shall pay not less than $40,000 per annum in money into the treasury of the State; and provided farther, that all charters shall cease and expire on the 1st of January, 1895, from which time all lotteries are prohibited in the State.

The $40,000 per annum now provided by law to be paid by The Louisiana State Lottery Company, according to the provisions of its charter granted in the year 1868, shall belong to the Charity Hospital of New Orleans, and the charter of said company is recognized as a contract binding on the State for the period therein specified, except its monopoly clause, which is hereby abrogated, and all laws contrary to the provisions of this article are hereby declared null and void; provided, said company shall file a written renunciation of all its monopoly features in the office of the Secretary of State within sixty days after the ratification of this Constitution.

These conditions were promptly accepted by The Louisiana Lottery Company; indeed, this constitutional provision guaranteed the Company exactly what it was contending it possessed—a contract with the State of Louisiana. This position has been further strengthened by a decision of the United States Supreme Court rendered within a few days. An effort was made to tax the lottery company under an act taxing stockholders in corporations for State and city purposes. This tax the company resisted, on behalf of its shareholders on the plea that the Company had a valid and bona fide contract with the State, and that it commuted the whole tax by the payment of $40,000 a year to the Charity Hospital. This plea was supported by the United States Supreme Court, which holds that the lottery company does have a legal and binding contract with the State of Louisiana, and that any attempt to extort from it a sum in excess of the $40,000 is illegal. This decision, however, carries with it a benefit to the Louisiana Lottery something more important to the managers than the mere saving of dollars and cents—recognition by the laws of Louisiana and of the nation as a corporation engaged in a legitimate business under a legal and valid charter. This recognition of the validity of contract gives The Louisiana State Lottery what no lottery has ever had in America since the days of Washington and Jefferson, when the Presidents were authorized to draw lotteries for the benefit of the national capital—a legal existence for the period of its charter.

A RECOGNIZED INSTITUTION.

The legal status of the Louisiana State Lottery is thus clearly and indisputably established. One cannot long remain in New Orleans without discovering that it is one of the recognized institutions of the city, and one that possesses the fullest confidence of the people. Whatever the rest of the world may think of lotteries, New Orleans believes in them. Interviews with the Presidents of the leading Banks, merchants and planters, not only proved this, but the further fact that these men have faith in the honesty of the management of the drawing and the perfect solvency of the institution. Indeed it is generally asserted that the Louisiana Lottery is stronger than any bank in the South, and all the banks cash its prizes at sight. Its stock, which is regularly quoted on 'Change, sells at $550. Its par value is $100. The management comprises the foremost citizens of Louisiana, financially and socially considered—men who are open handed, broad and liberal.

C. Kohn, President of the Union National Bank, said: "I am not interested in lotteries in any way, and am opposed to gambling in any form or guise it may take. I do not think gambling should be encouraged, but if ever an institution deserved the friendship of a people, The Louisiana State Lottery deserves the friendship of the people of this section. It has done, and is constantly doing, a great work for humanity. No one can imagine the far-reaching charity of that institution. Its vaults are always open to the poor and needy. It is a rich corporation, perfectly responsible, and conducted with the strictest integrity.

J. H. Oglesby, President of the Louisiana National Bank, a conservative, careful business man, who does not believe in lotteries, said: "The company is thoroughly responsible, is carefully and honestly conducted."

A. Baldwin, President of the New Orleans National Bank, said that the managers of the lottery were thoroughly honest men, responsible and charitable almost to a fault.

P. O. Fazende of the banking house of Fazende & Soixas, said: "There is no stronger or more responsible corporation in America than The Louisiana State Lottery Company. The standing of the managers in the community would preclude the idea of dishonesty in connection with it. It could not afford to be dishonest. Its very life depends upon its honesty. It is strictly honest, and has the full confidence of our people."

These sentiments were expressed by every prominent man seen by the *Chronicle* reporter, and his interviews covered fifty different persons, in every walk of life. Not one man was found who had an evil word for the Lottery, though nearly all deprecated the drawing of lotteries.

EXTRAORDINARY DRAWING.

Satisfied as to the legal and financial status of the concern, the reporter determined to investigate the honesty of the Drawing. This was an event in New Orleans. It took place in the Academy of Music which had been specially engaged for that purpose. It was an extraordinary drawing, the prizes aggregating $522,500, including a Capital Prize of $150,000, one of $50,000 one of $20,000, two of $10,000 and four of $5,000, with many smaller ones. The drawing of this lottery was wholly in the hands of General G. T. Beauregard of New Orleans and General Jubal A. Early of Virginia. The management of the Company had absolutely nothing to do with it. The preparations began on Monday and were not concluded until Friday. The scheme was based on a representation of 100,000 tickets, against which 87,215 prizes were to be drawn. Then there were 1,300 Approximation Prizes, not drawn from the wheel, making a total of 2,197 prizes. The numbers were printed on blue paper measuring two and one-half by one and one-half inches. These had to be carefully counted from 1 to 100,000. Then they were rolled up tightly by means of an instrument, and then inserted into a small rubber tube. The prizes were also printed in bold figures and similarly enclosed in tubes. This count consumed five days and was conducted by Generals Beauregard and Early, who were assisted in their laborious task by a number of ladies of New Orleans, whose families were reduced in circumstances by the war. The work was carefully, thoroughly and conscientiously performed. No mistake was possible. Every number was there beyond a doubt. When the count was completed the tubes containing the numbers were put into bags, which were sealed with the autographs and private seals of Generals Beauregard and Early. These bags were placed in a box and stored in a vault. The tubes containing the prizes were similarly sealed and stored. Yesterday these bags were conveyed to the Academy of Music and one at a time opened by the Commissioners, and as opened their contents were placed in a large wheel. The prizes when opened were placed in a smaller wheel. Everything was now in readiness for the drawing, toward which at least a quarter of a million of people looked anxiously and hopefully. The wheels are made with glass sides. The one containing the numbers, which is much the larger, was placed on the left of the stage and was in the special and personal charge of the venerable Confederate cavalry leader, General Early. The smaller wheel, with the prizes, was on the right of the stage under the honest and vigilant care of another distinguished soldier and eminent engineer, General Beauregard. There were present on the stage several clerks, who registered the prizes as they were drawn, four sub commissioners, Messrs. Rousseau, Buckard, Hodgson and Roux, and reporters of the daily press. At precisely 11 o'clock the drawing began. The tubes were taken from the wheels by blindfolded boys. There was really no occasion for this precaution, since the numbers were thoroughly concealed in the tubes, but the Commissioners continue the custom. The boys are brought from a local asylum and are well paid for a few hours' work. The scene was an interesting one and especially to a student of human nature. The house was fairly filled, many of those present being strangers who wished to satisfy themselves as to the honesty of the drawing. Many, however, had a personal interest in the result. These held in their hands lists of their numbers, which they anxiously scanned as the drawing proceeded.

LUCKY NUMBERS.

Those on the stage were there clearly in a business capacity. They had no interest in the drawing, save to see it honestly done. With the audience it was different. Anxiety and expectancy beamed on every face. The ladies filled the boxes and the balcony and leaned forward in their eagerness to catch the numbers as they were announced. They seemed to forget everything about them. One clergyman was present, and the audience included all classes of people. As General Early announced the first number, 75,097, a hush fell upon the audience. General Beauregard turned his wheel, and the boy having drawn a prize, the General said "$100," which was the prize given for that number. For several minutes the prizes ranged from $100 to $500, when General Early said "8712," and General Beauregard arose, and said, in a distinct and clear tone, "$10,000," and a murmur passed through the audience. Who was the lucky holder?

The wheels were turned, to thoroughly mix the tubes, after drawing twenty numbers, and the boys were changed at the end of every sixty numbers.

The drawing is a somewhat monotonous affair, and lasted until three o'clock—four hours of diligent work, diffusing happiness and wealth over the nation. The audience was evidently interested solely in the grand capital prize, and when ticket 84,544 won $5,000, and 56,794 brought some happy holder $5,000 more there was not a murmur, but soon a change came upon the assemblage. General Early said "No. 97,409." General Beauregard slowly arose and deliberately announced: "$50,000." A spontaneous applause went up, a good luck wish to the happy holder. So the work went along until No. 93,174 won the grand prize of $150,000. That ended the interest on the part of the audience which quickly dispersed, leaving the Commissioners alone to complete the work. No one who saw the lottery drawn would question the honesty of the Commissioners. No one who has seen the handful of prizes sitting alongside of the twenty bushels of numbers, representing the possibilities of winning, would wonder whether the lottery was honestly drawn. Still there might have been fraud in the large wheel, and to satisfy himself in that respect the *Chronicle* reporter proposed to ascertain if the full 100,000 numbers were in the wheel. As soon as the drawing was over the control of the wheel was passed over to him. One hundred of the tubes were counted out at a time until 1,000 had been counted. These were weighed and on the basis thus secured the contents of the wheel were weighed and found to be correct to the weight of a hair. It satisfied the investigator beyond a doubt that not a single number in the 100,000 was missing at the drawing, simply confirming his previous impression.

FORTUNE'S FAVORITE.

There was no question as to the fairness and honesty of the drawings. When the tubes had been weighed they were returned to bags, sealed by the Commissioners and by them locked up. The prizes and numbers were verified to-day by Generals Early and Beauregard, and then published and mailed to the ticket-holders. To-day there has been a constant stream of lucky holders pouring in and out of the office, getting their money. Those at a distance send their tickets for collection through the banks or express companies. To test the efficiency of the clerical department of the concern, the writer asked where the $50,000 prize had been sold, and was promptly informed "At Washington, D. C., to one man." A good return on a ten-dollar investment. Desiring to know what the Pacific Coast had won, the following list was given:

Ticket.	Prize.	Fraction.	City.
93,174	$150,000	one fifth	San Francisco
92,509	20,000	one-fifth	San Francisco
8,712	10,000	one-fifth	Bakersfld, Cal.
80,300	10,000	three-fifths	San Francisco
24,759	5,000	sev'n-t'nth's	San Francisco
56,794			Oakland
67,066			San Jose
84,544			Mojave

Two negro laboring men of New Orleans won $15,000 each—one-tenth each of the capital prize—and there was joy on their faces when they received their money. Dr. Dauphin, the President of the Company, then exhibited the list of ticket-holders, showing to what sections of the country the tickets were sent, and to whom, thus affording an absolute protection against fraud or duplication of tickets.

Instances are numerous each Drawing of a wide and happy distribution of prizes, and while yesterday's drawing has brought disappointment to some, it has also gladdened many a heart, and smoothed the downward journey of life for hundreds. The writer is convinced that every ticket had a fair and equal chance, that the lottery was fairly and honestly drawn, and has seen the prizes promptly paid without deductions of any sort.—[*San Francisco (Cal.) Daily Chronicle, Dec. 30.*

A New York man has written a book to tell how waste bread may be utilized in families. Our mother-in-law taught us long ago—don't waste it.

BRIGHT.

This word, although in itself a cheerful one, is much used in connection with one of the worst evils known to the human race. The most important symptom of this disease is a discharge by the way of the kidneys of the albuminous substances which should remain in the blood to be the nourishment of the system. Thus the body wastes away and death closes the scene.

Is Bright's Disease ever curable? Ask *Mr. Geo. W. Edwards* of Philadelphia. He inherited it from his father who died of it. He suffered for a long time, and was in a painfully weakened condition. How was he restored to health? Simply by means of Compound Oxygen, which arrested the waste of albumen, drove out the disease, and made a new man of Mr. Edwards. He is now attending regularly to his business, as he has been ever since his restoration to health. The Compound Oxygen Treatment is not sold at the drug stores, but is to be had only of Drs. STARKEY & PALEN, 1529 Arch street, Philadelphia, Pa. Write to them for a pamphlet-treatise, sent free, which tells all about it.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Matthews, 615 Powell Street, San Francisco.

Colored people ought to be the best folks in the world for them to keep dark about anything.

If you are bilious, take Dr. Pierce's "Pleasant Purgative Pellets," the original "Little Liver Pills." Of all druggists.

There are a good many p's in pepper, but not half so many as there are in coffee.

For relieving Throat Troubles and Coughs, "*Brown's Bronchial Troches*" have a world-wide reputation. *Sold only in boxes* Price 25 cts.

Many gentlemen in the front rows of the orchestra remove their hair, as has often been noticed and it is no more than fair that the ladies should remove their hats.

THE OYLY WAY TO CONQUER DYSPEPSIA.

It is perfectly preposterous to introduce pepsin and other artificial solvents into the stomach, in the expectation that they will assist digestion by acting on the food itself. They will not. Nor is it possible thus to overcome dyspepsia. The only way to conquer that disorder, and prevent the numerous diseases and disabilities which it assuredly provokes, is to renew the activity of gastric action by strengthening the stomach. Hostetter's Stomach Bitters eradicates the most inveterate forms of indigestion by restoring vitality to the alimentary organs, and those which are tributary to them. The liver, the bowels, the kidneys and the nerves, no less than the stomach, experience the invigorative effects of that standard tonic, which possesses alterative properties that greatly enhance its beneficial influence, and give a permanence to its effects which they would not otherwise possess.

It would never do to have women as managers of newspapers. You couldn't get them to give each other credit for anything.

AN INVENTOR'S ADVICE.

George Stevenson when advising young men how to get on would finish by saying "Do as I have done—persevere." For fifteen years he plodded and worked before giving the finishing touches to his locomotive. In as many days those persevering in the use of Dr. Pierce's "Golden Medical Discovery," have experienced great relief and found themselves on the high road to health. Liver complaints, impure blood, chronic lung diseases and many others yield to its healing influences never to return. All druggists.

A school where children are taught to steal has been discovered in Chicago. Sort of an Aldermanic training-school as it were.

3 months treatment for 50c. Piso's Remedy for Catarrh. Sold by druggists.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

WORTH KNOWING.

Allcock's are the only genuine porous plasters.

All other so-called porous plasters are imitations.

Their makers only get them up to sell on the reputation of Allcock's.

All so-called improvements and new ingredients are humbugs.

No one has ever made an improvement on ALLCOCK'S POROUS PLASTERS.

When you buy ALLCOCK'S POROUS PLASTERS you obtain the best plasters made.

When the Pilgrim Fathers hear that Plymouth has had a dance in honor of their landing they will be sorry they landed.

LONGFELLOW'S BIRTHDAY BOOK

is a beautiful present to give any lady. But there is a little book published in pamphlet form, with no pretensions to literary merit, that would be as appropriate, and might be the means of saving a life. It is called Dr. R. V. Pierce's treatise on diseases of women for whose peculiar troubles the "Favorite Prescription" is especially designed. It is profusely illustrated with wood-cuts and colored plates, and will be sent to any address for ten cents in stamps, by the World's Dispensary Medical Association, Buffalo, N. Y.

"They say that Mary is living out?" "Yes; thice evenings a week and all day Sunday."

Try Germania Breakfast

BABY'S SKIN & SCALP CLEANSED PURIFIED AND BEAUTIFIED BY CUTICURA.

FOR CLEANSING, PURIFYING AND BEAUTIFYING the skin of children and infants and curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair, from infancy to old age, the CUTICURA REMEDIES are infallible.

CUTICURA, the great SKIN CURE and CUTICURA SOAP, an exquisite Skin Beautifier, prepared from it, extermally, and CUTICURA RESOLVENT, the new Blood Purifier, internally, invariably succeed when all other remedies and the best physicians fail.

CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers, free from poisonous ingredients.

Sold everywhere. Price, CUTICURA, 50c.; SOAP, 25c.; RESOLVENT, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases."

BABY'S Skin and Scalp preserved and beautified by CUTICURA MEDICATED SOAP.

PERSONAL AND IMPERSONAL.

—Mary Harper, a Cleveland servant-girl, has inherited two hundred and fifty thousand dollars from a relative in Philadelphia.—*Cleveland Leader.*

—Moses Von Dam, of Jersey City, who was rejected by Mary Brunn, made his will, bequeathing her twenty thousand dollars, and then committed suicide.—*N. Y. Mail.*

—George K. Remington, a leading citizen of Fall River, Mass., who recently died, carried life-insurance policies amounting to over one hundred thousand dollars.—*Boston Herald.*

—Fred Douglass told the London *Daily News* not long ago that so far from the negroes dying out they are increasing. At the time of the abolition of slavery there were 4,000,000 of them, and he calculates that there are now 7,500,000.

—General Roger A. Pryor lately realized one hundred thousand dollars in a speculation in railroad securities. He came to New York soon after the war without a dollar in his pocket, and now has a legal practice of twenty thousand dollars a year.—*N. Y. Herald.*

—A very interesting ceremony took place in the Parish Church of Cedars, near Montreal, the other morning, when a widower, Charles Roy, was married to Mrs. Pilon, a widow, and the son of Mr. Roy married at the same time the daughter of Mrs. Pilon.

—Willie Hines, the seventeen-year-old son of a well-to-do farmer at West Point, Ga., eloped with and married Miss Newsome, ten years his senior. In order to keep his father from following him the young man smashed the family carriage and threw the saddle into the well.—*St. Louis Post.*

—The will of the late Charles Francis Adams, of Boston, makes one public bequest of ten thousand dollars to the Adams Academy, Quincy, of which the grandfather of the deceased was the founder. The rest of the estate is equally divided among members of the family.—*Boston Journal.*

—The New York *Graphic* says Allen Thorndyke Rice wore girl's clothes until he was sixteen years old. His mother, who had separated from her husband, thus dressed him for fear of his abduction by his father. At the age of sixteen he rebelled against the tyranny of petticoats, and took to wearing bifurcated garments.

—The sons of Mrs. John Benner, of St. Louis, a few weeks ago spoke to her about the birthday dinner they meant to give her on her ninety-first birthday. Although in good health, the old lady said: "No, boys. Instead of a dinner it will be a funeral." No attention was paid to this, but soon after Mrs. Benner began to fail, and just as she had predicted, on her ninety-first birthday her sons assembled at her funeral.—*N. Y. Sun.*

—Thaddeus Fowler, who died recently in Seymour, Conn. was a most prolific inventor. He invented a machine for sticking pins in paper, for manufacturing iron pins, for sorting pins, for making pins, head and all, at a single stroke; for making needles, for pointing wire, for making horseshoe nails and for stamping metal. He also invented a reaping and binding machine and the "sewing-bird" used on ladies' work tables. He had little business ability and died poor.—*Hartford Courant.*

"A LITTLE NONSENSE."

—The boy that sprained his ankle has a very lame excuse for not attending school.

—Passenger—That's all the money I have. Conductor—(examining a trade dollar)—I can't take that piece. Passenger—Ah, well, give it to the company then.—*Tid-Bits.*

—Mamma—And now, Bertie, you have chatted enough. Shut your eyes, hold your tongue, and go to sleep. Bertie—How can I do three things at ance, mamma?—*N. Y. Ledger.*

—A little Danbury girl, when asked by her mother about suspicious little bites in the sides of a dozen choice apples, answered: "Perhaps, mamma, they may have been frost-bitten, it was so cold last night."—*Danbury.*

—Mrs. Mulvaney—Arrah, Jamesy, phuy do yez put two thermoneyturs forninst the shtore? Shaunessy—Be gobs, Missus Mulvaney, wan av them is to tell how hot it is, an' the other is to tell how cowld it is.—*The Rambler.*

—What the people called him.—

There was a young lady in Bassville
Who said to her lover: "Alas, Will,
You come every night
And you talk such a sight,
That the people all call you my Gas Bill."
—*Detroit Free Press.*

The girls at Vassar draw each other into a corner and mysteriously inquire: "Do you know why Prof. Blank wears a plug hat?" "No; why is it?" "To cover his head of course!" Then they te-he-he-and ho! ho! ho! and write home to ma that they passed ninety-eight per cent in Hoyle.—*N. Y. Mail.*

—Disgusted poet (whose manuscript has been rejected)—I don't believe there is a single spark of literary fire in the whole establishment. Editor (gently)—You err, my young friend. That blaze which you see flickering upon the isinglass of yon stove is produced by burning manuscripts.—*N. Y. Independent.*

—"I wead-aw, in the papah this mawning, that a dweadful disease, twifoid fevah, was in the city-aw." "That's a very dangerous disease, Mr. Snobberly." "Yeth, Miss Bondclipper, it ith ath you thay, veahy dwangerous. If you don't die-aw, it leaves you semi-idiotic, ye know." "Dear me, Mr. Snobberly, how many times did you have it?"—*Texas Siftings.*

The Business He Was In.

A countryman and his wife were in town the other day for the first time, and they were wandering around looking in the show windows and having a good time. Finally they came to a bank, and wondering what kind of a business it was that had no signs or display of any kind, the man stepped in to inquire. There was no one in at the time but a very nobby young clerk—who was also very smart—and as the rustic gazed around at everything, the clerk tackled him for some sport.

"Very fine place we have here, sir," he said. "Can we do anything for you to-day?"

"Well, durn me," said the visitor, ignoring the question; "this beats 'em all. What kind uv a dog-gone business do you do here, anyhow? What do you sell?"

"Oh, we do a great business. We sell mules."

"No, you don't say? Well, durn me." He stepped to the door and called his wife: "Sal, come h-ere an' look." She came in and he led her around. "Jist think uv it, Sal. Ain't it purty? An', Sal, they sell mules here. That's ther business. Trade's good, too, Sal. Jist look at him," he continued, jerking his thumb toward the clerk; "he's the only one they've got left, an' I reckon they wouldn't have him, of the collar he's been workin' in hadn't skinned his neck an' shoulders."

As they passed out, the man remarked softly to his wife: "We may be from the head waters, Sal, but that's no sign we don't know mules."—Tid Bits.

A Confusion of Forces.

Brother Bruce—Lor', Brer Hotchkiss, specs you's gwine ter grin' dat ax in 'bout fo' secon's wid dat mule 'tachment; but bettah be leetle keerful 'bout makin' de grinstun revolve roun' too fas', 'cause de centerifical motion am liable ter make it splode, yo' know. Only las' week one bus' in a fact'ry down at Junburro, an' killed fo' men an' er dinnah pail."

Brother Hotchkiss (something of a genius)—Shoo! I risk all de splodin'. G'lang yer, Jude, what I feel yo'—! What I don't know how dat happen! I neb' t'ought centerifical motion act like dat!" (Subsequently.) "Brer Bruce, when I gits ter t'inkin' 'bout dat splosion, I rudder spects it war de mule dat bust, an' not de grinstun."—Harper's Bazaar.

The Same Color for the Cover.

Going out in the car the other day I saw a bright little miss of my acquaintance with a library book in her daintily gloved hand and, noticing the title was that of a rather abstruse subject, I said: "Why, my dear, you select very deep literature for your reading; I had no idea you were so studious." She answered: "Oh, is it? Well, I did not know what to get, and so took this, as the cover compared so beautifully with my hat. Did you ever see a more perfect match?"—Springfield Homestead.

Incurably Frivolous.

Act 1. Scene—Parlor of a modern house. Dramatis personæ, he and she.

He—Don't you think, Julia, that you are rather frivolous? Now, there's my sister, always reading some good book. Why, she tells me she has read 'Ben Hur' four times."

She (demurely)—Has she? I don't think I would like to have Ben Hur.

Denouement—Kisses and reconciliation.

Curtain—Detroit Free Press.

Borrowed Property.

Some strolling Thespians were once playing "Macbeth" in a country town. Their properties were not kept in very systematic order, for when the hero of Shakespeare's drama exclaimed:

"Is that a dagger that I see before me?" a shrill voice responded from the "flies:"

"No, sir; it's the putty knife. The dagger's lost."—Exchange.

The Mills of the Gods.

George Shepard, of Iowa, has lost three wives by the "accidental discharge" of his revolver. The authorities didn't take any action in the first two cases, knowing that George was rather careless, but when the third wife was peppered out of existence the other day the husband was arrested and held for murder.—Milwaukee Sentinel.

Ghastly Way of Putting It.

Two countrymen were standing on the street yesterday when several cadets passed. One said to the other, "Who are them boys what all wear clothes alike?" "They," said the other, "are them fellers what go to school at the cemetery."—Gainesville (Fla.) Advocate.

Badgering Senator Evarts.

It is to be hoped that Senator Evarts will decide to visit Boston on the occasion of the Merchants' club banquet. The merchants would like to hear the conclusion of his last year's speech.—Boston Traveller.

Plain English Wanted.

New York is to have a "Palais d'Industrie."—Boston Herald. Ah, indeed! We have one, but we don't put on any French frills and scallops over its name. We call it the state prison.—Providence Telegram.

Chicago Feet Again.

A Chicago firm announces in its advertisement of Christmas wares: "Our dancing slippers for young ladies are simply immense." That is the kind of slippers in demand in Chicago. They will go off like hot cakes.—Kansas City Journal.

He Can't See It.

Mind Reader Bishop has been offered $10,000 to tell where the $25,000 of which the Southern Express company was robbed is concealed, but Mr. Bishop did not want to earn $10,000.—Pittsburg Chronicle.

MILK-MAKING.

Abstract of R. Lespinasse's Essay Read to the Dairymen of Illinois.

Upon good milk depends the prosperity of the dairy farmer, and that of millions of auxiliaries. It is to be taken for granted that the farm is adapted to the business, that the pasturage is good—that tame hay and other forage grows abundantly, and good cows have been secured. In spring and summer bountiful pasturage furnish material from which abundance of milk is made. In winter the animals are at the mercy of the farmer. As he deals with them, so will the returns be profitable, indifferent or absolutely unprofitable. Gentle handling is at all times necessary. Between the secretive and the nervous systems there is such an intimate connection that all shocks ought to be avoided.

Raise your own cows. Keep a milk record, and select heifers only from your best milkers. In breeding, grade rather than cross. Use a pure-bred bull of your chosen breed on your native cows. The off-spring will generally follow the prepotency of the bull. Adopt the best method of feeding with a view to keep the greatest amount of stock on the same land. Soiling must of necessity become the common practice on land of high value. Land worth more than twenty dollars per acre can not profitably be used wholly for pasturing. The words of Israel Boies were almost prophetic, when seven years ago, in addressing this association he foretold the abandonment of pasturing, and the adoption of a complete system of soiling. His dream was partially fulfilled before his death. Dairymen of to-day are advancing with more rapid strides than anticipated. One of the essential problems in dairying is to maintain an even flow of good milk—to equalize irregularities of weather, flood and drouth, summer and winter, so that cows shall have about the same quality and amount of food at all times, the same or nearly the same general temperature, and nearly the same flow of milk. A variety of food is necessary—fodder, ensilage, early cut hay, grain, etc. Winter dairying is now much discussed. Its profits depend upon the warmth. We quote from H. C. Adams, of Wisconsin: "In winter save feed by keeping the cows warm. Give them warm water in the barn."

A dairyman wants the fat in the milk and not in the cow's ribs. Weed out the cows that put the feed upon their ribs rather than into the pail. Never mind their looks. "Handsome is that handsome does."

Every thing about the dairy should be brought down to rule. No rule of thumb, but weights and measures. A man who does not weigh and measure every thing about a dairy can not tell what he is doing. It costs more to make milk from old cows than from young ones having the same milk producing capacity. The period of profitable milking varies somewhat, but as a rule the best yield does not extend beyond the tenth year. When pasturage is short give the cows extra feed. When they once shrink, they do not come back again to their milk.—*Prairie Farmer.*

A Frank Confession.

Merchant (to applicant for a job)—You know any thing about figures, Uncle Rastus?

Uncle Rastus—Yes, sah.

Merchant—Well, if I were to lend you five dollars, and you promised to pay me one dollar each month, how much would you owe me at the expiration of three months?

Uncle Rastus—Fi' dollahs, sah.

Merchant—I'm afraid you don't know much about figures.

Uncle Rastus—No, sah, but I specs I knows all 'bout Uncle Rastus.—*N. Y. Sun.*

—In New York City one evening recently was given a dinner that cost seventy-five dollars per plate. Nine guests sat down to the feast. Hand-painted menus, worthy of preservation as works of art, cost five dollars each. The cigars were specially imported from Havana with a band prepared for the occasion. Many of the wines were specially ordered. The host was a wealthy manufacturer celebrating his retirement from business.—*N. Y. Herald.*

—Mr. Lowers, of Woods Run, Pa., owns one of the oldest family Bibles in this country, he having received it from his wife, who inherited it from her mother, Sarah Young, who also inherited it from her mother, Mrs. Sarah McCormick, who inherited it from Mrs. Judson, whose maiden name was Annie Emerson. This Bible was dedicated to King James, of England, and published in 1634, being now 252 years old.—*Philadelphia Press.*

—A young man in this city a few days ago was on the eve of matrimony and purchased a bridal outfit for his affianced. When the appointed wedding day came around the bride refused to be wedded, and returned her wedding trousseau. The young man has the outfit on his hands and is looking for another girl who can wear the garments without the additional cost of refitting. Here is a rare opportunity for some one.—*Nevada City Herald.*

—Some people have such a surplus of wisdom that they are constantly overflowing in streams of counsel to others. It makes no difference whether their counsel is asked or not, or whether it is becoming in them to give or not, they thrust it forward. Their poor victims feel like saying in the language of Esau to Jacob: "I have enough, my brother; keep that thou hast unto thyself."—*Chicago Advance.*

MISCELLANEOUS.

—A Deadwood (D. T.) justice of the peace married a couple recently. An hour later they returned and applied to the justice for a divorce. The bride said that she got married merely to spite an old lover.

—The production of the very finest makes of steel has led to the perfection of processes in the use of fuel at Springfield, Mass. A finer grade of gun-metal is made by flame produced from gasoline.—*Boston Post.*

—Frank Grove, hunting deer on Blue Mountain, Cal., saw one pass over a ridge. He hurried up, and looking down the slope and seeing what he thought was the deer, fired, and put a bullet through the leg of a miner who was stooping over, shoveling.

—Ten thousand families in New York are said to make way with their vegetable refuse by burning it in the kitchen range. An effort is being made to extend the practice, and if it is successful New York will probably be the cleanest city in the world.—*N. Y. Mail.*

—In Washington dwell two women who own so much bric-a-brac that they have moved into a larger house to accommodate it. Among other rare things is a screen, such as is used in eastern harems, made of carved wood, with curious little windows which open and shut like doors.—*Washington Post.*

—A woman is bound to have the last word. When the editor of the *Peavine* remonstrated with the principal contributor of the poet's corner of his valuable sheet for writing on both sides of her paper, she quietly retorted, "Well, and don't you print on both sides of yours?"—*Boston Transcript.*

—Eunice Barton, an eighteen-year-old girl of Frederick, W. Va., was shot dead by her younger sister, who was examining a revolver that she knew was not loaded. Eunice was to have been married soon to Asa Gray, a young farmer, but she was buried on that day instead.

—An engineer on an Iowa railroad saw a flock of turkeys on the track, and knowing their habits, slowed up, blew his whistle, and got them off without killing any. The owner, unobserved, saw the proceedings, ascertained the engineer's name, and sent him the fattest hen in the flock for his Sunday dinner.—*Chicago Mail.*

—"Before the curtain was drawn up at the Union Square theater last evening," relates the New York *World*, "a young woman who occupied a front seat in the center of the orchestra stood and deliberately removed a lofty and wide-spreading bonnet from her head. As it disappeared from the obstructed view of those behind a round of applause greeted the considerate action of the young lady. At the conclusion of the last act the occupants of the neighboring chairs remained in their seats and allowed her and her escort to precede them out of the empty aisle."

BRILLIANT SUCCESS.

Satisfactory Results Obtained by the Ostrich-Growers of California.

The growing of ostriches in California is a brilliant success. The feathers are equal to the best grown in Africa. The height of the birds is from 8 to 12 feet. Their weight varies from 300 to 400 pounds. The male is much the larger and is black, while the female is gray. Some male ostriches weigh as much as 500 pounds. It is a large turkey that weighs 20 pounds. This shows that a first class ostrich weighs as much as twenty-five large turkeys or four large calves. To stuff an ostrich for baking purposes, requires two bushels of filling. When roasted you have one pound of food for over 500 men.

The female ostrich does not begin to lay eggs until it is four years old, but it produces its first crop of feathers at the end of its first year. Every seven months thereafter its plumage is ready for market, yielding about 25 of the very finest feathers, besides a large number of less valuable ones. The feathers are not plucked, but are cut off quite close to the skin with large shears made for the purpose. No pain whatever is inflicted in the operation. Within a few days after the feathers have been cut the stubs dry and shrivel to such an extent that they are easily removed. The longest and finest white feathers are worth at wholesale $4 apiece, and good feathers are worth $200 a pound. The first clipping of young birds will average $40 in value. It requires a good deal of capital to start an ostrich farm, as a full grown pair of birds is worth from $700 to $800, and a single young bird six months old costs from $150 to $200; but after once under way, the return for the investment is a large one.

In California nearly all the ostriches are hatched by incubators driven by steam.

The stride of the ostrich when feeding is from 20 to 22 inches; when walking, but not feeding, 26 inches; and when terrified, from 11½ to 14 feet. An ostrich can do with ease, when frightened, forty miles an hour. No race horse can do this.—*Cor. Goodall's Sun.*

The Tower of London.

Mr. Lee, in a lecture at Brooklyn the other day on the Tower of London, stated that it is a fact that grass could never be induced to grow upon the spot where the hapless Lady Jane Grey yielded up her innocent life. Another interesting episode was the narrative of the discovery a few years ago of a lower range of dungeons below those which were already known to exist. One of these, a lower oubliete, was found knee deep in water, the passage to it swarming with rats, and in the dungeon the skeleton of a woman, with iron chains still about the bones. Not the slightest clew to her idenity could be found, and even the very existence of the dungeon had been forgotten.—*Philadelphia Call.*

KEEPSAKES.

Each lover has a keepsake
For the memory of his love;
One has a note or a ribbon,
And one a curl or a glove.

But I am rich in keepsakes;
Three notes I treasure apart.
There are two, accepting my presents,
And one, declining my heart.
—Macmillan's Magazine.

IF,—BUT.

If I were a wee, wee sprite,
Of all my pastimes rare
'Twould be my chief delight
To nestle in thy soft hair.

If I were a white, white rose,
How envied would be my rest,
Lulled to a sweet repose
On thy gently cradling breast.

Being neither rose nor elf,
I'll cease my poetical bray,
And content my prosaic self
To rest in some usual way.
—Trinity Tablet.

TURN AND TURN ABOUT.

The old man he carried the hod,
His son he got rich in molasses;
The grandson a scholar he grew,
And took the first place in his classes.
A statesman, he rose to high rank,
And he left a great name and much riches.
His son took to dealing in stocks
And lost everything but his pantaloons.
And thus goes the old whirligig—
The son of this illigant gold 'un
Spent his money in bumming around—
Now he carries the hod like the old 'un.
—New York Journal.

Burdettes.

A young man came into this city from a few miles abroad last week, and having sold his wood and put up his horses, set forth to shop. Something in the window of a ladies' furnishing store caught his eye and he went in. The crowd of women frightened him, and when the young lady behind the counter asked him what he wanted, he wanted to die, but he didn't say so. He managed to say, with painful effort, that he wanted "one o' them wire rat traps in the winder, and if you please, ma'am, would you show me how to set it?" The police carried the man away in an ambulance, but the girl behind the counter died.

CLOSE OF THE FISKAL YEAR.

A Most High and Mighty Deficit, hurrying down the busy railway track, met the Worthy Passed Dividend streaking along in the opposite direction. "Where to?" asked the High and Mighty. "Two off," meekly replied the Dividend. "I am looking for a hole in which I may hibernate until the robbers nest again." "Well," replied the Deficit, "there's the won I just crawled out of, but that is too big for you. You'll find a smaller one further down in the Bank. A due; I am hastening to a meeting of the directors." "I give you joy," said the Dividend, still trying to get passed; "I thought perhaps you were going to a meeting of the Creditors." "Nay, not so; this road is not run by the creditors; it is run like the government, by the owner." "What owner?" simply asked the Dividend. "For owner," said the Deficit with a mocking laugh, and he was gone. No, he was not; it was the Dividend that was gone. The Deficit had come to stay.

IT MULTIPLIES FOUR DIAMETERS.

An instrument called the "quadruplexoscope" is now used to illustrate lectures on travels. It is not a new instrument at all. We have often heard it used by travelers in telling about their adventures, but it is a new thing to make pictures with it.—Brooklyn Eagle.

Not Religious Just Then.

They tell a story on a local newspaper man that illustrates his presence of mind even under the most trying circumstances. He was awakened in a hotel one night by the cry of "Fire!" and in one spring and two movements was out of bed and in the hall, which was filled with smoke. Just ahead of him was a flying figure clad in white, like himself, and running at a 2:10 clip. A turn in the long hall and two steps leading to a higher level brought the figure up, or rather down, and the same cause precipitated the newspaper man against her. "Let's pray," cried the affrighted woman as she clasped him by the arm. "No, let's run," was his reply, and, putting her once more in the right direction, the lady was soon far ahead, though her rescuer got out in plenty of time. The two never saw each other again.—Buffalo Courier.

Tid Bit Gems.

Darwin must have had the toboggan slide in mind when he wrote "The Descent of Man."

"Pa," said little Johnny McSwilligan, "here's a piece in the paper about 'Parasites.' What are they?" "Paris-ites, my boy, are people who live in Paris. I think you ought to know that, and you in the Third Reader."

In a restaurant.—A customer was complaining of the amount of his bill. "But you don't consider, remonstrated the proprietor, "how much all these mirrors and this gilding have cost me." "Well, I didn't order them—the waiter can take them away."

His First Hotel Experience.

Voice from speaking tube—What do you want?

Granger from Jersey—None of yer gol darned business what I want! I dunno who you be, but if yer can't 'tend yer own affairs I'll hev yer put out o' that air room. I will, by gravy!—Judge.

Order Reigns in Warsaw.

The inherent depravity of inanimate things led the following bit of foreign information to arrange itself under the head of "State News" in yesterday's Journal: "The prisons in Warsaw are crowded with Anarchists and Nihilists, and continuous arrests are being made. Of those recently arrested some have been hanged." To correct any possible misapprehension arising from this paragraph, we hasten to say that, according to later accounts, "order reigns in Warsaw," Ind. It may be added that when Anarchists and Nihilists do congregate in the Hoosier town it is highly probable that they will be hanged promptly.—Indianapolis Journal.

Wretched Slang.

One morning recently the district attorney of Napa county, having occasion to leave his office, affixed a card to the door to explain his absence, bearing the words, "In jail—Hogan." When he returned he found the following commentary added: "Ah, there! stay there!"—San Francisco Alta.

MUGGINS' ADVENTURES.

Most Extraordinary Tales Which Contained One Indisputable Bit of Truth.

It is singular the hallucinations that will get possession of a man when he has been drinking a little too much. Now there is Muggins, a temperate and truthful man as a rule, but when he is a little "off"—for he gets that way once in awhile—he tells the most extraordinary tales of his adventures by land and sea—pure fabrications, all of them. He imagines that he has been everywhere, met everybody and seen every thing, when the fact is that he was born and raised in the village where he resides and was never more than twenty miles away from home in all his life. He has traveled "in his mind" altogether. He quite believes all that he is relating while the "spirit" is on, but mournfully repudiates it all the next morning.

"Then you wasn't on a four years' whaling voyage when a boy?" said a man to whom he acknowledged that his tales of the night before were all made out of whole cloth.

"Whale nothin'," said Muggins, gloomily. "I don't see why I need to tell that pesky lie every time I get full. The only experience I had in whaling was when dad whaled me."

"You said you went before the mast."

"It was a lie; the mast went before me, long enough."

"Never heard a more entertaining story in my life," continued the man, "than you gave me of going around the Horn."

"Well, I didn't go around any horn while I was telling it, did I?"

"You said a terrible storm came up—every body just frightened to death except yourself. The captain told you to take the helm."

"Did I state where he wanted me to take it to?" said Muggins with bitter sarcasm.

"The thunder rolled, the lightning flashed—"

"In the pan."

"And there stood the Horn, perfectly erect and over one thousand feet high. But you got around it."

"You bet I did, I would get around any thing with a quart of beer in me. But it's a lie, every word of it. Never even saw the sea."

"Oh, but the whales you used to catch! You wielded the livelest harpoon in the business."

"I've hung my harpoon 'the wil low,'" sighed Muggins.

"'But I say, Muggins," continued his tormentor, "there isn't any doubt but that you fought in the Mexican war, is there?"

"Never fought nothin', I tell you," said Muggins, pressing his hands to his throbbing temples.

"What! Wasn't you the first man to wade the Rio Grande, carrying the stars and stripes high over your head? Didn't you capture Santa Anna single handed, receiving the thanks of General Taylor as you led your prisoner into camp by the coat collar? You said so, you know!"

"I suppose I did," groaned Muggins. "What a fool a man will make of himself when the wine is in and—and his wife is out!"

"Well, Mr. Muggins," said the man, "I begin to doubt some of the other statements that you made to me last night. I seriously question whether you gave Morse his ideas about the magnetic telegraph, or invented the telephone, or suggested the liberty statue to Bartholdi, or knew Columbus in the old country, or went up in the first balloon, or was drunk—"

"Hold on!" cried Muggins; "if I said I was drunk there was one bit of truth that I told last night. Let's shake on that."

So they shook—each other, and parted.—*Texas Siftings.*

Inventions That Are Needed.

An English scientific journal enumerates the following as among the inventions which are specially needed at the present time: Macaroni machinery, good red-lead pencils, type-writers that will work on account books and record books, indelible stamp-canceling ink, a practical car starter, a good railway car ventilator, better horse-shoes, locomotive headlights, an instrument for measuring the velocity of wind currents, apparatus for measuring the depth of the sea without sounding by line, piano-lid hinge which shall be flush on the outside, good fluid India ink for draughtsmen, a good metallic railway tie, an effective cut-off for locomotives, a method of alloying copper and iron, and a molding material for iron and brass casting capable of giving a mold that can be used over and over again.—*Chicago Inter-Ocean.*

Confusion of Thought.

Odd mistakes are sometimes made and perpetuated in public documents, when the attention is directed to the main idea, and not to the phraseology.

Among the regulations at the West Boston Bridge Corporation, drawn up by two lawyers, is a section which was written, accepted, and now stands thus:

"And the said proprietors shall meet annually on the first Tuesday of June, providing the same does not fall on Sunday."

Persons living at a distance must not suppose that Tuesdays fall on Sundays any oftener in Boston that they do elsewhere.—*Youth's Companion.*

—There are a good many weddings at Castle Garden. A policeman is generally best man. There is a wedding ring ring there that has been worn 354 times.—*N. Y. Mail.*

—Albert Champion, of Livingston County, Ky., stole John Mitchell's best team and eloped with Mrs. Mitchell.

ANCIENT VILLAGES.

Some Interesting Discoveries Recently Made in Arizona Territory.

Mr. Stevenson's researches this season resulted in the discovery of several ancient villages, one of which is located on the Little Colorado. This village extends over an area of three miles. Many of the houses stand two and three stories high, built of square, flat stones laid in mortar. Several of the larger buildings, forming one group, are situated along the banks of a small canyon. This canyon presented many evidences of the handiwork of the aborigines who inhabited the dwellings along its banks. In the walls of this canyon are many small niches and cavities which had been walled up, leaving only a small aperture through which to place small articles. The plaster, some of which the party dug out, still retains the finger-marks and impressions of the masons who built them. These little bins must have been for the purpose of storing wild seeds and grain, for such were all they contained. Agriculture, in the sense as now understood, was unknown to these people. The domestication of animals was also unknown to them. Away from this group of dwellings, up the canyon for several miles, were found houses and corrals of various shapes and sizes. Surrounding this village is a series of volcanic hills or knolls from fifty to three hundred feet in height. On the summit of each was found either a round or octagonal-shaped tower, or fortification. This was evidently the object, from the fact that only one entrance was found to any of them, and they were in all cases furnished with port-holes about breast high, and were seldom so constructed inside as to indicate permanent dwellings. It was quite impossible to conjecture the age of this village, and none of the Indians now inhabiting that country could enlighten the explorers on the subject. They only refer to them as the homes of the ancients.—*Washington Letter.*

BOHEMIA'S CAPITAL.

A City Which Recalls the Peculiarities of the Orient.

A general view of Prague gives an impression decidedly oriental. Some of its church towers seem like the minarets of a mosque. Others have a Byzantine look. In no other city of Europe are massive buildings large enough to be called palaces more numerous. One of the old palaces near the station where you arrive in coming from Dresden has been transformed into a powder magazine. The old palace of the Kings of Bohemia close by is now a barrack. In the old portions of the city, on the right bank, there is still some of the strong aspect of the Hradschin, but commerce is gradually softening it. New streets are being made that are filled with handsome shops. Broader thoroughfares are being set with trees, and there are some well-kept parks and public gardens. The public buildings, aside from the palaces, are not remarkable for beauty, though there are exceptions. The city hall, which in the German-speaking countries of Europe is called the Rathouse (Rathaus) is curious architecturally, and remarkable for its astronomical clock, which excites the attention of every tourist. It is a full curriculum in the study of the service of astronomy. Near by is a church which contains the tomb of Tycho Brahe, the Danish astronomer, who came here at the invitation of the Emperor Rudolph II. Prague, like other European capitals, has its Academy of Fine Arts, and is well provided with charitable institutions. Its public monuments in the way of fountains and statues, though not as numerous, are in sufficient number to shame the poverty in works of art in the metropolis of America.—*Prague Cor. San Francisco Chronicle.*

FOREIGN GOSSIP.

—Hydrophobia is unknown in Lapland, but Pasteur has just shown that dogs may be inoculated with the disease.

—M. Galignani's alms-house for broken-down men of letters is nearly finished at Neuilly, at a cost of several million francs.

—A daughter of Richard Cobden was chosen to unveil a statue of her distinguished father, which has just been erected at Manchester, Eng.

—M. Pasteur, being urged by his family to rest for a time from his labors, replied: "When I am not working I seem to myself to be committing a theft."

—Marcus Jordan, of Bielefeld, Rhenish Prussia, is the oldest man in Germany. He has completed his 107th year in sound health, and reads the crabbed German letters without spectacles.

—The Raphael "La Vierge au Sein," which was discovered about a year ago in a dealer's shop at Lausanne by Prof. Nicolie, who bought it for £8, has been sold at Geneva to a French collector for £8,000.

—Princess Louise has a particular charm of manner in dealing with young children, who meet her overtures with the instinctive confidence of little ones who know they have found a friend.

—It is said that whenever an eruption of the Bromo Volcano, Japan, takes place, the natives, as soon as the fire (the molten lava no doubt it meant) comes down the mountain, kindle at it the wood they use as fuel for cooking. They keep in the fire thus made for years, and whenever it goes out, through neglect or for any other reason, they never kindle it new from matches, but they get a light from their nearest neighbors, whose fire was originally obtained from the volcano. The fires in use, up to the latest outbursts, in the native cooking places were all obtained from the Bromo eruption of 1832.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL.

SATURDAY, MARCH 12.....1887

The United States Supreme Court has decided that no State can impose a license upon commercial travelers from another State. The drummers can now go where they please and bore anybody who will listen to them.

Some of the County School Superintendents object to distributing the new text books, printed by the State; they say "it would be too much trouble." There is only one duty in connection with the office that the average Superintendent does not consider "too much trouble"; that is drawing the salary; and this is about all the real work that many of them do.

When a policy is issued in a life or accident insurance company, and the party insured afterward becomes insane and in that condition destroys life by poison, shooting, stabbing, hanging, or any other self inflicted violence, this does not vitiate the insurance, and the amount insured for must be paid to the heirs or devisees of the deceased. This is a recent ruling of the United States Supreme Court.

Southern California has not one representative on the Supreme Bench of the State. The most important cases that have come before the Supreme Court in recent years have been from the southern counties. A lawyer familiar with these counties would be better able to make just application of law to such cases, than one who is a stranger to them. New cases of equal importance are continually arising, and the death of Judge Morrison gives an opportunity to the Governor to appoint a lawyer to succeed him who would have full knowledge of these counties. There are plenty of very able lawyers to select from.

The San Francisco press complains that the Legislature is about the very worst the State ever had. Without learning or experience; void of honor and conscience, a large proportion of the members cared for nothing but a chance to plunder the State treasury, and all companies or individuals from whom money could be squeezed by "cinch" bills. Like Arabs, greedy for "backsheesh", and alike shameless and rapacious, they pounced upon everything in sight. A sigh of relief and a prayer of thanksgiving went up when the bandits dispersed. The Senate was worse than the Assembly, and the worst Senators were from San Francisco; but this is not unusual. Yet even in the Senate there appeared to be a twinge of remorse at last, and near the close of the session an attempt that had succeeded in the Assembly to make a big haul from the Treasury was defeated in the Senate. This was the bill to pay to parties in San Francisco ninety seven thousand dollars for damage done to property by contractors; damage that these same contractors had given bonds to make good. The delegate from Inyo in the Assembly was cajoled into voting for this big grab; but this mistake may well be forgiven in consideration of his good and faithful service in the main.

The Drug Clerk's Work and Pay.

Of all the toilers, retail drug clerks are the poorest paid. It takes at least three years to learn the business, and about the same time to get familiar with its details; so that you may say it requires five years to become a competent clerk. Now, this is so much the best part of his life that is thrown away, and for what? Simply to know how to earn $12 or $14 per week. A man who drives a car can earn more than that, and requires no time to learn. The drug business may not be a profession, although it is generally so considered, but at the least calculation it comes under the head of skilled labor. No one will pretend to deny that drug clerks are intelligent. From my experience with men in general I think they compare very favorably with any other class, and are far above the average. I know comparatively few young druggists who read Latin and Greek and are excellent English scholars. They study botany, geology and anatomy between prescriptions.

One thing is certain, a dunce can not work long in a drug store. He will be found out before he knows it. As a matter of fact, a dull and careless young man can not get a diploma from any of our better class of schools of pharmacy. The position occupied by the retail pharmacist is one of great responsibility. Errors made by the doctor are often corrected by the prescriptionist. The retail drug clerk is expected to be always on hand, night or day, wide-awake, active, and reliable; and no labor of like character receives so little compensation.—Drug Clerk in Globe Democrat.

The Small Tenants of Ireland.

Sir James Caird states that there are 538 000 small tenants in Ireland who will be unable to pay any rent if the present low prices of produce continue. He classifies Irish holdings under nine heads, as follows; Two hundred and eighteen thousand averaging £2 rental, 196,000 averaging £7 rental, 78,080 averaging £12 rental, 46,000 averaging £18 rental, 47,000 averaging £25 rental, 24,000 averaging £35 rental, 14,000 averaging £45 rental, 24,000 averaging £75 rental, 12,000 averaging £200 rental. This makes a total of 659,000 holdings, on which the annual rent is $52,085,000. Many tenants farm two or more holdings, and Sir James estimates the number of Irish bona-fide agriculturists at 400,000.—Chicago Tribune.

The Avenger of Abraham Lincoln.

Boston Corbett, who killed John Wilkes Booth, took up an eighty-acre claim near Concordia, Kan., six years ago, and he thinks the republic is ungrateful for not giving him a patent for the land.—Exchange.

Shingles Can Be Made Fireproof.

It is said that shingles can be made fireproof by setting the butts into a trough of water in which half a bushel each of lime and salt and six pounds of potash have been dissolved.—Chicago Herald.

SIMMONS LIVER REGULATOR

FAULTLESS FAMILY MEDICINE

"I have used Simmons Liver Regulator for many years, having made it my only Family Medicine. My mother before me was very partial to it. It is a safe, good and reliable medicine for any disorder of the system, and if used in time is *a great preventive of sickness.* I often recommend it to my friends, and shall continue to do so.
"Rev. James M. Rollins,
"Pastor M. E. Church, So. Fairfield, Va."

TIME AND DOCTORS' BILLS SAVED *by always keeping Simmons Liver Regulator in the house.*

"I have found Simmons Liver Regulator the best family medicine I ever used for anything that may happen, have used it in *Indigestion, Colic, Diarrhœa, Biliousness,* and found it to relieve immediately. After eating a hearty supper, if, on going to bed, I take about a teaspoonful, I never feel the effects of the supper eaten.
"OVID G. SPARKS,
"Ex-Mayor Macon, Ga."

NOTICE OF APPLICATION FOR PATENT FOR MINING CLAIM.
Mineral Application No. 274.

UNITED STATES LAND OFFICE,
BODIE, CAL. Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its postoffice address and principal place of business at the City and County of San Francisco, California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mojave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate placer claim, mine and mining premises, containing One Hundred and Nineteen 48-100 acres, the same being known as Location No. 1 of the Ancient Lake Borate Deposit Mine, situate in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises now officially surveyed, platted and numbered by the Surveyor General of the United States for California as survey No. 2194, lot No. 39, in unsurveyed township number twenty-seven (27), north range one (1) east, San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 51 minutes east.

Commencing at a chalk stone monument marked "C D No. 1 N E Cor." being the northeast corner of the Desert Borate Deposit Mine, and the southeast corner of this location No. 1, of the Ancient Lake Borate Deposit Mine; from which chalkstone monument, mineral monument No. 34 bears south, distant eleven (11) chains and twelve (12) links. The south corner of cement office bears north 16 degrees, 50 minutes west, distant ten (10) chains and eight (8) links. Winters Peak bears north 68 degrees 45 minutes east, and Chloride Peak bears north 1 degree 15 minutes west, thence,

1st Course—North twenty chains and twenty-four links to a stake marked "C D No. 2" at the base of low white hills, from which a stake marked "C D No. 70" at the southwest corner of location No. 6, of the Ancient Lake Borate Deposit mine bears N. 6 degrees 26 minutes E. distant thirty-six chain; thence,

2nd Course—North eighty nine degrees forty-nine minutes west, seven (7) chains and eighty-seven (87) links to wagon road. Ten chains and five links to a stake marked C D No. 3, being the southeast corner of location No. 2, of the Winters Borate Deposit Mine; thence,

3d Course—South eighty-nine degrees thirty minutes west along the south boundary of the Winters Borate Deposit Mine, forty-nine chains and twenty four links to a stake marked C D 3, at the southwest corner of the Winters Borate Deposit Mine on the dry bed of lake; thence,

4th Course—South twenty chains and sixteen links to a stake marked C D No. 33; thence,

5th Course—North eighty-nine degrees ten minutes east, nineteen chains and sixty links to a stake marked "C. D. No. 33½;" thence,

6th Course—North eighty-nine degrees forty-five minutes east, thirty-nine chains and fifty-two links to the point of beginning.

The above described Location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 is recorded in the mining records of the Death Valley Borax and Salt Mining District, in Liber A, pages 168, 169 and 170, and also in the Recorder's office of Inyo county, California, in Book D of Land, Water and Mining Claims, pages 370 and 371.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square, set two feet in the ground, on the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bear N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W. and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67-100 chains.

The adjoining claims consist of the Winter Borate Deposit Mine and the Desert Borate Deposit Mine, on the north and south respectively.

Particular attention is called to the plat of said location No. 1 of the Ancient Lake Borate Deposit Mine, or survey No. 2194, Lot No. 39 posted upon the said location and to the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said mine and mining premises hereby sought to be patented.

And any and all adverse claims to said premises or any part thereof must be duly filed in this office within sixty days from the date of the first newspaper publication hereof, or they will be barred under the law.

NOTICE OF APPLICATION FOR PATENT FOR A MINING CLAIM.
Mineral Application No. 275.

UNITED STATES LAND OFFICE,
BODIE, CALIFORNIA, Dec. 27, 1886.

NOTICE IS HEREBY GIVEN, THAT THE Henry Clay Mining Company, a corporation organized under the laws of the State of California, having its principal place of business and postoffice address at the City and County of San Francisco, State of California, has, by H. B. Spiller its agent and attorney in fact, who resides at Death Valley, Inyo county, California, and whose nearest postoffice address is at Mohave, Kern county, California, this day filed in this office its application for a patent from the Government of the United States for that certain borate deposit, mine and mining premises containing One Hundred and Thirty-nine 86-100 acres, the same being known as Location No. 6 of the Ancient Lake Borate Deposit Mine, situated in the Death Valley Borax and Salt Mining District, Inyo county, State of California, and more particularly described as follows, to wit:

That certain borate placer mine and mining premises, now officially surveyed, platted and numbered by the United States Surveyor General for California, as survey No. 2194 A lot No. 40, in unsurveyed township number twenty-seven, north range, one east. San Bernardino base and meridian, and described as follows, to wit:

Magnetic variation 15 degrees 31 minutes east.

Commencing at a stake marked "C. D. No. 70" from which mineral monument No. 34 bears S. 30 degrees 20 minutes W. Fifty-nine chains and twenty-nine links, a stake marked "C D No. 2," at the N. E. Cor. of Location No. 1 of the Ancient Lake Borate Deposit Mine bears S. 56 degrees 26 minutes W. distant thirty-six (36) chains. Winters Peak bears N. 70 degrees 30 minutes E; Chloride Peak bears N. 2 degrees 45 minutes W; thence,

1st Course—North eighteen chains and sixty-five links to a stake marked "C D No. 69" at southwest corner of location No. 5, of the Winters Borate Deposit Mine; thence,

2nd Course—East along the south boundary of location No. 5 of the Winters Borate Deposit Mine, nine chains and sixty-seven links to a stake marked "C. D. No. 68" at southeast corner of said location No. 5; thence,

3d Course—South eighty-nine degrees fifty two minutes east, forty-one chains and four links to a stake marked "C D No. 67;" thence,

4th Course—South twenty-two minutes west ten chains and twenty-two links to a stake marked "C. D. No. 66;" thence,

5th Course—East ten chains and fourteen links to a stake marked "C. D. No. 65," thence,

6th Course—South twenty chains and fifty-five links to a stake marked "C. D. No. 73," from which mineral monument No. 34 bears S. 56 degrees 39 minutes W, thence,

7th Course—West thirty chains and forty-one links to a stake marked "C D No. 72," thence

8th Course—North twelve chains and twenty-two links to a stake marked "C D No. 71," thence,

9th Course—West thirty chains and twenty nine links to the point of beginning.

The above Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, is recorded in the Mining Records of the Death Valley Borax and Salt Mining District in Liber A, pages 170 and 171, and also in the Recorder's office of Inyo county California, in Book D of Land, Water and Mining Claims, pages 371 and 372.

Mineral monument No. 34 consists of a durable sandstone, four feet long and six inches square set two feet in the ground, at the top of which is securely fastened a brass plate marked "N. S. E. W. S. B. M. M. M. No. 34," and is situated on the backbone of a butte bearing northwest and southeast, at a point distant a few chains in a southeast direction from the highest point of said butte. From which mineral monument, Winters Peak bears N. 67 degrees 40 minutes E. Telescope Peak bears S. 29 degrees 40 minutes W, and mineral monument No. 33 bears N. 9 degrees 24 minutes W, distant 442 67 100 chains.

The only adjoining claim is the Winters Borate Deposit Mine, on the north.

MISCELLANEOUS.

Particular attention is called to the plat of said Location No. 6, of the Ancient Lake Borate Deposit Mine, or Survey No. 2194 A, Lot No. 40, posted upon the said location, and the plat and field notes and other papers on file in the U. S. Land Office at Bodie, Mono county, California, for further description of the said Location No. 6 of the Ancient Lake Borate Deposit Mine hereby sought to be patented.

And any and all adverse claims to said land or any part thereof must be duly filed according to law in the U. S. Land Office at Bodie, California, within sixty days after the first newspaper publication of said notice hereof, or they will be barred under the law.

SHADE TREES.
Good, Thrifty Trees
One and One-half
Cents Each.
Cottonwood Trees
Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.
10,000 trees can easily be carried at once in a spring wagon.
Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.
These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, MARCH 12.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Idaho papers report snow drifts one hundred feet deep near the town of Murray, in that Territory.

More parties in search of land arrived from San Francisco this week and have been examining the country around Independence.

The new Town Hall is rapidly nearing completion; it will be a dandy, and will be opened with the gayest party ever held in the town.

Mrs. Gregg is improving rapidly since her arrival in town. Her present physician is not a Woodin man by any means, except in name only.

The Principal of the Bishop Creek Academy will preach at the Fort to-morrow forenoon, and at the M. E. church in town in the evening. Mr. Logan is an interesting preacher; turn out.

Mr. A. J. Davis, the shoemaker, has gone up into the Inyo mountains to look after some mining property. He will return Monday the 21st. Parties having business with him will please make a note of this.

Among other subjects of regret at time's changes, it is often asserted that there are no more large families of children born among us. This is a mistake; at Independence a good, hale and hearty mother recently gave birth to her thirteenth child.

Up in the northern part of the State the winter has been very severe. It is reported that seven feet of snow fell in Honey Lake valley in the month of February. In Modoc county the snow was also very deep. Great losses are reported in cattle and sheep.

Two and a half years ago the INYO INDEPENDENT began a fight against the outrageous injustice of the extravagant salaries for county officers, fixed by the law of 1883. It has stuck to its text somewhat closely, and at last the injustice is remedied beyond dispute.

One thousand acres of choice land for sale. No better grain or grass land in the State. An abundance of water at all times; a perfectly healthy location; title without a flaw. Five hundred acres or over, twenty dollars per acre; small lots, forty acres or more, thirty dollars per acre. Apply to the office of the INYO INDEPENDENT.

The official report of the proceedings of the Supervisors in special meeting this week does not show that much was done. But when the special meeting was ordered it was expected that all the furniture for the Court House would be delivered, all the bills be presented and considered. The furniture has not yet been received, nor any bills for the same presented. The matter of fencing, grading and otherwise improving the Court House grounds was also considered; but no official action was taken, therefore nothing appears upon the minutes in reference to this subject.

Mr. Finlay McIver returned to Independence last Wednesday. He expects to begin work without loss of time on the ditch that will convey water to the lands to be colonized south of Independence station. Several professional gardeners will be in the colony; and it is the intention to make extensive plantations of forest and ornamental trees, as well as planting orchards and vineyards. The more he has investigated the subject, the more convinced Mr. McIver is that the land and climate are all that could be wished for the intended purpose. All those who are interested with him are men of substance, and of such character as will make them the most desirable kind of settlers.

Henry Ward Beecher was stricken with paralysis last Saturday, and at last reports was believed to be dying. He is aged about seventy-three years, nearly fifty being passed in the ministry. He was pastor of Plymouth Church, Brooklyn, forty years. No clergyman of his time had so large a share of public attention as Mr. Beecher, and but few had so firm a hold upon their congregations. It is doubtful if any other man could have retained the confidence of a congregation after such a scandal as the Tilton-Beecher trial. But the people of Plymouth Church believed in his innocence and their faith never wavered. During the darkest days of the rebellion Mr. Beecher did good service to his country; and as a patriot he is entitled to honor.

Of Interest to Inyo.

Mr. Gould telegraphed on Wednesday that the Governor had signed the bill making an appropriation for the support of the new agricultural district. The bills to reduce salaries of county officers and for the adjustment of the State line also went to the Governor and would be signed.

Land Slide.

Last Monday there was a big land slide on the Central Pacific railroad at Bronco, in the Truckee river canyon, west from Reno. A freight train was thrown off the track and through travel was interrupted both ways. This was the cause why mail and express from San Francisco was delayed in reaching Owens valley early in the week.

Dull at Bodie.

Bodie is a dull camp at present. The *Miner* of last Saturday says: "This is the dullest payday that has occurred in Bodie within the memory of the oldest inhabitant. Eight years ago to-day $200,000 was distributed among the miners, millmen, and business men of this camp, but the pay rolls of to-day will amount to only about one twenty-fifth part of that sum.

Raisin Culture.

The San Bernardino *Courier* says ten acres planted to raisin grapes in San Bernardino county, if properly attended to, may be relied upon to give a clear yearly income of from $2,000 to $5,000. The same paper says land suitable for such purpose can be bought in that county for $150 per acre, which would, of course, be a good investment. The climate of Owens valley is far superior to that of San Bernardino for growing and curing raisins, and the soil is certainly equal, if not superior, to the best in that county. Instead of paying $150 per acre for land, here is good government land yet open for entry, while the *Courier* says a man might as well look for government land on the banks of the Hudson as in San Bernardino valley.

NEVADA MINES.

Reports from Virginia and Pioche.

The promised advent of a railroad appears to be restoring life to Pioche. W. S. Godbe arrived there lately from Salt Lake, and is confident of being able to raise $200,000 to be expended in prospecting and developing mines there. Some work is being done at the once famous Raymond and Ely mine.

At Virginia the outlook appears to be quite encouraging. The *Enterprise* of Tuesday says:

"All is looking well in the underground regions of the Comstock, and on the surface the snow is fast disappearing. We shall still labor under the disadvantages of muddy streets and bad, if not impracticable, roads for a time. However, it will not be for long. Already in many places are seen spots of dry ground. Stocks have been a little off for a few days, but not on account of bad news from the lower levels. Last Friday a small stream of surface water from the old Latrobe tunnel found its way into the Consolidated Virginia shaft and changed the draft from an upcast to a downcast for two or three hours. This little accident was distorted and exaggerated and made use of in San Francisco to bear the market; the story told there being that the Consolidated California and Virginia mine was full of gas, and that the men could no longer work in the ore-producing sections. To have heard the talk of the bears on Pine street, one would have supposed they were discussing the late outbreak of Mauna Loa.

The Santiago water wheel has been repaired and the mill is again in operation. It is now working on ore that was at the mill when the wheel gave out. Full forces will again be put on at the Crown Point and Belcher to-day or to-morrow.

The ore output at the middle mines is being steadily increased. The assays show a marked improvement in the value of the ore now being raised at the Consolidated California and Virginia. Also the exploring drifts are opening up new and valuable deposits of ore.

A Perfect Marble.

As was predicted from the beginning, the more the marble quarry is developed, the stone is found to be of finer quality. A correspondent writing from the quarry says: "The seams are as straight as a line and run perfectly parallel. The upper layer is about twenty feet thick; the second three and a half feet thick. The third layer has been uncovered but not cut through, and its thickness is not yet known; it may be three feet thick, or it may be twenty or more. One thing is certain, it is a solid layer and in its original place in the formation. There has never been on the market a better marble than that we have here, if it was ever equaled; or a quarry that will compare with this in its possibilities. The Vermont and Italian are good marbles, but are not to be compared to this in color, durability, purity of composition or strength." The new mill is working well and is rapidly sawing out marble for the market, all of which is taken as fast as offered.

A Good Chance for Fortunes.

Parties who had never before been up on the Inyo mountains went to the summit east of Independence at the beginning of the week. In the higher regions they everywhere saw abundant evidence of the presence of much silver and lead ores. There need not be any doubt that the Inyo mountains offer as good a field for prospectors as any other region in the world. For a distance of more than one hundred miles this range gives plenty of evidence of containing many valuable mines, and at no part need the prospector be more than about ten miles distant from a railroad; at many places there is good evidence of valuable ores with half that distance to the railroad, or even less. All along the mountains there is now an abundance of rich bunch grass, affording fine feed for animals.

White Hill Mines.

Last Wednesday Dick Whittaker came down from the White Hill. He brought good reports from all the mines up on the hill. Himself and partners are taking out good ore right along from the mine leased from Barnes and Kehoe. Dick lately found a new prospect about half a mile distant from the old White Hill mine. He brought samples of the ore to town. The pieces are beautiful cubes of galena ore, carrying about eighty-two ounces silver per ton and seventy-three per cent. lead. This promises to be as good a claim as any on the hill.

Pat Keyes and Pat Downs are very lucky in their claim; they have a fine vein and are taking out good ore right along.

Soda Extraction.

Up till the present time a large force of men and horses has been kept at work at Owens Lake, making pools, or ground tanks for the evaporation of the lake water. It is said that as many of these tanks are now ready for use as will be wanted for some time, and that the working force will be reduced to what is needed to attend the pumping machinery and keep the tanks filled. Another experiment is about to be made in evaporating the water. An evaporator the length of a flat car has been sent to the lake, and this will be tried in comparison with the ground tanks.

Fine Gold.

A small run of ore was completed at the Maxim mill last Wednesday. The ore was from the Arastra mine and another claim near Chrysopolis. From 28½ tons of ore 27½ ounces of gold was taken; the gold was remarkably fine, being worth nineteen dollars per ounce. Total value of the clean up, $521; average value of ore per ton, $18. Part of the lot was very poor ore; so that the part that paid anything was of much greater value than the average.

Protect the Children.

Small pox appears to be spreading in Los Angeles. It is reported to be breaking out at other places over the mountains. The dread disease might be brought into Owens valley by some one coming from the other side. Vaccination should be attended to without delay.

Religious Services.

To-morrow Rev. C. L. Logan, Principal of the Academy at Bishop Creek, will preach at Camp Independence at 11 o'clock a. m., and at Independence at half past seven, evening.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

A Good Flux.

Recently some refuse marble from the Owens valley marble quarry was shipped to Reno, to be tried as a flux in the furnace at the new reduction works. It was found to answer the purpose admirably, and will doubtless continue to be used in future.

San Carlos.

Hoole and Shaw are going ahead prospecting the San Carlos mine. This is a good mine to prospect; the men are making wages right along. A car load of ore was shipped away this morning; it is of better quality than any before taken out of the the mine, and the mine is looking better than ever before.

Will It Cross Inyo?

The Denver and Rio Grande Railroad Company are pushing their connections toward California with vigor. It is reported that they have commenced grading toward Pioche, Nevada.

"The road from Pioche will run down the valley, pass Bristol Gap, then down the valley and river to Crystal Springs, and thence to Bakersfield, California. In California it will connect with the Coast road." It would appear from this that the proposed route must be across the south end of Inyo county, and cross the Sierras, perhaps at Walker's Pass.

Another Gone.

Another Owens valley pioneer has gone. Henry Premer died last Sunday at the residence of Mr. James Hines. Mr. Premer came to the valley in 1861, and was one of the brave men who often fought desperate battles with the Indians. Up till about four years ago he owned a nice farm at Blackrock; he was stricken with paralysis, and not having any relatives near to take care of him, sold out to Mr. Rawson. He partially recovered his health, but about two years ago had another attack of paralysis, after which he was quite helpless till his death. The past two or three years he lived with the family of an old friend and neighbor, Mr. James Hines, where he was well and tenderly cared for. He had no property when he died, nor any money beyond what would pay all he owed.

Pleasant Entertainment.

There is a familiar story of an artist trying again and again to paint froth at the mouth of a dog in a picture he was making. After many trials he failed completely to realize his ideal of how the froth should appear, and in despair and anger he threw at the picture the sponge with which he had wiped away the color after each failure. To his surprise and delight the chance throw of the sponge accomplished what his greatest pains had failed to do; the paint in the sponge splashed on the canvas and the representation of foam was perfect. Last Friday evening an impromptu party met at the residence of Mrs. Eibeshutz and the entertainment given by the hostess was as perfect as if weeks had been spent in preparation. A number of young people had quietly issued invitations around town; the party met at the residence of Mrs. Blair and went in a body to the home of Mrs. Eibeshutz. There was plenty of musical talent in the party; the dining room was cleared and converted into a ball room where the company enjoyed themselves heartily. A repast, as choice as it was bountiful, was served near midnight. With song and dance aided by the attentions of the kind hearted hostess and her husband the company enjoyed themselves till near morning.

A Man With a History.

On Thursday of last week a man died at Keeler who had a strange history. Walter O'Malley was long a resident of Inyo county, and was a very old man when he first came here. An other old man, and pioneer of the county, Thomas McDonough, worked with O'Malley at Downieville, Sierra county, in 1851; and he says O'Malley was then an old man. A very short conversation with the deceased was enough to convince anyone that he had received a liberal education in youth. He spoke the French language fluently and with a good accent. When young he was been a good Latin scholar, though long neglect, had let that language and literature become dim in his memory. He was not much given to talk of his early life; but the few now in Inyo county who ever heard him speak on that subject believe implicitly every word he said. None of these can remember that he ever named the year of his birth. As learned from his conversation from time to time, he was born in County Mayo, Ireland. He was entered as a student at Maynorth College, near Dublin, and got his education there. The disastrous ending of the Irish rebellion in 1798 had not deterred others from plotting to get free of English tyranny. Napoleon, in 1804, was declared Emperor of the French. The sanguine Irish people thought that the new Emperor and mighty conqueror might be induced to send them aid. Secret meetings were held and delegates chosen to go to Paris and ask for help. The closest watch was kept of the Irish coasts by English armed vessels; but in a smuggling lugger the delegates managed to elude the blockade; got to sea and reached the French coast in safety. Young O'Malley accompanied the delegates, and was admitted with them to the presence of the Emperor. Napoleon amused the delegates with vague promises; the camp at Boulogne had been formed; a mighty army was organized for the invasion of England, and only awaited the arrival of the French fleet, under Admiral Villeneuve, to attempt a repetition of the exploit accomplished by Norman William, seven hundred and thirty years before. But alas for the hopes of Ireland, the diminutive body that contained the mighty soul of Horatio Nelson encountered Villeneuve; the French fleet was destroyed; the invasion of England abandoned; the camp at Boulogne was broken up, and Napoleon marched his army to Ulm and Austerlitz. O'Malley prolonged his stay in France, not returning to his native land till some years after the final downfall of Napoleon, in 1815. In 1834 he came to the United States, and was among the eager and adventurous men who rushed to California in '49. He became infatuated with prospecting for gold and silver, and continued an eager prospector up to within a very short time of his death. He was last at Independence a little more than a year ago, and made the trip from Darwin, a distance of fifty-six miles, on foot. Such a story may be thought incredible; if true, O'Malley must have been very nearly, if not quite, as old as our republic. He could hardly be less than one hundred and ten years old. It should be borne in mind that there is living and good evidence that he was a very old man at least thirty-six years ago. More than one witness would testify that he was a truthful, honorable man; not given to idle talk, nor prone to speak of himself. No one of these witnesses has the least doubt of the entire truth of his story, however strange it may appear to others.

Supervisors Proceedings.

A special meeting of the Board of Supervisors met at Independence last Tuesday, at 10 o'clock, a. m., for the purpose of considering the allowance of claims for furnishing the Court House, and anything thereto pertaining. Present, Messrs. Harger, Eldred, Robinson and Boland. Absent, Mr. Eddy. Chairman Harger presiding. Adjourned till 2 o'clock, p. m.

When the Board again met the following bills were allowed, and the Auditor was ordered to draw his warrant for the same.

John Keegan, digging vault	$ 5 00
Forbes & Tobey, lumber and hardware	203 51

Signed,
J. D. HARGER,
Chairman.

Attest: P. H. MACK, Clerk.

WEDNESDAY, March 9th, 1887.

The Board met at 10 o'clock, a. m. Same members present.

Bills allowed:

O. I. Mairs, for freighting	$69 04

Board adjourned till 1 o'clock, p. m., at which time the meeting was again called to order by the Chairman, Mr. Harger, and the following bills were allowed.

J. D. Harger, per diem and mileage	$26 10
J. R. Eldred, " " " "	25 80
E. Robinson, " " " "	12 30
T. Boland, " " " "	21 60

The Board adjourned.

J. D. HARGER,
Chairman.

Attest, P. H. MACK, Clerk.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

Vetoed.

The Governor promptly vetoed the outrageous "Stamp Act" passed by the Legislature. Had this vile Act become a law, not even a roll of butter could have been made without a stamp being attached to it, even if the butter should only be intended for the use of the people who made it. The Act was only intended to pander to the sand lot remnant of San Francisco. It is fortunate for the State that we have in the office of Governor a power that can interpose between the public interests and the public plunderers who meet at Sacramento.

Perseverance.

In spite of repeated failures continued efforts are made to work the rebellious ores of Meadow Lake. This camp is in the heart of the Sierras, away up near Truckee. There is plenty of ore and it is rich in gold, but so rebellious that many experiments, continued through twenty years or more, have all been unsuccessful. A ten stamp mill is to be erected the current year for one more experiment. Perhaps the electric process will be tried.

Two Exceptions.

All but two of the present county officers accepted without question their warrants for salaries at the reduced rates, as provided for in the bill of 1885. These two wanted the Auditor to draw warrants for the extravagant salaries fixed by the bill of 1883. The Auditor respected the law and refused to draw warrants that he believed would be illegal and that would get himself and his bondsmen into trouble.

Indispensable to the Toilet.

Darbys Prophylactic Fluid cures chafing, eruptions, and inflammation of all kinds; cures inflamed or sore eyes; relieves pains from bites or stings of insects and sore feet; destroys all taint of perspiration or offensive smell from the feet or any part of the body; cleanses and whitens the skin. Used as a dentifrice it purifies the breath; preserves the teeth and cures toothache, sore gums and canker. A little of the Fluid in the Water used in bathing is very refreshing and especially beneficial to the Sick.

Satisfied with the Electric Process.

The recent experiment with the electric process of amalgamating in the Douglass mill, at Dayton, Nevada appears to have been quite satisfactory to the owners of the mill. Dynamos are about to be put into the mill, and the process will be used continually in future.

BORN.

WOOD—At Independence, March 3d, 1887, to Mr. and Mrs. L. Wood, a daughter.

DIED.

PREMER—Near Independence, March 6th, 1887, Henry Premer, a native of Ohio, aged about 67 years.

O'MALLEY—At Keeler, March 3d, 1887, Walter O'Malley, a native of County Mayo, Ireland, age uncertain.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SPOTTSLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and babies to pay for it."

JOHN E. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. Ist. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $1000."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

Secure A Homestead For Your Family.

CALIFORNIA.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for it the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

International Immigrant Union,
126 Washington St., Chicago, Ills

Rooms 29 and 8.

THE DEAR GIRLS.

Two of Them Go Out Shopping and Patronize a Fashionable Restaurant.

Time—1 o'clock p. m. Place—Fashionable Restaurant.
Dramatis Personæ—Brown Tailor-Made Girl. Gray Tailor-Made Girl. Patient Waiter.

[The young women being advantageously seated, extra wraps and bundles disposed of, Patient Waiter fills their glasses and lays menu-card before them. Neither glances at it.]

Brown Tailor-Made Girl—I declare, I didn't know I was so tired.

Gray Tailor-Made Girl—Nor I. It's so horrible to match goods.

Brown—Dreadful. I'd rather buy material for three new dresses than renovate one old one.

Gray—So should I. I'm in such a quandary about that silk at Cash's. Did it seem to you to match at all?

[Patient Waiter goes off to seat a new-comer. A man.]

Brown—Why, I thought it was quite the nearest of any we had seen yet.

Gray—Did you, really? I am in such a dilemma about it, and I must send it down to Whalebone to-day or she will disappoint me.

Brown—Yes, the wretch! How quickly she takes advantage of a little delay in that way!

Gray—Yes, indeed. She kept me waiting three weeks last winter for a pink tulle because I was one day late in sending word whether I wanted a pointed or square bodice.

[Patient Waiter, having taken man's order to the kitchen, returns.]

Brown—Well, I suppose we must have some luncheon. [Pulls menu-card toward her.] What do you want, Nell?

Gray—O, I don't know. What are you going to have?

Brown—I don't know. I am not very hungry.

Gray—Nor I. I breakfasted late, and don't feel as if I could eat a thing.

Brown (pushing the card across the table)—Do pick out something, Nell. I can't.

Gray—Well, I can't either. I never do know what to take. [Patient waiter retires and serves man's order. Then he returns.]

Gray (still studying card)—Do you like oysters?

Brown—Not much; I get tired of them.

Gray—Well, I don't know but I do, too. At any rate, we won't take an oyster stew, for they only serve crackers with that, and the bread here is just lovely.

Brown—Isn't it. I can make a lunch off their bread and butter. [Patient waiter shifts from the left to the right leg.]

Gray—How would a chicken croquet go?

Brown (not so sure whether it's Dutch treat or not)—O, don't let's take croquets. We'll be sure to have them to-night at the Millers'.

Gray—That's so. O, dear, what do I want? I believe I'll take some cream-hashed potatoes and two cups of chocolate.

Gray—Yes, that will do nicely. (To patient waiter) Bring us two cream-hashed potatoes and two cups of chocolate.

Patient Waiter—Yes, madam; and bread?

Gray—Of course, bread.

Patient Waiter—Bread is only served with a meat order. Not with potatoes alone.

Gray—O, is that so? Then I don't care for potatoes.

Brown—Nor I, either. I do love the bread here.

Gray (resuming the study of the card)—O, bother! let's take some consomme.

Brown—All right.

Gray—But we don't want chocolate with soup.

Brown—O, no.

Gray—Well, we won't take chocolate then, but we can have some ice cream afterward if we want it.

Brown—Very well.

Gray (to Patient Waiter)—Bring two consommes.

[Three-quarters of an hour later.]

Brown (finishing the last morsel of bread and a long story at the same moment)—and from that day to this I have never even bowed to her.

Gray—You did perfectly right. She was horridly rude—in her own house, too.

Patient Waiter (approaching for the tenth time)—Do you wish any thing more?

Brown (looking at her friend)—I really don't care for any thing more—the soup is so hearty.

Gray—Nor I, either. Besides we must hurry.

[Patient Waiter vanishes and returns with the check, which he directly lays midway between the two.]

Gray (buttoning her glove)—This is mine, Kate.

Brown—O, no, indeed, Nell. You must let me pay.

Gray—Not at all. You came out to shop with me.

Brown—O, you forget I have several errands of my own.

Gray—O, I really insist. [Finishes her glove and draws check over. It is forty cents, and she lays a half-dollar on the tray.] Are you sure you didn't want any thing more?

Brown—O, no, indeed. I have eaten all I possibly could.

[Patient Waiter returns with two nickels and retires to a convenient distance.]

Gray (pocketing the nickels)—Do you know, I think it's sort of fast for girls alone to fee waiters.

Brown—So do I. I rarely do.

Gray—Well, let us make haste. We really have no time to lose.

Then the dear girls trot off to Cash's and Gray pays sixteen dollars the yard for trimming to renovate the old dress.—*Philip H. Welch, in Puck.*

—You can not do every thing with one plow: You might expect to obtain all knowledge from one book. For stiff clay soil have the mold-board long and slim, and for a light, sandy soil have a short one with a sharp turn. Turn over a green-sward flat—roll it before harrowing, and never harrow across the furrows.—*Turf, Field and Farm.*

MARKET OF MEXICO.

SUNDAY MORNING ON THE HIGHWAYS LEADING TO THE CITY.

The Gathering at the Market Place. What May be Bought There—The Eating Stands—Lepers and Beggars—Various Strange Sights.

Sunday in place of being a day of rest is the chief working day in the week in all the markets of the republic. Indeed it is said that the beasts of burden know when Sunday comes by the extra amount of work required of them. Then it is the hacendado starts his droves and brings his various products from the distant ranches so as to reach the Sunday market. The scene on Sunday morning on the highways leading into the city is enlivening.

Hundreds of pack mules and burros, loaded with hay, corn, wood, charcoal and butchers' supplies are hurried on by the peon muleteros. There are long trains of cumbersome, two wheeled carts fitted with vats for pulque and others with goat skins of pulque. The ranchero is bringing up the rear. He is mounted on a fine horse and carries a lasso, sword and pistol by his side, and usually wears a pair of fancy leather pantaloons with a couple of rows of silver buckles on the seam from the pockets to the shoe tops. Then along the pathway on either side of the road we see many Indians and inestizos, or half breeds, hurrying on in a jog trot under loads of fruit, vegetables, earthenware, bullrush mats, baskets of eggs, butter, clabber cheese and coops of chickens, etc.

Others are leading haltered pigs, lambs, goats and cows. The women are usually shoeless and hatless, and in addition to their burden of produce most of them carry a baby on top of the load. Whole families plod on in this style for fifty or seventy five miles with a load of produce that will not sell for more than $3 or $4, most of which they will spend for pulque and mescal before they leave the city, yet they will return home after a week's trip just as happy as if they had laid up the whole amount for old age.

SIGHTS IN THE MARKETS.

The articles seen in the market I will here give as they were written down during a recent Sunday morning visit. One department is under cover and is filled with assorted fruits, including oranges, lemons, limes, pineapples, pears, peaches, plums, bananas, quinces, alligator pears, cocoanuts and many other tropical fruits, most of which, owing to the high market tax and costly transportation, sell at about New York prices. The streets and sidewalks in the vicinity are lined with men, women and children, who are seated on the ground surrounded by their market products, which include, beside the ordinary vegetable market products, parrots, pigeons, unweaned puppies, game chickens, pet lambs, haltered pigs and kids. Then there are heaps of old iron, bird cages, cheap calico, brass jewelry, boiled corn, potatoes, stewed pumpkins, beans, pepper, cooked and raw pig's feet, sheep heads, hearts, lights and entrails. There are also flints and tinder for starting fires, metal mounted stone for grinding corn, roots, bark and medical herbs and dye woods.

Close by we see fried shrimps and grasshoppers; each are cooked whole and eaten so. The latter are about the size of our common grasshopper, but are entirely red, but as to looks I would just as soon try to go the common "hopper" of the north. Besides these the natives gather the eggs of the swamp fly and boil them into a paste and eat them with salt, chili (pepper) and tortillas. The fly and its eggs are each sold in the market. The former is somewhat smaller than the house fly, while the eggs are about the size and color of a hay seed. In fact everything is eaten here that the human stomach will digest or anything that is capable of being converted into soup.

A MOTLEY MIXTURE.

Passing on we see women selling flowers, incense, gum, cane and corn stalks, cigarettes, cigar stumps, pulque, stale bread, bullrush mats, second hand combs, and tooth brushes, Aztec images of gods, sacred images and pictures, hot soup, ice cream, toy coffins, candy skulls, prayer books, wax images, hairless bluish poodle dogs, cakes made for the dead, also others made in the form of the crucifix, the Virgin, saints and angels.

Among this motley mixture there are to be seen babies half naked and babies completely naked running at large. In fact numerous entire families of Mexican citizens come and spend all day in the market place. This is their home and they usually bring all their domestic animals along. The market presents a continued babble, as every vender keeps up a constant cry, which he gives in Spanish and sometimes in the Aztec or native Indian dialect, the kind, quality and price of all he has to sell.

Each stand has a pole about eight feet high, upon the top of which there is a flat framework covered with a bullrush mat. This is the only protection from sun and rain, and under such shelter we find the hash and soup stands. In these popular eating stands every article of food that will not scald or burn is dished out by hand; for other things they use large wooden and brass spoons. While not otherwise engaged these women are hunting fleas among their poodle dogs and puppies and combing the children's heads for what they seldom fail to find.

Then there are scores of lepers and beggars sleeping and lounging about gathering the vermin from their filthy rags. Some of them are playing lame while others are covered with sores which they pointedly exhibit, but more often in place of sores are layers of acquired filth. Thus with as few rags as the law will permit and as much filth as they can live under these beggars crowd the market place, confront every class of visitors and expect to be paid for th exhibition they present. There are also many other phases of life among the lowly common sights every day, but for the sake of propriety and decency are not spoken of.—Mexico Cor. Detroit Free Press.

Disuse of the French Language.

A writer in a Belgian contemporary traces the decline of the French language on the continent. Flemish is driving French out of the University of Antwerp and the Academy of Ghent, from the Belgian mint and postoffice, from the legislature and the tribunals. French has ceased to be the official language of the German foreign office; but it is not so well known that even technical terms of French derivation have been arbitrarily substituted in the postal and telegraphic services by words of purely German manufacture—the result of an organized movement to effect the same result in all departments of life. German is gradually conquering French in Alsace-Lorraine. Russia no longer speaks French even at court. Greece, following the German example, is purifying itself from the French element—once exceedingly strong—with the utmost energy; and in Turin, instead of seeing in the shops, as formerly: "Si parla Italiano," one reads an exceptional: "On parle Francais."—Chicago Tribune.

The Idle Capital of the World.

A peculiar instance of the immensity of property accumulation was seen when a Dublin, Ireland, company, Guinness & Co.'s porter brewery advertised for a loan of £6,000,000. In reply they received offers to the amount of £127,000,000, or $635,000,000. "The truth is," The New York Chronicle remarks, "the amount of idle capital in the world to-day is almost without a parallel."

A CURIOUS COMPLICATION.

One of the best known clergymen in Marengo, Illinois, was afflicted with a curious complication of ailments. For twenty years he had nervous dyspepsia. For eight years he had spasms affecting sight, speech and hearing. To these disorders were added *catarrh, bronchitis, and constipation.* His appetite was small, his strength was almost gone, and it was but rarely that he could preach a sermon. After trying almost every other method of cure this clergyman wrote to Drs. Starkey & Palen to see if there was any use in trying Compound Oxygen. They hardly dared to encourage him. Still he concluded to try it. Now see the result. He writes: "My general health is greatly improved, appetite is quickened, dyspepsia is almost gone, constipation relieved, and catarrh and bronchitis greatly helped. Have gained ten pounds in flesh, and am physically stronger, and in better condition generally."

If you cannot understand exactly what Compound Oxygen is, or why and how it should effect such cures, be assured of one thing: *it really does the work.* This is attested by so many who have been brought out of severe chronic illness that there is no disputing it. The Treatise, which is sent free by mail, tells more about it. Write for it to Drs. Starkey & Palen, 1529 Arch Street, Philadelphia, Pa.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

The first few months of happy honeymoon
They bill and coo awhile; then coo and bill
A short time after that, but all too soon
The cooing disappears. 'Tis now all bill.

A CHANCE FOR HEALTH

is afforded those fast sinking into a condition of hopeless debility. The means are at hand. In the form of a genial medicinal cordial, Hostetter's Stomach Bitters embodies the combined qualities of a blood fertilizer and depurent, a tonic and an alterative. While it promotes digestion and assimilation, and stimulates appetite, has the further effect of purifying the life current and strengthening the nervous system. As the blood grows richer and purer by its use, they who resort to this sterling medicinal agent, acquire not only vigor, but bodily substance. A healthful change in the secretions is effected by it, and that sure and rapid physical decay, which a chronic obstruction of the functions of the system produce, is arrested. The prime causes of disease being removed, health is speedily renovated and vigor restored.

"Doesn't that sound heavenly?" whispered the younger Miss Gushington when the groom declared to the bride, "With all my worldly goods I thee endow."

"ONE NAIL DRIVES OUT ANOTHER,"

is a French saying that finds exemplification in the way one disease will substitute itself for another and graver one, in very many cases. Liver disease, for instance, will soon induce blood disorders, throat ailments, skin affections and eventually, because of impoverished blood, consumption itself, unless, indeed, it be treated in its incipiency and early progress by Dr. Pierce's "Golden Medical Discovery," which acts as a specific in these ailments, accomplishing a rapid cure by its powerful alterative action upon the great organs of the body.

A deep peace fills the souls of the man who laid in his winter supply of coal last autumn.

CATARRH, CATARRHAL DEAFNESS AND HAY FEVER.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research has proved this fact, and it is now made easy to cure this curse of our country in one or two simple applications made by the patient at home. Send stamp for circular describing this new treatment to A. H. Dixon & Son, 303 West King street, Toronto, Canada. By special request Mr. Dixon Sr., is now in San Francisco, and can be addressed at 405 Sansome street, for a short time. Sufferers should send for his treatise or call and see him. Consultation free.

The man who wrecks a train is a murderer; the man who wrecks a whole railroad, a financier.

"DON'T PAY A BIG PRICE!"

65 Cents pays for a year's subscription to the Weekly *American Rural Home*, Rochester, N. Y., without premium—"the Cheapest and Best Weekly in the World," 8 pages, 48 columns, 16 years old. For **One Dollar** you have one choice from over 150 different Cloth-Bound **Dollar Volumes**, 300 to 900 pp., and paper one year, postpaid. Book postage, 15c. Extra. 50,000 books given away. Among them are: Law Without Lawyers; Family Cyclopedia; Farm Cyclopedia; Farmers' and Stockbreeders' Guide; Common Sense in Poultry Yard; World Cyclopedia; Dandson's (Medical) Counselor; Boys' Useful Pastimes; Five Years Before the Mast; Peoples' History of United States; Universal History of all Nations; Popular History Civil War (both sides).

Any one book and paper, one year, all post paid, for $1.15 only. Paper alone, 65c. Satisfaction guaranteed on books and Weekly, or money refunded. Reference: Hon. C. R. Parsons, Mayor Rochester. Sample papers, 5c. RURAL HOME CO., LTD.

Without Premium, **65c.** a year. Rochester, N. Y.

Resolutions to lead a better life are like political platforms. The candidate forgets them first.

YOUR FRIENDS WILL NEVER TELL YOU,

but perhaps somebody, who isn't your friend, will, that your presence is rendered offensive by the foul, fetid smell of your breath. Every word you utter, though it be the very echo of wisdom and poetry, disgusts your hearers, and your laugh is productive of anything but mirth to them. It is a duty you owe, not only to yourself, but to society to remove this cause of offense. Dr. Sage's Catarrh Remedy will heal the diseased mucous membrane, will bring relief to yourself and others. Do not hesitate to employ it.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

TORTURING, DISFIGURING, ITCHING, SCALY and pimply disease of the skin, scalp and blood with loss of hair, from infancy to old age, are cured by the CUTICURA REMEDIES.

CUTICURA RESOLVENT, the new blood purifier, cleanses the blood and perspiration of disease sustaining elements, and thus removes the *cause.*

CUTICURA, the great Skin Cure, instantly allays Itching and Inflammation, clears the Skin and Scalp of crusts, scales and sores, and restores the Hair.

CUTICURA SOAP, an exquisite Skin Beautifier is indispensable in treating Skin Diseases, Baby Humors, Skin Blemishes, Chapped and Oily Skin. CUTICURA REMEDIES are the great skin beautifiers.

Sold everywhere. Price, Cuticura, 50 cents; Soap, 25 cents; Resolvent, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., Boston, Mass.

☞ Send for "How to Cure Skin Diseases."

TINTED with the loveliest delicacy is the skin bathed with CUTICURA MEDICATED SOAP.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

J. R. GATES & CO., Proprietors.
417 Sansome St., San Francisco.

A LITTLE LEAVEN LEAVENETH THE WHOLE LUMP.

A disease in one part of the body will eventually fill the whole body with disease. Every year or two some part of the system grows weak and begins to decay. Such part should be removed at once and new matter be allowed to take its place. There's no need of cutting it out with the surgeon's scalpel. Purge away the old, diseased and worn out parts with BRANDRETH'S PILLS. Then the new body will take care of itself.

Graves (softly)—I believe in honor where honor is due. Merriman—Well, then, suppose you honor this note, which is due?

Young or middle-aged men, suffering from nervous debility and kindred weaknesses, should send ten cents in stamps for large treatise giving successful treatment. World's Dispensary Medical Association, Buffalo, N.Y.

Although very fashionable as an article of dress, the bustle is really a back number.

In 1850 "*Brown's Bronchial Troches*" were introduced, and from that time their success in Colds, Coughs, Asthma, and Bronchitis has been unparalleled.

Piso's Remedy for Catarrh is agreeable to use. It is not a liquid or a snuff. 50 cts.

FEROCIOUS PIGS.

How an Army of Peccaries Attacked a Noted Traveler's Camp.

That was a strange adventure of James W. Wells, the English traveler, when he was attacked by peccaries in the wilds of Brazil. Mr. Wells traveled three thousand miles in that South American country, and at the time of the attack in question was in the valley of the Sapao river. With him were some Brazilians, one of whom he called Don and another Jose. That day they had seen signs of peccaries in the swamp, and they knew that those fierce wild pigs will follow a dog's trail. So that night the camp was made particularly strong. A "fort" was built so as to protect the dogs, and some of the Brazilians also went to sleep within the flimsy stockade. Mr. Wells and three or four others went into their hammocks, which were swung out of reach of the snouts of any assailants. But let Mr. Wells tell how the camp was stormed: "I felt my hammock violently shaken. It was the Don awakening me, saying: 'Wake up! Here are the *porcos;* we are going to have some fun.' I sat up, looked around, and listened. The pitchy blackness of night surrounded us, but the fire, burning brightly, sent its flickering light upon the tree-trunks, the foliage and the hammocks. Two men were in the fort, with gun and knife in hand. The dogs, tied to the stake, were with difficulty kept quiet. As I listened it became evident that we were surrounded by some animals. It was a moment of suspense, but not for long, for suddenly, from all around us came a blood-curdling sound of the simultaneous snapping of teeth from vast numbers of the enemy. This was followed by the appearance of a crowd of charging black animals, rushing with wonderful speed toward a common center—the fort. We in the hammocks each lighted a coil of wax-tapers that were prepared for the occasion. And what a scene ensued! The fire was rapidly scattered. Under and around us was a seething mass of black peccaries, barely distinguishable in the dim light, but all pushing and struggling to the front. The men in the fort had discharged their weapons and were hard at work, hacking and thrusting at the peccaries as they endeavored to swarm up the smooth surface of the hides and covered the sides of the fort. The men in the hammocks, after discharging their guns, reached down and slashed with their knives at the swarming animals below them. The attack was more like the wild, reckless bravery of the Arabs of the Soudan, for as pig after pig fell squealing and disabled, scores more struggled for their place. It was a strange, noisy, wildly wierd scene—the swinging hammocks, with their occupants reaching downward, cutting and thrusting with their long, gleaming knives; the dim figures of the men in the fort, and the wild, rushing, charging forms of the peccaries. The extremely disagreeable odors of the animals, their snapping teeth, like musketry file-firing, the reports of the fire-arms, the shouts of the men, the howling and the barking of the dogs—created an indescribably strange and exciting scene. Every bullet of my revolver took effect. I shouted to all the men to fire in a volley. They did so, and the effect was instantaneous. Off went the pigs, and we could hear them snapping their teeth afar. We had killed twenty-seven peccaries."—*Golden Days.*

JACKSON'S LIFE.

Old Hickory's Desperate Fight on the Borders of Georgia and Tennessee.

Andrew Jackson's life was literally a "battle and a march." From his youth, in the revolution, to his old age in the White House, he passed few years without a fight of some kind on his hands. War appeared to be his natural element, and it made little difference to him whether he was fighting the Indians in Mississippi, the British in Louisiana, or Calhoun and the nullifiers, Clay and the Whigs, or Biddle and the banks. He had no fondness for wine, or ardent spirits, or games of chance or skill, although living among men who spent much time in such indulgences. He was interested in horse-racing, however, and was always ready with the pistol when "the times were out of joint," and ugly customers on the warpath. One day, not long after the adoption of the Constitution, there was a horse-race on the borders of Georgia and Tennessee, between the horses of the respective States. The Georgia horse won, and after the race was over the participants in the sport dined together at a tavern near the race-course. Jackson, then a young man, sat next to a stalwart Georgian. In the course of the dinner, the former, smarting under the mortification of defeat, cried out in a loud voice: "Georgia's a mighty mean State. Tennessee's a heap better." No sooner were the words out of his mouth than the stalwart Georgian seized Jackson by the nape of his neck and the seat of his pantaloons and threw him clear across the table. Jackson lit upon his feet like a cat, and, drawing a pistol, opened fire upon his opponent. A general scrimmage ensued, which lasted for half an hour, but, strange to relate, none were killed or wounded. My informant was a boy at the time, and witnessed the fight through a crack of the door, behind which in his terror he had taken refuge. He lived to be nearly ninety, and saw many scrimmages in after years in that wild country between the Coosa and the Black Warrior, but this fight at Bob Anderson's Tavern he always regarded as the great event of his life.—*Ben: Perley Poore, in Boston Budget.*

"The oldest locomotive now in use anywhere near Chicago," remarked a railroader, "is No. 60 on the Illinois Central, still making regular trips down the road. She has been in use thirty-three years. It is estimated that in that time she has traveled 1,650,000 miles, or equal to sixty-six times around the globe. She has hauled passenger trains, freight trains, special trains, pay cars, gravel trains and done switching. She has been in several accidents, but was never badly damaged. She has killed 'her man' half a dozen times. The average life of a locomotive is ten or twelve years, and so you can see that old No. 60 is a stayer."

Sold, to Dec. 27, 1886.
No Other Remedy in the World Can Produce Such a Record.

This wonderful success of "Warner's Safe Cure" is due wholly to the real merit of the Remedy. For a long time it has been *REGARDED BY THE HIGHEST MEDICAL AUTHORITIES AS THE ONLY SPECIFIC FOR KIDNEY, LIVER AND URINARY DISEASES AND FEMALE COMPLAINTS.*

Thousands of people owe their life and health to "Warner's Safe Cure" and we can produce *100,000 TESTIMONIALS* to that effect.

Read the following and note the large number of bottles distributed. We guarantee these figures to be correct, as our sales-books will prove.

Boston, - - 1,149,122.

CAPT. W. D. ROBINSON (U. S. Marine Insp., Buffalo, N. Y.), in 1885 was suffering with a *skin humor like leprosy.* Could not sleep; was in great *agony.* For two years tried everything, without benefit. Was pronounced *incurable.* "Twenty bottles of Warner's Safe Cure *completely cured me,* and to-day I am strong and well." (Feb. 5, 1885.)

Providence, - - 171,929.

EX-GOV. T. G. ALVORD (Syracuse, N. Y.) in 1884 began *running down* with *General Debility,* accompanied with a sense of weight in the lower part of the body, with a feverish sensation and a general giving out of the whole organism. Was in *serious condition,* confined to his bed much of the time. After a thorough treatment with Warner's Safe Cure he says: "I am *completely restored to health* by its means."

Portland, Me., - - 441,105.

MAJOR S. B. ABBOTT (Springfield, Mo.), in 1871 was afflicted with *lame back, Rheumatism and Kidney trouble.* Consulted the very best physicians in San Francisco, and visited all the mineral springs there. Took a health trip to the New England States, but for seven years *suffered constantly* from his malady, which had resulted in *Bright's disease.* After using a couple dozen bottles of Warner's Safe Cure, and two of Safe *Pills,* he wrote: "My back and kidneys are *without pain,* and, thank God, I owe it all to Warner's Safe Remedies."

Bal. of New Eng., - 441,753.

MRS. J. T. RITCHEY (562 4th Ave., Louisville, Ky.) was a confirmed *invalid for eleven years,* just living, and hourly *expecting death.* Was confined to bed ten months each year. Was attended by the *best physicians.* Her left side was *paralyzed.* Could neither eat, sleep, nor enjoy life. The doctors said she was troubled with *female complaints;* but she was satisfied her kidneys were affected. Under the operation of Warner's Safe Cure she passed a *large stone* or calculus, and in Nov., 1885, reported, "Am to-day *as well as when a girl.*"

New York State, - 3,870,773.

C. H. ALLEN (Leavenworth, Kan.), son Edwin, two years of age, afflicted with *extreme case of bright's disease,* and the doctors *gave him up.* By the advice of the doctor's wife, began the use of Warner's Safe Cure, and after taking seven bottles he is *perfectly well* and has had no relapse.

Canada, - - 1,467,824.

Pennsylvania, - 1,821,218.

F. MAYER, (1020 N. 12th St., St. Louis, Mo.) afflicted with *tired feelings,* dizziness and pain across the back, and lost appetite. Was sallow and care-worn all the time. The doctors failing he began the use of Warner's Safe Cure, and reports, "*I feel like a fighting cock.*"

Chicago, - - 2,808,693.

MR. R. BROWN (2221 Woodward Ave., Detroit, Mich.) injured his back from a *fall.* Was confined to his bed six weeks. The fall injured his *kidneys,* producing intense suffering. Warner's Safe Cure *restored his kidneys* to their natural condition, and he writes, "I am now eighty years of age, *smart and active.*"

Detroit, - - 846,964.

MRS. THOS. SCHMIDT (Wife of the Vice-Consul of Denmark, 69 Wall St., New York) reported that her little son after an attack of *Diphtheritic Sore Throat* eight years ago, was afflicted with Bright's Disease in advanced form; by the advice of Gen'l. Christiansen, of Drexel, Morgan & Co., Bankers, New York, she prescribed Warner's Safe Cure, with the consent of the physicians, and reports, "the physicians say that he will *be perfectly well.*"

Milwaukee, - - 458,894.

MISS Z. L. BOARDMAN (Quechee, Vt., in May, 1882, began to *bloat,* thence came *stomach trouble,* terrible *headaches,* and finally the doctor's opinion that it was *Bright's disease,* and *incurable.* Eventually she became nearly *blind,* pronounced by the doctors to be the *last stage* of Bright's disease. After having been under treatment by Warner's Safe Cure for *one year,* she reported, "*I am as well as anyone.*"

Minnesota, - - 648,017.

HON. N. A. PLYMPTON (Worcester, Mass.), in May, 1880, was prostrated by *Gravel.* Under the operation of Warner's Safe Cure alone he *passed a large stone,* and subsequently wrote, "I have had *no recurrence* of my trouble since Warner's Safe Cure *cured me.*"

Bal. N. W. States, - 1,767,149.

ASK YOUR FRIENDS AND NEIGHBORS ABOUT
"WARNER'S SAFE CURE."
THE MOST POPULAR REMEDY EVER DISCOVERED.

Cleveland, - - 682,632.

EX-GOV. R. T. JACOB (Westport, Ky. was prostrated with severe *Kidney trouble* and lost forty pounds of flesh. After a thorough treatment with Warner's Safe Cure he reports, "I have *never enjoyed better health.*"

Cincinnati, - - 873,667.

GEN. H. D. WALLEN (144 Madison Ave., New York), *scarcely able to walk* two blocks without exhaustion, and, having lost flesh heavily, began the use of Warner's Safe Cure and says: "I was *much benefited* by it."

Bal. Ohio, [State,] - 633,158.

COL. JOSEPH H. THORNTON (Cincinnati, O.) in 1885 reported that his daughter was very much prostrated; had *palpitation of the heart,* intense *pain in the head,* nervous disorder and *catarrh of the bladder.* She lost fifty-five pounds. Other remedies failing, they began the use of Warner's Safe Cure, Safe *Pills* and Safe *Nervine,* and within three months she had gained fifty pounds in weight and was *restored to good health.* That was three years ago, and she is still in as *good* health as ever in her life. Col. Thornton, himself, was cured of *chronic diarrhœa* of eighteen years' standing, in 1881, by Warner's Safe Cure.

Southern States, - 3,534,017

St. Louis, - - 1,530,527.

CAPT. GEO. B. WILTBANK (919 Spruce St., Phila., Pa.), prostrated in Central America, with Malarial Fever, caused by congestion of Kidneys and Liver. *Delirious* part of the time. *Liver enlarged* one-third. Stomach badly affected. Could *hold no food;* even water was ejected. Using less than a dozen bottle of Warner's Safe Cure, he writes, "I was *completely cured.*"

Kansas City, - - 717,860.

MRS. (PROF.) E. J. WOLF (Gettysburg, Pa., Wife of the Ed. of the Lutheran *Quarterly*), began to decline with Pulmonary Consumption. (Over 50 per cent. of all cases of Consumption are caused by diseased kidneys.) *Despaired of living.* After a thorough course of treatment with Warner's Safe Cure, she writes, "*I am perfectly well.*"

Bal. S. W. States, - 746,789.

EX-SENATOR B. K. BRUCE (South Carolina), after doctoring for years for what he supposed was *Malaria,* discovered he was afflicted with *Sugar Diabetes,* and having obtained no relief whatever from his physicians, he began the use of Warner's Safe *Diabetes* Cure, and he says: "My friends are astonished at my improvement."

San Francisco, - 1,242,946.

J. Q. ELKINS (Elkinsville, N. C.) suffered for ten years from *Gravel,* which attacked him *every six months.* He lost 45 pounds in three months, and his strength was *nearly gone.* After thorough use of Warner's Safe *Diabetes* Cure, he reports, "I am *as well as I ever was,* after using fourteen bottles."

Bal. Pacific Coast, - 732,316.

THE WARRIOR AGE.

Europe at Present Placing Military Glory Above All Other.

Standing armies constitute one of the most important factors in the socialistic problem in Europe. Hundreds of thousands of the strongest and most active young men of these countries are taken from the industrial ranks, and the burden of their pay and support, as also of the immense caravans or camps, arsenals, fortifications and all sorts of military supplies and equipments is thrown upon their parents and weaker brothers and sisters left to work at home. It is pitiful to mark the contrast between these soldiers, with their fine physique and gay uniforms, lounging around the camps or strolling the streets, swarming like locusts everywhere, and the miserable peasants with their wooden shoes, ragged clothes and half-starved looks; old men and women, young girls and little children, toiling in the hot sun and in the dirt, struggling to their utmost strength for their poor and insufficient food, and taxed to the last soldo on every mean article they buy or own to keep this enormous force of their stout brothers in the army.

Traveling in Germany seventeen years ago, I heard everywhere the boasted fame of its great scholars and its great schools. To-day the talk is only of its soldiers, its victories and its military power and greatness. Soldiers are the most welcome guests in the fashionable salons of its capital, and it is complained there that the English-born Princess Imperial will still invite to her receptions eminent artists and men of letters. Its great universities are still crowded, but it is largely with foreign students, and because the strict requirement of a university education for admission to the liberal professions compels the attendance of young men seeking a professional career. But the army is now on the highway to honor. The soldier, not the scholar, is in fashion; and I have heard German students even wish for the outbreak of war that they might put to proof their military discipline and have a chance to win the promotion so slow coming in civil life. Young Germany talks, thinks and dreams of war. Its heart has gone back to the age of iron. If the sciences and arts and commercial interests did not bind Europe to nineteenth century progress the general degradation of its civilization would be inevitable. As it is the amenities, the moral principles and the intellectual refinement which mark the highest and best civilization, have already suffered great loss. Europe is proving the truth of the old Roman maxim, *inter arma leges silent*, which for the occasion I will translate: "Among armies civilization slumbers."—*Ohio State Journal.*

PARISIAN STYLES.

Plush Garments More Popular Than Seal and Other Fur Wraps.

Long cloaks falling to the bottom of the dress, princess style, are not in as great favor here as last year. Ladies prefer the shorter plush garments, which in themselves are very ornamental, and provide for the display of elegantly fashioned dress skirts. The Queen of Italy has just ordered several superb plush garments from Worth. She is said to be the best dressed woman in Europe, and therefore her toilets are much cited. Among these wraps was a sealskin plush, short in the back, and with long front panels gathered at the ends and finished off with long tassels of brown, beige chenille, and old gold bullion. The wide sleeves were lined with old gold satin; the whole garment was bordered with a heavy passementerie of fine brown chenille and old gold; in front plush *revers* opened upon a vest of Swedish leather, covered with old gold embroideries. One to wear with a heliotrope plush dress was a short garment, half visite, half dolman. It was made of heliotrope satin covered with antique Venetian guipure, drawn and embroidered with threads of gold; it had epaulets and Medicis collar of old gold guipure and an old gold "motif" in the front, ending with cord and tassel of the same precious metal. Worth slashes most of these garments in the back, so as to allow room for puffings.

The new opera cloaks, made long to envelope the form, are lined entirely with the long-furred white Thibet; this fleecy lining extends over he velvet as plush and forms collar, bands down the sides, and cuffs on the sleeves. A superb one, made by Worth for a Russian Princess, was of Persian fabric of the dull red and blue, heavily wrought in silver and gold; over the edges of the Thibet fur fell aiguillettes made in passementerie to match the Persian stuff; the same passementeries formed the wide Louis XV. collar. Clasps of old gold fastened the garment down the front.

The traditional cashmere shawl which was formerly considered an indispensable part of a lady's trousseau has been lately replaced by an assortment of expensive furs—the sealskin cloak for usual wear (that fur is always considered demi-toilette in France), valuable bands of marten for the trimming of calling garments, and chinchilla for evening cloaks.—*Paris Cor. Chicago Times.*

Awkward Pauses.

Magistrate—You are evidently a scoundrel.

Prisoner—I am not as much of a scoundrel as you——

Magistrate (fiercely)—What's that, sir?

Prisoner—Seem to suppose.

Magistrate—Well, may be not. Hereafter don't indulge in any awkward pauses.—*Philadelphia Call.*

PITH AND POINT.

—The hat makers had a banquet the other night, and the next morning not one of them could find a hat in his shop big enough for him.—*Boston Post.*

—It appears to us that the woman's heart kept in alcohol in Philadelphia isn't much of a curiosity. We have no doubt several women have hearts.—*The Judge.*

—A good many fables begin "Once on a time." Oddly enough, too, when married men have been once on a time they are apt to invent fables.—*Somerville Journal.*

—Definition of a bore.—

Do you ask me what a bore is?
I will tell you who is such:
'Tis the one who knows too little,
'Tis the one who knows too much.
—*Tid-Bits.*

—The Ball family fall heirs to twelve millions in Scotland. There are three balls in New York that represent the portable property of many good families.—*Albany Journal.*

—The *Phrenological Journal* says: "In choosing a wife, be governed by her chin." A man is apt to be governed by the same thing after he gets a wife.—*Kansas City Squib.*

—Tender-hearted young lady—O! you cruel, heartless little wretch! to rob those poor birds of their eggs! Wicked little boy—Ho! That's the old one 'at you've got on yer bonnet. Guess she won't care.—*Forest and Stream.*

—Faith is sometimes represented by the figure of a drenched female clinging to a sea-washed rock; but a better personification would be a bald-headed man buying a bottle of patent hair-restorer.—*Shoe and Leather Reporter.*

—Photographer (to sitter)—That gentleman who preceded you is the most remarkable man I ever saw. Sitter—In what way? Photographer—He didn't tell me that he would rather have a tooth pulled than have his picture taken.—*N. Y. Sun.*

—Flowers of sulphur sprinkled on a hot shovel and the fumes inhaled while they are fresh is recommended for a cold in the head; but Fogg affirms that he will die before he will snuff up burning brimstone. It is not unlikely.—*Boston Transcript.*

—Clerk (in fashionable up-town bakery to proprietor)—That tray of American soda biscuits in the window, sir, has been there for three weeks, and they are getting sour. What shall I do about it? Proprietor—Label them English tea muffins.—*Pittsburgh Dispatch.*

—Men are strange creatures. They will waste an hour hunting a collar-button instead of having an extra supply and letting their wife find the missing one. You never see a woman look for a pin she drops. Her husband finds it when he walks around in his bare feet.—*Philadelphia Call.*

—Omaha Girl—Pa, there is talk of forming an archery club in our set, May I join? Omaha Pa—I saw a girls' archery club practising the other day, and I am afraid I can't afford to bear my share of the expense. "Why, bows and arrows don't cost much." "No; but it takes so much lumber to build a mark."—*Omaha Herald.*

—Husband—My dear, that is a long motto you are working, Wife—Yes, John. He reads on it:

"While the lamp holds out to burn
The vilest sinner may return.

Is it to be hung in the vestibule of the church, my dear?" "No, John; I'll hang it on the chandelier in the hall."—*Harper's Bazar.*

DESPAIRING TOM.

Story of a Faithful Cat That Died of a Broken Heart.

A lady visiting a bird-fancier's shop was struck by the beauty and size of an Angora cat exhibited for sale, imprisoned in a large parrot's cage. The captive effectually pleading for pity by licking her hand, was purchased and taken home. After some years, the cat was removed with his mistress to Brighton, though under protest as to future reformation. Tom was then probably one of the largest of his species, and universally admired. He had adopted an apparently incurable habit of sharpening his claws on a highly polished dining-room table; and also committed sad havoc amongst the flowers in the garden of his new abode, spending a great portion of leisure time luxuriously lying in the sunshine, amidst mignonette, etc. A decree of banishment was at length unwillingly issued, and poor innocently erring Tom forthwith departed to a country rectory, where he was much valued. Every kindness that could conduce to his comfort was shown, all his special tastes as to diet consulted; but the exile remained inconsolable. He never attempted to return, not seeming to have sufficient energy left to attempt aught in self-defense; he simply gave himself up to despair. It was vainly hoped that time would reconcile the mourner to his changed lot, but matters only grew worse, the cat pining and fretting till he became the shadow of his former self. He could not twine "fantastick garlands," or utter an altogether "melodious lay," like "the fair Ophelia," but wandered aimlessly about the garden, eating little except green fruit and such strange fare; dying, after a brief period, literally of a broken heart. The chief object of this devoted love was the cook he had left behind him. The attachment, unlike that of Shakespeare's ill-starred heroine, may not have been a romantic one; still, it was purely disinterested, unwavering amidst all mere worldly temptations.

Nature is fine in love; and where 'tis fine,
It sends some precious incense of itself
After the thing it loves.

Poor faithful Tom gave the sole offering he had to give—his life. If it be true that "Man's love is of man's life a thing apart," it was in the above case proved to be a cat's "whole existence."—*Chambers' Journal.*

A FIGHT WITH WOLVES.

The Use to Which a Norwegian Farmer Put a Big Wash-Tub.

In former times wolves were numerous in Norway, and committed enormous depredations upon sheep, and consequently were much feared by the owners of flocks, whose only weapon for destroying them (before the introduction of fire-arms) was the axe. It was dangerous for a man to travel in lonely places, for these ravenous beasts had been known to attack human beings when very hungry. In these days they are seldom seen, and both wolves and bears have been well-nigh exterminated.

The story is told of a Norwegian farmer of seventy or eighty years ago, who was conveying one of his swine to another estate in the night. His road lay across a pond which was frozen over. Upon his sled he had fastened a very strong, high tub, in which he placed the weighty animal, and covered it. The tubs which are in common use for washing, as well as other purposes, are nearly four feet deep, and are supported by three feet.

The middle of the pond was reached, when in the stillness was heard the faint patter of feet and the distant howling of a pack of wolves, and the farmer knew they were pursuing him with swift directness. Now was his time to exercise the coolest bravery and the most adroit skill. He at once loosened his horse from the harness and let him go. The voracious creatures were almost upon him when he threw them the fat porker. He then overturned the tub and hid beneath it as his only refuge, his axe his sole weapon. After devouring the delicious booty the wild beasts tried to get at the man and make him their prey by thrusting their paws or their noses under the tub. But he wielded his axe with energy, and his well-aimed blows cut off the intruding members steadily. The ferocious animals fell back on the ice, one after another, bleeding and helpless, but the farmer remained imprisoned until daylight. When he knew by the silence that he was alone and safe he crept forth to view the scene and mark the result of the adventure. It appeared that eight or ten of his foes had been destroyed, and the bloody tracks upon the ice showed that others had been wounded and had crawled away. By the bounty which he received for killing the wolves and the sale of the skins taken from them the farmer gained a round sum, although he lost the animal he set out with. The horse had trotted back to his stable.—*Chicago Tribune.*

FRENCH IN DIPLOMACY.

Introduction of the English Language Into Correspondence With Foreign Nations.

It is admitted that the representatives of England in foreign courts ought to know not only French, but Spanish, German, Italian, and, if possible, the Oriental languages as well. But it is urged that the Foreign Secretary need not know any other language than English. If this were so he would be absolutely without means of direct communication with the representatives of foreign countries here, and would be at the mercy of secretaries and chief clerks. Diplomacy is a social art as well as a matter of business. International relations require an international tongue. In the days which followed the revival of learning, Latin, as the language of the church, the professions and the men of science and letters in every country, was the natural medium of communication. It is now used only in the state papers of the Pope. Henry VIII. and Elizabeth and James, and the statesmen of their time, were able to converse in it. The ascendency of Spain led to the not infrequent employment of the Castilian tongue. When Louis XIV. made France the dominant power in Europe, and nearly every war and treaty was, in one aspect or another, a French war and treaty, the French language naturally came into the general use which it has retained. The choice was made by a process of natural selection. French had been polished into an instrument of almost perfect sharpness and precision for the purpose of exact statement and facile intercourse. But with the decline of the French monarchy, the monarchy of the French tongue is challenged. Lord Greenville, in his reply to the overtures for peace which the first consul addressed to George III., was, with the accidental exception already referred to, the first to introduce the English language into correspondence with a foreign nation. Mr. Canning, who was erroneously credited with the authorship of the dispatch, defended the innovation on the ground that, though it might be proper to employ the French language in correspondence about the affairs of another State, yet a manifesto as to the policy of England ought to be in English. There is an early precedent for this proper national self-assertion in the case of Sir Richard Fanshaw, who, being sent ambassador to Spain, on his first audience "delivered his message in English, having first procured his Catholic Majesty to be prepared to accept it, and spoke Spanish only in paying his respects to the Queen."—*Saturday Review.*

Easily Identified.

A New York lady on board of one of the ocean steamers asked one of the officers:

"Can you tell me, sir, where the captain of this vessel is?"

"Yes, madame; go up on deck and if you see a man walking up and down with a red beard and a $19,000 a year salary that's him."—*Texas Siftings.*

A Sweeping Reform.

Up in Beef Gap, Idaho, there is a new city marshal. He was "Onion Bill" before his election, but now they call him "Chief" and add respectfully his last name Birdell. Here is a copy of a circular he posted in prominent places in the town and its outskirts. It has had a good effect:

NOTICE.

This is to inform all citizens of Beef Gap and strangers sojourning therein that on and after this date, Monday, Nov. 25, 1886, it will be unlawful in this town for anybody to carouse, cuss or whoop.

On and after this date also there will be in this town

No more compelling people to drink when they don't feel like it;

No more shooting of plug hats;

No more short card games of chance;

No more drinking of whisky out of bottles when the bars are open;

No more noisy deviltry;

Any man driving or riding a horse into a public bar will be shot.

Any man or men compelling another man to dance will be shot;

Any man raking down the pot at poker without the cards to back it up will be shot dead;

Tramps, tin-horn gamblers, back door lunchers, beggars, boneyard bummers, scrappers and coffin-paint demolishers are warned away from Beef Gap.

It is the determination of the new administration to usher in an era of new reform, and all good citizens will array themselves on the side of the law. All others will be turned over to the coroner.

By the Mayor;

BILL BIRDELL, Chief.
—Arizona Star.

Why Not?

Young Wife—Why, Clarence! what under the sun have you on your head? You look ridiculous.

Husband—Do I? Well, those infernal turkey feathers on your hat make you look so outrageously tall and me so ridiculously short that I had to do it for self protection; besides it combines the useful with the ornamental.

An Unfortunate Order.

"James," said a grocer to his clerk," you musn't say 'lady' to the woman customers any more; they don't like the term."

"All right, sir," replied James; and presently Mrs. Wayback came in.

"I want a Philadelphia dry picked codfish," she said, "and three bars of soap."

"Yes, woman," responded James; "where'll you have 'em sent?"

"Don't you 'woman' me, you young snapperhead," said Mrs. Wayback, eyeing him with disfavor. "I'm a lady a-a' don't you forget it," and she flounced out.—New York Sun.

One at a Time.

A counsel thought that he would overcome Lord Norbury on the bench. One day his lordship was charging a jury, and the address was interrupted by the braying of an ass. "What noise is that?" cried Lord Norbury. "'Tis only the echo of the court, my lord," answered the counsel. Nothing disconcerted, the judge resumed his address, but soon the barrister was compelled to interpose with technical objections to the charge. While stating them the ass again brayed. "One at a time, if you please," remarked his lordship with a sarcastic smile.—American Law Review.

The Proper Acknowledgment.

A mother, talking to her little 4-year-old daughter said: "Do you not feel thankful that you have a good home and a papa and mamma, with plenty of comfortable things to wear and food to eat, while there are so many children who have not so many things to make them happy?" "No, I do not," said little Miss Perverseness. But when safe in bed at night and alone in the room her mother overheard her saying: "Yes, I have a nice papa and mamma and everything good, and, dear Lord, I am much obliged."—Utica Press.

At the Festive Board.

"Mr. Peterby, will you please carve the turkey?"

"No, I thank you. The man who carves must either be a fool or rascal, and I don't care to be either."

"What do you mean?"

"If he keeps the choicest portions for himself he is a scoundrel; if he does not keep them for himself, he is a fool, and as I said, I don't care to place myself in either category."—Texas Siftings.

Spoiled for the Service.

Commanding Officer—Bring your company up.

Captain (just taken back into the army)—Well, I'll go and talk to the boys and see if they'll come.

"Great stars! Where have you been since you left the army?"

"Been commanding a regiment of militia."—Omaha World.

A Graphic Description.

Some time ago a little 3-year-old, playing in the yard, came into the house and said in a surprised tone to his mother:

"Mother, I saw nothing with a tail to it."

His mother, being unable to understand him, followed the child into the yard, where the little fellow pointed to a snake which was gliding away through the grass.—Youth's Companion.

Fashions Change.

Edith—Seems to me every one of these ancient sculptures is from the nude.

"Yes; how wise those old artists were!"

"Wise?"

"Why, yes; they had sense enough to know the dresses of the period would go out of fashion, so they omitted them."—Omaha World.

From Child to Woman.

"You shouldn' act in such a childish manner," said a mother in a chiding tone of voice to her little daughter. "You will soon be a young lady, you know."

"If that's so, ma," replied the little tot rather skeptically, "don't you think that it is about time that my bustle was beginning to grow?"—Judge.

COWBOY HOSPITALITY.

The Free and Easy Way in Which They Welcome Travelers and Strangers.

One hot afternoon, as we were approaching Big Dry Creek, a cowboy suddenly rode in sight on the crest of a ridge, and came down the slope toward us at a swinging gallop. He sat as erect as a bronze statue, and had he been lashed to his horse like another Mazeppa he could not have sat more perfectly motionless in his saddle. Instinctively we straightened up our tired shoulders, and sat erect also. Evidently he wanted to speak to us. So we rode frward to meet him, wondering the while whether his manner would be agreeable or irritating.

After we had civilly exchanged how do-you-dos, he inquired if we had seen any horses since morning. He had lost some, and up to that time, two o'clock, had ridden about twenty-five miles in search of them. No, we had not seen any horses. So we fell to asking questions about trails, creeks and waterholes. We were getting a deal of information, when he suddenly exclaimed:

"Looky here, fellers! The best thing you can do is to pull on to our ranch and put up for awhile. It's only twelve miles from here. Take the trail that turns off to the left, about three miles ahead. You won't find anybody at home—the boys are all off on the round-up, you know—but just go right in and make yourselves at home."

"Isn't the door locked?"

"Thunder, no! We never lock doors in this country. Somebody might come along hungry, and want to get in to get some grub, or stay all night. If a cowboy wanted to get in, and found the door locked, he'd just simply break it down."

"Aren't you afraid of thieves?"

"O, no; nothing is ever stolen. A man's upon his honor, you know; and, besides, if a feller'd ever really steal any thing out of a shack, the country'd soon be too hot to hold him. Anybody that comes to a shack hungry is expected to go in and get a square meal, and stay all night if he wants to."

"Isn't that privilege often abused?"

"No, hardly ever. Say, you'll find a cow up at the ranch and you can milk her if you want to. There are plenty of eggs about the stable; if you want 'em go for 'em. Just make yourselves at home, and stay as long as you like. I'll be glad to have yer company."

A few more remarks were exchanged, and then our cowbow gathered up his reins and said:

"Well, I've got to finish my circuit, twenty miles more, I reckon; so I must be moving. So long. I'll see you at the ranch about sundown."

And flinging the last remark over his shoulder at us his pony galloped rapidly away, a moment later he rode over the ridge and disappeared.—*W. T. Horuaday, in Cosmopolitan.*

FLOATING VILLAS.

The Queer House-Boats Moored Along the Banks of the Upper Thames.

Villas on the Thames, especially in the pleasant, picturesque stretches between Hampton court and Windsor, command such fabulous prices during the summer months that nothing but millionaires can indulge in the luxury. "Necessity is the mother of invention," and an ingenious mind has initiated a movement that will make of the upper Thames a series of floating villages. This new fad is a house-boat, built on almost a flat bottom, thus allowing it to be moored at any sylvan spot close under the umbrageous trees that line the banks. The boat has its saloon, dining and sleeping rooms, and is generally fitted up by the ladies with exquisite taste and comfort. There is great luxury in a quiet life on these handsomely-appointed crafts, and their numbers increased so rapidly last year that the tradesmen sent round small steamboats taking orders and delivering the provisions. The owners of fine villas are naturally indignant at the constant inroads on their privacy, and the question as to the right of mooring such boats in close proximity to the grounds of a park is to be tested in the law courts. These craft were moved to different parts of the river by means of tugs, but recently a stern-wheel velocipede has been tested as a motive power. The paddles, two feet in diameter, are connected with a gut-band to the driving-wheel, which is twenty-six inches in diameter and over seventy pounds in weight. Ordinary bicycle handles, which are connected with the rudder, saddle cranks, and treadles are used. The boat is thirty feet long and seven feet beam, and was propelled two miles and a half, between Marlow and Bourne End, in forty minutes, which is good time. It caused a great deal of astonishment to the oarsmen and inhabitants of other house-boats to see such a big thing propelled so easily by one man.—*London Letter.*

—In the school-books of a generation still young a vast tract of territory west of the Missouri river was known as the "Great American desert," and the manner in which that supposed sterile area has been transformed into profitable grazing regions and has even been covered with fertile farms and gardens is one of the most remarkable achievements of American enterprise during the past decade. Eastern people who behold with wonder the present rapid growth of that section are even led to believe that the settlers bring an increased fainfall with them and thus overcome the arid character of the plains, or at least that the cultivation of the soil and the planting of trees enhance the supply of atmospheric moisture.—*N. Y. Herald.*

—If you have no dark place for the fruit cans wrap each one separately in heavy paper.—*Good Housekeeping.*

A Different View of It.

A Detroiter, who was driving out on the Holden road the other day, came to a spot where the snow had badly drifted on each side of the track just as a woman driving a horse and "pung" entered the other end of the cut. As both held to the road their horses soon came head on and stopped.

"Why didn't you turn out?" shouted the man.

"Why didn't you?" replied the woman.

"I've got seven miles to drive, but I'll stay here all winter before I'll turn out?"

"And I've got five dozen eggs here, and I'll let 'em freeze as hard as rocks before I'll give an inch!"

The man dropped the lines, lighted a cigar and leaned back on his seat. The woman dropped her lines, lighted her pipe and wrapped the old buffalo robe around her feet. Thus they sat for eight minutes, when the man grew impatient and called:

"What's the price of hogs out your way?"

"Oh, you've got all the pork you want in your sleigh!" she answered.

"I'm glad I'm a widower!"

"And I'm glad I'm a widder!"

"Eh? Are you a widow?"

"Sartin, and I own 225 acres of the best land in Greenfield. So you are a widower?"

"Yes'm. Madam, pray excuse me. I'll cheerfully turn out."

"Oh, don't mention it. I'm perfectly willing to haul into the snowbank."

"Ah! madam, allow me to hope that you will overlook my"——

"Oh, certainly. Fine weather, but rather cold. Good-by."

"Good-by, madam. Hope you a safe journey."—Detroit Free Press.

He Caught the Train.

And—would you believe it?—when at last he shook himself out and dragged her up and restored her fan to her, she slapped his head with it!—London Judy.

A Stupid Court.

Lady Lawyer (to witness)—You have been an intimate friend of the family, haven't you?

"Yes."

"You have seen the defendant here ill use his"——.

He Lawyer—I object. The question is improper.

The Court—Objection sustained.

Lady Lawyer—Haven't you seen the defendant——

He Lawyer—Ibjec; same ground.

The Court—Same ruling.

Lady Lawyer—Well, then, what I want to know is, hasn't his wife, my client, been shamefully ill——

He Lawyer—Ibjec.

Court—Jection stained.

Lady Lawyer—Please state, then, what you know about the cruelty of the man to——

He Lawyer—Ibjec.

Court—Same ruling. Ask the witness, madam, to tell what he knows.

Lady Lawyer—Well, that's what I'm doing? Now, sir, tell us what you know.

Witness—About what?

Lady Lawyer—Why, about the cruelty——

He Lawyer—Ibjec.

The Court—Jection stained. No more of this, madam.

Lady Lawyer—Very well. Now then, witness, tell us what you know.

Witness—Ask me questions and I'll answer 'em.

Lady Lawyer—Why, just tell us how you have seen him abuse—Oh, dear me, I forgot. Well, tell us—Oh, judge (breaking down in tears), he knows perfectly well what I want him to say!

The Court—Recess for half an hour. Our learned sister can employ the time in composing herself.—San Francisco Post.

Track!

—London Judy.

A Test of Faith.

"I's heer, Brudder Johnson," said the minister, "dat yo' lack de trew spirut ob Christun charity. Am dat so?"

"I's dont 'actly comprehend de quessun," replied old Johnson, not liking the way things were drifting.

"Well," continued the minister, "let me gib you 'xample. Subbose dere wus a room chuck full ob gold, wid no un to watch it; would yo' hab faith 'nuff in de 'tegrity ob your brudder chu'ch member to trus' him in dere alone?"

"Dat am a quessun, an' no mistake," replied old Johnson, his mouth watering at the thought of the picture just described. "In a case ob dat kin', sah, I's don't tink I wud trus' miself."—Judge.

Instructing the Firemen.

The engine arrived and the men came piling upstairs. The small boy of the family was in a fever of delight. He was examining the hose and chopping things with the axes, for there wasn't any very bad fire and it took them some time to get at it. They found a burning joist set on fire by the neighbor's furnace. The little boy meanwhile was talking to some of the disengaged firemen.

"Say," he said, "if there should be a big fire here, and you want to save things please don't save my winter flannels, for they tickle me."—San Francisco Chronicle.

Not a Mourner.

At the funeral of a wealthy New Yorker last week a reporter was elbowing his way with as little commotion as possible among the well dressed mourners who packed the wide halls and spacious drawing rooms. Accosting a fine looking man faultlessly dressed, who was standing near the door, the reporter inquired for his name to add to his well filled list. He was electrified when the gentleman replied: "I guess you don't want my name, young feller; I'm just a common 'cop,' watching the hats and bric-a-brac."—New York Tribune.

GYPSY MUSICIANS.

The Old Love of Music Still Lingering in the Tents of the Nomads.

In days of yore, long ere the hills of England were tunneled, its rivers crossed, or its valleys were invaded to make way for railway trains, it was sweet to listen to the mild music which, emanating from some Gypsy camp in a secluded dell, mingled with the rich notes of the nightingale and other birds of song, just as the sun, on his vermilion car, sank below the horizon in the distant west. Although inroads have been made on the haunts of the Gypsy tribes, and there music is not heard so often now as formerly, the old love of it still lingers in the tents, and lives in the hearts of this singular people. Their home is now and then enlivened by music and dancing, especially when the women have had "good luck," and the men have been successful in their speculations. It is then they indulge, more than they usually do, in both eating and drinking. A few of "fortune's smiles" will make them so light-hearted, and they become so merry, that a tune on the violin is proposed, to which all that are able and so disposed dance with great hilarity, especially to that known as "The White Cockade." Many of the men dance well, and the women and girls generally move lightly and elegantly, and all of them seem to enjoy the pastime. The favorite instruments of the Gypsies are the harp, fiddle, tambourine and tin whistle. Such apt pupils in music are many of them, that if they had proper facilities and efficient tutors they would be no disgrace whatever either to the most eminent composers or to the most accomplished musicians. In different parts of Europe, particularly in Russia and Hungary, many Gypsies have become very popular as singers in cathedrals and churches, and have often been employed to sing before Princes and fashionable assemblies, both private and public. In Spain some of the Gitanos are theatrical performers, and cases are not infrequent in which they have attained great efficiency and popularity. In Hungary a writer relates of knowing several Gypsy women who were popular as public singers, and one in particular whose voice was of such remarkable sweetness that she was almost constantly engaged in singing at concerts given in the private mansions of the rich and noble for many miles around, and for which she was always very munificently paid.—*Interior.*

READING FOR GIRLS.

The Point at Which Their Intellectual Career Is Closed.

We all know Charles Lamb's views on the subject of early reading, as expressed in his triumphant vindication of Bridget Elia's happily neglected education: "She was tumbled by accident or design into a spacious closet of good old English books, without much selection or prohibition, and browsed at will upon that fair and wholesome pasturage. Had I twenty girls, they should be brought up exactly in this fashion." It is natural that but few persons are anxious to risk so hazardous an experiment, especially as the training of "incomparable old maids" is hardly the recognized summit of maternal ambition; but Bridget Elia at least ran no danger of intellectual starvation, while, if we pursue a moderate school girl along the track of her self-chosen reading, we shall be astonished that so much printed matter can yield so little mental nourishment. She has begun, no doubt, with childish stories, bright and well written, probably, following each other in such quick succession that none of them have left any distinct impressions on her mind. Books that children read but once are of scant service to them; those that have really helped to warm our imaginations and to train our faculties are the few old friends we know so well that they have become a portion of our thinking selves. At ten or twelve the little girl aspires to something partly grown up—to those nondescript tales which, trembling ever on the brink of sentiment, seem afraid to risk the plunge; and with her appetite whetted by a course of this unsatisfying diet, she is soon ripe for a little more excitement and a great deal more love, so graduates into Rhoda Broughton and the "Duchess," at which point her intellectual career is closed. She has no idea, even, of what she has missed in the world of books. She tells you that she "don't care for Dickens," and "can't get interested in Scott," with a placidity that plainly shows she lays the blame for this state of affairs on the two great masters who have amused and charmed the world. As for Northanger Abbey, or Emma, she would as soon think of finding entertainment in Henry Esmond. She has probably never read a single masterpiece of our language; she has never been moved by a noble poem, or stirred to the quick by a well-told page of history; she has never opened the pores of her mind for the reception of a vigorous thought, or the solution of a mental problem; yet she may be found daily in the circulating library, and is seldom visible on the street without a book or two under her arm.—*Agnes Kepplier, in Atlantic.*

A Fine Marine View.

Landlord—"Why, how is this? This is no marine piece. It is almost an exact representation of the interior of my saloon."

Artist—"I meant it for that."

"But I told you to paint me a bit of sea coast, a tasty little marine morceau, a ——"

"That's what it is, sir. Don't you see the schooners crossing the bar?"—*Philadelphia Call.*

—It is said that women dress extravagantly to worry other women. A man who dresses extravagantly generally worries his tailor.—*Rochester Union.*

INDEPENDENCE, CAL

SATURDAY, MARCH 19.....1887

An Important Law.

Perhaps the most important law enacted at the late session of the Legislature is that for the promotion of irrigation. The bill was introduced by Mr. Wright, of Stanislaus county. Under the provisions of this Act fifty, or a majority, of the land-owners of a given district may petition the Board of Supervisors for the formation of an irrigation district. An election is then called, at which the formation of the district is submitted to the qualified electors, and it requires a two-thirds vote to confirm it. The act provides for the issuance of bonds to pay for the necessary works; the election of officers is also provided for. For the purpose of constructing necessary irrigating canals and works and acquiring the necessary property and rights (right of way for instance) the Board of Directors of any such district must, as soon after such district has been organized as may be practicable, estimate and determine the amount of money necessary to be raised, and shall immediately thereupon call a special election, at which shall be submitted to the electors of such district possessing the qualifications prescribed by the Act, the question whether or not the bonds of said district shall be issued in the amount so determined. The bonds shall be of the denomination of five hundred dollars, and shall be negotiable in form. The Board may sell the bonds from time to time, in such quantities as may be necessary and most advantageous, to raise money for the construction of the canals and works. The bonds, and the interest thereon, shall be paid by revenue derived from an annual assessment upon the real property of the district. Due provision is made in the Act for the assessment of real property in the district, including farms, city and town lots, and the improvements thereon. At the end of ten years after the issuing of the bonds the rate of assessment must be increased; and a further increase of assessment must be made each succeeding year till the whole amount of the bonds sold, principal and interest, shall be paid at the end of twenty years. The assessment due upon real property is a lien against the property assessed, from and after the time the same becomes delinquent. When property has been sold for delinquent assessment, it may be redeemed by the owner at any time within twelve months after the date of sale. There is a steady and rapid increase of capital all over the country; opportunities for the safe and profitable investment of capital are not increasing with equal rapidity. By the provisions of this law money may be invested with absolute security. The rate of interest will be such as the lenders and borrowers can agree upon. All parts of the State afford good openings for the formation of irrigation districts; millions of money may be invested in works that will make fertile lands worth tens of millions of dollars; and a degree of prosperity follow such as will far exceed all that has yet been done in the State.

An Act passed the Legislature providing for a re-survey of the eastern boundary of the State from Lake Tahoe south. A very gross blunder was made in the bill originally introduced. This ordered the State Engineer to make the survey, and if he found that the line was not properly located, then he was to move the monuments to correspond with his survey. Congress alone has power to order the alteration of State line monuments, and all that can be done under this bill is to make a survey, and if error is discovered then an Act may be passed by Congress authorizing the adjustment of the line. Alpine is the county having most interest in the matter; unless the line should be moved far enough east to include Aurora in Mono county. In that case matters might come up that would make it very interesting for the people of Mono.

No better news could come for the farmers of Owens valley than increased prosperity at Virginia City. The great market there for cured meat, fruits, vegetables and all sorts of farm produce, should be supplied from Owens valley. Most of these supplies are now brought across the mountains; but as the rates for freight are largely in our favor there is no reason why we should not control the market. The new settlers who are coming into the valley know the value of this market much better than the old settlers do, and will make an effort to secure it, and they will succeed. Everything is in favor of such an effort; cheap and fertile land, easy access by rail to market and moderate cost for freight; cost that will be further reduced as business increases.

Italian laborers are swarming into the United States in great numbers. Thousands arrive at New York every week. All over the East working people regard the coming of these and other foreigners with some alarm. Wherever the strangers settle the price of labor declines. There is a rapidly growing conviction that a check should be put upon immigration. When it is clear that American citizens are injured, or even inconvenienced, by the coming of more immigrants, the doors should at once be shut; or at least put so near shut that none but very desirable people may be able to squeeze through.

THE TOWER OF BABEL.

THE STRUCTURE PLANNED FOR THE PARIS EXPOSITION.

Twice the Height of Egypt's Pyramids—Construction of the Elevators—An Observatory for Astronomers and Electricians—View from the Cupola.

No feature of the plans for the great exposition of 1889 is so much talked about as the gigantic tower, 1,000 feet high, or twice the height of the pyramids of Egypt, designed by M. Eiffel, the engineer of the department of arts and manufactures, to decorate the Champs de Mars. Nothing like it has been attempted since the Tower of Bable, and scientific progress may permit the descendants of those whom God dispersed because of their impiety to carry out a simlar design.

As the workmen will soon begin digging the foundation of the tower, a description of the plan will be of interest. The base of iron is composed of four pyramids, each one square, fifty feet a side, and diminishing towards the top, which is twenty feet a side. These four pyramids are separated from each other by a space of 300 feet, and for stability they are anchored in solid masonry. Two hundred and thirty feet above the ground these pyramids are united by a gallery fifty feet wide. This gallery, which is covered with glass, will be used for restaurants, soirees, etc. The next story has a room, covered with glass, 100 feet square. At the summit is a glass dome, with terrace, and from this terrace the exposition will be lighted by electricity.

Visitors will reach the dome by means of elevators. Four of these elevators, constructed like the Swiss railways, will be placed in the four pyramids and we can go seven times as high as the Column Vendome and stand 600 feet higher than the top of Mont Valerien. The eyes can sweep the horizon for 100 miles, and Compiegne, Rheims, Fontainebleau, Chartres, Dojon, with the little villages lost in the woods, and the rivers, wandering through the valleys, will all seem a continuation of Paris. Ten departments of France will be at our feet. There have been no accidents with this system of railway, because the car is drawn by a cable and the axle attached to a steel hook, so if the cable breaks the car remains fastened to this hook. That is the system for the elevators, and in addition to the four placed in the pyramids a fifth will take visitors from the center directly to the summit.

ASTRONOMERS AND ELECTRICIANS.

In the cupola astronomers will be established with their telescopes, pluriometres, etc. This observatory, fitted up with a metallic armature, destined to receive all the atmospheric electricity, will be surrounded by a paratonerre. Experiments heretofore impossible can be made here; atmospheric electricity, speed of the wind, Foucault's experiment to demonstrate that the earth revolves—all can be studied. Spectroscopes, destined to analyze the light of the sun and stars, and an enormous telescope, to follow stars which could hardly be perceived from the other observatories, will be placed in this cupola. Another interesting study will be that of the variation of temperature, with altitude. The tower will form an immense paratonnerre, and when there is a storm everybody in the tower will be struck by lightning and not feel any effect. To produce this result the conductor will be interrupted for a distance of two yards and the lightning will jump from one section to the other, with continual explosions.

The iron used in the construction of this gigantic monument will weigh about 7,000 tons. Of course the critics are very busy prophesying the failure of the work. "The tower will never be finished; it cannot be scientifically utilized, for at the slightest wind there will be an oscillation preventing all observations." M. Eiffel answers by saying that with an impetuous wind of seventy feet a second and a pressure of 100 pounds to every square yard, the tower will not sway more than four inches. With a tempest—the wind 100 feet a second and a pressure of 150 pounds a yard—the oscillation will not be more than six inches. The oscillations will be very slow because of the great length of the part which vibrates, and it is certain that it will be much less than in columns of masonry, where the elasticity of the mortar is the chief cause of marked oscillations.—Paris Cor. Philadelphia Times.

Number of Efectrical Inventions.

The number of inventions on electricity during 1885, was 1,358, or 5.78 per cent. of the whole number of inventions of all kinds. The number of the last patent, issued in 1885, was 333,495. Of these, about 265,672 are now in force.—Frank Leslie's.

Water-Color Portrait of Washington.

What is claimed to be an original water-color portrait of Washington, painted on ivory in 1876 by J. Lacon, owned in Springfield, Mass., is offered to the government for the modest little sum of $250,000.

In nine years oaken piles at Mieres, Spain, have taken on the appearance of stone-coal.

How's Your Liver?

Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.

NEVER BEEN DISAPPOINTED.

As a general family remedy for Dyspepsia, Torpid Liver, Constipation, etc., I hardly ever use anything else, and have never been disappointed in the effect produced; it seems to be almost a perfect cure for all diseases of the Stomach and Bowels.
W. J. McELROY, Macon, Ga.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expens of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.

Exercises of the closing week June 19 to 23.

Sunday, June 19—Special sermons to students.

Tuesday evening, June 21—Declamation contest for prizes.

Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.

Wednesday evening, June 22—Lecture before the Fowler Literary Society.

Thursday, June 23, 10 A. M.---Closing exercises of Academy.

Thursday evening, June 23---Reception of Principal to students and friends of the Academy.

No. 904

NOTICE

OF THE

REMOVAL OF THE LAND OFFICE

FROM

BODIE TO INDEPENDENCE, CALIFORNIA.

Notice is hereby given that the President of the United States, by Executive Order dated April 22, 1886, has, pursuant to law, directed that the office for the sale of public lands now located at BODIE, California, be removed to INDEPENDENCE, in said State.

The Register and Receiver of the district will give notice of the precise date when the office will be closed at BODIE, preparatory to removal and reopening the same for the transaction of public business at INDEPENDENCE.

Given under my hand at the City of Washington, this twenty-fourth day of April, A. D. 1886.

BY THE PRESIDENT:
WM. A. J. SPARKS,
Commissioner of the General Land Office.

In pursuance of the above order notice is hereby given that the said Land Office will be closed at BODIE on the 22d day of March, 1887, and opened for the transaction of public business at INDEPENDENCE on the 6th day of April, 1887.

SHADE TREES.

Good, Thrifty Trees
One and One-half
Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

W. J. MARSH & SON,
FORT CHURCHILL, Lyon Co., Nev.

TO ADVERTISERS

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, MARCH 19.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Mr. Bertrand Rhine arrived home from San Francisco last Monday.

At Mr. Rhine's store is a large quantity of new goods has been received the past week.

Chris Mangels came in from Bishop Creek last Thursday with an eight horse team loaded with flour. Rhine took the lot.

Apricot, nectarine and peach trees have been coming rapidly in bloom the past week. All these are several weeks later than last year.

Under-Sheriff Thurston went to the mountains yesterday morning to arrest Hood, but had not got back up to the time of going to press.

Owens valley farmers are holding wheat at two dollars per hundred pounds; the buyer to pay for hauling. There is not much on hand.

Last Sunday night there was a wreck on the Central Pacific near Blue Canyon. A cattle train and a freght train collided. Nobody hurt; engines wrecked; trains delayed.

A party of eight men arrived at Independence last Sunday from Los Angeles county. They are in search of land and are now traveling over the valley looking for suitable locations.

Fresh roll butter is retailed in Virginia City at fifty cents a roll. In Owens valley sixty cents is the current price. Farm products of all kinds bring a better price here than anywhere else in the State.

Several parties around town have transplanted three year old peach trees during the past few weeks. The trees don't appear to be uffected by the operation, but go on blooming as if they had not been disturbed.

A Citrus Fair, held at Colton, San Bernardino county, closed last Saturday. It was a grand success, and proves that our neighbor county is not second to any other in the State for the production of oranges and lemons.

A destructive fire occurred at Mariposa lately. It was caused by the explosion of a lamp that was left burning in a hotel all night for the convenience of guests. Lamps should never be left with the flame turned low except when there are two young people in the room.

Bodie must be very dull. The *Miner* says men are idly sauntering about the streets, waiting for something to turn up. The same paper mentions the bright outlook for Inyo county and urges the people of Mono to follow our example and make known to the world what undeveloped resources they have.

One thousand acres of choice land for sale. No better grain or grass land in the State. An abundance of water at all times; a perfectly healthy location; title without a flaw. Five hundred acres or over, twenty dollars per acre; small lots, forty acres or more, thirty dollars per acre. Apply to the office of the INYO INDEPENDENT.

Last Monday evening Mr. A. W. Eibeshutz got his commission as Receiver of the Land Office, and next morning he started for Bodie to relieve his predecessor. Mr Laird, the Register, has been at Bodie several weeks, waiting for Mr. Eibeshutz. In all probability the office will be moved to Independence next week.

Rev. C. L. Logan preached a very interesting discourse at the M. E. Church last Sunday evening. His subject was the influence of christianity upon literature, science and art. The same subject has been often discussed by others, but the discourse of Mr. Logan was none the less original with himself or pleasing to his hearers.

When all the rooms in the new Academy building at Bishop Creek shall be completed, one hundred students can be lodged in the building. The rooms for girls will be furnished first; these will accommodate forty students. In the meantime students of both sexes can find rooms and board in respectable families, where they will be as well cared for as in their own homes. The Principal of the Academy will at all times look carefully after the conduct and surroundings of students. Good board and comfortable rooms can be had at a cost not to exceed five dollars per week.

Silva Again.

Last Monday R. S. Miner, attorney for Frank Silva, telegraphed to Independence that the Circuit Court had given judgment in his favor in the suit to recover the money deposited with Wells, Fargo & Co. by Silva. No one at Independence appears to know whether or not this will be the end of the matter.

Demand for Hogs.

Parties in Sacramento want to buy hogs in Owens valley. About two thousand head of fat hogs would be taken at top market price, live weight. None but animals ready for slaughter are wanted. Parties having fat hogs for sale should make known the number and estimated weight of what they have got.

Nursery Stock for Sale.

We are reliably informed that A. F. Smith, representing R. D. Fox nurseries of San Jose, Cal., is now at Bishop Creek with a general assortment of Fruit, Shade and Ornamental trees which he now offers for sale. Mr. Smith will be remembered as the man who solicited orders in a portion of this county last Summer, and who delivered them to the entire satisfaction of his customers.

Scale Wash

Pear trees are liable to be infected with scale. In Santa Clara county where the disease is prevalent the following wash is used with success:—Put one and one-half pounds of sal soda into one gallon of hot water and stir till the soda is dissolved; then add enough water to make the whole quantity of the mixture fifty gallons, and to this add one gallon of whale oil. The same proportion may be used in making smaller quantity. Warm the mixture before using, but don't make it too hot. Spray the infected trees and rub the trunks with a cloth or sponge dipped in the mixture. Repeat from time to time till the scale disappears.

SHOOTING.

An Old Quarrel Resumed.

The old feud between David Stubblefield and "Hickey" Hood has broken out again. It will be remembered that about three years ago Hickey was sent up for wounding Stubblefield with a pistol. Since his return here Hood has been very quiet, keeping at work most of the time. The trouble between him and Stubblefield is caused by a dispute about firewood on the Inyo mountains. Hood has a cabin near a spring in Mazourka canyon; not far off there is plenty of dead wood, the mountain side being thickly strewn with it for miles. From this source all the fuel wanted by the people has been taken since the whites first settled here. Along with others, Stubblefield and Hood have for years been supplying Independence with fuel from there. Quarrels finally resulted, leading to the wounding of Stubblefield, and sending Hood to jail. Last Thursday Stubblefield was coming from the mountains with a load of wood; a little distance west from the railroad station Hood rode up and accused Stubblefield of taking wood that did not belong to him; this the latter denied, when, as Stubblefield says, Hood pulled a pistol from under his coat. Stubblefield saw the movement to draw the weapon and at once jumped from the wagon seat; as he went over the side a bullet whizzed by him, and a second followed the first. When Stubblefield stood up again after falling to the ground, Hood was riding away toward the mountain. Stubblefield then resumed his seat on the wagon and came on to town. He at once went before a justice and entered a complaint, charging Hood with an assault with a deadly weapon, with intent to commit murder, and a warrant was issued for the arrest of the accused.

Interstate Commerce Law.

A circular has been issued by General Freight and Passenger Agent Bender, of the Carson & Colorado and Virginia & Truckee Railroad Companies, to agents, requesting them to notify all shippers and consignees, that on and after April 5th, when the Inter State Commerce law goes into effect, all rates in conflict with said law will be cancelled and void. He says: "Having received notice from the Southern Pacific Company that the through special rates now in force on Inter-State freight from points on the Southern Pacific Company's roads to points on the Virginia & Truckee and Carson & Colorado roads, and from points on the Virginia & Truckee and Carson & Colorado roads to points on the Southern Pacific Company's line, will be withdrawn on April 5th next, you will thereafter apply the rates named, on such freight in local freight tariffs."

A Disgusted Flatterer.

The Carson correspondent of the Reno *Gazette* wrote a series of articles for that paper, giving sketches of the members of the Nevada Legislature. The legislators were all described as men of fine appearance and great ability. Now the correspondent is cursing them as a lot of ill-favored, ignorant blockheads. He was not careful to secure his pay in advance, and after the flattery was published the legislators refused to put up anything more than ten cents a copy for three or four copies of the paper in which each was decorated with whitewash. The reporters at Sacramento are sharper than the *Gazette* correspondent; they must have coin in advance for their laudatory articles.

School Report.

The following is the report of the Independence school for the month of February, 1887.

Clara Willett 85.

R. L. PEELER, Teacher.

Big Ledges.

On the east side of Panamint valley is a very large ledge of antimony ore. The metal was quoted recently in London at $150 per ton. No effort has ever been made to do anything with this ledge. On the west side of the same valley is a quartz ledge, twenty-five feet wide, that is reported to carry about five dollars per ton in free gold. This ledge crops out for a distance of several miles. In Plumas, Sierra or other mining counties, such a ledge would be regarded as a perfect bonanza, yet here no attention is given it.

Quail Nuisance.

Quail are so plentiful in the valley as in some cases to become a nuisance. Mr. Clark says they pull up strawberry and other plants at his place—the Lank ranch—and he will be pleased to have hunters go there and kill as many as they want. It is a pity such beautiful creatures should soon become a nuisance. When driving along the roads in the valley flocks of the quail are encountered at short distances apart; they are almost as tame as barnyard fowl.

The Land Office.

By reference to the notice in another column it will be seen that the Land Office will be closed at Bodie next Tuesday, the 22d inst., and will be reopened at Independence on April 6th, two weeks afterward.

A Screw Loose.

A car load of Stockton flour was delivered to N. Rhine last Wednesday. There must be a screw loose somewhere when our farmers don't grow wheat enough to supply the home market.

Distinguished Visitors

Uncle Sam and Yankee Doodle may be expected to visit Independence about the Fourth of July. The boys should set about preparing to give the distinguished visitors a rousing welcome.

Store Teeth Found.

A few days ago an upper dental plate with teeth attached was found near Camp Independence. The piece of mouth furniture can be had at the office of the INYO INDEPENDENT.

Preaching.

There will be preaching at Camp Independence, Sudday the 20th inst., at 2 p. m. and at the Church in Indepence at 7:30 p. m., by T. B. Scovil, of the Church of Christ.

ANOTHER RAILROAD HORROR.

The Probable Cause, and Possible Prevention of such Calamities.

Railroad disasters have been numerous in the East of late, and several have been especially horrible from the number of human beings killed and frightfully maimed. Last Monday morning one of the worst yet occurred on the Dedham branch of the Boston and Providence Railroad, between Forrest Hill and Roslindale, at what is known as Bussey Park Bridge. The 7 o'clock train from Dedham, consisting of seven cars and a baggage-car broke through the bridge. The engine and three cars went over safely, but five others fell through the bridge to the road beneath—a distance of thirty feet. The last car, which was the smoker, turned completely over and struck on top of the others, all being crushed almost out of shape. At least twenty-seven persons were killed. The body of one woman was found in the wreck; the head had been cut off and was found at some distance from the body. In some places were fragments of flesh or pieces of clothing which had belonged to some victim whose remains had previously been removed. There was blood over everything. Most of the pieces of clothing found were from the garments of women, and the fatality among them is proportionately greater than among the men. In one place the bodies of seven were taken out all horribly mangled. A pitiful sight was that of two girls with their arms around one another, clinging together in the embrace of death. In many instances axes and crowbars were necessary in order to free persons who were pinioned in the wreck. In two cases it was necessary to cut bodies in two in order to get them out. They were already crushed out of any resemblace to human shape, and so tightly wedged in that they could be removed in no other way.

The cause of the accident is supposed to be the breaking of an iron girder of the bridge; when this broke the entire structure went down under the train, and bridge and train became one mass of ruin.

Under continual vibrations iron will become completely crystalized and almost as brittle as glass. The constant passage of trains over bridges will work this change in the iron; and as the bridges are kept painted there will be nothing on the surface of the iron to indicate the change that has taken place. At length the iron gets into such a condition that it has no fibre; it is nothing but a mass of crystals, and a comparatively slight shock will be enough to break it into fragments. This may have been the cause of this terrible disaster. Electric tests may yet be used to reveal the changes effected in bridge girders by vibration, and such awful accidents as this may be guarded against.

Increased Activity on the Comstock.

Good reports come from the Comstock. This time it is not a stock deal, but a thorough resumption of good, square work getting out ore. The *Enterprise* says:

The Mexican mill, on the Carson river, will now be run exclusively on Crown Point and Belcher ores. This mill has been running on ore from the Savage and other middle mines, but it belongs to the companies named above, and they have notified the Savage folks that they now need it for the reduction of their own ores. This means a greatly increased output of ore from Crown Point and Belcher. This will, of course, temporarily disarrange matters at the Savage and Norcross, but undoubtedly they will shortly be able to find some mill or mills to reduce their ores. A new water mill will soon be built here in town, which will crush the ores of some of the middle mines and thus reduce the present strain upon the mills now at work.

There is now an abundance of water in the Carson river, and additional stamps and pans may in a short time be put up. Also, some of the mills that have been running on tailings may be arranged to resume operations on ore. Besides, some of the smaller mills that have been working ore from outside mines may for a time be pressed into service.

We understand that the change caused the temporary laying off of fifteen men at the Savage, and that they yesterday ceased hoisting ore at the Bonner shaft of the Gould and Curry. As ten times as many men as were laid off at the Savage will be put on at the Crown Point and Belcher, the change is one that will be no disadvantage to the business men of this place and Gold Hill; besides, the Savage men will soon again be at work.

It is a good sign for the future prosperity of the country to see this present rushing and crowding for milling facilities. It shows that there is plenty of ore in sight in the mines, and we may be sure that means for crushing it will very soon be found.

This week the laying of the new twelve-inch pipe across Washoe Valley will be commenced. There will be no snow to interfere with operations in the valley, nor will there be any on the mountain ridge between this city and Washoe Valley—the ridge up which the outlet end of the big inverted siphon will run. At the inlet end—which is on a spur or offshoot from the main Sierras—there may be some snow near the highest point, but the little that it will be necessary to handle can be managed.

Water will probably be flowing through the new pipe much sooner than it did through the two now in use—counting from the time of beginning the work of laying it—snow and all other disadvantages to the contrary notwithstanding.

The new mill of the Chollar and Potosi companies is also to be pushed. Men will be set to work in a few days now—just as soon as a site has been decided upon. Once the site has been selected, men may at once be put to work at grading. Also the business of getting out stone for the mason work may be started at almost any time; and carpenters and millwrights need not wait for the water to come in before beginning work.

In case the weather shall hold good—as it now promises to do—busy times will soon be seen both here on the Comstock and up in the mountains.

Guard Against Pestilence.

The fruit interest of Owens valley is growing rapidly in importance. This spring more trees planting than ever before is being done. So far very few insect pests are known in the valley, and every precaution should be taken to guard against their introduction. One young tree imported here having scale or other pest, would be enough to spread the plague over the whole valley. Once introduced any insect pest may do vast damage and take years of labor and great expense to get rid of it again, if, indeed, that can ever be accomplished. Before being set out every young tree should be examined most carefully, and if found to be infected it should be burned at once.

Mules For Sale.

Three fine mules for sale; each four years old, rising five. All trained to harness and gentle. Terms: Cash on delivery. Address JAMES HINES, Independence.

A Big Increase of Business.

A business man of Independence, who who was burned out in the big fire last June, but has since rebuilt, says he has done more business in the past six months than he did in two years before the fire. The increase of business is, he says, due to the coming of new settlers and people in search of land.

Indispensable to the Toilet.

Darbys Prophylactic Fluid cures chafing, eruptions, and inflammation of all kinds; cures inflamed or sore eyes; relieves pains from bites or stings of insects and sore feet; destroys all taint of perspiration or offensive smell from the feet or any part of the body; cleanses and whitens the skin. Used as a dentifrice it purifies the breath; preserves the teeth and cures toothache, sore gums and canker. A little of the Fluid in the Water used in bathing is very refreshing and especially beneficial to the Sick.

Meteorological Summary for February, 1887, Keeler, Cal.

Bull For Sale.

"Silver Brick" a thoroughbred Holstein bull, calved June 5th 1886. Out of "Black Queen" by "Saratoga," both imported from Holland and registered in the Holland Herd Book. Silver Brick is a direct descendant of "Rooker," beautifully marked, a square, bulky animal, unusually heavy of his age, bred from the best strains of the famous milk breed, with pedigree perfect. His sire, Saratoga, was imported direct from Holland, is an animal of remarkable prepotency, whose half breed progeny require an expert to distinguish them from thoroughbred stock. Although under age he was awarded a special premium at the Nevada State Fair, his sire took first premium two successive years. He is offered for sale for $250, as his owner does not need two bulls. Apply to Sam Davis, Appeal Office, Carson City, Nev.

BORN.

ENOS—At Independence, March 15 h, 1887, to Mr and Mrs. W. S. Enos, a son.

PROPOSALS FOR BOARDING INYO COUNTY PRISONERS.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of Inyo county, at the office of the County Clerk until Tuesday May 31, 1887, at 12 o'clock M., for the boarding of Inyo county prisoners for the term of one year, beginning May 1st, 1887, and ending May 1st, 1888, said bids to designate the price per diem for each prisoner, and said board to be paid for by warrants drawn upon the General Expense Fund, upon bills duly verified and presented at the regular meetings of said Board of Supervisors.

Proposals must be endorsed "Proposals for Boarding County Prisoners," and the same will be opened between the hours of one o'clock and four o'clock P. M. on said 31 day of May, 1887, and the Board reserves the right to reject any and all bids.

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of Inyo county, at the office of the County Clerk until 12 o'clock M., on Tuesday, May 31, 1887, to contract for the care of said Indigent sick for the term of one year, from May 1st, 1887 to May 1st, 1888. Said bids to designate the amount for which parties contracting will care for said indigent sick, on the basis of an average of four patients per day throughout the year, and to include all medicine, nursing, board, lodging and washing. Said bids to include the burial and funeral expenses of any indigent sick person or persons who may die while under such care.

Said contractor to care for all the indigent sick properly admitted to the contractor's care. And said bids to designate the price per head at which all excess of patients over the average of four each day throughout the year will be cared for, said excess to be paid for by extra allowance on presentation of bills duly sworn to, at the regular meeting of said Board, immediately after said contract has expired. The average four per day to be paid for at the regular meetings of the Board, on presentation of bills duly verified. All payments to be made by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of said contract price, for the faithful performance of said contract.

The care and management of said indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof, or any person appointed by said Board for such purpose.

Said proposals must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of one o'clock and four o'clock P. M., on said 31 day of May, 1887, and the Board reserves the right to reject any and all bids.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, STOUTSBURG, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take so much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. Ist. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for gold."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

PITH AND POINT.

—The hand-maid of Scripture was a simple thing compared with the tailor-made girl of the present day.—*N. O. Picayune.*

—"For what is it my sad soul yearns?" asks a poetess. We don't know, dear, unless it is for the editor to send you a check instead of the little note "Returned with thanks."—*New Haven News.*

—Wife (innocently)—Is the base ball season over? Husband (petulantly)—Of course. Look at the weather. Any fool ought to know that. Wife (sweetly)—That's why I asked you, my dear.—*Washington Critic.*

—A servant-girl went to sleep one afternoon and did not wake up until forty hours later. When she awoke she was naturally much incensed to find that she had been defrauded out of two evenings out.—*Boston Transcript.*

—"So you think Friday an unlucky day, do you, Edith?" "Yes, indeed, I do, ma'am." "And why do you think it is unlucky?" "Well, you see we always have fish on Friday, and I just abominate fish."—*Yonkers Statesman.*

—A fashion item says: "Bonnets will not be worn as high this year as last." If this be true, all this talk about "elevating the stage" may as well be dropped. With less lofty bonnets, the stage is high enough.—*Norristown Herald.*

—In Phil Armour's Chicago packing house they are killing four thousand hogs a day, and yet the man who sits sideways in a street car was in town yesterday. So was the man who has his hair cut Saturday night. Some men are born lucky.—*Burdette.*

—Editor: "What noise is that in the assistant editor's room?" Office Boy: "De assistant editor, Johnson, is stamping on de new type-writin' machine." Editor: "What's the matter with it?" Office Boy: "Why, he started to write up 'our funny column' and de t'ing rung up a chestnut before he'd wrote more'n a line."—*Judge.*

—"Mother," said a little Rockland girl, looking up from her book, "what does transatlantic mean?" "Oh, across the Atlantic, of course. Don't bother me, you make me forget my count." "Does 'trans' always mean across?" "I suppose it does. If you don't stop bothering me with your questions you'll go to bed." "Then does transparent mean a cross parent?"—*Rockland Courier.*

—Mr. Minks—Seems to me that new girl is a very good one, isn't she? Mrs. Minks—She is a perfect treasure. I can't imagine how I even existed before she came, and I'll never let her go, never; but the beauty of it is, she is just as well satisfied as I am, and I know she'll never even think of leaving. "Don't be too sure about that. She may take a notion to get married some fine day." "No danger; she's been married once."—*Omaha World.*

—They were sitting as close together as the sofa would permit. She looked with ineffable tenderness into his noble blue eyes. "George," she murmured, with a tremor in her voice, "Didn't you tell me once that you would be willing to do any great act of heroism for my sake?" "Yes, Fannie, and I gladly reiterate that sentiment now," he replied in confident tones; "no noble Roman of old was fired with a loftier ambition, a braver resolution than I." "Well, George, I want you to do something real heroic for me." "Speak, darling; what is it?" "Ask me to be your wife. We've been fooling long enough."—*Chicago Tribune.*

CARL DUNDER.

He Has His Mind Read and Finds Some of His Merchandise Missing.

"I suppose I vhas shwindled some more," sorrowfully remarked Mr. Dunder, as he paid a visit to Sergeant Bendall yesterday.

"Not a doubt of it. What's your story?"

"Do you pelief dot a man can read somepody's mind?"

"Well, I've heard of mind-readers."

"So has Shake, und he goes crazy aboudt it. He vhas going to be a mind-reader if it takes all winter. He practice a leetle on me, und I vhas astonished."

"But about the swindle?"

"Vhell, two mans come in my place last night vhen I vhas all alone. Vhas I Carl Dunder? I vhas. All right, one of dot pair vhas a mind-reader, und he like to gif me some points. He doan' do it by everypody, but I vhas such a friendt of der poor dot he like to oblige me. Vhell, Sergeant, dat seems all right, und we lock der door und sot down. I vhas blindfolded mit a handkerchief, und der mind-reader says:

"'Now, Mr. Dunder, you fix your mind on some subject shust so hardt as you can, und keep awful still. If you take dot pantage off or shump aroundt dot preaks me all oop.'

"Vhell, Sergeant, I fix my mind on dot time I falls off my parn on Hastings shtreet, und may be two minutes goes by und nobody shpeaks to me. Den der oldt woman comes down-shtairs und I tako off der pantage. Dose mans vhas gone."

"And what else?"

"Two boxes of cigars and fife pottles of whisky. Vhas it a shwindle on me?"

"I should smile! Mr. Dunder, you are very soft."

"Sergeant, look in my eye! I vhas going home. To-night some pody vhill drop in. Vhas I Carl Dunder? I vhas. All right. Mr. Dunder, I like to read——!"

"Yes."

"Dot vhas all, Sergeant! If some inquest vhas heldt you remember dot I vhas a shwindled man, und dot I kildt him in self-defense!"—*Detroit Free Press.*

The Burden of Conscience.

The Buffalo Courier tells of a 4-year-old citizen of that place who, having been naughty, was reprimanded by her mother and told that the Lord knew every act of her life. In a half repentant frame of mind she walked into the front parlor, and was pensively regarding the fire in the grate when the cat came along and tried to work into her good graces by purring and rubbing against her ankles. Even that did not please her, and at last her mother heard her snap out: "Go way, pussy! It's bad enough to have God watching me without having you tagging me around."—New York Sun.

HE TOOK ONE.

The store was dimly lighted, and
The clerk my wants employed,
Leaned o'er the counter toward me, while
Her listless fingers toyed
Among some samples of the trade
Surmounted by a card which said,
"Take one."

She raised the placard carelessly,
Until it touched her lips;
She seemed to hide a kiss behind
Her slender finger tips;
Her blue eyes plainly seemed to say:
"You can't, but don't you wish you may!"
Her lips were smiling coyly, though—
I looked over at the card, and so
Took one.

RELIGIOUS AND EDUCATIONAL.

—Seven million children attend school daily in this country and about six million wish they didn't have to.

—A great religious revival is sweeping over Northern New Brunswick. It is said to be unequaled in the history of the provinces.

—At Zurich 29 women are now pursuing the study of medicine; in London 48, and at Paris, 103. At the latter 18 have obtained their diplomas of doctor during the past seven years.

—Newspaper dispatches say that at the last meeting in Omaha, Neb., of Rev. Sam Jones he secured contributions for a new Young Men's Christian Association building amounting to $81,000.

—Before sailing for home General Booth, of the Salvation Army, claimed that during his stay in this country he had put in 696 hours on the cars, had spoken to 180,000 American sinners at 129 meetings, and had saved 2,500 souls.

—After twenty-eight miles of riding in a wagon, fourteen miles on horseback, and organizing a Sunday-school, a missionary met a dozen cowboys in the evening, and they spent an hour in singing gospel hymns.—*Christian at Work.*

—During the past year $13,284,986 was expended for educational purposes in the State of New York. Of this amount $9,102,268 was for teachers' wages. There are 31,325 school-teachers and 1,735,073 school children in the State.—*N. Y. Tribune.*

—It is reported that Mr. Moody has received from Mr. D. M. Weston, of the Shawmut Church, Boston, a donation of $50,000, to be applied to his educational work at Northfield and Mt. Hermon, Mass. With this gift another dormitory is to be built.—*Boston Journal.*

—At a reception given to the Baptist Union at its late meeting in Bristol, England, by the mayor of the city, its president said that on the 4th of October, 1653, the Mayor of Bristol sent two Baptist ministers to prison for preaching, but on the 4th of October, 1886, its mayor gave a grand reception to Baptist ministers.

—The trustees of Columbia College, New York City, have voted to celebrate its centennial next April. In the various departments, literary and scientific, there are 1,514 students this year. The authorities have negatived the students' petition that Greek and Latin be made elective studies after sophomore year.—*N. Y. Mail.*

—Harvard University has 1,693 students. The number in the college proper is as follows: Seniors, 239; juniors, 238; sophomores, 224; freshmen, 280; special students, 96; making the total in this department of the university, 1,077. The other departments are represented as follows: Medical school, 271; law school, 180; divinity school, 20; scientific school, 14; dental school, 28; Bussey Institute of Farming and Agriculture, 8; school of veterinary medicine, 25; graduate department, 70.—*Boston Herald.*

WIT AND WISDOM.

—He that hath no bridle on his tongue hath no grace in his heart.—*St. Jerome.*

—There is room for everybody in this big world. Friction comes through the fact that too many want the front room.—*N. O. Picayune.*

—Nothing can be had for nothing. Whatever a man achieves he must pay for it; and no favor of fortune can absolve him from duty.—*Bayard Taylor.*

—A wise self-discipline in the maturest is not so easy or so common that we may reasonably expect the young to be exemplary in that respect.—*N. Y. Examiner.*

—Miss Flim—Have you read Mr. Rattlebrane's novel? Tell me, how did it come out? Fogg—I suspect he had it published at his own risk.—*Boston Transcript.*

—Impecunious lover—Be mine, Amanda, and you will be treated like an angel. Wealthy maiden—Yes, I suppose so; nothing to eat and less to wear. No, I thank you.—*Texas Siftings.*

—An authority on the cuisine says that duck ought not to stand long after being roasted. Probably it would do no harm to let the duck sit up if it isn't too tired, but it shouldn't be allowed to swim in the gravy.

—Miss Blank (to her cousin, who has inadvertently admired her foot)—Yes, papa thinks so muce of my foot that while we were in Italy he tried his best to persuade me to have a bust made of it.—*Chicago Tribune.*

—"And what's become of George Tulliver?" asked one old friend of another, in reviewing the days of their youth. "Poor fellow, I hear that he came to a bad end!" "Ah, yes," replied the friend; "a very bad end. went up behind a mule."—*Puck.*

—Young husband—Isn't there something peculiar about the taste of these onions, my dear? Young wife (anxiously)—O, I hope not, dear. I took such pains with them. I even sprinkled them with jockey club before I put them to boil to take away the unpleasant odor.—*N. Y. Sun.*

—"That's a fine pet crow, Arbegast." "Yes, he's an extra fine crow, but a terrible nuisance. He wakens the whole family at daylight and frightens away all the other feathered songsters." "Ah! Arbegast, there you have a fine illustration of caws and effect."—*Peck's Sun.*

—Edith—"Seems to me every one of these ancient sculptures is from the nude." "Yes; how wise those old artists were!" "Wise?" "Why, yes; they had sense enough to know that the dresses of the period would go out of fashion, so they omitted them."—*Omaha World.*

SHAMEFUL ABUSE

Heaped Upon a Noted Englishman for His Open Honesty.

WM. ED. ROBSON, M.D., L.R.C.S.I., M.K.Q.C.P.I., late of the Royal Navy, of England, has got into professional trouble for writing the following open letter to the editor of the London *Family Doctor:*

"I believe it to be the duty of every physician to make known any means or remedy whereby sickness can be prevented, and it is for this purpose I write to give my experience both here and abroad. I ask the publication of the statement that people may be warned before it is too late, to say to them that there is at hand a means by which they may be restored to perfect health. It is well known to the medical world, and indeed to the laity, that a certain disease is making a terrible havoc; that next to consumption it is the most fatal, and that when fully developed there is nothing to be done for the sufferer."

"Physicians and scientists have long been trying to throw light upon the cause, and if possible, find in nature a medicine for this fatal malady. They have shown, absolutely, that the blood-purifying organs of vital importance are the kidneys, and that when they once fail, the poison which they should take out of the blood is carried by the blood into every part of the body, developing disease."

"In my hospital practice in England, India and South America, and also while a surgeon in the Royal Navy of Great Britain, I gave a great deal of attention to the study of diseases of the kidneys and urinary organs, and found that not only was the cure of chronic Bright's Disease hopeless, but that kidney disease was remarkably prevalent; much more so than generally known, and was the cause of the majority of cases of sickness, and further, that the medical profession has no remedy which exerts any absolute control over these organs in disease."

"Some time ago when I had a case which resisted all regular treatment,—which is very limited,—complicated with the passing of stones from the kidneys, much against my will I permitted my patient to use Warner's safe cure, of which I had heard marvelous results. In his case the result was simply marvelous, as the attack was a severe one, and development very grave, for an analysis showed per cent. of albumen and granular tube casts."

"The action of the medicine was singular and incomprehensible to me. I had never seen anything like it. The patient recovered promptly, and is today a well and healthy man. This stimulated my inquiry into the merits of the remedy, and after analysis I found it to be of purely vegetable character, harmless to take under all circumstances."

"Casting aside all professional prejudice I gave it a thorough trial, as I was anxious that my patients should be restored to health, no matter by what medicine. I prescribed it in a great variety of cases, Acute, Chronic, Bright's Disease, Congestion of the Kidneys, Catarrh of the Bladder, and in every instance did it speedily effect a cure."

"For this reason I deem it my duty to give to the world this statement regarding the value of Warner's safe cure. I make this statement on facts I am prepared to produce and substantiate. I appeal to physicians of large practice who know how common and deceptive diseases of the kidneys are, to lay aside professional prejudice, give their patients Warner's safe cure, restore them to perfect health, earn their gratitude, and thus be true physicians."

"I am satisfied that more than one-half of the deaths which occur in England are caused, primarily, by impaired action of the kidneys, and the consequent retention in the blood of the poisonous uric and kidney acid. Warner's safe cure causes the kidneys to expel this poison, checks the escape of albumen, relieves the inflammation and prevents illness from impaired and impoverished blood. Having had more that seventeen years' experience in my profession, I conscientiously and emphatically state that I have been able to give more relief and effect more cures by the use of Warner's safe cure than by all the other medicines ascertainable to the profession, the majority of which, I am sorry to say, are very uncertain in their action."

"Isn't that a straightforward, manly letter?"

"Indeed it is."

"Well, but do you know the auther has been dreadfully persecuted for writing it?"

"How so? What has he done to merit it?"

"Done? He has spoken the truth 'out of school' and his fellow physicians, who want the public to think they have a monopoly in curing diseases, are terribly angry with him for admitting professional inability to reach certain disorders.

"That letter created a wonderful sensation among the titled classes and the public. This jarred the doctors terribly. The College of Surgeons and Queen's College, from which institution he was graduated, asked for an explanation of his unprofessional conduct, and notified him that unless he made a retraction they would discipline him.

"The doctor replied that he allowed his patients to make use of Warner's safe cure only after all the regular methods *had failed*, and when he was satisfied that there was no possible hope for them. Upon their recovery, after having used Warner's safe cure, he was so much surprised that he wrote the above letter to the *Family Doctor*. He regretted that the faculties found fault with his actions in the matter, but he could not conscientiously retract the facts as written to the *Family Doctor*.

"The faculties of both colleges replied that unles he retracted they should cut him off, which would naturally *debar him from again practicing his profession*, and also prevent his securing another appointment in the Royal Navy!"

The illustrious doctor's dilemma is certainly an unpleasant one, emphasizing, as it does, both his own honesty, and the contemptible prejudice and bigotry of English medical men. The masses, however, having no sympathy with their nonsense, keep on using the remedy he so highly recommends and get well, while the rich and able depend upon the prejudiced doctors and die!

STORIES OF REPORTERS.

A Class of Men About Whom Most Persons Know Little.

Most persons never saw a reporter to know one. Tens of thousands in private life have seen reporters only at meetings or in public places. Even in New York, where reporting is a very old profession, the business is not clearly understood and reporters are continually meeting persons who say to them, "Do you want an item?" or "Hello! why aren't you at a fire?" precisely as if newsgetting was like fishing or was pursued as collectors search for butterflies—net in hand. To tell the world that reporters (in New York, at least) only seek what their city editors send them to find is to run the risk of being thought an imposter. But in all communities the reporters have experiences almost as queer as any they report.

There is a gifted news getter in town, whose weight is about 300 pounds, and the quality of whose work is proportioned to his size. He was taking down a speech in shorthand not long ago in Tammany hall when an Irishman in the gallery spied him and said to his neighbor: "Och, will ye luk at the soize av that mon, and him airning his living wid a little pencil!" A New York reporter sent to Newark once, went to a house he should not have gone to, mistaking it for one farther up the street, where he was to interview a man. The man of the house opened the door. "I am a reporter," said the interviewer. The man pulled him in almost by main force. "For heaven's sake!" said he, "how do you reporters get hold of things before they happen?" He led him into the parlor and shut the door. "Now," said he, "tell me how you knew what I was going to do. I swear I have never told a soul." The reporter, equally amazed, said he guessed there was a mistake; he was looking for so-and-so. That night the man horsewhipped another citizen for insulting his wife. He must have thought the reporter was a mind reader who had come to get the news ahead of time.

When I was callow I was charged with the task of exposing to the public the overcrowding of the public schools. I reached the first school house early in the morning, entered the assembly room of the girls' department and explained to the lady principal that I was a reporter and desired to look through the building. To my horror, she turned to the pupils and said: "Young ladies, this gentleman is the editor of The Sun, who desires to address you this morning." There was no getting out of it. It was fun, too—for the girls. Kirk Munro's experience must be told, also, even at the risk of his having a burr upon it. He was green at the business when he was sent to report a religious revival in young Dr. Tyng's church. The pastor happened to be moving from person to person in the congregation, and reached Munro just as that young man entered the door. "My dear brother," said Tyng, "are you a follower of Christ?" "No," said Munro; "I'm a—a Sun reporter."

I got a new view of my calling once when the city editor, Mr. Bogart, sent me after something or other on the east side of town. I found my man and approached him with "Are you Mr. Feldsticker?" "Yah," he replied. "I am a reporter of The Sun," said I. "I've been trying ever since to think what he meant by his reply. Perhaps he did not understand me—or else didn't know what he was saying. At any rate, when I said I was a reporter of The Sun, he replied in a fatherly tone, full of kindly sympathy: "So? Vell, vell, you can't help dot."—Julian Ralph in The Journalist.

Late, Late, Too Late.

"My dear friend," said a minister at the bedside of a sick man, "I want to call your attention to the blessed consolation which religion brings in hours of suffering and danger to those"——

"I'm much obliged to you," interposed the grateful patient, "but you are too late."

"Too late!"

"Yes, sir, my physician says that the crisis is past, and all danger is over."—New York Sun.

Nothing Unusual.

Mrs. Patrician (to new girl)—I suppose, Bridget, you overheard my husband and I conversing rather earnestly this morning?

Bridget—Indade, I did that, mum.

Mrs. P.—I hope you do not consider that any thing unusual was going on?

Bridget—Niver a bit, mum. I wanst had a husband meself mum, an' niver a day passed that the neighbors didn't belave one or the other of us would be kilt entoirely.—*Tidbits.*

FAVORED BY FORTUNE.

People Who Invest Small Amounts and Secure Large Returns.

Scarcely a month passes but what the papers are called upon to record what might be termed the luck of some Californian in acquiring large sums by means of small investments. It is an old saying that "nothing risked nothing gained," and the practical application of this time-honered maxim to every-day life is a sufficient explanation of the so-called "luck" of many business men. For several years past the daily papers have periodically contained items, detailing the manner in which well-known residents of this city and State have won prizes in The Louisiana State Lottery. The drawings of this admirably managed institution occurs every month, and with the same regularity as the rotation of months the announcements are made of people who have risked a trifle and won large sums, frequently a fortune. The last drawing occured on December 14th last, and as usual a resident of San Francisco won a tenth part of the capital prize of $150,000. The fortunate holder of a coupon of ticket No. 93,174, which won that prize, was Nat. M. Raphael, the well-known jeweler, at 732 Market street in this city. To a reporter the gentleman said: "I have been buying a few coupon tickets every month for the past seven or eight years. In the last drawing I held a coupon which was a tenth of the ticket No. 93,174, and on the day following the drawing when I read in the telegraph columns of the morning Call that one of the numbers I held had drawn the capital prize I was almost dazed with surprise. I could hardly convince myself that I had at last become one of the fortunate ones of whom I had so often read. However, I finally realized that I was actually entitled to the money, so I immediately went to the London and San Francisco Bank and deposited my ticket for collection. Eleven days later I received the full amount of $15,000 in gold coin."

Another lucky man was Fred R. Brown, a shoemaker, living on Ritch street. To a reporter he stated that he had very frequently bought coupons in The Louisiana State Lottery, but had never won a dollar. He had almost given up in despair, when he bought one-tenth of ticket No. 92,507 which drew one-tenth of the third capital prize of $20,000. During the holiday week he had received the money, and he rejoiced that he had persisted in his efforts until success came to him.—[San Francisco, (Cal.) Call, Jan. 5.

LES MISERABLES.

When Victor Hugo wrote his famous book with this title it became popular all over the civilized world. There are so many human beings who are in some way or other miserable, that the name at once arrested the attention of the public.

Verily the brotherhood of misery is large. But there is a great deal of misery in the world which might readily be got rid of. Thankful reports from ex-miserables show what a large and honored share Compound Oxygen has had in working misery out and bringing health and comfort and joy in its place. People who have been almost ready to destroy themselves, have been brought up from the depths by means of this wonderful vitalizer. Men who have been overwhelmed with the misery of nervous prostration have been made bright and hopeful and cheery. Women almost helpless have been set on foot and made happy. One gentleman who was utterly prostrated with *nervous infirmity* gratefully writes: "After three weeks' treatment am able to report as follows: Felt improvement from its first use. Do not have such terrible bad feelings; am more comfortable; feel more like living, and am beginning to enjoy myself. My mind is brighter; all nature seems more lovely and fresher."

For all you want to know about this method of escaping from misery, write to Drs. STARKEY & PALEN, 1529 Arch Street, Philadelphia, who will mail you free, a treatise, giving full information.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Fnanrisco.

A Baby Posted for Sale.

Babies are beginning to figure as assets. A very young one was recently seized for rent, together with a cradle and a dog, on Lord MacDonald's estates in Penniess, Scotland. The dog was valued at a shilling and the infant at sixpence. Lord MacDonald is very indignant, as the baby was actually posted for sale, and he has ordered an action against the sheriff's officer who took the child from its mother.—Chicago Tribune.

—A quart bottle of whisky stood on the table when Mrs. Mary O'Neill left her home on Cherry street, New York, for a brief time the other day, leaving her son Johnny, aged five years, alone. When his mother returned, some hours later, he was unconscious and the bottle empty. His face was swollen and distorted and the skin of a dark reddish hue. Efforts to revive him were fruitless and he died that night in convulsions.—*N. Y. Herald.*

—Nellie Steel, then a young woman, entered Bellevue Hospital in New York thirty years ago, and remained there, suffering from a variety of mysterious ailments, until her death a few days ago. The post-mortem examination revealed the presence of a needle in her heart. How it came there is unknown, but it is believed that she swallowed it.—*N. Y. Tribune.*

A CHANCE FOR HEALTH

is afforded those fast sinking into a condition of hopeless debility. The means are at hand. In the form of a genial medicinal cordial, Hostetter's Stomach Bitters embodies the combined qualities of a blood fertilizer and depurent, a tonic and an alterative. While it promotes digestion and assimilation, and stimulates appetite, has the further effect of purifying the life current and strengthening the nervous system. As the blood grows richer and purer by its use, they who resort to this sterling medicinal agent, acquire not only vigor, but bodily substance. A healthful change in the secretions is effected by it, and that sure and rapid physical decay, which a chronic obstruction of the functions of the system produce, is arrested. The prime causes of disease being removed, health is speedily renovated and vigor restored.

A new song is out address to "The Boodle Aldermen" of Gotham. It is probably written in Sharps and flats. One, two, three—Sing Sing.

OUR PROGRESS.

As stages are quickly abandoned with the completion of railroads, so the huge, drastic cathartic pills, composed of crude and bulky medicines, are quickly abandoned with the introduction of Dr. Pierce's "Pleasant Purgative Pellets" which are sugar-coated, and little larger than mustard seeds, but composed of highly concentrated vegetable extracts. By druggists.

When an ordinary young woman tries to learn how darned lace is made, she begins to understand that the confounded thing was well named.

BEAUTY of Skin & Scalp RESTORED by the CUTICURA Remedies.

NOTHING IS KNOWN TO SCIENCE AT ALL comparable to the CUTICURA REMEDIES in their marvelous properties of cleansing, purifying and beautifying the skin, and in curing torturing, disfiguring, itching, scaly and pimply diseases from pimples to scrofula. CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers.

Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, $1. SOAP, 25c. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

☞ Send for "How to Cure Skin Diseases"

HANDS Soft as dove's down, and as white, by using CUTICURA MEDICATED SOAP.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

The Woman's Sure Friend

☞ IT IS A BLESSING TO OVERWORKED WOMEN. IT REMOVES FAINTNESS, FLATULENCY, ALL CRAVING FOR STIMULANTS, AND RELIEVES WEAKNESS OF THE STOMACH. CURES LEUCORRHŒA, MENSTRUAL PERIODS PASSED *without* PAIN.

☞ Sold by Druggists. Price $1. per bottle.

CURE OF PNEUMONIA.

HESS ROAD, NIAGARA CO., N. Y., March 24, 1886.

About a year ago I was taken with a severe pain in both lungs. I was first attacked with a violent chill, then a dreadful pain and then a cough accompanied by considerable fever. It looked very much like a bad attack of pneumonia. A friend of mine procured five ALLCOCK'S PLASTERS. One he put under each arm, one under each shoulder blade, and one on my chest close around my throat. In a few hours the cough ceased, the pain gradually abated and I broke out in a profuse perspiration. I fell into a profound sleep, and the next day was almost well. I wore the Plasters eight days afterwards, and have never had any trouble since. WILLIAM A. SAWYER.

No man of feeling will ever allude to one of his fellow-men as a "drunken dog." It is taking a mean advantage of the dog.

For colds, fevers and inflammatory attacks, as well as for cholera morbus, diarrhœa, dysentery or bloody-flux, colic or cramps in stomach, use Dr. Pierce's Extract of Smart-Weed, composed of best Grape Brandy, Smart-Weed or Water Pepper, Jamacia Ginger and Camphor Water.

"Brigham Young," observes *Puck*, "was the man who broke the marriage record." Solomon being a foreigner, we presume, dosen't count.

For Throat Diseases, Coughs, Colds, etc., effectual relief is found in the use of "*Brown's Bronchial Troches.*" Sold only in boxes. 25 cts.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

Mrs. Cleveland has a new pet—a monkey—and the Washington dudes, with whom she will have nothing to do, regard her action as most unjust discrimination.

In the cure of severe coughs, weak lungs, spitting of blood, and in the early stages of *Consumption*, Dr. Pierce's "Golden Medical Discovery" has astonished the medical faculty. While it cures the severest coughs, it strengthens the system and *purifies the blood.* By druggists.

A writer says that the mating of human beings is beyond the science of man. Perhaps that is the reason why match-makers are usually of the gentler sex.

If a cough disturbs your sleep, take Piso's Cure for Consumption and rest well.

THE AMERICAN BUGGY.

The Favorite Light Passenger Vehicle for All Purposes and All People.

In style and construction, in exterior appearance and comfort we know of no carriage that offers so many varieties as the buggy, inasmuch as each is the result of the development in some particular direction of the original buggy, whatever that was like, by the American manufactuer, who has made its improvement a study, it may be regarded as par excellence the democratic vehicle of the age.

Unlike the phaeton, the dog cart, the gig, etc., it is adapted for all times, all seasons, all weathers, all climates, all peoples, and all considerations of use, according to the different styles in which it is constructed. The flyer speeds over the well-kept road or track at a 2:30 gait with a buggy behind him, its one seat just affording the solitary passenger a comfortable resting place; if of more sociable inclination, he can accommodate a friend without materially adding to the size, weight, cost or draft of his vehicle. With a top the buggy is the most comfortable carriage in the world for pleasure driving, it shelters the occupant without enclosing him, and in case of a sudden storm affords him almost complete protection without interfering with the driving arrangements. It is thus equally adapted for cold or hot countries, while, where the weather is variable, it is always a safe vehicle to travel in.

In the city it rolls easily over poor pavements, its lightness and perfect spring construction preventing the agonizing jolts that a heavy carriage invariably entails, and it is certainly the safest and easiest vehicle to handle in a crowded street. In the country the buggy of stronger build comes into use, and here we find the farmer using it in preference to any other carriage on cross country roads and open fields that would strike terror into the driver of a dog cart or even a gig. Hung low on its wheels, it passes in safety places that would inevitably mean a spill with any other carriage, its lightness enabling the driver to handle it with readiness, if only his horse proves reliable. Here, again, the protection it affords its occupant in all weathers, as well as its easy riding, are fully appreciated, and there is no carriage in which more and longer riding can be done in comfort.

Even in style, the buggy offers an endless variety of designs suited to all tastes, while the manner in which it is geared is equally varied. Piano box, Corning and Whitechapel bodies are supported on Brewster, Timken, Storms, side, end and even spiral springs, while as a modification of the buggy, so far as the simplification of the under gear is concerned, we have the buckboard, so popular in the mountainous regions of New England. Neatly finished and decorated, the buggy is a handsome carriage, and a well kept top-buggy of good make will attract attention among the finest equipages.

Finally, the buggy is a cheap vehicle. Its cost has been reduced to a minimum, the extensive and constantly increasing demand for it at home and abroad having led many important concerns to go into the business of its manufacture, systematically, on a large scale and with the most improved modern machinery and appliances, in the use of which the division of labor is carried to its furthest limit of practicability, so that repairs are seldom requisite, and when necessary they are cheaply made, while even in the horse power required to propel it, it effects a saving over other carriages, to which one or even two powerful animals must be attached. For foreign use it is particularly well adapted, for in addition to all the merits above enumerated, its lightness, the compact space into which it can be packed and the readiness with which it may be crated for safe transportation to any distance, are all strong points in its favor. Its popularity is proved by its general employment by all classes, and even in foreign countries, as its large sales testify, the American buggy is rapidly becoming, wherever progress in the construction of carriages in every direction in which they may be improved is considered, the favorite light passenger vehicle for all purposes and all people.—*Australasian.*

Get There in Time.

Mrs. Hendricks, accompanied by Bobby, had dropped in for a moment to see Mrs. De Hobson concerning a church matter, and, after much urging and entreaty, had finally consented to stay to luncheon.

"Bobby was so pleased with the shop windows," Mrs. Hendricks said, sipping her soup, "Dear little fellow. I could scarcely tear him away from them."

"Yes, indeed," acquiesced Bobby enthusiastically, "and so were you, and you said that if we didn't make haste we wouldn't get here until lunch was over."—*N. Y. Sun.*

—The somewhat strange case of a man who draws pay as a juror while being tried for murder is interesting citizens of Santa Rosa, Cal. Such was the case in the recent trial of John Bailiff for the murder of James Noon. Mr. Bailiff was drawn on the venire, and drawn out of the box. He drew sixteen dollars for his services as a juror.

—"You know, my dear. I have often said that, like the rest of the human kind, I am only a poor, weak sinner," said Mr. Jones, as he was trying to excuse himself to his wife. "Yes," replied she. "You have so. And I never in my life saw anybody so anxious to prove the truth of his statement as you seem to be."—*Merchant Traveler.*

FOR LION-HUNTERS.

How American Snobocracy Can Keep Itself Posted Concerning Titled Foreigners.

American society is to have its long-felt and never-satisfied want taken care of by a company which has just been incorporated. The title of this humane organization is, "The International Social Lion Furnishing Company, Limited." The object of the concern, as set forth in its prospectus, is to supply American social circles with British lions, whose history shall be known. The company guarantees that each person is a real, live nobleman, and, in order that there can be no possible mistake, produces his entire personal history.

The company has a branch office in London, and it is there that its chief work is done. A large force of expert detectives and searchers is employed, and it is their business to look up the record of every scion of the British nobility. When a detective has thoroughly sifted the facts, he reports them at the main office, where they are written up by the clerks and filed away for future reference.

The office in this city is furnished with copies of these records for exhibition to mothers who are in search of English aristocrats as husbands for their daughters, and to all persons who wish to bask in the sunshine of titled smiles.

Of course, the advantages of such a concern are apparent to the most careless observer. The personal history of a man is a guarantee of his character and social standing, and, armed with such documents, Americans can invite English noblemen to their houses without any danger of being imposed upon by sham Dukes or Lords. The new company has already gone into operation, and we feel that we are only doing our duty in informing the public of its existence. Some of the papers on file in the safes of the corporation are extremely well gotten up, and we take pleasure in submitting some of them as examples of the admirable manner in which the work is done.

BEAUPERE, Lord Arthur (Seventh), born at Chiswick Pudding, Yorkshire, November 21, 1855. Father, Lord Henry Beaupere. Mother, Miss Earlescombe Harcourt, of the Scrubs, Warwickshire. Educated at Eton and Cambridge, graduating last in class from Trinity College in 1876. Owns seven race horses, on which he annually loses £40,000. Owns, subject to first, second and third mortgages, Chiswick Pudding Manor, 197 acres in extent, and town-house in Riddlecombe street. Owns, subject to mortgage in hands of builder, schooner-yacht *Kestrel*, 120 tons, out of commission at present for want of funds to run her. Has been expelled from the Sugbury Club for cheating at *ecarte*. Was horsewhipped last winter by Lord Beanswick, for trying, while intoxicated, to kiss the latter's grandmother in Hyde Park. Income, £30,000 per annum. Very popular.

SCRUMORE, Albert Henry William George Peter Beers, Lord of, (fifth,) born at Scrubmore Grange, Northumberland, January 4, 1857. Father, sixth Lord Scrubmore. Mother, Dolly Widgeon, prima donna soprano at Vauxhall Garden. Educated at Rugby and Oriel College, Oxford, being expelled from latter in second year for winking at the Vice-Chancelbor's niece in St. Mary's during a University sermon. Owns several square miles of grouse-moors in Scotland, a town house in Belgravia, and a toy-villa at Kensington. Does not own Scrubmore Grange, owing to his father having cut off the entail three years ago, and incontinently bounced him. Has been prominent as a musical patron in England for several years, and would be a good catch for musically-inclined girl. Began as part owner of the Whitechapel Variety Palace. This having burst up, he became lessee and manager of the Blackfriars Opera House, but this failed on account of internal dissensions in the company, brought on by his lordship's making love to the leading ballerina instead of to the prima donna soprano. Next entered into partnership with Mlle. Sally Salter to run the Chelsea Garden. It was on account of this that his father disinherited him. Recently became part owner in an international variety show, and lost £20,000. This young man who is a prime A1 specimen, can be had cheap.

CARROLLIMES, Godfrey McKenzie Mulcahy Pschtsdefferx, ninth Earl of, born May 8, 1888, at Stwdaniphsk, Wales. Father, eighth Earl of Carrollimes. Mother, Lady Bridget Elaine Mulcahy, of Maginnis-on-the-Shannon, Ireland. Educated at St. Winifred's and in Paris. Has been out of society in Great Britain, and traveling on continent since shortly after his majority, owing to his having forged his father's name to pay racing-debts contracted at Ascot Heath. Is in a tolerably good state of preservation, but, owing to the ravages of early dissipation, can not last more than five or six years more. Estates all intact, and wealth large. Best catch on our books.

It will be seen at once that these records are unmistakably those of English noblemen. No other persons of distinction could so comport themselves. With such records, verified by the researches of first-class detectives, and sworn to before notaries public, American society can be sure of getting genuine articles in the way of British lions. —*Puck.*

Medicine for the Mind.

It is sometimes difficult to say which works more mischief, enemies with the worst, or friends with the best intentions.

As the medical properties of some plants can be adduced only by distillation, so our good qualities can only be proven by trials.

Life at the greatest and best is but a forward child that must be humored and coaxed a little till it falls asleep and then all is over.

Apathy is one of the worst moral diseases; it incapacitates us from combatting the encroachment of vice and closes every avenue of our souls to the approach of virtue.

When we are laboring under a physical malady we see every thing through a distorted medium; we are no longer masters of ourselves, but the victims of a distempered imagination.—*Good Housekeeping.*

A Striking Resemblance.

"Alderman McBoodle is a fine-looking man, ain't he?" said a friend of ours the other day.

"Yes," replied another, "I was taken for him once."

"You! why, you are as ugly as sin."

"I don't care for that, I was taken for him. I went on his bail bond and was taken for him—by the sheriff."

It Wouldn't Pay the Bill.

"Mr. Black, I've called to see why you haven't taken any notice of my repeated duns?"

"'Silence is golden,' you know, Mr. White."

"Well, now, it seems to me a durned sight more like brass. It won't pay any bills"—*Philadelphia Call.*

BEATING A RAILROAD.

Sad Experience of an Honest Humorist Who Had Lost His Trip-Check.

Down in New York State there is a railroad called the Rome, Watertown & Some Other Place railroad. I believe the some other place is Ogdensburg. Last summer occasion required that I should use this line of road for about sixty miles, and I left Rome one morning feeling at peace with all mankind. The conductor came along in due time to take up the tickets, and I made it a point to ask him if we were on time. I didn't care a copper whether we were two hours ahead or two hours behind time, but I wanted to exhibit a friendly spirit and let him know that I was interested in his welfare. A passenger who won't show his hand to a conductor ought to be made to ride in a baggage-car. He uttered a grunt in reply to my question and passed on. If he was too overworked and heart-broken to utter a yes or no, that was not my fault. He put a green ticket in the band of my hat to show that I was a cash passenger, and I went to sleep to dream that a mad populace were about to hang Jay Gould because he didn't pay his railroad conductors a salary of five thousand dollars a year.

"Ticket!" yelled a voice in my ear, and I awoke to find the broken-hearted conductor towering above me.

"What do you want?"

"Your ticket!"

"Gave it to you an hour ago."

"Where's your check?"

"In my hat."

"See here, young man," growled the broken-hearted conductor, "I want your check or your fare!"

The check was not in my hat. It was not in any of my fourteen pockets. It was not on the seat or the floor, nor above nor beneath the earth. It took ten minutes to satisfy the over-worked conductor of this fact.

"But I had it," I persisted.

"I doubt it."

"Don't you remember of my asking you, when you took my ticket, if we were on time?"

"No, sir! If I had ever been asked such a question as that I should have surely remembered it."

"This man here must have seen my ticket, for I saw him looking into my wallet."

"You are a liar!" promptly responded the passenger, who had the seat behind me.

"And you must either pay your fare or get off," added the conductor.

"Look here, old fellow, I bought my ticket in the regular way, handed it over according to rule, and the fact that I have kept my seat for sixty miles is evidence that you received the ticket. Don't make a side-show of yourself about the check, which is but a bit of card board, anyhow. I have always sympathized with conductors as a poor but strictly honest lot of men. I feel that you are overworked and over-burdened, and that you are many times the object of unjust suspicions. When I make my will I shall remember at least twenty-five conductors to the extent of——"

"I want that check!"

"I haven't got it."

"Then I want your fare!"

"I have paid once."

He reached up and seized the bell-rope and demanded:

"Will you pay?"

"Not to-day."

He pulled the cord, and the train came to a stand-still in about a quarter of a mile.

"Now, then, off with you!"

"You'll have to put me off! I've paid my fare, and if I go off I want a show for a suit for damages."

He beckoned for the brakeman. I have always sympathized with the brakemen as a class, believing them to be gentle-minded creatures who suffered and endured simply to keep trains running for the convenience of the public. The brakeman came, and the pair lifted me up and helped me down the aisle and dropped me off among the daisies: I sat down on the grass, and as the train moved off the conductor remarked:

"Next time you try this dodge on me you'll get badly thumped!"

I sat there for twenty minutes, and then the rear end of the train as it backed up came into view. It stopped opposite me, and the conductor came down and said:

"My dear sir, I beg a thousand pardons! We found your check under the seat, and have come back for you!"

"Then I had a check?"

"You did!"

"And I am not a dead beat!"

"I'll shoot the man who says you are!"

"But you put me off, and I want damages from the company."

"Say, don't do it! You'll ruin me! I've got two children sick with scarlet fever, a wife who is bed-ridden, a mother who needs my support, a father——"

I got aboard the train and went on. The man who called me a liar begged my pardon, the brakeman wanted to adopt me for his son and a dozen passengers came to shake hands and say that my magnanimous spirit would surely be rewarded in Heaven.—*M. Quad, in Detroit Free Press.*

—As an Austin teacher was calling the roll, he had just come to the name of Robert Smith, when Robert threw open the school-room door on a run and called out, "Here!" "Robert" said the teacher, gravely, "you must not answer to your name unless you are here."—*Texas Siftings.*

—A child eight years old died recently at Vallejo, Cal., of consumption.

WORDS OF WISDOM.

Some of the Sad Results of Supersensitiveness and Carelessness.

'Tis we, not they, who are in fault,
When all the world seems wrong.

So many of us are apt to pass unjust sentence upon the world at large if one little factor of it happens to cross our paths in a way unpleasant to us. Indeed, there are not a few of us who are so choleric as to believe that our best friends are plotting against us, if they dare take the liberty of differing from us on any subject, and unless we can have this thinking, active, throbbing world narrowed down to fit our own slings, we pronounce it going to the bad. Now, this is an unhealthy state of mind, and is traceable in a large degree to selfishness; for the view we get of the world depends much upon the spectacles through which we look at it. If we peer out at it through our bitterness, selfishness, or uncharitableness we will seem to see those unlovely qualities in others, while in reality we are the faulty ones, and not our fellow-creatures; and if, instead of condemning others, we would look more impartially into the causes of the unhappy state of affairs, we would find that our proneness to impute unworthy motives to others in their actions toward us has been at the root of much of the trouble. Observation has taught me that the two chief reasons for mental misery are oversensitiveness on the part of half of the world, and lack of thought, or tact, on the other half. It is those afflicted with oversensitive natures who are quick to take offense at all imaginary slights. They are forever on the lookout for something to feel injured about, and invariably persuade themselves that the motives which would have actuated them in a certain course of conduct must have influenced the one who has offended them. This inclination to fix unkind motives upon the words and deeds of our friends and acquaintances has caused us more real heartaches than it was ever intended we should suffer. The motive is, after all, the thing to be weighed, and if we know that the unkind word which wounded was not premeditated nor intentional, are we not wrong to ourselves and others to invest it with a harsher meaning and take it to heart as much as though it wer espitefully said? Indeed, there is no sense nor reason in our harrowing up our feelings by imaginary thrusts and stabs while there are so many stern realities which make the old world seem out of gear.

If, then, the sensitive part of the world suffers, it is the thoughtless half which is in most instances to blame, for more sorrow is caused by the carelessly thoughtless than ever was wrought by the wickedly heartless; and yet many plead this self-same mischief-making, "I did not think," as an excuse for their wrong-doing. Our prayer-books teach us that "sins of omission" rank in enormity with "sins of commission." No one who is not possessed of a certain amount of thoughtfulness or tact can attain to that degree of perfection which endears her to the heart of every one. In the society world it makes the successful hostess, for what is more charming to meet together with those whom a nice discrimination has selected because of compatibility of tastes and acquirements. The same thoughtfulness guides the conversation from topics which would prove embarrassing, and invests the hostess with the happy faculty of always saying the pleasantest thing possible and making her guests satisfied with themselves as well as her.

This is an attribute which may be cultivated by those who have gone so far through life heedless of the feelings of others, for there will come times when this uniform carelessness will testify against them in the absence of their fast departing friends. But the exercise of a kind thoughtfulness is not limited in its province to the center figures of the social circle, as the home is, above all places, the one in which it should never be forgotten. Each member of the home knows what is the sensitive point of each of the others, and remembering this, and avoiding always these reefs of danger, the daily intercourse of families might be more harmonious than we frequently find it. But the most careful person may at times unconsciously touch a hidden spring of sorrow or bitterness in another by some light allusion, and immediately the wounded one feels anger and contempt for the speaker, so quickly does she believe an unworthy motive suggested the remark. Thus, in all the world, these two griefs play into each other's hands, stirring up strife between the dearest friends, estranging the members of one household, and making this lovely world, with its beauty and sweetness, appear as wholly unattractive.—*Baltimore American.*

Connubial Sarcasm.

Husband—Belle, your feet suggest a capital paraphrase to me of these two lines contained in Goldsmith's "Village Schoolmaster:"

"And still they gazed, and still their wonder grew,
That one small head could carry all he knew."

Wife (sweetly, expecting a compliment)—How so, my pet?

Thusly, (edging toward the hole the carpenter left):

"And still I gazed, and still my wonder grew,
That big '9' hoofs could wear a small '3' shoe."

The piece of bric-a-brac that she grabbed from the mantel did not hit him, but it cracked a panel in the closing door as he vanished.—*Siftings.*

—Slippers, to be cozy and comfortable, must be several sizes larger than the boots a young man wears when he goes to see his best girl. This is a hint thrown out to those who are making slippers.—*Boston Post.*

Short Smiles.

Epitaph on an Editor—Here lies one who never lied before.—Washington Critic.

"Yeth, ah, yeth," he said; "yeth, we're going to stick boars—imported boars, you know—at Tuxedo; rare sport, by Jove!" "No doubt," she said, playing with her fan, "but are you not afraid, Mr. Addlepate, that you will be injured?"—Morning Journal.

When the Pilgrim fathers hear that Plymouth has had a dance in honor of their landing, they will be sorry they landed.—Philadelphia Call.

Mrs. Ram came over from Calais to Dover the other day. She said that it wasn't so much the sea as the osculation of the boat that upset her.—Punch.

A fashion item says that "new pocket books are long and slender." They generally are slender immediately after the holidays. We prefer the long and plethoric style. —Norristown Herald.

"I am afraid its not genuine," said a lady to a shopman. "Oh, yes, it is, madame," replied the polite gentleman. "All our camel's hair shawls are made of pure silk, direct from the worm."—Exchange.

"Do you believe that chestnuts keep off rheumatism, Binks?" "Yes," replied Binks; "I always carry a comic paper in my pocket."—Boston Bulletin.

The Rigors of January.

Oh, dear! mammy, I'se so cold!
Git along, yo' fool nigger yo'! Whyn't yo' go put on dat pair o' gloves yo' got on de Christmas tree at de Sunday school?—Illustrated Graphic News.

The Reason Was Good.

A bright youngster of this city sent his first letter to an aunt in a neighboring town the other day, and the recipient, instead of replying directly to the writer, sent word to his mother that it was a very creditable initial attempt indeed. The compliment was repeated to him, and he said: "Well, if she thought so much of it why didn't she answer it?" The same epitome of man remarked recently: "If you should die, mamma, I would get a very young mother to take your place." "Why?" was the natural query. "Because," was the answer, "she would last so much longer."—Boston Gazette.

Unkind of Her Father.

Edith—Mercy me, Nellie; what has happened?

Nellie—My heart is broken, Edith. I shall never smile again, never again find music in the songs of birds, or——

Edith—Oh, it can't be. Has your engagement with the count been broken?

Nellie—Yes.

Edith—Oh, what have you done to him? What has happened?

Nellie—Papa went and told him he had lost every cent of his money.—Omaha World.

Not Favorable to Strikes.

"I told you this morning that I would whip you if you were not a good boy to-day, did I not, Johnnie?"

"Yes, sir."

"And you have been a good boy?"

"Yes, sir."

"Was it because you wished to please me?"

"No, sir."

"What then, Johnnie?"

"Because I don't believe in encouraging strikes."—Detroit Mercury.

The Danger Was Past.

Conductor—Do you expect us to take that boy through on a half ticket?

Matron—Certainly. The agent who sold the ticket saw the boy.

Conductor—Didn't he ask his age?

Matron—No, he didn't seem to think it necessary. Have you a pair of scissors on the train?

Conductor—Scissors!

Matron—Yes, I want to let the hem out of his trousers.—Omaha World.

Natural History in the Nursery.

Uncle Jack returns from a long walk and being somewhat thirsty drinks from a tumbler he finds on the table. Enter his little niece Allie, who instantly sets up a yell of despair.

Uncle Jack—What's the matter, Allie?

Allie (weeping)—You've drinked up my aquarium and swallowed my free pollywogs. Howls with anguish.)—Harvard Lampoon.

Didn't Know What He Missed.

Mrs. Goodear—I am so sorry you are late. You have missed that beautiful aria in the first act and the lovely andante movement in the second.

Mr. V.—Oh, I don't care so much for the area, don't you know, as I don't go in for scenery. But it cuts me up awfully when you tell me I am late for the ballet.—Life.

The Reason He Wanted a Place.

An influential voter in the provinces proposes to "work" his representative in the chamber of deputies for "all he is worth." "My dear deputy, could you manage to get my son a place in the Paris exhibition?" "What can he do?" "Do? Why, if he knew how to do anything I shouldn't be troubling you."—French Joke.

Not Declinable.

Teacher—How would you decline "to drink?"

Willie—Can't be done.

Teacher (in surprise)—Can't be done?

Willie—No; I asked papa how he'd decline it, and he said he couldn't do it—he'd accept. —The Rambler.

Dictated by Malice.

Successful suitor (joyfully)—Well, I have won Miss King; she sent me a beautiful plaster cast of her hand, labeled: "Twas mine; 'tis yours—' Disconsolate rival (sneeringly)—Well, why didn't she finish the quotation: 'and has been slave to thousands'?—Chicago Rambler.

A Gratified Wish.

"Ah! Miss Roseleaf, how I envy that fur arrangement you wear around your neck. What do you call it?"

"It is a boa, Mr. Snidkins."

"Oh, would I were a boa!"

"Your wish is gratified, you are one."—Harvard Lampoon.

Some Hope for Shakespeare.

She—Did you see Henry Irving in "Faust" while abroad, Mr. Breezy?

Mr. Breezy (of Chicago)—No I find most of Shakespeare's plays rather dull and uninteresting, although "Adonis" is not so bad. —Life.

STORY OF A PARROT.

A Bird That Asked and Answered Questions Like a Human Being.

Sir William Temple tells this about a Brazilian parrot which Prince Maurice met in his travels: "I had a mind," said Sir William, "to know from Prince Maurice's own mouth the account of a common and much-credited story of an old parrot he had seen in Brazil, during his government there, that spoke, and asked and answered common questions like a reasonable creature. Prince Maurice said there was something true, but a great deal false, of what had been reported. He had heard of such a parrot when he went to Brazil, and though he believed nothing of it, and it was a good way off, he had the curiosity to send for it; that it was a very great and very old one, and when it came into the room where the Prince was with a good many Dutchmen about him, it said presently:

"'What a company of white men are here!'

"'They asked it what it thought that man was, pointing to the Prince? It answered:

"'Some General or other.'

"When they brought it close to him he asked it:

"'Whence came you?"

"'The Parrot—From Miriannan.'

"'The Prince—To whom do you belong?'

"'The Parrot—To a Portuguese.'

"'The Prince—What do you here?'

"'The Parrot—I look after the chickens.'

"The Prince laughed and said:

"'You look after the chickens?'

"The parrot answered:

"'Yes, I; and I know how to do it very well.'

"And then he made the chuck, chuck, chuck, three or four times that people used to make to chickens when they called them.

"I set down the words of this dialogue," said Sir William, "just as Prince Maurice said them to me. I asked him in what language the parrot conversed, and he said in Brazilian. I asked him whether he understood Brazilian. He said no; but he had taken care to have two interpreters with him—one a Dutchman who spoke Brazilian and the other a Brazilian who spoke Dutch; that he asked them separately and privately, and both of them agreed in telling him just the same thing the parrot said."—*Boston Record.*

A DARMO'S HOUSE.

The Charming Houses of Wealthy and Influential Japanese Citizens.

Life in one of the old families of wealth and position in Japan is full of unique and picturesque interest. We may call it heathen if we will, but it is still a home and replete with suggestive home history. Well do I remember one such, a grand old house of solid timber 69 feet broad by 100 deep, with lofty rooms and long, wide corridors. Its one story had an immense and imposing sloping roof, which covered 14 apartments and many balconies. The sliding partitions could all be removed and make on occasion a noble hall, with many columns. The ceiling was made of fine grained wood and 15 feet from the floor. The front of this house was protected from the inquisitive gaze of the world by a wall of tiles built with cement and lined with a row of firs with mighty girth and far spreading branches which measured their height by rods and their shadows by furlongs. The main gate of the court-yard was supported by heavy tree trunks and covered with a handsome roof, while just within was the porter's lodge. Near this lodge was a clump of evergreens and under their shadow stood an ark cut from solid stone, perhaps four feet high, used as the family shrine and holding in its depths sacred emblems and holy symbols. Just beyond was a rockery of great beauty, where fountains tossed their spray and played with the sun and moonbeams. Here and there the mockunji tree shed its purple blossoms to the breeze from lofty heights, while azalias and starry asters bloomed about its foot. All about the garden camelias of brilliant red or purest white unfolded their lovely buds from low growing shrubs, while now and then a camelia tree, towering fifty feet in the air, drew the eye with its lovely wax-like blossoms.—*Overland Monthly.*

Good Pay for Light Work.

Eight hundred a year for clapping your hands a dozen times every evening is good pay for light work. That is the lowest estimate of the income of the "chief of the *claque*" in Vienna; and the estimate is based upon the confessions of some forty or fifty ladies and gentlemen of the opera and ballet who have been in the habit of purchasing applause at the cheap rate of from ten shillings per month each. Out of this the chief of the *claque* has to pay his assistants; but as the work is pleasant and easy, and occupies only the evening—which might, no doubt, be much less agreeably spent—the annual expenditure upon this head can not be very large. It is tolerably clear that the astute gentleman who "controls" the *claque* in Vienna puts most of the fees into his own pocket, since he has quite recently purchased a pretty little estate in Hungary with his savings.—*St. James Gazette.*

—Said an absent-minded schoolteacher: "I hear a quiet noise in the right-hand corner of the room. I know very well who the guilty party is, but I will not mention his name. It is Tommy Jones."

—It has been decided by the Massachusetts Supreme Court that a fire marshal, like a trial jurist, may subpœna witnesses and compel their attendance to testify in any matter before him.

FEMININE FANCIES.

Some Pretty Things in the Way of Ladies' and Children's Wearing Apparel.

One of the prettiest and simplest frocks for children is the so-called "May" dress. The underskirt is plain and full, like a pinafore—simply drawn together at the neck and wrists by means of a tape, the sleeves being full and loose. Over this is another similarly cut garment, only made with a low, square neck and no sleeves, merely a band of ribbon over the shoulder with a bow in the middle.

For very little boys there comes a pretty style of garment, such as are worn by children at Oxford. They are loose frocks of white woolen fabrics, buttoning up the back, and the only trimming a deep sailor collar of cream plush, which is put on afterwards, so that the square part of the collar falls in the back and the ends in front are tied with a ribbon bow. To make the suit complete there is a plain turban cap of plush.

In handsome fabrics, silk, plush, velvet and the richer woolens with velvet stripes, but little drapery are employed; the back of the overdress is thickly gathered or plaited and falls in smooth folds over the large reeds in the lower skirt. Many of the materials used in the latest French importations are too handsome and heavy to be draped at all and the costumes are richly simple in design, not being wrinkled or folded anywhere.

The chief novel feature in black cloth is that fancy ones are to be worn instead of plain, especially boucle, frise and plain stripes. These give them a warmer and more dressy appearance. Some of the fine viennas have cord stripes, some have interwoven stripes forming checks, and others have a large coarse check on a dice ground.

Blue fox and golden brown beaver are the most popular for trimmings, though not to the exclusion of many other handsome kinds. Blue, so fashionable all last summer, loses none of its popularity, and blue-fox tones well with this favorite color. Not that the fur is really blue—blue fur is as impossible as a blue rose—but it has a certain tinge of metallic bluish gray that in a degree justifies the name bestowed upon it.

The popular Russian tulle, with its coarse basket net, which has been so much worn for small veils, is now shown in light colors for evening dresses. It is very becoming as a veil, and the effect is excellent when worn over silk in evening gowns. It does not crush easily though it looks extremely light, and wears even better than Brussels net, besides being much newer. It is of French manufacture, though christened Russian tulle.

For bonnets heliotrope continues to be the leading color, but will scarcely grow widely popular, because it is a difficult color to harmonize, and requires all the other details of dress to be perfect. Labrador is a beautiful coal color which is used in dark shades for the street, and the lighter tints for evening wear. Acacia pink and tapestry blue are other new colors for bonnets. Steel embroidery is seen on many of the new bonnets in combination with Labrador velvet. For theater wear nothing is more becoming to a blonde woman than the small bonnets of frilled black lace, without strings.—*N. Y. World.*

NOT SURPRISING.

The Neat Way in Which a Lawyer Succeeded in Discrediting a Witness.

Recently Judge Z——, of W——, Ind, was engaged in a case in court where the will of one W—— was being contested, upon the ground that the maker of the will was of unsound mind when he caused the instrument to be executed, Judge Z—— being for the defense, and Judge G—— for the plaintiff.

One Mr. T—— was put on the witness stand to prove that Mr. W—— was not in his right mind when or before the will was made, and Judge G—— questioned him.

Judge G.—"What is your name?"

Answer—"William T——."

Judge G.—"You reside in W——, Ind?"

Answer—"I do sir."

Judge G.—"What's your business or occupation?"

Answer—"A speculator, and I practice law a little."

Judge G.—"Now tell the court if you knew Mr. W—— and when you last saw him in life before date of this will?"

Answer—"I have known Mr. W—— intimately for years, and had much dealing with him. I last saw him in life about ten days before date of the will at his country home, and talked with him full two hours. At first he appeared rational enough, but before I left him I noticed that his mind wandered."

Judge G. (to Judge Z.)—"You can take the witness."

Judge Z. (to witness)—"You say your name is William T——; that you reside here in W——, that you are a speculator and practice law a little?"

Answer—"Yes, sir."

Judge Z.——"And that you were intimate with Mr. W——, had much dealings with him."

Answer—"I have had, sir."

Judge G.—"And that you saw Mr. W—— about ten days before his death, talked *two* hours with him, and at the first he was rational, but *before* you left Mr. W——'s mind appeared to wander?"

Answer—"Yes, sir; it so appeared to me."

Judge G.—"That is, *after* you had talked to him *two* hours his mind wandered?"

Answer—"Yes; I so said."

Judge Z. (to the court)—"I'm not surprised at it—not surpised at it at all, your Honor."—*Detroit Free Press.*

SATURDAY, MARCH 26 1887

HOW TO GET LAND.

Every mail brings letters asking how government land may be got by settlers. Only the number of such letters could convince anyone how many people there are, even among American citizens, who appear to have no knowledge of the provisions of the various acts governing the location and settlement of government land. Writing separate answers to these letters of inquiry takes a good deal of time and no small amount of work. A large number of slips will be printed separate, of the following synopsis of the various acts, and these slips can be used to answer future inquiries.

WHO MAY LOCATE.

Government lands can be located only by American citizens, or those who have declared their intention to become such. A woman may locate land, provided she is of legal age and the head of a household. A woman living with her husband, or a daughter living with her parents, has not the right of location.

HOMESTEAD.

Under the Homestead Act any qualified person may locate 160 acres of government land, except on the odd sections adjoining railroad grants; on such odd sections only eighty acres may be located under this law. The following fees must be paid in California:—When entry is made, $12; when certificate issues, $12; a fee of $10 when entry is made; total $34.

A man and woman, after making each a homestead entry, may marry without invalidating their rights, if the law is complied with as to residence and cultivation. Where a man and woman marry after each has made a homestead entry of adjoining land, they may live in a house built on the dividing line between the two homesteads. Residence for the period of five years from date of entry on the tract is a compliance with the homestead law. If a settler prefers to pay for his land, as at private entry; he may after six months settlement and cultivation make the necessary proof; and upon doing so and paying the government price will get a patent for the land.

Every man who served for at least ninety days in the Army or Navy of the United States during the recent rebellion, and who was honorably discharged and has since remained loyal to the government, may locate 160 acres under this act, and the time for which he served shall be reckoned to him as part of the five years residence required by law. Where a discharge has been given from the service on account of wounds received or disability incurred in the line of duty, then the whole term of enlistment shall be deducted from the time required to perfect title; but in all such cases there must be at least one year's actual bona fide residence and cultivation of the homestead. There are other provisions, but these are the principal points of the homestead law.

PRE-EMPTION.

The principal difference between the homestead and pre-emption privilege is, that beyond the small fees and commissions paid to Registers and Receivers, nothing is paid for the land homesteaded, whereas $1.25 or $2.50 must be paid for the land pre-empted. The same amount of land may be located under this as under the other act. The first step necessary is for the claimant to enter upon the land and do some act showing his intention to become a settler.

Such act may consist in building a house, clearing timber, building fences, and so on. Having made a settlement the next step towards securing title is the filing of a declaratory statement; this must be done within three months from date of settlement, or the settler will be liable to lose his claim. The filing of a declaratory statement before settlement is a nullity, and a settler can make but one legal filing under this law. Where a party is very poor, a dug-out in the side of a hill or a sod house is a satisfactory place of abode, and four pre-emptors may combine to erect a house on the corner common to their claims, but each pre-emptor must reside in his own part of the house. Should one of them be unmarried he may board in the family of a married pre-emptor. When an individual has made settlement on a tract and filed his pre-emption declaration therefor, he may change his filing into a homestead, if he continues in good faith to comply with the pre-emption laws until the change is affected. The time during which the party has resided upon and claimed the land as a pre-emptor will be credited upon the period of residence and cultivation required under the homestead law.

TIMBER CULTURE.

Not more than one hundred and sixty acres in any one section can be entered under the timber culture act, and no person can make more than one entry. Prairie lands, or lands not prairie but naturally devoid of timber, are subject to the operations of the timber culture laws. The fees for entries are $10 if the tract applied for is more than eighty acres; and $5 if it is eighty acres or less; and the commissions of Registers and Receivers on all entries (irrespective of area) are $4 ($2 to each) at the date of entry, and a like sum at the date of final proof.

The ratio of area required to be broken, planted, etc., is one-sixteenth of the land embraced in the entry, except where the entered tract is less than forty acres, in which case it is one-sixteenth of forty acres. The party making an entry of a quarter section, or one hundred and sixty acres, is required to break or plow five acres covered thereby during the first year, and five acres in addition during the second year. The five acres broken or plowed during the first year he is required to cultivate by raising a crop, or otherwise, during the second year, and to plant in timber, seeds, or cuttings, during the third year. The five acres broken or plowed during the second year he is required to cultivate by raising a crop, or otherwise, during the third year, and to plant in timber, seeds, or cuttings during the fourth year. The tracts embraced in entries of a less quantity than one-quarter section are reqcired to be broken or plowed, cultivated, and planted in trees, tree-seeds, or cuttings, during the same periods, and to the same extent, in proportion to their total area, as are provided for in entries of a quarter section.

On each acre of the land required to be planted with trees not less than twenty seven hundred trees must be planted; and at the time of making final proof there shall be then growing not less than six hundred and seventy-five trees to each acre. The planting of fruit trees or shrubbery is not a compliance with the law. Trees that are of value for commercial purposes, or for firewood and domestic purposes, are included among the trees that may be planted and cultivated. No final certificate will be given, or patent issued for the land entered, until the expiration of eight years from the date of entry.

DESERT LAND.

Desert lands are such as will not produce crops without irrigation or an artificial supply of water. Six hundred and forty acres or less may be located by one person. On making the application twenty-five cents per acre must be paid for the land applied for. At any time within three years from the date of filing the declaration and the issue of certificate, the party may make satisfactory proof of having conducted water upon the land applied for in quantity to accomplish the reclamation of each smallest legal subdivision of forty acres or less. On making final proof an addhtional payment of one dollar per acre must be made for the land.

On last Tuesday was celebrated the ninetieth birthday of Emperor William of Germany. Few human lives have been lived through such stormy times, fewer still have been the men who were actors in such great events as the aged Emperor. The story of his life is the story of Europe through the Napoleonic wars and the later great wars of our own time. In his day the German people have made wonderful advance in all the arts and sciences, and not less in the growth of liberal ideas. Respect for his great age and great services to the state make the German people tolerant of his ideas of personal government; but in all probability when he passes away the Government will be conducted with more regard to liberal ideas, and he is likely to be the last monarch in Western Europe to whom even the form of autocratic authority will remain.

Balfour, the new Chief Secretary of Ireland, when he took office called a meeting of all the division majorities of Ireland at Dublin Castle, and instructed them to order the police to shoot the people w[illegible] "got a chance. The [illegible] errible order was t[illegible] a [illegible]ung man named H[illegible]non. An armed policeman plunged his bayonet into the body of Hanlon when the unfortunate young man was passing along the street. Russia made war upon Turkey a few years ago, in defense of Christians who were not treated with greater brutality by the Turks than christian Englishmen exercise upon their fellow christian Irishmen.

Dreadful accidents destructive of human life have been very frequent in the Eastern States during the past few months. By the burning of a hotel at Buffalo last week, about thirty human beings met a horrible death. The stairways and elevator shaft were first filled with flames, and the unfortunate people on the upper floors had no means of escape. The great majority of hotels in cities are death traps; every little while a tragedy occurs like this at Buffalo, and yet the same style of building is being put up in every town and city, and no law is made compelling the builders to provide some means whereby the inmates may have at least a chance of escape from being roasted alive.

Father Keilcher, a catholic priest, is in jail at Dublin. He was custodian of funds entrusted to his care by tenants; he refused to betray his trust and the Tory government put him in jail. It is said that other priests will be treated in the same way for like cause. This will not make any difference; the priests have ever been faithful to the Irish people and they will continue to be so, the Tory government will be beaten in the end.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer: To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

INTENDING ADVERTISERS should address

GEO. P. ROWELL & CO.,
10 Spruce Street, New York City,
For SELECT LIST OF 1000 NEWSPAPERS,
Will be sent FREE, on application.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expense of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.

Exercises of the closing week June 19 to 23.

Sunday, June 19—Special sermons to students.

Tuesday evening, June 21—Declamation contest for prizes.

Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.

Wednesday evening, June 22—Lecture before the Fowler Literary Society.

Thursday, June 23, 10 A. M.---Closing exercises of Academy.

Thursday evening, June 23---Reception of Principal to students and friends of the Academy.

No. 904

NOTICE

OF THE
REMOVAL OF THE LAND OFFICE
FROM
BODIE TO INDEPENDENCE, CALIFORNIA.

Notice is hereby given that the President of the United States, by Executive Order dated April 22, 1886, has, pursuant to law, directed that the office for the sale of public lands now located at Bodie, California, be removed to INDEPENDENCE, in said State.

The Register and Receiver of the district will give notice of the precise date when the office will be closed at Bodie, preparatory to removal and reopening the same for the transaction of public business at INDEPENDENCE.

Given under my hand at the City of Washington, this twenty-fourth day of April, A. D. 1886.

By THE PRESIDENT:
WM. A. J. SPARKS,
Commissioner of the General Land Office.

In pursuance of the above order notice is hereby given that the said Land Office will be closed at Bodie on the 22d day of March, 1887, and opened for the transaction of public business at INDEPENDENCE on the 6th day of April, 1887.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, MARCH 26.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Frank Fitzgerald made a brief visit to town at the beginning of the week.

County Clerk Mack went to Darwin this week, to look after mining interests.

Only orange blossoms are waited for; the bride has all else ready and "Barkis is willin'."

District Attorney Forbes returned last Saturday, after a sojourn of a week or more at Bishop Creek.

A man named L. J. Moore is in jail at Reno, charged with the murder of his own daughter, Alice Moore.

Cat fishing is now the proper caper. The men who would rather die than dig dirt for money go after worms at a lively rate.

A beginning has been made in the work of improving the Court House yard; quite a number of shade trees were planted this week.

A Washington physician says the President is in great danger of sudden death from eating too much and not taking enough exercise.

An extra meeting of the Board of Supervisors was held this week, to provide for holding on election on the proposed amendments to the Constitution.

Mr. J. C. Harris has gone to San Francisco. The many friends of Joe at Independence parted from him with reluctance; their kind wishes will follow him.

Mr. J. W. P. Laird, Register of the Land Office, and Mr. A. W. Eibeshutz, Receiver, returned to Independence from Bodie last Wednesday. The books and other belongings of the office will be brought next week.

Mr. N. G. Fairman has gone to San Francisco. He expects to return about two weeks hence and then go to Panamint and push along the work of rebuilding the mill and other structures destroyed by storm last fall.

At the late session of the Nevada Legislature, a law was passed that no one will be allowed to teach in the public schools of that State who has not been an actual resident of the State for at least six months. This will give the resident teachers of the State a monopoly of the business.

In their report the Grand Jury of Alameda county charge the Salvation Army with being a disgrace to Oakland. After describing the proceedings of the Salvationists at some length the report says: "We are of the opinion that such proceedings are a public nuisance and detrimental to the peace and good name of the city.

One thousand acres of choice land for sale. No better grain or grass land in the State. An abundance of water at all times; a perfectly healthy location; title without a flaw. Five hundred acres or over, twenty dollars per acre; small lots, forty acres or more, thirty dollars per acre. Apply to the office of the INYO INDEPENDENT.

Divine Service.

Rev. J. H. De La Matyr is expected to preach at Camp Independence Sunday forenoon, and at Independence at half-past seven o'clock evening.

New Organist.

Mrs. Nettie Webb has kindly volunteered to serve as organist for the Sunday-school at the M. E. Church. Mrs. Webb is a fine musician and her services will be of much value to the school.

Flower Roots.

Flower roots and bulbs of many kinds, including varieties of roses, dahlies, lilies, jasmines, pansies and various others, for sale cheap at the garden of A. N. Bell, Camp Independence.

A Cheap Home.

One hundred and sixty acres of land; one acre in orchard, choice fruit; ten acres partly alfalfa, partly grain and garden; good water right; house of five rooms, one-half mile distant from school and post office. Every foot of the land good. Title U. S. patent. This will make a fine home for an industrious farmer. Will be sold very cheap; terms, cash. Apply to C. Mulholland, Independence, Inyo County, Cal.

Nursery Stock for Sale.

We are reliably informed that A. F. Smith, representing R. D. Fox nurseries of San Jose, Cal., is now at Bishop Creek with a general assortment of Fruit, Shade and Ornamental trees which he now offers for sale. Mr. Smith will be remembered as the man who solicited orders in a portion of this county last Summer, and who delivered them to the entire satisfaction of his customers.

Indispensable to the Toilet.

Darbys Prophylactic Fluid cures chafing, eruptions, and inflammation of all kinds; cures inflamed or sore eyes; relieves pains from bites or stings of insects and sore feet; destroys all taint of perspiration or offensive smell from the feet or any part of the body; cleanses and whitens the skin. Used as a dentifrice it purifies the breath; preserves the teeth and cures toothache, sore gums and canker. A little of the Fluid in the Water used in bathing is very refreshing and especially beneficial to the Sick.

Meet Nurse for a Poet.

One must be as dull as an ox to look without emotion upon Owens valley in its present aspect. The vast range of the Sierra towers up on the west, all covered with snow; its peaks resting against the deep blue sky like columns of marble. The valley is clothed in a mantle of green, varied with the lovely colors of almond, apricot, nectarine and peach trees, now in full bloom. Some of these have flowers of the very richest colors, and at a little distance look like masses of flame, till one almost expects to hear the voice that spake to Moses, saying, "put off the shoes from off thy feet, for whereon thou standest is holy ground." If it be true that the mind of a people receives its bent from the surroundings, a Homer or a Dante will in some future generation be produced in Owens valley. Only such genius as these two poets had could do justice to this sublime scenery.

SUICIDE.

An Old Man Takes His Own Life.

Some time between Sunday evening and Tuesday morning last, Michael Heiber committed suicide. The deceased was a native of Germany, aged seventy-one years. During the past fifteen years, or about that length of time, he had been in the employment of Mr. A. Sanger, and when the latter moved from Kern county to Owens valley Heiber came with him. Last Sunday Heiber went from the home of Mr. Sanger, at Alvord, over to Big Pine; he drank some and was last seen alive in the village toward evening. Being missed Mr. Sanger made search for him on Tuesday morning, and his body was found by a haystack about half a mile east of the village. He had shot himself in the mouth, the ball passing through his brain. Deceased was subject to fits of despondency and had said that he would destroy himself. Coroner Matlack held an inquest and the jury rendered a verdict in accordance with the facts. Mr. Sanger had the body decently buried at his own expense. Deceased was not known to have any relatives in the country.

A Gifted Artist.

Mr. W. F. Matlack has two crayon portraits at his residence, that deserve more than passing notice. These pictures have the fidelity to outline of photograps; but they have more than that, more than photographs ever have; they are not rigid and stiff, but have all the flexibility and animation of features of live human beings. This is more than the camera can give; the camera can give a true picture of form, but only a living hand moved by a living soul can infuse life itself into a picture. A good photograph may be admired as a mechanical production; these likenesses are the product of a human soul and inspire something far above mere admiration. The artist is Miss O'Hara, of Round valley. Some very fine pictures by Miss O'Hara were shown at the fair at Bishop Creek last fall.

Lookout

At the end of last week one hundred and ten tons of ore had been accummulated at the furnace at Lookout. The amount is being added to from day to day. In addition to this two big teams are constantly on the road, hauling ore to Keeler. It will not be possible for teams to reach the charcoal heaps on the mountains sooner than another week; this will delay the lighting up of the furnace for some time yet.

Smith and Wallace are taking good ore from the Minnietta mine. The scarcity of good miners is still complained of at Lookout. At least twenty good men would find steady employment there at standard wages.

Protect the Children.

There are a great many children in Inyo county who have never been vaccinated. Small pox is prevalent in Los Angeles and the disease may be conveyed here. It is doubtful if there is a single physician in the county who is now in possession of vaccine matter. Parents should not lose a day in requesting the family physician to get virus and have their children inoculated. The risk is too great, the possible result too dreadful for any loving parent to neglect the only security for the child against such a terrible disease as small pox.

Reception.

It is reported that a grand reception was given last evening to Mr. Gould, at Bishop Creek. Desirous of making public expression of their appreciation of his services as Assemblyman, a number of citizens met Mr. Gould at the station and escorted him into the town. A dinner was given, laudatory speeches were made and, in short, everything was done that could prove the high estimation placed upon the services of Mr. Gould in the Assembly.

Italian Cypress.

At the residence of Mr. A. N. Bell, at Camp Independence, are some very fine Italian cypress trees. The trees are heavily loaded with seed bolls and Mr. Bell will supply all that may be wanted free of cost to any who may call at his place and gather them. Mr. Bell has a number of young trees growing from the seed. The Italian cypress is a handsome evergreen and grows rapidly at his place, no doubt it would do the same all over the valley.

The Correct Thing.

A mistake was made in receipt published last week, of a wash for trees infested with scale. Mr. A. F. Smith, agent for a nursery at San Jose, says the following is correct:—One and a half pounds of sal soda to one, or each, gallon of water; add one gallon of whale oil to fifty gallons of the mixture. The sal soda to be thoroughly dissolved by heat and the mixture to be kept in constant agitation while using.

The Pole Reached at Last.

Now we may have a toothpick made from the north pole; according to the *Enterprise* Carson has not only reached the pole, but has gone far beyond it; that paper in a scientific article says the Carson Observatory is in latitude 119 degrees, 45 minutes and 42 seconds. Perhaps Senator Stewart has accomplished the great feat of making Carson the sovereign city of the hyperborean regions.

New Postoffice.

This week work was begun on a new building for the postoffice at Independence. The structure adjoins Mairs' hotel and is built by the hotel proprietor. With the building of a fine hotel, hall and postoffice, Onie may be called the Augustus of Independence.

For Sale Cheap.

A fine Jack, five years old, stands twelve and a half hands high, color, black. His progeny are noted for their large size and fine action. For further particulars inquire of

R. C. SPEAR,
Independence, Cal.

The Fourth.

A meeting was held at the town hall last evening, to make preliminary arrangements for duly celebrating the glorious Fourth. Judging from the tone of the meeting, it is safe to say there will be no lack of funds and spirit to do the thing up in good style.

Mill Will Close.

Mr. A. N. Bell gives notice that on the 20th day of April next his flour mill will be closed, and will not again be opened for work till the new wheat crop begins to come in. All parties having grain to grind will please bring it to mill immediately.

Dying.

J. C. Mitchel, sent to the county hospital a week or two ago, is said to be dying. A few years ago Mitchel was a man of some local prominence; but habit became stronger than will, with the usual result.

Thanks.

The Committee of Arrangements for the ball given last week on behalf of the school at Camp Independence, desire to give thanks to all who attended the ball and to all who in any way aided the affair.

Stand In.

Mr. F. Russell, of Yolo county, is at Independence. He wants to help organize an irrigation district under the law lately enacted by the Legislature. He should have the hearty support of every citizen of the district. Nothing we can do would so hasten the general prosperity of the whole valley.

To Land Seekers.

In answer to many inquiries we would say: Good lands, partially improved, can be bought in Owens valley at prices ranging from ten dollars to thirty dollars per acre. All of the lands for sale are within easy reach of railroad, postoffice and school house.

Committed for Trial.

Aaron Hood, or "Hickey," as he is more generally called, was arrested for shooting at David Stubblefield. Last Saturday he was examined before C. Mulholland, J. P. and committed for trial, charged with an assault with a deadly weapon, with intent to commit murder. Hickey is the first occupant of the new jail.

Fair Directors.

The Governor has appointed the following Directors for the new agricultural district: Hon. N. D. Arnot, Alpine county; Harvey Boone, Mono county; Robert Ford, Bishop Creek; Thomas J. Goodale, Fish Springs; N. Rhine and A. R. Conklin, Independence; John Shepherd, Georges Creek; W. Walker, Olancha.

Young Man Killed.

Last Tuesday morning C. E. Adle, of Bishop Creek, got a telegram from San Bernardino that his brother-in-law, William A. Cole, had been killed that morning by being run over by cars on the railroad. Willie Cole formerly lived in Owens valley; he was aged about eighteen years; his mother, Mrs. Cole, now lives at Bishop Creek.

Broker on Trial.

Sol Frankel, the defaulting stock broker of Virginia City, was put upon trial last week, charged with embezzling 400 shares of mining stock. At latest heard from Virginia the jury had failed to agree. If found guilty other charges would be brought against Frankel and his partners; if acquitted it is thought no further action will be taken in any of the other cases.

Another Old Man.

Modoc county has a citizen almost as old as Walter O'Malley, who died recently in this county. The name of this old man is Samuel K. Matney. The Modoc *Independent* says: Last week his papers granting him a pension for services in the Mexican war arrived here, and a reporter of this paper took from them the following data: "Samuel K. Matney enlisted in Shelby county, Illinois, for the Mexican war in the year 1846, in Company C, Third Regiment, Captain Freeman, at the time he was 62 years of age," and consequently is now in his 103d year.

Needed Repairs.

The Supervisors did not get the election proclamation in readiness in time for publication this week. The amendments to the Constitution, to be voted upon at the coming election, pertain to the reorganization of the State Supreme Court. All the changes proposed are much needed, and will no doubt be adopted by a large majority in the State. The Constitution is as much in need of repairs as was a gun belonging to a certain Scotch Highlander. The hielanman took his gun for repairs and told the gunsmith to make for it a new stock, and a new lock, and while he was about it he might just as weel make a new barrel for it.

Invention of a Papier Mache Coffin.

Some one not long since invented a papier mache coffin. Among the advantages claimed for it was its close resemblance to wood, its lightness, waterproof quality, and incombustibility, though why this latter quality should recommend the new casket is not apparent. The paper casket has been patented, but has not been put upon the market. Iron and bronze caskets have been for some time in favor, and recently marble caskets have come in. They are practically indestructible, being made of a composition of powdered marble dust and Portland cement, and molded and baked like pottery. A certain peculiar post mortem vanity has found gratification in transparent glass coffins, but hard wood is still more used than any other material, and for all practical purposes it is doubtless, as satisfactory as anything else. On the score of healthfulness, indeed, the less durable the casket the better for the surviving population of the earth.—Chicago Herald.

Character of Ralph Waldo Emerson.

Emerson never was a platform orator. He was purely an essayist. His manner was very far from energetic, and his subject matter unfit for a popular audience. He never drew a crowd twice. In all towns he had a handful of worshipers. He was one of the purest, most gentle of men. No committee was ever annoyed by his exactions. But if he had forgotten his manuscript, alas for everybody. He could do nothing. He had no ready wit. And he was very likely to forget his papers.

Emerson had a habit of seeing in people that which other people did not see. He was wonderfully interested in any nature that was downright earnest. If their views diverged sharply, all the better. His question was, how and why is this man so sincere? No one can be in dead earnest without there is a truth somewhere in him. He did not care to lecture, and it was with much difficulty that he was drawn far from Boston.—Globe-Democrat.

The Pronunciation of Beaufort, S. C.

The name of this place is pronounced Bew-fort, "and don't you forget it," as a native remarked. This is authentic and taken on the spot. Whatever the inhabitants call a place is the name of that place, no matter if it is spelled with eleven h's and pronounced Oshkosh. And whatever a man or family calls himself or itself, is the name thereof; though, like one of the noble families of Virginia, they spell it Taliaferro and call it Toliver. But that place in North Carolina with the same spelling is called Bo-fort, and that little inlet in Florida is called Boof-ert. All this is done, I suppose to illustrate the absurdity of our orthography.—"Parke" in Chicago Times.

SOLE PROPRIETORS. Price, $1.00.

In the Superior Court of Inyo County, State of California.

In the matter of the Estate of Rafael Diaz, deceased.

Abraham Diaz, the Administrator of the estate of Rafael Diaz, deceased, having filed his petition herein, duly verified, praying for an order of sale of certain part of the real estate of said deceased, for the purposes therein set forth. It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased, appear before the said Superior Court on Monday, the twenty-fifth day of April 1887, at ten o'clock in the forenoon of said day, at the Court Room of said Superior Court, at the Court House, or at the Methodist Church, if the Court be there holden, in the town of Independence, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased, at private sale, as shall be necessary; and that a copy of this order be published at least four successive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

Dated March 25th, 1887.

JOHN A. HANNAH,
Superior Judge.

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of Inyo county, at the office of the County Clerk until 12 o'clock m., on Tuesday, May 31, 1887, to contract for the care of said indigent sick for the term of one year, from May 1st, 1887 to May 1st, 1888. Said bids to designate the amount for which parties contracting will care for said indigent sick, on the basis of an average of four patients per day throughout the year, and to include all medicine, nursing, board, lodging and washing. Said bids to include the burial and funeral expenses of any indigent sick person or persons who may die while under such care.

Said contractor to care for all the indigent sick properly admitted to the contractor's care. And said bids to designate the price per head at which a excess of patients over the average of four each day throughout the year will be cared for, said excess to be paid for by extra allowance on presentation of bills duly sworn to, at the regular meeting of said Board, immediately after said contract has expired. The average four per day to be paid for at the regular meetings of the Board, on presentation of bills duly verified. All payments to be made by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of said contract price, for the faithful performance of said contract.

The care and management of said indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof, or any person appointed by said Board for such purpose.

Said proposals must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of one o'clock and four o'clock p. m., on said 31 day of May, 1887, and the Board reserves the right to reject any and all bids.

S. A. DENSMORE,
Camp Independence.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SCOTLAND, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, Ill., writes: "You ask what I think of the Washer I bought last summer. Ist. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $10."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

INJUSTICE CORRECTED.

Convincing Verification of Widecast Public Statements.

TO OUR READERS:—In common with many publishers and editors, we have been accustomed to look upon certain statements which we have seen in our columns as merely adroit advertising.

Consequently we feel justified in taking the liberty of printing a few points from a private letter recently received from one of our largest patrons, as a sort of confession of faith to our readers. We quote:

We have convinced ourselves that by telling what we know to be true, we have produced at last a *permanent conviction* in the public mind. Seven years ago we stated what the national disease of this country was, and that it was rapidly *increasing*. Three years ago we stated that a *marked check* had had been given it.

"The statistics of one of the largest life insurance companies of this country shows that in 1883 and 1884, the morality from kidney disorders *did not increase* over the previous years: other companies stated the same thing. It is not presumptous for us to claim *credit for checking* these ravages.

"Seven years ago we stated that the condition of the kidneys was the key to the condition of health; within the past five years *all careful life insurance* companies have conceded the truth of this statement, for, whereas, ten years ago, chemical analysis to determine the condition of the kindeys was not required, to-day *millions of dollars in risks are refused*, because chemical examinations discovers *unsuspected* diseases of the kidneys.

"Seven years ago we stated that the ravages of Bright's Disease were insignificant compared with other unsuspected disorders of the kidneys of many misleading names; that ninety-three per cent. of human ailments are attributable to deranged kidneys, which fills the blood with uric acid, or kidney poison, which causes these many fatal diseases.

"The uric acid, or kidney poison, is the real cause of the majority of cases of paralysis, apoplexy, heart disease, convulsions, pneumonia, consumption and insanity; over *half* the victims of consumption are first the victims of diseased kidneys.

"When the recent death of an honored ex-official of the United States was announced, his physician said that although he was suffering from Bright's Disease, that was *not the cause of* death. He was not frank enough to admit that the apoplexy which overtook him in his bed, was the fatal effect of the kidney poison in the blood, which had eaten away the substance of the arteries and brain; nor was Logan's physician honest enough to state that his fatal rheumatism was caused by kidney acid in the blood.

"If the doctors would state in official reports the *original* cause of death, the people of this country would be alarmed, yea, nearly *panic stricken* at the fearful mortality from kidney disorders."

The writers of the above letter give these facts to the public simply to *justify the claims that they have made*, that "if the kidneys and liver are kept in a healthy condition by the use of Warner's safe cure, which hundreds of thousands have proved to be a specific, when all other remedies failed, and that has received the endorsement of the highest medical talent in Europe, Australasia and America, many a life would be prolonged and the happiness of the people preserved. It is successful with so many *different* diseases because it and it *alone*, can remove the uric acid from the blood through the kidneys."

Our readers are familiar with the preparation named.

Commendation thereof has often appeared in our columns.

We believe it to be one of the best, if not the best ever manufactured. We know the proprietors are men of character and influence.

We are certain they have awakened a wide-spread interest in the public mind concerning the importance of the kidneys. We believe with them that they are the key to health, and that for their restoration from disease and maintenance in health, there is nothing equal to this great remedy.

The proprietors say they "do not glory in this universal prevalence of disease, but having started out with the purpose of spreading the merits of Warner's safe cure before the world, because it *cured our senior proprietor, who was given up by the doctors as incurable*, we feel it our duty to state the facts and leave the public to its own inferences. We point to our *claims;* and to their *public and universal verification* with pride, and if the public does not believe what we say, we tell them to ask their friends and neighbors what they think about our preparations."

As stated above, we most cordially commend the perusal of this correspondence by our readers, believing that in so doing, we are fulfilling a simple public obligation.

Mr. Webster's Story.

Ben: Perley Poore says that Mr. Webster used sometimes to read the conclusion of a charge by Judge Dudley, a trader and a farmer, a manuscript copy of which he had for many years in his desk. It was a treat to hear him read it in pure and undefiled English, as it doubtless came from Judge Dudley's lips: "You have heard, gentlemen of the jury, what has been said in this case by the lawyers, the rascals! but, no, I will not abuse them. It is their business to make a good cause for their clients; they are paid for it, and they have done in this case well enough; but you and I, gentlemen, have something else to consider. They talk of law. Why, gentlemen, it is not law that we want, but justice. They would govern us by the common law of England. Trust me, gentlemen, common sense is a much safer guard for us; the common sense of Raymond, Epping, Exeter and the other towns which have sent us here to try this case between two of our neighbors. A clear head and an honest heart are worth more than all the law of all the lawyers. There was one good thing said at the bar. It was from one Shakespeare, an English player, I believe. No matter, it is good enough almost to be in the Bible. It is this: 'Be just, and fear not.' It is our business to do justice between the parties, not by any quirks of the law out of Coke or Blackstone, books that I have never read and never will, but by common sense and by common honesty, as between man and man. That is our business, and the curse of God is upon us if we neglect or evade or turn aside from it."—Boston Budget.

HOME AND FARM.

—Cows that have no bedding are often injured in the knees by getting up or down, especially if the floors be wet and slippery.—*Troy Times.*

—Swine are populous in the United States. According to Statistician Dodge of the Agricultural Department there are about eighty swine to every one hundred of our population, while in Europe there only fifteen to each one hundred persons.

—A New York *Tribune* writer says that two ounces of saltpeter dissolved in a quart of warm water and thrown into the cistern will remove the offensive odor of the water.

—Potato crust for meat pies is made by adding one teacupful of cream to six large potatoes that have been boiled and mashed fine. Add flour enough to roll, and a little salt, and handle as little as possible.—*Cincinnati Times.*

—For biliousness the editor of the Boston *Medical and Surgical Journal* says a plain diet of bread, milk, oatmeal, vegetables and fruit, with lean meat and fresh fish, is best. Exercise in the open air. The victim of an acute attack will be righted by (1) abstinence, (2) porridge and milk, (3) toast, a little meat and fish and ripe fruit, thus coming to solid food gradually.

—Stuffed Potatoes: Choose some large potatoes, peel them, cut a small piece off the top of each, and scoop them out carefully with a knife and fill them with sausage meat; replace the top pieces. Grease a baking-pan with butter and lay the potatoes side by side in it, with a little lump of butter between each; bake them in a hot oven.—*Good Housekeeping.*

—Velvet Pudding: Five eggs beaten separately, one cup of white sugar; beat well together, then stir in four tablespoonfuls of corn starch dissolved in a little sweet milk, let it come to boiling point, then stir in briskly the other ingredients, then let it boil until it becomes quite thick, remove it from the fire, pour into your baking dish. When nearly done take the white of eggs, beaten to a froth with one cup of sugar, and pour over the top of the pudding.—*Boston Budget.*

—Under a forcing system of treatment the best hens in the world will quickly play out. You may get a large number of eggs within a given time, but the later layings will not give you average good chickens when you come to hatch such product. This result we have proved beyond peradventure in our past experience. Therefore, never force to any considerable extent your stock to lay an excessive or unnatural number of eggs, as it is exhausting, and will impair the vigor of the progeny.—*Prairie Farmer.*

EDUCATED FARMERS.

What They Have Done for the Advancement of Rural Interests.

While it is not to be inferred that farmers are uneducated, or in any sense inferior to other classes in intelligence, yet there is room for greater educational expansion, which should not be overlooked. It has been but a decade since "book-farming" was derided as a pastime, resulting in great expense and no profit; but at the present day "book-farming" is considered indispensable in conducting practical operations on the farm. The "book-farmer," as the phase is understood, may not have been an adept in the use of implements, may have lacked skill at the plow and in feeding, and knowledge of the proper mode of expenditure; but while he was lacking in "practical experience," he was always aiming for the best of every thing, and, by experiments, educated his neighbors. Though he knew nothing about milking a cow, yet he could, at a glance, separate the different breeds of stock and mate them for the best results; and his knowledge of fertilizers, varieties of plants and peculiarities of soils was often far in advance of his more practical neighbors. While his efforts were often failures, they always tended to a better system of cultivation and the introduction of superior stock in the section in which he operated.

If the skilled and practical artisan considers it his duty to make a study of architecture, mechanical drawings and specifications, with the advantage of books giving the experience and designs of others, there is no reason for the farmer to refuse kindred privileges for himself. A knowledge of the progress made in his calling can be gained only by study and practical experiment upon the theories advanced. There are hundreds of farmers who are experts in the management of a dairy, yet who give little or no attention to the classification of stock; and some of the most successful horticulturists have no idea of how the varieties of fruit cultivated by them were produced.

Though farmers, like all other classes, may be benefited by knowledge, they are not as slow as is generally supposed. Every season there are a great number of conventions held to consider agricultural subjects, but the masses are best educated not only by the study of agricultural literature, but by meetings in each locality. It is at such meetings that the practical and theoretical can be compared, and the experiments and opinions of every member given. A great advantage of local meetings is the facility of inspection of the farms of such sections and a direct comparison of the growing crops, as well as the live-stock possessed by each, which affords an opportunity also to the younger members, infusing in them a spirit of progress which is sure to result in benefit in the future, and to render agriculture more and more profitable.—*Philadelphia Record.*

Destined for Greatness.

A wealthy gentleman interrogated his son's teacher as to the boy's capabilities: "You have been giving private lessons to my son for more than a year?" "Yes, sir; it's more than a year." "Well, by this time you must have got a pretty good idea as to his capabilities?" "I think I have." "Now tell me candidly has he not got a remarkably intellectual grasp?" "Indeed he has; quite remarkable, in fact." "Ah! I am glad to hear it." "Yes; I think I can truthfully say that he grasps the simplest problem with the greatest imaginable difficulty."—Texas Siftings.

THE INDUSTRIAL WORLD.

—One of Cincinnati's chief industries is the manufacturing of lead, fifteen million pounds of which are made every year.

—Near Toronto is being constructed the first steel steamer ever built in Canada. The engines, however, are being made in Scotland.

—A new industry recently developed in Hancock County, Maine, is the gathering of white pine and spruce cones for French and German markets.

—A farmer of New Hope, Cal., who planted five hundred acres in potatoes, has had such an abundant crop that he calculates that it will yield him $50,000.

—A Pittsburgh natural gas company is the largest one in the country. It supplies over four hundred manufactories and over seven thousand dwellings with the entire amount of fuel consumed. The total area of pipe leading into Pittsburgh is given as 1,341,602 square inches.—*Pittsburgh Post.*

—The great bulk of cheap pocket cutlery is punched in dies from sheet steel. Good cutlery is hand-forged, and the average output per hour for a good workman is from twenty-five to forty blades, according to size, American steel is being used a good deal for this purpose. The blades are polished on walrus hide.—*Chicago Times.*

—The decline of the silk industry in India, for which various causes have been assigned, has at length been proven by Mr. Wood Mason, an English naturalist, to be due to a destructive parasitic disease of the worms. The affection seems to be identical with "pebrine," which ravaged French silkworm nurseries from 1849 to 1865, and was eradicated from Europe by the discoveries of Pasteur.—*Arkansaw Traveler.*

—California made in 1886 25,000,000 gallons of wine, against but 7,500,000 last year. The San Francisco *Call* says 40,000,000 pounds of grapes have been shipped East as table fruit, 60,000,000 pounds made into raisins, 20,000,000 pounds made into brandy and over 215,900,000 pounds made into wine. The eastward shipments of lemons, limes and oranges will be twice as large as they were last year, it is said, owing to a reduction in freight charges.

—In the town of Clymer, Chautauqua County, N. Y., is a large settlement of Hollanders, the oldest members of which brought from their fatherland the simple manners and industrious habits which have always been characteristic of that race. Nearly without exception they are engaged in general farming and dairying, and to supplement their farm labors they have introduced an industry which is carried on in no other place in the Union. This is the making of the wooden shoes, or clogs, which are so common in Holland and some other foreign countries.—*Buffalo Express.*

—A Pittsburgh correspondent tells of a man named Cook, at Mansfield, O., who has spent a large portion of his life and some $30,000 in electrical construction and other work. First his efforts were concentrated on a flying machine. This, of course, was a failure. Then an evaporating pan for sorghum realized some $10,000, and with this he plunged into the field of electrical invention. He is now at work on an electrical contrivance for perpetual motion, from which he expects to realize $25,000,000. It is described as wonderful piece of mechanism.

PUNGENT PARAGRAPHS.

—Who says you can not reason with a woman? You can reason with a woman. And generally that is all the good it will do.—*Somerville Journal.*

—It am twice as easy to spend fifty cents to go to de circus as it am to pay back two shillins of borrowed money.—*Brother Gardner's Observations.*

—We notice in a newspaper some verses headed "The Seven Ages of Woman." After a woman is thirty she abolishes the other six.—*Somerville Journal.*

—It is very difficult for a lady to enter or leave a carriage properly. It requires practice and a carriage. The carriage is the hardest part to acquire.—*Puck.*

—A New York paper speaks of a lady pickpocket. No lady picks any pocket but her husband's, and in cases of this sort usage has rendered such action proper.—*Omaha Herald.*

—"Professor," said a graduate, trying to be pathetic at parting, "I am indebted to you for all I know." "Pray don't mention such a trifle," was the not very flattering reply.

—Fogg—"So you have twins down at your house, have you, Pat?" O'Kelly—"Who told ye we had twins? Indade we have not. There is just wan boy an' wan garl."—*Detroit Free Press.*

—"O, Clara," said Maud, "Charley took me sleigh-riding last night. I had such fun I drove." "What was the matter with Charley?" "Stupid! He couldn't drive with his teeth, could he?"—*N. Y. Sun.*

—"Pa, have you got the hydrophobia?" "No, Bertie; what makes you ask that question?" "Well, I heard ma say to-day that you got awfully bitten when you thought she had a fortune in her own name."—*Harper's Bazar.*

No More St. Louis for Him.

A miserably poor specimen of the stranded actor ambled into a railway office in the Missouri metropolis and asked:

"Isn't there some way that I could get a pass over your road to Chicago?"

"I'm afraid not," replied the ticket agent. "We are very short of passes just now and the price of them has gone up."

"Well, couldn't you arrange to give me a half rate ticket and take my note for the amount. It will be all right, you know."

"No; our rules are very strict now, and it would be as much as my position's worth to make out a half rate ticket for any one."

The stranded Thespian looked pained and thoughtful a moment and then whispered:

"Well, say, could you lend me a quarter and direct me to the nearest drug store?"

"Why, what do you want—whisky?"

"No, strychnine. I'm going to leave St. Louis somehow."—Chicago Herald.

—Honor to the true man ever who takes his life in his hands; and at all hazards speaks the word which is given him to utter, whether men will hear or forbear, whether the end thereof is to be praise or censure, gratitude or hatred.—*Whittier.*

AFTER-DINNER ORATORY.

A European Custom That Is Gaining Ground in the United States.

A lump of soft coal crackled on the hearth in the private room of the president of the New York Central railroad the other morning, and the darting flames gave a cheerful look to the spacious apartment. At a broad, flat desk Mr. Chauncey Depew sat, busily engaged in signing his name to passes when the *Herald* representative entered. After a few minutes' conversation something was said about dinners. At the mention of this talismanic word a sweet smile played about the corners of his mouth; he laid his pen down, and throwing himself back in his chair, with his hands folded over the receptacle of so many good dinners, said:

"Dinners! Public dinners are becoming an institution in this country. The day is not far distant when the country will recognize the influence of after-dinner speeches. The lecture platform, which at one time attracted to it the greatest men in the nation, has become the stamping-ground of the small talker with the stereopticon. There are few public occasions upon which the orator is given an opportunity. Indeed, oratory no longer enjoys the place it did in public estimation. The newspapers are every thing. The press has seized the scepter of the orator and lecturer.

"Just look into the great national assemblies. Take the House of Representatives at Washington, for instance. The day of speeches is past. The printing press is more effective than the voice for putting a speech before the members. But all this is bad for the interchange of ideas. It disposes with all friction. Now, nothing keeps the public so wide awake as the clashing of ideas. Just see how the dinner affects this. Mr. So-and-so is a great believer in a project. It is his hobby—he rises at the table to answer to a toast, and ventilates it. His neighbor entertains a different opinion, and he rises to tear it to shreds, believing he will toss it to the winds, to be irremedibly scattered. Now, without the formality of a debate, a great question may have been brought up and discussed. The press seizes upon it and against it. Like magic the whole country in a week's time is thinking it over."

"Then you believe matters of great public interest will be discussed at these dinners?" asked the *Herald's* representative.

"I do, indeed. In Michigan, you may have noticed, there was a dinner given, to which all the prominent people went, from the farmer to the political chieftains. Men of all kinds had an opportunity to speak. You see, if a man's views are unpopular he is shut down upon, and, if his views are forcibly presented, men will listen attentively to him. You will note how many dinners are being given by one association or another at which there is speaking afterward, as a matter of course. In Europe, when any great enterprise is to be started, a public dinner is given, at which it is announced. The custom is being taken up here, and I think before long that associations, clubs, societies and promoters of enterprises will resort to the banquet as the best means of getting men together to set them thinking."

"What is your personal experience of after-dinner speaking?"

"Well, I don't know how a man who can talk at all can have a better chance than at a dinner to fire into the camp of his enemies. What ugly things you can say. My!" At this moment Mr. Depew passed his hand over his mouth. It was an impressive gesture. When the hand fell a smile had been swept away.

"I have," he continued, "several times in my life been able to pour red-hot shot at my foes, and in such a way that they could not reply. Yes, indeed, a good speaker can do effective work after a dinner; he can amuse and do much besides to make the country think on the topics of the day. I am a strong believer in the dinner and after-dinner speaking."—*N. Y. Herald.*

Used Instead of Whalebone.

"Featherbone," an article prepared from the quills of geese and turkeys, is largely taking the place of whalebone in the manufacture of whips, etc., for which whalebone was formerly used exclusively.

The average catch of lobsters on the Maine coast has been 15,000,000 yearly for thirty years.

THE SLEEP WHICH THE DRUGS BRING.

Sleep-bringing drugs means mischief. They bring sleep, it is true, but they bring more mischief than rest. The sleep produced is not healthy. There is no refreshment in it. The more you take these drugs the more they rack your nerves, demoralize your brain and give occasion for more and more drugs. "How, then, shall I procure sleep?" asks the nervous and shattered victim of insomnia.

The records of the victories of Compound Oxygen are full of cases in which sleepless sufferers have been blessed with quiet and refreshing slumber. That of Mr. Arthur Hagan, of Philadelphia, a well-known merchant, may be mentioned as one. On taking Compound Oxygen, with faithful perseverance and good nursing, his shattered nervous system was restored to health, his dyspepsia departed and he entered into the enjoyment of good health.

Mr. J. B. Kenyon writes from Bedford, Ohio: "Your Compound Oxygen has worked wonders for me; has made a new man of me; have not had an attack of *asthma* since using it; was in very bad shape when I commenced; would not do without Compound Oxygen for *ten times its price; first time I inhaled it I went to sleep at once, and I never rested better in my life*

A hint to the sleepless: Don't take drugs in order to induce sleep. Write to Drs. STARKEY & PALEN for the treatise on Compound Oxygen, which contains much that every sufferer from sleeplessness ought to know. Address 1529 Arch street, Philadelphia, Pa.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Matthews, 615 Powell Street, San Francisco.

Amid all the mutations of time it has never yet been discovered why a lawyer calls any legal document a brief.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

Brown—What did you think of the play? Fogg—Fairly good; but what I object to is the intense realism in the third act—a church sense, you know. It was so natural that I actually went to sleep.

A CHANCE FOR HEALTH

is afforded those fast sinking into a condition of hopeless debility. The means are at hand. In the form of a genial medicinal cordial, Hostetter's Stomach Bitters embodies the combined qualities of a blood fertilizer and depurent, a tonic and an alterative. While it promotes digestion and assimilation, and stimulates appetite, has the farther effect of purifying the life current and strengthening the nervons system. As the blood grows richer and purer by its use, they who resort to this sterling medicinal agent, acquire not only vigor, but bodily substance. A healthful change in the secretions is effected by it, and that sure and rapid physical decay, which a chronic obstruction of the functions of the system produce, is arrested. The prime causes of disease being removed, health is speedily renovated and vigor restored.

Farmer—Do you want this job of shoveling snow? Tramp—I am not a snow shoveler; I sprinkler lawns. The man who shovels snow will be along in about ten minutes.

WHAT "OLD FRITZ" SAID.

It was an aphorism of Frederick the Great's that "Facts are divine things." An undisputed fact is that Dr. Pierce's "Golden Medical Discovery" is the most powerful liver vitalizer extant, and by its characteristic and searching action will cure dyspepsia, constipation, dropsy, kidney disease, sick-headache, and other maladies which, popular opinion to the contrary notwithstanding, are directly traceable to a diseased condition of the liver, by which its work as purifier of the blood is made incomplete. All druggists.

Prospective lodger—And is there a fire in the room? Landlady—No, but there is the most beautiful picture of an Italian sunset you ever saw.

"OH, BUT I SALIVATED HIM!"

was the actual exclamation of an honest physician, spoken of one of his patients to whom he had given calomel for the cure of biliousness and a diseased liver. And he had *salivated him* for certain, from which he never recovered. All these distressing consequences are avoided by the use of Dr. Pierce's "Pleasant Purgative Pellets," a purely vegetable remedy that will not salivate, but produce the most pleasing effect, invigorate the liver, cure headache, dyspepsia, biliousness, constipation and piles. By druggists.

Now is the time for Sergent Bates to win deathless fame by carrying the American flag through Canada.

Cure for Cough or Cold.—As soon as there is the slightest uneasiness of the Chest, with difficulty of breathing, or indication of Cough, take during the day a few "*Brown's Bronchial Troches.*" 25 cts. a box.

"Are you married?" he said to the lady,
Who charmingly poured out the tea;
"Oh, no, sir," she said with a simper,
"But I'm quite willing to be."

The worst cases cured by Dr. Sage's Catarrh Remedy.

The price of coal may rise, but the number of hundred-weight to the ton rarely gets above nineteen, with the driver and cart weighed in.

If afflicted with Sore Eyes, use Dr. Isaac Thompson's Eye Water. Druggists sellit. 25c.

BETTER THAN QUININE.

Quinine is not only an expensive medicine, it is a harmful one if taken too freely and too often. Of course the world insists on taking great quantities of it for fever and ague. Some persons think nothing else will cure fever and ague. We say positively, and testimonials back us up, that BRANDRETH'S PILLS have often cured bad cases of fever and ague when quinine has failed. BRANDRETH'S PILLS break up the worst attack.

Bronchitis is cured by frequent small doses of Piso's Cure for Consumption.

Try Germea for Breakfast

Cuticura
A POSITIVE CURE
for every form of
Skin and Blood
Disease
from
PIMPLES to SCROFULA

SKIN TORTURES OF A LIFETIME INSTANTLY relieved by a warm bath with CUTICURA SOAP, a real Skin Beautifyer, and a single application of CUTICURA, the great Skin Cure.

This repeated daily, with two or three doses of CUTICURA RESOLVENT, the New Blood Purifyer, to keep the blood cool, the perspiration pure and unirritating, the bowels open, the liver and kidneys active, will speedily cure

Send for "How to Cure Skin Diseases."

PIMPLES, blackheads, chapped and oily skin prevented by CUTICURA MEDICATED SOAP.

LYDIA E. PINKHAM'S
VEGETABLE COMPOUND
WILL HELP
ANY WOMAN
Suffering from Kidney Disease or from troubles peculiar to her sex.

Its purpose is solely for the legitimate healing of disease and the relief of pain, and that it does all it claims to do, thousands of ladies can gladly testify.

It has stood the test of twenty years in relieving periodical pain, promoting regularity of seasons, and banishing weakness, backache and consequent nervous distress.

Probably no other woman in the world receives so many "letters of thanks" as Lydia E. Pinkham, of Lynn, Mass. Mrs. B—— of Enfield, N. H., says: "I will simply say that your Vegetable Compound is all you recommend it to be. *It has done me Worlds of good.*" Another lady writes from Ottawa as follows: "I have just to-day bought the seventh bottle of your Vegetable Compound, have used two boxes of Pills and several packages of your Sanative Wash, and think it but right to tell you how much good I derived from your medicines. *They are a regular God-send.* All the pains and aches have almost disappeared, my stomach is much stronger too and I feel myself improved every way."

Price $1. Sold by all Druggists.

IN GOLD AND SILVER AND
$6,000 IN HANDSOME PRESENTS GIVEN AWAY!

"THE POPULAR MONTHLY,"
FREE BIBLE COMPETITION
"SEARCH THE SCRIPTURES AT ONCE."

AN EASY CHANCE FOR A BIG REWARD.

To the 500 subscribers first answering correctly, on or before March 30th, 1887, our simple Bible question, "Where in the Bible is First Found the Word "GOLD," we will donate the following rewards:

1—Cash Present in Gold	$2,500	8—Cash Present in Gold	$400	15—One Set Furniture	$120
2—Cash Present in Gold	2,000	9—Cash Present in Gold	200	16—One Solitaire Diamond Ring	100
3—Cash Present in Gold	1,500	10—Cash Present in Gold	100	17—One Breechloading Shotgun	70
4—Cash Present in Gold	1,200	11—One Upright Piano, val	500	18—One Ladies' Gold Watch	50
5—Cash Present in Gold	1,000	12—One Fine Top Buggy	200	19—One Ladies' Pair Bracelets	50
6—Cash Present in Gold	600	13—One Cabinet Organ	150	20—One Sewing Machine	50
7—Cash Present in Gold	500	14—One Diamond Breastpin	100		

To the next 30, each a Solid Gold Watch, worth $100 each. To the next 50, each a Solid Silver Watch, worth $25 each. To the next 100, each an Elegant Photograph Album, worth $5 each. To the next 125, each a Solid Gold Ring, worth $2 each. To the next 185, an Elegant Book, each worth $1.50.

If a competitor should fail on the first he will stand a chance for one of our

MIDDLE REWARDS.

To the 158 persons whose names come in the middle, counting from number one to the last received, we will donate the following rewards:

First Cash Present in Gold	$725	Fifth Cash Present in Gold	$100
Second Cash Present in Gold	500	Sixth Cash Present in Gold	75
Third Cash Present in Gold	250	Seventh Cash Present in Gold	50
Fourth Cash Present in Gold	175	Eighth Cash Present in Gold	25

To the next 30, each $10 in cash. To the next 20, each $5 in cash. To the next 20, each $2.50 in cash. To the next 75, each $2 in cash.

LAST REWARDS.

To those who are too late for any of the above rewards a special chance remains. To the 353 whose names come in last we will donate the following: To the last name on the list, $500 in cash. The next to the last will give $300 cash. The third name from last $200 in cash. The next 50, each $10 in cash. The next 100, each $5 in cash. The next 200, each $2.50 in cash.

TOTAL VALUATION OVER $21,000.

Each competitor must in every case send $2.00 for one year's subscription to THE POPULAR MONTHLY, with their answer. No answer will be recorded unless accompanied by the cash, for which we will send, postpaid, our splendid Magazine and FIFTEEN of the 40 books listed below. Present subscribers can compete by paying for another year or for a friend. The regular subscription price of our elegant Magazine is only $2 a year, so

U PAY NOTHING FOR COMPETING

for the above presents. The presents will be sent to the successful ones, and their names published in our April issue of THE POPULAR MONTHLY. Don't delay. The Magazine is worth much more than the money, (and 15 books free) by answering quickly you may secure one of the larger prizes. This is the Fifteenth Competition of THE POPULAR MONTHLY, all having given the utmost satisfaction.

Every parent should encourage children to enter this contest. Besides familiarizing themselves with the Bible they secure a highly deserving Family Magazine, (with 15 books free) and also a chance for one of the rewards. We refer to over 28,000 subscribers. We enter every letter in the order received, and number the names as recorded in our subscription books; hence there can be no mistakes. If you do not get one of the largest you may get one of the smaller rewards, and thus be amply repaid. If you don't get anything but our Magazine (and 15 books free), you will be satisfied, as it has no equal at the price. No answers recorded bearing postmark date later than March 30th, 1887. Send before that date. Send money by new postal note, money order or registered letter.

The following is a partial list of the names of those who were awarded presents in our January, 1886, March, 1886, and November, 1886 Bible Competitions, viz: Chas. Fishwick, Atchison, Kas., $2,500; W. B. Schumann, $2,000, Terre Haute, Ind.; Henry C. Crawford, $1,200, Calhoun, Ark.; Kate Bradford, Morrisonville, Ralls county, Mo. $1,500; Mrs. M. C. Heard, Little Rock, Ark., $1,200; Henry Avery, Esq., Garland Ark., $500; Miss Annie Johnson, Queen City, Tex., $200; Frederick Kimber, Onondaga Valley, N. Y., $100; Mrs. George E. Simms, Helena, Ark., Grand Upright Piano, $800; Geo. E. Haymes, Atlanta, Texas, Cabinet Organ, $150; Miss Annie Goode, Calhoun, Ark., Diamond Breastpin, $100; Chas. Johnson, Rockford, Ill., Solitaire Diamond Ring, $100; S. P. Brown, Esq., Chicago, Ill., Ladies' Gold Watch, $50; Mrs. J. B. Hitchcock, 1123 Tremont ave., Davenport, Iowa, "White" Sewing Machine, $50. The following receipt speaks for itself:

CHICAGO, ILL., Nov 26, 1886.

POPULAR MONTHLY—Gentlemen: Please accept my thanks for the $2.00 in gold presented me for answering your Bible Question, where the word K is first appeared. My answer was Chapter 27 and 26 verse, for the November competition. To say you have my best wishes is unnecessary.

Truly yours, H. F. STIMMING.

The Kansas City Times says: "THE POPULAR MONTHLY is indeed the best low priced Magazine published. It is composed of popular contributions, such as people read with pleasure. The poetry and short stories are better than found in older magazines. Its publishers are reliable, and will do all they promise."

It is fair to presume that the names of the gentlemen to whom we refer, must be acquainted. We would not assume the unwarranted liberty of using them as references, for personal reasons well understood to the least observing. We could multiply indefinitely, but without the business and social standing of those present will suffice for all purposes. Any letters addressed to them, with stamps will receive prompt attention. Major R. P. Jones, Secretary and Treasurer Kansas City Water Works Company, Hon. Charles D. Lucas, Recorder of Deeds; Kansas City Savings Bank; Dr. J. Feld, capitalist, Kansas City, Mo.

THE POPULAR MONTHLY is an old-established Family Magazine, Handsomely Printed, Finely Illustrated, Pure and Elevating, a favorite in thousands of homes. ONE READER out of the many who READ this paper should profit by this. It never disappoints; subscribers gladly testify to personal gains, on file, open to inspection; now in its Twelfth year, has gone to the Hearths and Firesides of the American People. They demand a Magazine within the reach of all. Sample copy, Ten cents.

PRESENTS FOR EVERYBODY,

Your answer in Bible Competition includes your choice of FIFTEEN from these 40 books, ORDERED BY NUMBER ONLY. Bound in cloth form would cost $1.00 each.

CARELESS DOCTORS.

What a Druggist Has to Say About Mistakes Made by Physicians.

"I have beaten the record," said a bright young man in one of the popular dispensaries of pure drugs and medicines in Chicago. "One Sunday, while alone in the store I put up fifty-one prescriptions. Now, twenty prescriptions a day is considered an average day's work for a clerk in a drug store. It is not the actual mechanical labor involved in compounding the formula, but the close concentration of attention, the accurate measurements, the observance of apparently unimportant details, and the care necessary to see that the doctor has made no blunder. I know there is a popular belief that doctors are infallible, but if you could look over our prescription files you would speedily change your mind upon that point."

While he was speaking two prescriptions came in, one of which simply called for "Listerine," a new and comparatively unknown medicine, without a word of direction as to its use—not even the oft-repeated formula: "Used as directed." The other simply read—[and this came from one of the most prominent physicians of Chicago, whose fee for consultation is fifty dollars]—"Tr. aconite. One every two hours." One what? One dose? One teaspoonful? Now aconite is a deadly poison, and one teaspoonful would speedily put the taker beyond human aid. Fortunately the keen-eyed druggist detected the omission, and supplied the hiatus with the missing word, "drop," thereby probably saving a life and cheating the coroner out of a fee.

"There is another thing," said the druggist. "There are two solutions of morphia—one prepared according to the United States Pharmacopœia of 1870, and known as the U. S. P. formula; the other known as Magendi's solution. The first contains one grain of morphia to the ounce and a teaspoonful dose of it can be taken with safety by almost any patient. Magendi's solution contains sixteen grains to the ounce, and a teaspoonful would knock John L. Sullivan out on the first round. You would scarcely believe it, but not one doctor out of five ever specifies the particular solution desired, simply writing 'morphia,' and leaving it entirely within the discretion of the druggist whether to give the patient one grain or sixteen grains of the deadly drug.

"I might give you instance after instance of a similar character, but these will suffice to show you that not all the mistakes which are made in the composition and administration of medicines can be laid at the doors of the druggist."—*Chicago Tribune.*

CANINE INTELLIGENCE.

A Connecticut Dog Noted for His Sagacity, Carefulness and Wisdom.

A dog owned by Colonel Newton, of Cromwell, goes twice a day to the railroad station for the morning and evening papers. He goes of his own accord, is always on time, and waits about where the baggage car is to stop, in the morning at one place and in the afternoon at another. "There he waits until the bundle is thrown off and opened by the station-master, when he takes his paper in his mouth and immediately starts for home. If the weather is rainy, he has a piece of oil-skin which is kept in a place where he can get it himself, and of his own accord he carries this with him, and the station-master wraps it around the paper before giving it to him, in order that it may not get wet. On his return home he puts the oil-skin away in its place, against the next rainy day."

He knows the papers and insists on getting the right one. Once he was fooled. "In opening the bundle the station-master slipped one that was two days old out of his pocket and handed it to the dog. Demo took it in his mouth and started for home. Arriving there he took it to his master, and was rewarded by a pat on the head and a kind word. Colonel Newton adjusted his spectacles and began to read. Of course he at once discovered the trick, although he thought at the time it was only an error. Calling Demo to him he told him to take the paper back, and reprimanded him for making the mistake. I don't know what it was he said to him, but the dog seemed to understand it, for he hung his head and really looked ashamed. In a short time he was at the station with the old paper in his mouth, and going to the agent he laid the paper at his feet, and, looking in his face gave a short and very decided bark, as much as to say, "Give me the right paper, and do it now." He was offered one that was a day old, but after sniffing at it for a moment refused to take it, and not until he was given a paper of the right date would he have any thing to do with it. Since then, although an attempt has been made several times to fool him again in the same way, he can not be deceived, and so, as I said before, it seems as though the dog must be able to read."—*Middlesex County (Conn.) Record.*

—A Chinese gentleman, bearing the simple name of Azurizawa Ryochi Nichome Sanjukanboz Kiobash-Ku, has discovered the secret of photographing in natural colors. It is hoped he will not, in imitation of Daguerre, christen the new process with his own name. Think of going to a photographer and telling him you want half a dozen Azurizawar yochinichomesan jukanbozkiobashkuotypes taken!—*Norristown Herald.*

—Dog fashions have changed in England, and the fox terrier has supplanted the pug. And yet the fox terrier is no match for the pug in plain, unadulterated ugliness.

PERSONAL AND IMPERSONAL.

—F W. Kennie, of San Francisco, says that city has three hundred young women who are heiresses to $500,000 or more each, and all are unmarried.

—Within the last twenty years Mr George Washington Childs, of Philadelphia, has presented over two hundred big and valuable Bibles to churches, schools and societies.

—The oldest employe of the Government of the United States is Joseph Goldsborough Bruff, an artist, who has for the past sixty-three years designed seals, vignettes, medals, etc.—*Boston Budget.*

—The editor and city editor of the *Register* and the editor and city editor of the *Union* have been elected hog-haywards of New Haven, Conn. If they qualify, it is intended to turn loose a drove of hogs on the green and demand that the haywards catch them.

—James G. Richardson, of Lake City, Minn., has invented several contrivances so that while lying in bed, by pulling wires, he feeds his horses, lights the kitchen fire, and opens the draughts of the baseburner in the sitting room. Mr. Richardson is from Connecticut.—*N. Y. Sun.*

—A New York housekeeper writes that she has a maid-servant now working for fourteen dollars a month who has several thousand dollars in railroad stock, which she has accumulated. She reads the news, dresses well and does good work, from scrubbing to cooking or sewing.

—The corporation of Stratford-on-Avon, Eng., has voted the heartiest thanks of the town to George W. Childs, of Philadelphia, for the gift of a drinking-fountain. In the letter presenting the gift Mr. Childs expresses a hope that the fountain may prove an evidence of good will between the two nations having the fame and works of Shakspeare as a common heritage.

—Edwin Forrest's last public appearance was as a reader of "Othello" in Boston. While the audience was dispersing, the doorkeeper said: "I hope we shall have you with us long, Mr. Forrest." "Oh, yes," he replied, "all the week." "I don't mean here in Boston, but in the world." "Ah! as to that," rejoined the old actor, "how uncertain and vague it all is!" The next week he was dead.—*Harper's Weekly.*

—Jabez Beaumont, of Easton, Pa., who has just celebrated his ninety-second birthday, thinks that he will never die. He says that when he was a young man a woman offered him a drink, saying: "That's likely to kill you. If you drink it and recover from the effects you will never die." He drank, was quite ill, but recovered, and now in his vigorous old age is firmly convinced that he will live forever.—*Pittsburgh Post.*

—The oldest man in Modoc County, Cal., is "Tule Dad," aged one hundred years. In crossing the plains all of his relatives were massacred by the Indians, and he became a veritable "Injun fighter." It is said that he still can handle his rifle and ride his horse with as much agility as many men who are young enough to be his great grand-sons. He is a great tobacco-chewer. He acquired the habit ninety years ago and has adhered to it ever since.—*San Francisco Call.*

"A LITTLE NONSENSE."

—"Tell your mistress I have torn the curtain," said a boarder to a domestic. "Very well, sir. Mistress will put it down as extra rent."—*N. Y. Mail.*

—Pig iron has advanced in price three dollars per ton within the last three weeks, and is still advancing. If this ratio keeps up it certainly will soon become hog iron.—*Exchange.*

—Guest (rising excitedly from the table, after tasting an olive for the first time): "It's sorry I'd be to disturb the hilarity of the mating, but I believe some joker's salted the guseberries."—*Chicago Mail.*

—City man—What the blazes is the matter with that hen? Farmer—Nothing. She has just laid an egg. City man—Great Scott! One would suppose that she had just laid the foundation for a brick block.—*Lowell Citizen.*

—"I think," said Colonel Fizzletop, "that Johnny is the laziest boy in Austin." "That may be, but he gets up at six o'clock in the morning, I notice," replied Mrs. Fizzletop. "Oh, he does that so he can have more time to loaf."—*Texas Siftings.*

—An aggrieved individual thrust his head into the editorial sanctum and began his tirade of abuse: "Base minion!" "No," said the editor, without looking up, and thinking that he recognized the voice of the foreman of the composing room, "leaded nonpareil, please."—*Boston Post.*

—"And how are yez falin' to-day, Mr. O'Rafferty?" I never felt so poorly in my life. I'm too poorly to buy the necessaries of life. If I had millions, it's every cent of it that I'd give to be a rich man." "I'm wid ye, Mr. O'Rafferty. If I owned the whole world, I'd be willin' to give it away for a little piece of land an' a cabin that I could call me own."—*Prairie Farmer.*

—The Maligned Meter.—Man—I come to tell you about my gas meter. For the last three months— Gas office clerk—Yes, we know all about it. You've been out of town and all the pipes have been sealed, yet the meter registers 13,274 feet. You'll have to pay it all the same. Man—You are mistaken, sir. I have burned gas all over the house, and the meter only registers sixteen feet. I thought I'd notify you of the discrepancy. Clerk—I—I—why, sir—(Falls dead).—*Philadelphia Call.*

TOBOGGAN OUTFITS.

Interesting Information Concerning the Latest Fashionable Craze.

In a talk with a dealer in toboggan costumes and articles a reporter learned some interesting facts. A complete suit for a man costs from $20 to $30 and consists of knickerbockers and jacket made of wool blankets, a worsted tuque or cap with cord and tassel, a sash, stockings and woollen or buckskin moccasins. The suits are made in nearly all colors, the body of the garments being plain with colored stripes. As a rule the stripes are red, blue and white, the red being the favorite. The prices for the different articles range something like this:

Jackets	$7 to $13.50	Sash	$1.50 to $5
Knickerbockers	$5 to $8	Stockings	$1 to $1.75
Tuque	$1.25 to $2	Mocassins	$2.50 to $3

Ladies suits consist of the same kind of stockings and moccasins as the men wear and a long over-garment, made of blanket material and resembling a cloak with a hood. These garments cost from $13.50 to $18 each and are made in all colors, though the ladies as a rule prefer white. In regard to the toboggan it was stated that the old Indian form was perfectly flat on the bearing surface formed of one or two pieces of thin wood, and besides lacking the requisite strength and lateral resiliency, it offered the greatest resistance or frictional surface to the snow. The toboggans now in general use are made of slats which are shaped to lessen the frictional surface. Some of the best that are made cost $10 and $12 each. They are eighteen inches wide and six and seven feet long. They are made of rock maple, selected, kiln-dried, and highly finished. They consist of seven slats each, oval-shaped on the bearing surface, three of which are slightly thicker than the others, and are provided with a steel shoe. This shoe, by an ingenious invention requiring special machinery, is fastened by flanges that are turned into the wood in such a way that no bolts, screws or rivets are used anywhere along the bearing surface. Less elaborate toboggans are bought for from $4 to $8.50 apiece. Sizes for boys are made three and four feet long, and cost $2 and $2.50 each.—*N. Y. Mail and Express.*

HAPPINESS DIVINE.

The Merits of a Wife Who Doesn't Know a Note of Music.

"My wife," said Jones, "has one great accomplishment, she doesn't know a note of music." I admired his charming spouse from that moment.

To think of the misery that from her childhood she saved her friends and relations.

She never played scales before breakfast and so prevented her poor father and mother having a comfortable doze prior to getting up.

She never drove the neighbors mad with either "The Blue Bells of Scotland" or "Glorious Apollo."

She never Czernly Exercised anybody's patience to that extent as to drive them crazy.

When she was fourteen or thereabout, and there were people in the drawing-room, her mother never said: "Amanda, darling, play that charming bit of Kuhe, with variations." The variations in question something like a rat running over the keyboard and stopping every now and then (chords) to eat a bit of cheese.

When sixteen she never "Lieder Ohne Worte"-d her eldest brother to death when he was cramming for Woolwich.

When eighteen she never gave anybody doses of Liszt. She never scrambled through Chopin's mazurkas. She never gave an amateur delirium tremens with the "Restless Nights."

Thrice happy Jones, how are you to be envied! Your ears are never assailed with these awe-inspiring words: "Darling, would you like a little music with your coffee?"

Thrice happy Jones, you were never soothed with the "Moonlight Sonata" when you wanted to have a quiet look at your betting-book.

An unmusical woman.

O, pearl of pearls! O, angelic silent bul-bul! O, that I had such a charmer to nestle in my manly breast!—*Hoff's Comic Annual.*

WOODEN SHOES.

The Profitable Monopoly Enjoyed by the Hollanders at Clymer, N. Y.

In the town of Clymer, Chautauqua County, N. Y., is a large settlement of Hollanders, the older members of which brought from their fatherland the simple manners and industrious habits which have always been characteristic of that race. Nearly without exception they are engaged in general farming and dairying, and to supplement their farm labors they have introduced an industry which is carried on in no other place in the Union. This is the making of the wooden shoes or clogs which are so common in Holland and some other foreign countries. During the coldest days and the long winter evenings these Hollanders ply their knives and "shaves" almost without cessation. The business is really a monopoly and of late it has proved very profitable, the demand for the clumsy shoes for decorative purposes not only largely enhancing their value, which the shrewd Dutchmen were quick to see, but increasing the number called for very materially. The woods used are basswood and cucumber. Each shoe is bored and cut from a single block. They become so well seasoned that a pair made in the best manner is almost indestructible. The bulk of these shoes is handled by a dealer in Corry, Pa., and a large number are sent direct to the Philadelphia market. It also requires a great many to supply the wants of the colony itself, as the shoes are generally worn by both sexes.—*Philadelphia Call.*

A Plausible Explanation.

"What was that great racket I heard in your woodshed after you got home from fishing last night?" asked one Estelline small boy of another.

"It was me swingin' the buggy whip for fun," the other replied.

"But I heard somebody jumpin' around too."

"Oh, that was pa, seeing if he could jump over the wash boiler and two tubs."

"But who was it yelled so like thunder?"

"Why, every time he made an extra high jump he would holler, kinder in fun, you know."—Estelline Bell.

The Wrong One.

A STORY WITHOUT WORDS.
—Fliegende Blaetter.

A QUATRAIN.

Who deems himself a happy man,
Happiness in him lies;
But wisdom has small part in him
Who fancies himself wise.

—Tid Bits.

Give the Woman a Chance.

Bluffum is possessed of a broad, catholic spirit. There is nothing contracted about Bluffum. He was reading the other evening the card of a woman in the newspaper in which she demanded that women be admitted into certain professions. "Them's my sentiments," exclaimed Bluffum with unwonted emphasis. "Give woman a right to labor wherever she wants. Hang it! she may do all the work for aught I care."—Boston Transcript.

She Was Too Ready.

"Will you favor me with your hand?" he said softly.

"Oh, George," she exclaimed, blushing becomingly; "this is so sudden. Really I hardly know what to say."

"I am very deeply interested in palmistry you know," he explained.

And he never could understand why she left the room with such a display of temper.—The Rambler.

He Knew the Remedy.

Maud—Pa, my chin feels sore as if I were getting some kind of a skin eruption.

Pa—How long have you had it?

Maud—I've only noticed the prickling sensation during the last few days.

Pa—Tell that fellow who calls to see you so much to shave. This under the mistletoe business has been overdone.—Texas Siftings.

Rare, Even Raw.

"I am not accuthtomed to dwinking," he said timidly to the bartender, "but I am feeling quite thick, and I would like to athk you if you have any ware old whithky?"

"Rare old whisky?" repeated the bartender indulgently, "I should say so! I can give it to you raw if you want it."—Life.

No New Mixture for Him.

"Did you ever try a toboggan?" asked Tom Reed of the Hon. Frank Lawler.

"No," replied Frank scornfully. "I don't believe in them fancy drinks. I always take mine plain and old fashioned."—Washington Critic.

An Ambiguous Verdict.

The following verdict was recently rendered in Woodland: "We, the jury, find the defendants not guilty, with the recommendation that they leave the town within forty-eight hours."—San Francisco Call.

They Speak No More.

"Now which of these two photographs of you may I have, dearest! The beautiful one, or the one as I know you?"—Punch.

—A hardware man in Illinois is in hard luck. He offered a stove to any person who would guess the correct number of seeds in a pumkin in his store window. One of the guessers put the number at 240,787. There were 599 seeds, and six persons guessed the correct number.—*Chicago Tribune.*

—A chunk of a boy asked Ticket Seller Ayres for a half-fare ticket to Cheshire, the other day. "How old are you?" asked the ticket seller. "Ten years old," said the boy. "When were you born?" asked Mr. Ayres. "Ten years ago," said the young Yankee. He got his half-fare ticket.—*Boston Journal.*

—The study of handwriting as an indication of character is very interesting. The "Penciler" has written twice to Jay Gould to say that he would take pleasure in examining scientifically Mr. Gould's signature at the end of a one thousand dollar check, but he has received no reply. Can Mr. Gould be away?—*Somerville Journal.*

—The editor of the Washington *Critic*, who has evidently visited a fair before, says: "We expect to pay twenty-five cents apiece for one consecutive five-cent cigar this very evening. Five cents for the cigar, five for the beautiful hand we take it from, five for the lovely eyes that look at it go, five for the cherry lips that tell the price, and five for charity; isn't that cheap enough?"

—While employes of the railroad company were blasting rock to be used as filling along the line of the Columbia & Puget Sound road, they found, thirty feet from the facing and in solid rock, a mass of petrified terredos imbedded in the sandstone. It is stated by old residents on salt water that this is the first instance they ever heard of where the worm has been found petrified.—*Seattle (W. T.) Press.*

—An enthusiastic New York dentist recently said in an address that if all the workers in woods, metals and clays, molders, porcelain workers and decorators, painters and sculptors, "were suddenly and simultaneously destroyed, those arts would not be lost, for in the ranks of the dentists could be found experts in every one of them; and if in the same grand catastrophe all the scientists of certain classes were cut off the same sciences could be fully taught by dentists."

—On the planet Jupiter, according to Swedenborg, men live to an age equal to about thirty of our years. They become bald at the age of twenty-nine, and knowing this to be the sure precursor of their death within a year, they instantly set about preparing themselves for that event. When we remember how men act on this miserable old earth after they become bald, we don't see how they can ever look at Jupiter without blushing for shame.—*Leavenworth Times.*

—One of the most admired performers in a sensational dram recently produced in Cincinnati was a big bulldog, that at a critical point in the play came bounding out, and, seizing the villain by the throat, or thereabouts, hung on like grim death, amid uproarious applause. The other night he grabbed his man as usual, but something gave way, and the dog fell near the footlights, and then he stood there and calmly ate a big piece of liver, which had been fastened under the villain's throat and had hitherto been the incentive for the dog's exertion.—*Cincinnati Times.*

—Twenty-five years ago Thomas King, a young Englishman, came to Manayunk, Pa., and there fell in love with a young woman whom he would have married had not George W. Knox, a young man of the place, warned him that she was not what he thought she was. King found that Knox was right, and was so thankful for his escape that he said he would reward him when he got rich. He went back to London, and there died the other day, and in his will he left to Knox, who now lives in Philadelphia, three thousand dollars for the services rendered so many years before.—*Philadelphia Press.*

—If it were possible to rise above the atmosphere which surrounds the earth we should see nothing but an intense and sharply-defined ball of fire, while every thing else would be wrapped in total darkness. There could be no diffusion of light without an atmosphere or some similar medium for it to act upon, but if the air around us extended to a height of seven hundred miles the rays of the sun could not penetrate it, and we would be left in darkness. At the depth of seven hundred feet in the ocean the light ceases altogether, one-half of the light being absorbed in passing through seven feet of the purest water.—*Boston Globe.*

SOLDIERING IN AFRICA.

A Frenchman's Remarkable Adventures While a Captive Among the Arabs.

A lot of emigrants stepped from the cars at the Union depot recently. Among them was a Frenchman named Victor Muller, with his wife and two children. He had a remarkable story of adventure his life, and as he rested in a hotel preparatory to going out house-hunting he related it to a reporter as follows:

"When I was young I had a great love for the army, and at the age of seventeen I went to Strasbourg to become a soldier. I was put into an infantry regiment, from which I was transferred in six weeks to the Third regiment of zouaves. While among them I was sent to Algiers, where I staid for about fifteen years, fighting the Arabs or living the miserable life of a French soldier in Tangier."

"Why miserable?"

"Well, the country is awfully hot, and anybody who is not used to it suffers terribly."

"Did you do any active service?"

"Yes, and plenty of it. The Arabs on the northern coast of Africa are constantly revolting against the supremacy of the French, whom that country costs many a drop of blood in a year. Many a friend did I lose while I was out there. Once when we were on the desert—we had been after a detachment of Arab horsemen—we lost our way, and we roamed for about a week through the vast sea of sand which stretches itself through the northern part of Africa—the Sahara. Our supply of water had given out, and we were almost dying of thirst, while our knapsacks with provisions were almost empty. To get some water and some food we resorted at last to the measure of killing one of the camels that we had with us. The camel has a stomach which is divided into four parts, one of which contains the water just as the animal drinks it. We opened that part, and to our great joy there was enough water to give us all at least a cupful each. On the sixth day our number had dwindled down to seven, when a cavalcade of Arabian horsemen came upon us, and we, being too weak to defend ourselves, were made prisoners and taken to Taghit, a town in Morocco.

"Here our Captain was killed in the most horrible manner by the Arabs. They tore his nails one by one from his fingers, cut out his tongue, and chopped off his ears before they finally killed him. I myself was sold the next day to a rich Moor, who made me his valet. I had here comparatively an easy life, but they forced me there to join the religion of Mohammed. Unfortunately my master died, and he leaving no heirs I was taken back by the Government as their property. They, not being able to dispose of me immediately, sent me to Morocco, where I was put into a dungeon among criminals of the most degraded character. However, I appealed to the Sultan, through the governor of the prison, and I was released, principally because I had become a Mussulman. I ran through the town, from one end to the other, when at last I found occupation with a Hebrew, who took me in as a water-carrier and general servant. As soon as I had saved some money, I left Morocco for Algiers. The dangers I encountered on my long and wearisome journey were horrible—not so much from the people or from beasts as from the horrible climate. For five days I traveled through a dreary, barren desert. I was without food for two days. On several occasions I was misled by the Fata Morgana. The Fata Morgana is a reflection of some distant place in the rays of the sun, and is very deceiving to travelers, especially on the desert. I had left Tlemeen, the town where Abd-el-Kader vanished the French in 1835, the day previous. When I got on the desert I had a small flask of water, which I had been obliged to buy, as there was a drought in Tlemeen, making water so scarce that it sometimes came to twenty centimes (four cents) a pint.

"When the water in my flask gave out I seemed to feel awfully thirsty; I became terribly dejected, my head felt dizzy and ached dreadfully. I was wishing for the next town with all my heart. The sun shone down upon the country with scorching heat. The sand was so hot that it burned the soles of my feet. With a fainting heart I lifted up my head to see whether any trees or houses appeared on the horizon. Looking up I was pleasantly surprised by noticing in the distance a beautiful village. The little one-story white houses were surrounded with large trees, whose beautiful green foliage, in contrast to the white houses, made up a nice picture. I hastened to reach the spot as quickly as possible, but imagine my disappointment when I found that the glorious oasis was nothing but a deception. The next day, almost at the point of death, I came to a small settlement, where I recuperated myself from my starving condition. After a week I arrived in Tangier, where I was received with joyful hurrahs by my old comrades. In the meantime news had arrived in Algiers of the war between France and Germany. In a few days a ship took us away from Africa. We landed in Marseilles, and were at once dispatched to the front. I fought under Marshal Bazine at Gravelotte, and was taken prisoner by the Prussians, who sent me to Erfurt, in Saxony. I was prisoner there for six months, when I was liberated on account of peace, which had been established between the countries. Since that time I have been a German subject, as Alsace-Lorraine was annexed by that country. I am glad we became Germans, because while I was a prisoner in their country they treated me like a prince, better than I was ever held as a soldier in France."—*Pittsburgh Commercial Gazette.*

YOLKS AND WHITES.

A Commission Merchant Chats About two Peculiar Articles Imported From Europe.

"The business of importing egg yolks and egg albumen, which only began about five years ago, is assuming larger proportions every year, and every German steamer brings over dozens of barrels of egg yolks and hundreds of tin-lined, air-tight cases of albumen, or the whites of egg. It is possible to call the albumen food, although it is used in a very unwholesome shape, being consumed chiefly by candy manufacturers and confectioners. The former has the quality of making their candy swell up and appear one-third larger. For a small outlay for albumen they can practically increase their stock in bulk one-third. They say it 'aerates' the candy. It certainly makes it dry and sponge-like, and candy made of it tastes as if it was infused with carbonic acid gas. When I buy my children candies I make a point to avoid all candy made of egg albumen, for it is a sort of fraud on the little ones.

"Where do most of the eggs come from?"

"Germany sends over more than all other countries combined," replied the egg merchant. "Switzerland Austria and Italy send a great deal also. The egg yolk is sent over in the strong barrels which have already done duty in transporting oil from this country to Europe. The yolks are in liquid form mixed with about twelve per cent. of salt. A barrel of egg yolks will weigh about five hundred pounds. The wholesale price of the product is fourteen cents a pound and it takes the yolks of about three dozen eggs to make a pound. The albumen is imported in a dry state in cases weighing about three hundred pounds. It is dried in the sun on panes of glass. The price paid for it there is fifty cents a pound. The thrifty Germans manage to ship the whole egg over here, shell and all. The shells are ground and mixed with pipe clay and the admixture of shells gives the clay a peculiar gloss and finish. These pipes are stamped and sent over here to tempt passers-by in the windows of tobacco-shops as genuine Powhatan."

The extent to which the importation of eggs in the condition mentioned is supplanting the importation of the egg in its complete form can be seen by the following figures obtained at the Mercantile Exchange: The importation of whole eggs in 1882 amounted to 2,684 cases (fifty dozen), valued at $60,000; 1883, 4,997 cases, valued at $112,000; 1884, 35,449 cases, valued at $418,898; 1885, 22,790 cases, valued at $236,019. The figures for 1886 will show a steady decline from those of 1885. Here can be seen the rise, the climax and the decline.—*N. Y. Tribune.*

AN ANCIENT CUSTOM.

Superstitions of Sneezing Which Are Several Centuries Old.

Most people sneeze in the course of their life-time, and even in this country there are many communities among whom bystanders, upon such an occasion, will exclaim: "God bless you!" This is designed to avert the evil omen. The superstition was brought here from England and from most of the northern nations of Europe. Many of our readers will recall what Longfellow wrote of the custom in Sweden: "You sneeze, and the peasants cry, 'God bless you!'" A writer at the beginning of this century, remarking upon the customs of Italy, says that when you sneeze, "even in the theaters, men rise and wish you '*Felicita!*'" The purport of this is the same as the hearty Swedish and English "God bless you!"

The origin of this custom in the different countries of Europe was the same, just as its meaning is the same. It has been traced to those visitations of fearful pestilence known as the Black Death. One will read of it in England in the time of Edward III. In 1350 this plague swept over Sweden and Denmark. Its ravages in those countries were so great that the disease gained the name of the Tiger death. The earliest symptoms of an attack by so dread a pest was a sneeze. Thereupon the pitying bystanders, with sorrowing glance, would turn to the newly-marked victim and exclaim: "May God be with you!"

If this account of the custom be correct, it will be seen in what good reason the usage originated, and with what want of all reason it is continued in times when a sneeze, at the worst, indicates but a trifling cold. Nevertheless, it is a pleasant little custom, which does harm to nobody, and we have not so many acts of formal courtesy that it is necessary to dispense with any of them.—*Youth's Companion.*

Digging in a Glacier.

A well at Yakutsk, to Siberia, has been a standing puzzle to scientists for many years. It was begun in 1828, but given up at thirty feet because it was still in frozen earth. Then the Russian Academy of Sciences continued for some months the work of deepening the well, but stopped when it had reached to the extent of some 382 feet, when the ground was still frozen as hard as a rock. In 1844 the academy had the temperature of the excavation carefully taken at various depths, and from the data thus obtained the ground was estimated to be frozen to a depth of 612 feet. As external cold could not freeze the earth to such a depth, even in Siberia, geologists have concluded that the well has penetrated a frozen formation of the glacial period which has never thawed out.—*Science.*

—A cable dispatch from France says, "The left will decide upon the future policy of the Government." When a fellow's left over here he very rarely attempts to decide any thing.—*Philadelphia Call.*

TAXATION AND IRRIGATION.

The New Law on Irrigation not Understood.

The provisions of the bill to provide for the organization and government of irrigation districts, passed at the late session of the Legislature, are not yet generally known. This want of knowledge is causing some opposition to the formation of districts. Persons engaged in merchandising appear to think that they would be taxed upon goods, wares and merchandise, the same as for State and county purposes; and this, added to the taxation already imposed, would be more of a burden than they could bear. For this reason some country merchants oppose the formation of districts. These people are mistaken. Section 18 of the bill contains the following provisions: "The Assessor must, between the first Monday in March and the first Monday in June, in each year assess all real property in the district, to the persons who own, claim, have the possession or control thereof, at its full cash value. He must prepare an assessment book, with appropriate headings, in which must be listed all such property with the district, in which must be specified, in separate columns under the appropriate head.

First.—The name of the person to whom the property is assessed. If the name is not known to the Assessor, the property shall be assessed to "Unknown Owners."

Second—Land by township, range, section, or fractional section, and when such land is not a congressional division or subdivision, by metes and bounds, or other description sufficient to identify it, giving an estimate of the number of acres, locality, and the improvements thereon.

Third.—City and town lots, naming the city or town, and the number and block according to the system of numbering in such city or town, and the improvements thereon.

Fourth.—The cash value of real estate, other than city or town lots.

Fifth.—The cash value of improvements on such real estate.

Sixth.—The cash value of city and town lots.

Seventh.—The cash value of improvements on city and town lots.

Eighth.—The cash value of improvements on real estate assessed to persons otherthan the owners of real estate.

Ninth.—The total value of all property assessed.

Tenth.—The total value of all property after equalization by the Board of Directors.

Eleventh.—Such other things as the Board of Directors may require.

No other property may be assessed under the provisions of this bill beyond what is described and enumerated in the foregoing sections.

Goods, wares and merchandise; horses, cattle, sheep, hogs and, in a word, all kinds of personal property are excluded from taxation under this bill.

The Directors are empowered to issue and sell bonds to get money to build canals and ditches, and to procure such rights and property as may be necessary. Personal property could not serve as a basis for the issuance of such bonds, therefore no kind of personal property will be taxed for such purpose. The building of one canal in Owens valley, such as is contemplated in this bill, would create so much new property subject to taxation, that the whole rate of taxation for all purposes, including that for the county and State, as well as that for the building of the canal, would be very much reduced inside of two years.

Freight on wool shipped from California to Boston is 62½ cents per hundred pounds. It is now announced that from and after April 5th—next Tuesday—the rate will be increased to $5.40 per hundred pounds. This enormous increase of freight rate is caused by the interstate commerce law, now about to go into effect. California wool growers will be forced to go out of the business, or mills for manufacturing the wool must be built at home.

Election Proclamation.

Pursuant to law and a proclamation of the Governor of the State of California, made and done at Sacramento, March 15, 1887.

Notice is hereby given by the Board of Supervisors of the County of Inyo, State of California, that a Special Election will be held throughout said county on Tuesday, April 12th, 1887. The polls will be open one hour after sunrise and continue open until sunset of said day, during which time the following amendments to the Constitution of the State submitted by the Legislature at its last regular session will be voted upon by the electors of said county.

The said amendments are respectively designated.

"Amendment Number One."
"Amendment Number Two."
"Amendment Number Three."

Each Amendment shall be voted upon separately, by ballot; and the ballots used at such election must contain the words:

"For the Amendment Number One."
"For the Amendment Number Two."
"For the Amendment Number Three."
Or the words:
"Against the Amendment Number One."
"Against the Amendment Number Two."
"Against the Amendment Number Three."
Written or printed thereon.

And the Governor of the State of California does hereby offer a reward of one hundred dollars for the arrest and conviction of any and every person violating any of the Provisions of Title IV, Part I of the Penal Code; such rewards to be paid until the total amount expended hereafter for the purpose reaches the sum of ten thousand dollars.

Said election to be held at the places, and the election to be conducted by the election officers hereby appointed and hereinafter named, as follows, to wit:

Election Precinct No. 1.—Polls to be held at house of David Olds, Round Valley. Inspector, Frank P. Blaisdell. Judges, Thos. E. Jones and David Olds.

Election Precinct No. 2—Polls to be held at the schoolhouse at Avena. Inspector, Wm. McLaren. Judges, A. Spencer and Thomas Hutchinson.

Election Precinct No. 3—Polls to be held at the Co-operative store at Bishop Station. Inspector, H. A. Man. Judges, G. A. Thede, G. H. Hardy.

Election Precinct No. 4—Polls to be held at Gilberts at Cottonwood. Inspector, W. A. Greenly. Judges, Nathan Gilbert, S. P. Roberts.

Election Precinct No. 5—Polls to be held at the schoolhouse at Bishop Creek. Inspector, I. P. Yaney. Judges, B. F. Scott, L. P. Springsted.

Election Precinct No. 6—Polls to be held at the house of Geo. Collins at Warm Springs. Inspector, George Storey. Judges, Bart. McGee, W. W. Collins.

Election Precinct No 7—Polls to be held at the schoolhouse at Big Pine. Inspector, Jas. E. Jones. Judges, L. M. Newman, Samuel J. McMurry.

Election Precinct No. 8—Polls to be held at the house of W. R. Tibbetts. Judges, Thos. Ferguson, H. Malone.

Election Precinct No. 9—Polls to be held at the schoolhouse at Independence. Inspector, G. W. Brady. Judge, W. J. Lake, J. D. Blair.

Election Precinct No. 10—Polls to be held at the school or half way house at George's Creek Inspector, John Kispert. Judges, W. L. Hunter, J. E. Shepherd.

Election Precinct No. 12—Polls to be held at the store of Thomas McDonough in Arastra Canon. Inspector, M. C. Lasky. Judges, Thomas McDonough, John Anton.

Election Precinct No. 13—Polls to be held at the schoolhouse at Lone Pine. Inspector, C. Meysan. Judges, C. Begole, W. W. Covington.

Election Precinct No. 15—Polls to be held at the hotel of Chris Chron in Cerro Gordo. Inspector, John Thomas. Judges, John Hertel, Wm. Crapo.

Election Precinct No. 15—Polls to be held at the office of the Hawley mill at Keeler. Inspector, John Barnes. Judges, W. R. Johnson John Morton.

Election Precinct No. 16—Polls to be held at the house of William Walker, Olancha. Inspector, Alonzo Brown. Judges, Ed. Walker, Augustus Walker.

Election Precinct No. 17—Polls to be held at the schoolhouse at Darwin. Inspector, J. F. Hawley. Judges, Martin Mee, Chas. Anthony.

Election Precinct No. 18—Polls to be held at the store of Frank Fitzgerald at Lookout. Inspector, Frank Fitzgerald. Judges, Frederick Wallace and Arthur Smith.

Election Precinct No. 20—Polls to be held at the boarding house of the Bonanza King mine. Inspector, Theodore Wibbelt. Judges, ——

Election Precinct No. 21—Polls to be held at the office of the Inyo Consolidated Mining Company at Panamint. Inspector, H. J. Chickering. Judges, Geo. Courtright and Wm. Hedge.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer: To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

INTENDING ADVERTISERS should address

GEO. P. ROWELL & CO.,
10 Spruce Street, New York City,
For SELECT LIST OF 1000 NEWSPAPERS.

Will be sent FREE, on application.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expense of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.
Exercises of the closing week June 19 to 23.
Sunday, June 19—Special sermons to students.
Tuesday evening, June 21—Declamation contest for prizes.
Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.
Wednesday evening, June 22—Lecture before the Fowler Literary Society.
Thursday, June 23, 10 A. M.---Closing exercises of Academy.
Thursday evening, June 23---Reception of Principal to students and friends of the Academy.

No. 904

NOTICE

OF THE
REMOVAL OF THE LAND OFFICE
FROM
BODIE TO INDEPENDENCE, CALIFORNIA.

Notice is hereby given that the President of the United States, by Executive Order dated April 22, 1886, has, pursuant to law, directed that the office for the sale of public lands now located at BODIE, California, be removed to INDEPENDENCE, in said State.

The Register and Receiver of the district will give notice of the precise date when the office will be closed at BODIE, preparatory to removal and reopening the same for the transaction of public business at INDEPENDENCE.

Given under my hand at the City of Washington, this twenty-fourth day of April, A. D. 1886.

BY THE PRESIDENT:
WM. A. J. SPARKS,
Commissioner of the General Land Office.

In pursuance of the above order notice is hereby given that the said Land Office will be closed at BODIE on the 22d day of March, 1887, and opened for the transaction of public business at INDEPENDENCE on the 6th day of April, 1887.

SHADE TREES.

Good, Thrifty Trees
One and One-half
Cents Each.

Cottonwood Trees

Averaging 2 feet high, in lots of 10,000, at the above price delivered at Fort Churchill station. Same quantity 2 to 6 feet high 3 cents each. One foot high or less 1 cent each.

10,000 trees can easily be carried at once in a spring wagon.

Such a number of trees planted in nursery rows will soon supply any ranch with abundant fuel, fencing, and shade for stock against the scorching Summer heat.

☞These trees being indigenous to the soil and climate of the eastern slope and the most wide spreading and rapid growing variety in existence, are the best to plant for farm or pasture shade. Trees 8 to 30 feet high, prices on application.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, APRIL 2.....1887.

Mining location notices at the office of the INYO INDEPENDENT.

Mr. T. Coffin, a Carson lawyer, has been at Independence most of this week.

Hon. A. J. Gould arrived at Independence last Monday; he made but a short stay in town and went on home to Darwin.

Reno papers report beef cattle selling at seven and a half cents per pound. San Francisco dealers are reported eager to buy.

Goodbye, gentlemen, take the Land Office with you; you are welcome to it, that is, when we can't help ourselves.—*Bodie Miner.*

Mr. W. T. Grant was in town some days this week; he came up from Olancha with Mr. W. Walker and both left for home yesterday morning.

Mr. T. J. Goodale, of Fish Springs, one of the Directors of the Agricultural Association, was at Independence a couple of days this week.

Mr. Louis Munzinger, of Bishop Creek, arrived at Independence last Thursday; he went on to Lone Pine next day and is still down the valley.

During the past few days Doctor Blair has vaccinated many children in town and Camp Independence. He lately got plenty of pure vaccine matter.

D. P. McIntosh left for Reno last Tuesday. He has been engaged in building at Independence since last July, and expects to return again soon.

The Odd Fellows of Independence are talking of giving a ball on the anniversary day of the order, April 26th. The matter will be decided next meeting night.

Hale Brothers, of Sacramento, are competing for the trade of Owens valley. This is one of the best known and most reliable houses in the State. See their advertisement.

William Dickenson, a miner aged about sixty years committed suicide at Calico lately. The Calico *Print* says he had been drinking heavily, got despondent and took poison.

On Wednesday of last week, Miss Maria Sanger, daughter of Mr. Gusteve Sanger, was married to Mr. D. A. Leonard. The wedding took place at Bakersfield, Kern county.

August Thiebaut was arrested last Tuesday for beating Robert Arnold at Camp Independence. He was admitted to bail and will be tried to-day before a jury at Independence.

William Arcularius and family left Round Valley about one year ago "for good and all." They returned at the end of last week, quite cured of the notion that there is any better country in the State than Inyo county.

Henry Levy won't be left behind in the march of improvement; he is grading around the Independence Hotel, planting trees and doing other work that makes it a neat and cosy resting place as a tired traveller need wish to find.

A new hotel for Bishop Creek is on the cards. Mr. O. I. Mairs owns a good deal of property there, and he contemplates giving to the town what it never has had, a hotel building worthy of its population and business.

Mr. W. Walker, of Olancha, was promptly on hand to assume his duties as one of the Board of Directors of the Agricultural Association. He is one of the two Directors who will serve for the full term of four years. Mr. Walker will make a diligent and faithful officer.

The Tax-Collector of Los Angeles, E. L. Hammond, is missing; but his absence would not be so much regretted if he had not taken $12,500 of the county funds away with him. She painted her face and tried her head and sat at a window and Hammond was taken in and done for.

A great many trees have been planted in and around the grounds of the Court House. They don't look much for trees yet, but they will leaf out and make quite respectable shade before the summer is over. In the meantime they would serve a good purpose as rubbing posts for mossbacks.

San Francisco papers are calling for the building of a hotel that will accommodate twenty five hundred guests. A very short time ago some of the big hotels of San Francisco would hardly pay running expenses; now the rush of people from the East is so great that more hotel accommodation is needed.

One thousand acres of choice land for sale. No better grain or grass land in the State. An abundance of water at all times; a perfectly healthy location; title without a flaw. Five hundred acres or over, twenty dollars per acre; small lots, forty acres or more, thirty dollars per acre. Apply to the office of the INYO INDEPENDENT.

INDEPENDENCE, March, 28, 1887.

I take this method of expressing to the people of Independence my high appreciation of the many courtesies extended to me during my stay. As my business relations were mostly with O. I. Mairs, I take particular pleasure in making this public acknowledgment of his honorable and very liberal settlement of all my accounts with him for building.

D. P. McINTOSH.

Flower Roots.

Flower roots and bulbs of many kinds, including varieties of roses, dahlies, lilies, jasmines, pansies and various others, for sale cheap at the garden of A. N. Bell, Camp Independence.

A Cheap Home.

One hundred and sixty acres of land; three acres in orchard, choice fruit; ten acres partly alfalfa, partly grain and garden; good water right; house of five rooms, one-half mile distant from school and post office. Every foot of the land good. Title U. S. patent. This will make a fine home for an industrious farmer. Will be sold very cheap; terms, cash. Apply to C. Mulholland, Independence, Inyo County, Cal.

Fresh Vaccine.

Doctor Woodin gives notice that he has received a supply of vaccine matter; it is warranted of the best quality. He will vaccinate at his office, or at the homes of children when called to do so.

Cleaning Up.

Never before was so much cleaning up of streets done at Independence. On the west side of town weeds and sagebrush have been dug out, rubbish gathered up and burned, new fences made and old repaired to "look amaist as weel 's the new." A general air of life and smartness pervades the whole quarter.

For Improvement.

San Bernardino has voted to expend one hundred and fifty thousand dollars in improving the streets and sewers of the town. A few old fogies, such as are found in nearly all communities, opposed issuing bonds to get money for the work; but the vote in favor of the bonds was overwhelming.

Let the Children Plant.

Every schoolhouse in the county could soon be made more comfortable and the surroundings would be much pleasanter, if the teachers would lead the children in planting trees in and about the school grounds. Every pupil in every school would gladly help to do this; children love such work.

A Just Verdict.

Goldenson, who murdered a school girl in San Francisco some months ago, has been tried for the crime and found guilty of murder in the first degree. The jury were out only thirty-eight minutes after the case was given to them. Goldenson will be sentenced to-day; it is a tolerably safe conclusion that he will be hung.

Quail Again.

Farmers complain bitterly of the damage done to wheat by quail. The flocks are so numerous and the birds are so destructive to the young wheat that it is thought some of the ground will have to be replanted with corn. It is not legal to shoot the birds at this season, or to trap them at any time.

$600 Per Acre.

Eastern people are pouring into Los Angeles and other southern counties and paying as much as six hundred dollars per acre for lands on which but little improvement has been made. Here in Owens valley lands can be bought for one-thirtieth of that price that will produce better wine, brandy and raisins than ever were or will be produced in any other part of the State.

Failed to Become Law.

The bill for the adjustment of the eastern boundary line of the State, passed at the recent session of the Legislature, has failed to become law, the Governor having refused to sign it. The reason why the Governor refused to sign the bill was, that the legislature has no power in the matter. Congress alone has power to change a State boundary, and the same power should order the necessary survey and provide for the expense thereof.

New Penalties.

Dealers in high explosives should be careful to observe a law passed at the recent session of the Legislature.

CHAP. 95—Provides that all persons making, storing or dealing in high explosives must keep a journal of every sale in detail as to name, person, place, etc., and makes it a misdemeanor not to keep such record, making it a penalty of $250 for every failure to comply, the money to be paid to the informer.

Crippling Industry.

The operation of the Inter State Commerce Law will cripple mining where ores have to be shipped from or through one State to another. In all probability what is called "chloride" mining will be stopped entirely in many places. Men who are working small ledges, that just pay fair wages with freight rates as they have been, will have to quit work when rates are increased to three or four times as much. This is expected to be the effects of the law.

Roads.

A new section has been added to the law relating to roads and highways, which provides that road districts may be divided into sections, and contracts be let for two years to maintain the roads of the several sections; the contracts to be let to lowest responsible bidder, who must reside in the district and give bonds for the performance of the work, but Supervisors may reject any and all bids; the poll taxes of sectionized districts to be collected by the Road Overseer, who shall be allowed 15 per cent. for collecting; Road Overseer is to inspect the work of contractors and make written reports to Supervisors quarterly, and contractors to be paid quarterly.

Nevada Wants Them.

Commenting on an item recently published in this paper, in reference to farmers complaining about quail being a nuisance, the Virginia *Enterprise* says:

Let Mr. Clark trap the quail and send them up here to stock our depleted quail ranches. Our sporting clubs would pay liberally for a few thousand pairs to turn out this Spring upon their quail ranches. Send the quail along, and we'll take the chances on their pulling up our strawberry vines.

There is a law in California against trapping quail, but the boys might take their chances of being detected in its violation.

For the Benefit of Teachers.

Amendments have been made to Sections 1665 and 1667 of Political Code so as to make it obligatory upon all teachers in public schools in this State to give special instructions (in connection with the study of physiology and hygeine) as to the nature of alcoholic drinks, and narcotics, and their effects upon the human system. The law should be still further amended so that no tobacco user should be permitted to enter the school room as a teacher. It may fairly be presumed that no drunkard will be employed to teach in any public school; but it will be useless for a teacher to talk to his pupils about the evil effects of tobacco, while he gives them the bad example of using it himself. No man whose whole person is redolent of the disgusting odor of tobacco should be suffered to be in such contact with children as teachers must be. No man can be prevented from plaguing his own family with his filthy habits; but the children of other people ought to be protected.

AGRICULTURAL DISTRICT No. 18.

Organization of the Board of Directors.

Last Thursday the newly appointed Directors of Agricultural District No. 18 met at Independence. The following Directors were present:—John Shepherd, Thomas J. Goodale, A. R. Conklin, N. Rhine, W. Walker. Absent, N. D. Arnot, Harvey Boone, R. W. Ford. A. R. Conklin was chosen temporary chairman and C. Hampton temporary secretary. Mr. Mr. Walker nominated Mr. Conklin for the office of President of the Board; all the Directors present voted for the motion and Mr. Conklin was declared elected. C. Mulholland was elected Secretary and O. I. Mairs, Treasurer; both to serve for the term of four years. The Secretary was ordered to give bonds in the sum of $2000, and the Treasurer in the sum of $4000; said bonds to be renewed each year during their terms of office. The salary of the Secretary was fixed at $150 for the first year, and the salary of the Treasurer at $25 for the same time. The Directors present drew lots for the long and short terms; the Secretary drew lots for the absent Directors. The drawing resulted as follows: To serve one year N. D. Arnot and T. J. Goodale; two years, Harvey Boone and Nathan Rhine; three years, R. W. Ford and John Shepherd; four years, A. R. Conklin and William Walker. The following were appointed a committee to frame a Constitution and By-Laws for the government of the Association: N. Rhine, John Shepherd and A. R. Conklin. A resolution was adopted that the Board meet at Independence on Thursday, April 21st, to select a place for holding the Fair the coming season. The Secretary was authorized to procure the necessary books and papers for the Association, and the meeting adjourned.

A BIG IMPROVEMENT.

Water Works for Independence.

Last Wednesday evening a meeting of citizens of Independence was held to consider the subject of water works for the town. The meeting was called to order by S. D. Thurston; C. Mulholland was chosen for Chairman and R. L. Peeler, Secretary. It was agreed that a corporate company should be formed to acquire the necessary rights and build the works. A committee was ordered to be appointed with power to frame articles of incorporation; make estimates of the amount of water to be brought in; ascertain the cost of acquiring right and canvas the town to find who would subscribe for stock and the amounts that would be taken. The Chair appointed the following as said committee: E. Robinson, O. I. Mairs, John A. Lank, A. R. Conklin and N. Rhine.

Indispensable to the Toilet

Darbys Prophylactic Fluid cures chafing, eruptions, and inflammation of all kinds, cures inflamed or sore eyes; relieves pains from bites or stings of insects and sore feet; destroys all taint of perspiration or offensive smell from the feet or any part of the body; cleanses and whitens the skin. Used as a dentifrice it purifies the breath; preserves the teeth and cures toothache, sore gums and canker. A little of the Fluid in the Water used in bathing is very refreshing and especially beneficial to the Sick.

Rich.

During the past two years Frank Silva has been working a mine at Darwin, in which himself and Mr. Gould are partners. Recently Silva sank to a greater depth than had yet been reached, and struck a vein of ore that goes four hundred and eighty-eight ounces silver per ton, and seventy-five per cent lead. Quite a quantity of this ore is in sight, enough to justify the owners in the belief that they have a good thing.

For Sale Cheap.

A fine Jack, five years old, standstwelve and a half hands high, color, black. His progeny are noted for their large size and fine action. For further particulars inquire of

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of Inyo county, at the office of the County Clerk until 12 o'clock m., on Tuesday, May 3d, 1887, to contract for the care of said indigent sick for the term of one year, from May 1st, 1887 to May 1st, 1888. Said bids to designate the amount for which parties contracting will care for said indigent sick, on the basis of an average of four patients per day throughout the year, and to include all medicine, nursing, board, lodging and washing. Said bids to include the burial and funeral expenses of any indigent sick person or persons who may die while under such care.

Said contractor to care for all the indigent sick properly admitted to the contractor's care. And said bids to designate the price per head at which all excess of patients over the average of four each day throughout the year will be cared for, said excess to be paid for by extra allowance on presentation of bills duly sworn to, at the regular meeting of said Board, immediately after said contract has expired. The average four per day to be paid for at the regular meetings of the Board, on presentation of bills duly verified. All payments to be made by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of said contract price, for the faithful performance of said contract.

The care and management of said indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof, or any person appointed by said Board for such purpose.

Said proposals must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of one o'clock and four o'clock p. m., on said 3d day of May, 1887, and the Board reserves the right to reject any and all bids.

In the Superior Court of Inyo County, State of California.

In the matter of the Estate of Rafael Diaz, deceased.

Abraham Diaz, the Administrator of the estate of Rafael Diaz, deceased, having filed his petition herein, duly verified, praying for an order of sale of certain parcel of the real estate of said deceased, for the purposes therein set forth. It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased, appear before the said Superior Court on Monday, the twenty-fifth day of April, 1887, at ten o'clock in the forenoon of said day, at the Court Room of said Superior Court, at the Court House, or at the Methodist Church, if the Court be there holden, in the town of Independence, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased, at private sale, as shall be necessary; and that a copy of this order be published at least four successive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

Dated March 25th, 1887.

JOHN A. HANNAH,
Superior Judge.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, Stoutland, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will set up any instrument that will take as much labor off of men as this Washer takes of the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, Normal, Ill., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

INYO COUNTY—Owens River Valley

THE INTERNATIONAL IMMIGRANT UNION intends to colonize the Valley of Owens River, Inyo county, one of the prettiest valleys in the great west, containing about 100,000 acres and well adapted to the growth of wheat and other cereals, as well as of the various fruits. The soil is about the same as the best ever known in California or Oregon, and the facilities for irrigation unsurpassed.

The Company offers to locate settlers upon 80, 160, 320 and 640 acre farms, the settlers obtaining the same from the Government at $1.50 per acre under the Desert Land Act, paying for the same 50 cents per acre upon filing his or her application, and the balance, $1 per acre, at the end of three years, or before if water is brought upon the land in sufficient quantity to irrigate the same. Any person, man or woman, 21 years of age, can locate a tract of 640 acres.

HINTS ON LINEN.

Suggestions Which Will Be Particularly Acceptable to Lovers of Fine Sheets.

Linen sheeting comes in various qualities, widths and makes. There are Irish, Scotch, English and German linens, each having its points of excellence and its more or less ardent supporters. There is a very wide range of values in these goods, the prices varying from 75 cents to $3.50 per yard, according to fineness, weight and general finish.

Linens may be very fine and yet very heavy, the threads being round, firm and closely woven, or they may be heavy and strong, but more loosely placed, making a thicker but not as durable an article as the finer woven grades. It is a great mistake to choose very fine linen for sheets. It will never stay in place, but will roll up and get "stringy," and after repeated efforts to keep it in place the user gives up in despair and declares that "linen sheeting is a failure." If she will select a good grade of sheeting that is well worth about 90 cents to $1.25 per yard, she will ever after believe in it.

The special novelty in linen sheeting is a thick, fine twilled goods, a regular linen satine, which is by far the most elegant fabric of the sort ever brought out. It combines all of the qualities most desirable in goods of high grade. It has sufficient body to stay in place, is exquisitely smooth and satiny to the touch and almost as glossy as silk. It comes two and a half yards wide, and has pillow and bolster case linens to match. Altogether it is one of the most perfect fabrics in market, and in spite of its rather high cost is an economical investment, as it is especially durable and handsome.

In making sheets it is well to allow a little more than the regular two and one-half yards in length. Most of the best housekeepers add to this from one-fourths to three-eights of a yard, this being often the length after the hems are done. Two and three-fourths yards for a finished sheet is generally sufficient unless the bedstead is extra size. The linen should never be cut straight across the piece. It is frequently the case that the crease is drawn altogether out of regular lines during the process of calendering and putting up, and to cut across the fold as the dealer cuts it from the piece is often to waste three or four inches in the straightening, which all judicious housewives will look after. In the purchase of a single pair of sheets allowance must be made for this irregularity, else the finished articles will be quite too short.

However much the fabric may be drawn it will come straight after laundering, provided care is taken in hanging the sheets upon the line, and vigorously shaking and snapping them both before drying and while they are yet damp. All linen articles should be taken from the line while yet damp, thoroughly shaken and pulled straightway of the goods, rolled up in damp cloths and ironed until perfectly dry. The irons should be quite hot, but carefully tempered, as linen is more easily scorched than cotton, and once browned its durability is destroyed.

It is well to hem the corners by hand, over-seam the ends of the hems very firmly, and then stitch the hems on a lock-stitch machine, running around the ends of the hems to the doubled edge of the cloth. Done in this way, there is very little danger of hems breaking out until the sheets are worn threadbare. Where sheets wear thin in the middle they may be cut through lengthwise, hemmed and over-seamed together at what was originally their outer edges. In this way they will last through many more changes and launderings for the extra work. Many old-time housekeepers make this their regular practice with sheets of all sorts.

Hems should be about two inches wide upon the end at the head of the bed, and about three-fourths of an inch wide for the foot end. Ladies with plenty of leisure and a taste for such work hem-stitch the wide end hem very elaborately, giving it almost the appearance of drawn work. The narrow hem may be plain or may have a single row of hem-stitching. Pillow and bolster cases may be similarly finished; the latter are rarely more than single hem-stitched, however, while pillow cases are often very elaborately done. For regular use this is scarcely commendable, as the drawing out of so many threads weakens the fabric and makes the articles less durable.—*Decorator and Furnisher.*

Empress Eugenie's Pearls.

There was a new opera and a new necklace for the fashionable people to see this week. The triumphant article was the famous string of pearls which had once belonged to the Empress Eugenie and been worn by her in the days of the French monarchy. Even in these days of royal glitter in Paris, this jeweled thing shone so brightly as to dazzle beholders accustomed to lavish adornments. It consists of 340 Oriental pearls, set in a golden chain, and it was valued then at about $150,000. Napoleon's widow put it into a safe deposit vault in Paris on her retirement to Chiselhurst, and there it lay until the recent sale of her useless effects. William K. Vanderbilt and his wife were in the French capital, and they purchased it at $130,000. They bought other things from the Eugenie collection—mostly household embellishments—and these will be disclosed at next week's reopening of the Fifth avenue residence. But Mrs. Willie Vanderbilt put on the necklace for the opera.—New York Cor. Chicago Tribune.

Getting Up False Faces.

A number of men, women and children make a living by getting up false faces, which find a ready sale during the ball season and around Christmas time. It requires no little ingenuity and artistic skill to make these grotesque combinations of paint and cardboard which delight the children, and serve to lighten up the graveyard gloom of the ordinary public mask ball. The best false faces, however, come from France, and are coated with wax before being painted.—New York Journal.

President Eliot said, in his address at King's chapel, Boston, that "as a rule the world loves a conservator better than the critic or pioneer."—Chicago Times.

Many a man who imagines that he is a big electric light finds out to his sorrow that he is only a little tallow dip.—New Haven News.

THE ANSWER OF PARIS.

My Helen, with thy grand Greek eyes,
Made by heaven most pure and wise,
Thou dost bid the winds of joy
Whisper thee of long lost Troy!
My Helen, with thy grave Greek lips,
Carved in death's last sweet eclipse,
Thou dost bid the murm'rous sea
Tell Troy's burial place to thee?

Deep in northern snows two meet,
Two whose love is full, complete;
And beneath a southern sun,
Two whom love hath made as one.

My Helen! Let me touch thy hand
Where love dwells—still Troy doth stand.
—Fannie Aymar Mathews in Home Journal.

THE SAFE DEPOSIT VAULT.

How Wealth Tries to Make Assurance Doubly Sure—Locks and Safes.

It is a long way, in fact, from the simple contrivances of classic times for protecting ready wealth to the coffers and money chests, the secret drawers and guarded treasuries of Florence and Venice. And from them it is still a longer one through the clumsy safes and rude locks of the last century to the present almost perfect treasure vaults, proof against fire or flood, against both sharp edged tools and any charges of powder or dynamite that a burglar may safely use. The present safety vault has of course grown out of the old safe, and is really only a perfected modern bank safe on an enlarged plan. The average safe is an iron and steel box, some four to six feet in height by four feet in breadth and depth. It has a thick door, made in half a dozen layers of unequal size, heavily bolted together, and opens by a combination of movements on an exterior knob.

The safe deposit vault is another big box, also of steel and iron, some ten feet in height and twelve feet in length, built in, like a prisoner's cell, with a heavy wall of brick, mortar and cement, and opening by a door almost a foot in thickness into a larger room which contains it. All that ingenuity can do has been done to make the body of the vault impregnable and to put the secret of the intricate lock beyond chance of guessing. The cell inside is lined with drawers and boxes, each locked and bolted. The whole thing is a safe within a safe, making assurance doubly sure at but slightly higher rates for nervous and cautious depositors.

Safe deposit vaults are built by only a few of the large safe makers. The metal used for the walls of the vault is a mixture of iron and steel, melted together at high heat and tempered throughout as finely and evenly as possible. The result is a homogeneous, almost flawless surface, which defies alike the burglar's tools or the flames of a big fire. A wall three inches in thickness is laid on in plates with heavy bolts of the same material, and the whole side is then shut in with a stout covering of fire proof brick and a finely mixed cement. Particular care, of course, is taken with the door, which is the only part exposed after the outer wall is built. The plates are doubled, braced and re-braced, of various sizes according to the layers, over lapping and falling short, but all so piled and blended together that while one holds all will hold and the treasures within will still be safe. The lock combination is made so intricate, too, that it needs one man's mind working all the time to keep up with it.

The demand for vaults is comparatively small now, but the makers agree that there will be a large increase in the number used before ten years pass. People are just beginning to realize what mental relief it is to have one's valuables absolutely secure from accident or theft, and that comfortable feeling is sure to spread even if it entails the building of costlier safety vaults than those we have now.—New York Tribune.

Diffusion of Wealth.

Twenty millions of dollars in a village does not make that village rich if it is all owned by two men; but if that amount is spread evenly all over the village then it is different. Money in the hands of one or two men is like a dungheap in a barnyard. So long as it lies in a mass it does no good, but if it was only spread evenly on the land how everything would grow! Money is like snow. If it is blown into drifts it blocks up the highway and nobody can travel, but if it lies evenly distributed over all the ground it facilitates every man's travel. Wealth is good if diffused, but not if hoarded.—Henry Ward Beecher.

American Women and Men.

It is a frequent fashion to proclaim the general worthlessness of American women from the animal standpoint. They lack the breadth of back and the massiveness of limb observed in lands where wives plow with the ox and daughters delve in the mines. The American woman looks after her household, rears her children, makes happy a husband for whom she is much too good, and in her old age takes joy in manly sons and womanly daughters. It is slander to call her incompetent, or say that she falls short in the measure of duty, when compared to the women of other lands, whose strength she has, but whose grossness she lacks.

Just now the fashion in talk has changed. It is the man who is the weakling, and who is hurrying the nation to extinction. There is a craze for big biceps and abnormal calves. In all of which there is considerable nonsense and some wisdom. Statistics show that in America length of life is increasing. Men are as healthy and as happy and as capable as a hundred years ago. Some striplings may go out of life in a cloud of cigarette smoke, but they are not dragging the nation toward extinction, and some of sound body will be left to bury the dead, in spite of the croakers who seem to think this continent is developing into a graveyard.—Omaha Herald.

Russian Scientific Discoverers.

For four or five years past Russian scientific men have been stationed at or near the mouth of the Lena, carrying on first the work of one of the circumpolar stations and then engaging in the exploration of the delta and of a part of the large region eastward. They have made a number of interesting discoveries, and scientific zeal has been richly rewarded even in this apparently desolate country. In the region where the pole of greatest cold is situated, these explorers have collected 400 kinds of plants, numerous paleontological specimens and a large number of insects and other invertebrata.

Among the mountains that divide the Lena from the Yana basins Baron von Toll obtained six specimens of mountain sheep. He has made a special study of the fauna of the sea coast, and the latest news from him was that he was going with a party of natives to find a mammoth which a recent land slide had revealed. An important feature of the work of this party has been the complete exploration of the large Yana river from its headwaters to the sea, including two of its affluents.—New York Sun.

POINTED REMARKS.

Persons Who Did Not Believe in Wasting Time in Idle Talk.

The characteristics of several nations have been summed up in the following concise form: The first thing a Spaniard does on founding a colony is to build a gallows; a Portugese, to build a church; an Englishman, a drinking-booth, and a Frenchman, a dancing-floor.

A cobbler visited one of the large manufactories the other day, and for the first time in his life saw shoes made by machinery. "What do you think of that?" asked the foreman. "It beats awl," was the laconic and significant reply. A "sensible" woman, as Dr. Abernethy would have called her, was discovered by a shy man, who made her a rather original proposal. He bought a wedding ring and sent it to the lady, enclosing a sheet of note paper with the brief question: "Does it fit?" By return of post he received for answer: "Beautifully!"

It is related that Makart, the great Viennese painter, is even more taciturn than Von Moltke, the man who is silent in seven languages. An American, who had been told that the best way to get on friendly terms with the artist would be to play chess with him at the cafe to which he resorted nightly, watched his opportunity, and when Makart's opponent rose, slipped into his chair. At last his dream was about to be realized; he was to spend an evening in Makart's society. The painter signed to him to play, and the game began and went on with no other sound than the moving of the pieces. At last the American made the winning move and exclaimed "Mate!" Up rose Makart in disgust and stalked out, saying angrily to a friend who asked why he left so early: "Oh, I can't stand playing with a chatterbox."

The expressions used by some boys and girls if written as pronounced would look like a foreign language. Specimens of boys' conversation like the following may be called short-hand talking: "Warejego lasnight?" "Hadder skate." "Jerfind the ice hard'n good?" "Yes; hard'nough." "Jer goerlone?" "No; Bill'n Joe wenterlong." "Howlate jerstay?" "Pastate." "Lemmeknow wenyergoin, woncher? I wanter go'nshowyer howto skate." "H—m, ficoodn' skate better'n you I'd sell out 'nquit." "Well, we'll tryerace 'nseefyercan."

The well-known answer of the Greeks to the Persian King before the battle of Thermopylæ was rivaled by the despatch of General Suvaroff to the Russian Empress: "Hurrah! Ismail's ours!" The Empress returned an answer equally brief: "Hurrah! Field Marshal!"

The message from Lord Charles Beresford to his wife from the fort near Metemmeh was pithy enough: "Quite well and cheerful. Privations have been severe; thirst, hunger, battles desperate; but things look better."

There are some quaint and pithy epistles on record. Quin, when offended by Rich, went away in resentment and wrote: "I am at Bath." The answer was as laconic, though not quite so civil: "Stay there."—*Chambers' Journal.*

David Davis' Signature.

Among President Arthur's papers there is doubtless a note which he once received from David Davis which amused the General very much. It was a brief and formal letter, but the peculiar thing about it was that Mr. Davis signed his name so close to the last line that nothing could have been written between the lines. Arthur thought it a very unconventional signature, especially as, at a hasty glance, it might be overlooked. But he learned that Judge Davis always signed his name thus to prevent any one from filling in any thing in the customary blank space. It appeared that when he was a judge in Illinois, a suit was brought before him to test the validity of a note. The ostensible maker admitted the signature was his, but swore he never made the note, and it was developed on trial that some rascal had taken advantage of a blank space between the termination of a letter and the signature to fill in a note of hand, which he got discounted. The judge, who was a very cautious man, took a hint from this, and ever afterward signed his own name so as to prevent such improper use of it.—*Chicago Herald.*

Throwing the Wedding Shoe.

The custom of throwing one or more old shoes after the bride and groom either when they go to church to be married or when they start on their wedding journey, is so old that the memory of man stretches not back to its beginning. Some think it represents an assault, and is a lingering trace of the custom among savage nations of carrying away the bride by violence, others think that it is a relic of the ancient law of exchange or purchase, and that it formerly implied the surrender by the parents of all dominion or authority over their daughter. It has a likeness to a Jewish custom mentioned in the Bible. Thus in Deuteronomy we read that when the brother of a dead man refused to marry his widow she asserted her independence of him by "loosing his shoe." Also in Ruth when the kinsman of Boaz gave up his claim to the inheritance of Ruth and to Ruth also, he indicated his assent by plucking off his shoe, and giving it to Boaz. It was also the custom of the middle ages to place the husband's shoe on the head of the nuptial couch, in token of his domination.—*Chicago Inter Ocean.*

A Urgent Need.

Krupp's last gun will fire a ball weighing two tons through thirty-eight inches of solid iron. What the American public demands is a machine to propel the nocturnal brickbat with force and accuracy.—San Francisco Examiner.

No Danger for Them.

Smith—I notice that an English physician says coffee drinkers are sure to be old before their time.

Jones—How thankful we ought to be that we board.—Pittsburg Chronicle.

HER HUSBAND MADE FUN OF IT.

Some people value remedies according as to whether they are frightful in appearance or nauseous to the taste. When such folks hear about Compound Oxygen, and learn that it is something not to be swallowed but simply to be inhaled, and that there is no unpleasant taste or odor with it, they have no idea that it can do any good.

A Montana lady who had been troubled with lung disease and a bad cough, writes her experience:

"My husband is very favorably impressed with the Oxygen, and is willing for me to take another Treatment. He at first made fun of it, as so much water bottled up, but he don't think that now."

When we come to inquire why the husband stopped making fun of Compound Oxygen we find it in what the lady says of her improvement:

"*I am feeling fifty per cent. better than when I commenced taking Oxygen;* indeed, I would think I was in perfect health but for the slight cough and occasional pain in my lung. My appetite is excellent, and my bowels were never more even. I notice now that I can walk farther or go up steps without losing my breath so bad, and can enjoy a good laugh without coughing."

That will do. It cures. Write to Drs. Starkey & Palen, 1529 Arch St., Philadelphia, for a little book which tells in good earnest a great many interesting facts about Compound Oxygen.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 615 Powell Street, San Francisco.

"Can you use this?" timidly inquired the poet, as he laid a bundle on the desk. "I think I can," said the editor affably. "I am just about to start a fire in the office stove."

A CHANCE FOR HEALTH

is afforded those fast sinking into a condition of hopeless debility. The means are at hand. In the form of a genial medicinal cordial, Hostetter's Stomach Bitters embodies the combined qualities of a blood fertilizer and depurent, a tonic and an alterative. While it promotes digestion and assimilation, and stimulates appetite, has the further effect of purifying the life current and strengthening the nervous system. As the blood grows richer and purer by its use, they who resort to this sterling medicinal agent, acquire not only vigor, but bodily substance. A healthful change in the secretions is effected by it, and that sure and rapid physical decay, which a chronic obstruction of the functions of the system produce, is arrested. The prime causes of disease being removed, health is speedily renovated and vigor restored.

After all there would be nothing so very strange about the return of Brigham Young to life. Perhaps he met a dozen or so of his wives in the other world.

For allaying Hoarseness and Irritation of the Throat, it is daily proved that "*Brown's Bronchial Troches*" are a mild remedy, yet very efficacious.

TOOK ALL HIS PAINS AWAY.

A. M. Chisholm, of No. 2724 Stoddart Street, St. Louis, Mo., writes:

"During my long residence in Canada I suffered for years from severe pains in my back, across the region of the kidneys, and by the constant use of Allcock's Plasters invariably obtained great relief. Upon removing to St. Louis, I was again troubled with the same complaint, and was advised to use Magnetic and other kinds of plasters, without being relieved of pain, so fell back to my old friend Allcock, who gives me more relief than any other I have ever tried. I always recommend them to my friends and all who suffer from pains and aches of any kind."

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

Relief is immediate, and a cure sure. Piso's Remedy for Catarrh. 50 cents.

Try Germea for Breakfast

BABY'S SKIN & SCALP CLEANSED PURIFIED AND BEAUTIFIED BY CUTICURA.

For cleansing, purifying and beautifying the skin of children and infants and curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair, from infancy to old age, the Cuticura Remedies are infallible.

Cuticura, the great Skin Cure, and Cuticura Soap, an exquisite Skin Beautifier, prepared from it, externally, and Cuticura Resolvent, the new Blood Purifier, internally, invariably succeed when all other remedies and the best physicians fail.

Cuticura Remedies are absolutely pure, and the only infallible skin beautifiers and blood purifiers, free from poisonous ingredients.

Sold everywhere. Price, Cuticura, 50c.; Soap, 25c.; Resolvent, $1. Prepared by the Potter Drug and Chemical Co., Boston, Mass.

☞ Send for "How to Cure Skin Diseases."

BABY'S Skin and Scalp preserved and beautified by Cuticura Medicated Soap.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

INVALIDS' HOTEL AND SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS,

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine *for yourself*, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to *you* for what we represent, and if you come and visit us, and find that we have misrepresented, *in any particular*, our institutions, advantages or success, **we will promptly refund to you all expenses of your trip.** We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

By our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and familiarize them with our system of treatment, yet we have not seen one person in five hundred whom we have cured. The perfect *accuracy* with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to *exactly* locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain *signs*. From these scientists deduce accurate conclusions regardless of distance. So, also, in medical science, diseases have certain unmistakable signs, or symptoms, and by reason of this fact, we have been enabled to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases, without seeing and personally examining our patients. In recognizing diseases without a personal examination of the patient, we claim to possess no miraculous powers. We obtain our knowledge of the patient's disease by the practical application, to the practice of medicine, of well-established principles of modern science. And it is to the accuracy with which this system has endowed us that we owe our almost world-wide reputation of skillfully treating lingering or chronic affections. This system of practice, and the marvelous success which has been attained thereby, if it demonstrate the fact that diseases display certain phenomena, which, being subjected to scientific analysis, furnish abundant and unmistakable data, to guide the judgment of the skillful practitioner aright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in **"The People's Common Sense Medical Adviser."** By R. V. Pierce, M. D. 1000 pages and over 300 colored and other illustrations. Sent, post-paid, for $1.50. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular disease, will be sent you, with our terms for treatment and all particulars.

MARVELOUS SUCCESS.

SIGHS OF DISEASE.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such diseases than he who attempts to treat every ill to which flesh is heir, without giving special attention to any class of diseases. Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or literature.

By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of *every* malady incident to humanity.

OUR FIELD OF SUCCESS.

NASAL, THROAT AND LUNG DISEASES. **The treatment of Diseases of the Air Passages** and **Lungs,** such as **Chronic Nasal Catarrh, Laryngitis, Bronchitis, Asthma,** and **Consumption,** both through correspondence and at our institutions, constitutes an important specialty.

We publish three separate books on Nasal, Throat and Lung Diseases, which give much valuable information, viz: (1) A Treatise on Consumption, Laryngitis and Bronchitis; price, post-paid, ten cents. (2) A Treatise on Asthma, or Phthisic, giving new and successful treatment; price, post-paid, ten cents. (3) A Treatise on Chronic Nasal Catarrh; price, post-paid, two cents.

DISEASES OF DIGESTION. **Dyspepsia, "Liver Complaint," Obstinate Constipation, Chronic Diarrhœa, Tape-worms,** and kindred affections are among those chronic diseases in the successful treatment of which our specialists have attained great success. Many of the diseases affecting the liver and other organs contributing in their functions to the process of digestion, are very obscure, and are not infrequently mistaken by both laymen and physicians for other maladies, and treatment is employed directed to the removal of a disease which does not exist. Our Complete Treatise on Diseases of the Digestive Organs will be sent to any address on receipt of ten cents in postage stamps.

KIDNEY DISEASES. **BRIGHT'S DISEASE, DIABETES,** and kindred maladies, have been very largely treated, and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients, **who can, therefore, generally be successfully treated at their homes.** The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by sufferers from this class of maladies as the old and world-famed World's Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the *exact* nature of each case, and, hence, have been successful in *nicely* adapting their remedies for the cure of each individual case.

CAUTION. These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do *positive injury* in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only safe and successful course is to carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the disease and condition of our patient.

WONDERFUL SUCCESS. To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our institutions devoted exclusively to the treatment of diseases of the kidneys and bladder. The treatment of diseases of the urinary organs having constituted a leading branch of our practice at the Invalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a style to be easily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps.

BLADDER DISEASES. **INFLAMMATION OF THE BLADDER, STONE IN THE BLADDER, Gravel, Enlarged Prostate Gland, Retention of Urine,** and kindred affections, may be included among those in the cure of which our specialists have achieved extraordinary success. These are fully treated of in our illustrated pamphlet on Urinary Diseases. Sent by mail for ten cents in stamps.

STRICTURE. **STRICTURES AND URINARY FISTULÆ.**—Hundreds of cases of the worst form of strictures, many of them greatly aggravated by the careless use of instruments in the hands of inexperienced physicians and surgeons, causing false passages, urinary fistulæ, and other complications, annually consult us for relief and cure. That no case of this class is too difficult for the skill of our specialists is proved by cures reported in our illustrated treaties on these maladies, to which we refer with pride. To intrust this class of cases to physicians of small experience is a dangerous proceeding. Many a man has been ruined for life by so doing, while thousands annually lose their lives through unskillful treatment. Send particulars of your case and ten cents in stamps for a large, illustrated treatise containing many testimonials.

NERVOUS DISEASES. **Epileptic Convulsions, or Fits, Paralysis, or Palsy, Locomotor Ataxia, St. Vitus's Dance, Insomnia,** or inability to sleep, and threatened insanity, **Nervous Debility,** arising from overstudy, excesses, and other causes, and every variety of nervous affection, are treated by our specialists for these diseases with unusual success. See numerous cases reported in our different illustrated pamphlets on nervous diseases, any one of which will be sent for ten cents in postage stamps, when request for them is accompanied with a statement of a case for consultation, so that we may know which one of our Treatises to send.

DISEASES OF WOMEN. We have a special Department, thoroughly organized, and devoted *exclusively* to the treatment of Diseases of Women. Every case consulting our specialists, whether by letter or in person, is given the most careful and considerate attention. Important cases (and we get few which have not already baffled the skill of all the home physicians) has the benefit of a full Council, of skilled specialists. Rooms for ladies in the Invalids' Hotel are very private. Send ten cents in stamps for our large Complete Treatise on Diseases of Women, illustrated with numerous wood-cuts and colored plates (160 pages).

RADICAL CURE OF RUPTURE. **HERNIA** (Breach), or **RUPTURE,** no matter of how long standing, or of what size, is promptly and **permanently cured** by our specialists, **without the knife and without dependence upon trusses.** Abundant references. Send ten cents for Illustrated Treatise.

PILES, FISTULÆ, and other diseases affecting the lower bowels, are treated with wonderful success. The worst cases of pile tumors are permanently cured in fifteen to twenty days. Send ten cents for Illustrated Treatise.

DELICATE DISEASES. Organic weakness, nervous debility, premature decline of the manly powers, involuntary vital losses, impaired memory, mental anxiety, absence of will-power, melancholy, weak back, and kindred affections, are speedily, thoroughly and permanently cured.

To those acquainted with our institutions, it is hardly necessary to say that the Invalids' Hotel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which arise from youthful indiscretions and pernicious, solitary practices.

We, many years ago, established a special Department for the treatment of these diseases, under the management of some of the most skillful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced specialists.

WE OFFER NO APOLOGY. We offer no apology for devoting so much attention to this neglected class of diseases, believing no condition of humanity is too wretched to merit the sympathy and best services of the noble profession to which we belong. Many who suffer from these terrible diseases contract them innocently. Why any medical man, intent on doing good and alleviating suffering, should shun such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladies which afflict mankind there is probably none about which physicians in general practice know so little.

We shall, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these delicate diseases.

CURED AT HOME. Most of these cases can be treated by us when at a distance just as well as if they were here in person.

Our Complete and Illustrated Treatise (168 pages) on these subjects is sent to any address on receipt of ten cents in stamps.

SURGICAL PRACTICE. Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-specialists. Large Stones are safely removed from the Bladder, by crushing, washing and pumping them out, thus avoiding the great danger of cutting. Our specialists, remove cataract from the eye, thereby curing blindness. They also straighten cross-eyes and insert artificial ones when needed. Many Ovarian and also Fibroid Tumors of the Uterus are arrested in growth and cured by electrolysis, coupled with other means of our invention, whereby the great danger of cutting operations in these cases is avoided.

Especially has the success of our improved operations for Varicocele, Hydrocele, Fistulæ, Ruptured Cervix Uteri, and for Ruptured Perineum, been alike gratifying both to ourselves and our patients. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the female generally resulting in Barrenness, or Sterility, and the cure of which, by a safe and painless operation, removes this commonest of impediments to the bearing of offspring.

A Complete Treatise on any one of the above maladies will be sent on receipt of ten cents in stamps.

ALL CHRONIC DISEASES A SPECIALTY. Although we have in the preceding paragraphs, made mention of some of the special ailments to which particular attention is given by the specialists at the Invalids' Hotel and Surgical Institute, yet the institution abounds in skill, facilities, and apparatus for the successful treatment of every form of chronic ailment, whether requiring for its cure medical or surgical means.

All letters of inquiry, or of consultation, should be addressed to

WORLD'S DISPENSARY MEDICAL ASSOCIATION,
663 Main Street, BUFFALO, N. Y.

This BELT or Regenerator is made expressly for the cure of derangements of the generative organs. The continuous stream of ELECTRICITY permeating through the parts must restore them to healthy action. Do not confound this with Electric Belts advertised to cure all ills from head to toe. It is for the ONE specific purpose.

For circulars giving full information, address Cheever Electric Belt Co., 193 Washington Street, Chicago, Ill.

STEINWAY. KRANICH & BACH, Gabler, Roenish Pianos; Burdett Organs, band instruments. Largest stock of Sheet Music and Books. Bands supplied at Eastern prices. M. GRAY, 206 Post Street, San Francisco.

KINDERGARTEN

A select family paper 4 children and big folks. Teaches home elevation—American principles—Kindergarten methods—Every family in America needs it—managed by ladies—regular subs. 50c. per year—but send right now, 20 cents in stamps, the lowest price in clubs of 500, and it will be sent one year post paid.—Send by first mail to "Kindergarten," 420 Montg. St. S. F. Cal.

QUEER OCCUPATIONS.

The Peculiar Ways in Which Some New Yorkers Make a Good Living.

New York has not attained the unique distinction recently boasted by Paris of maintaining a beggar factory for maiming little children, so as to render them objects of pity. Neither has it yet reached up to London in the possession of "necessary stores," wherein every earthly thing in use by man is kept on sale. There is an audacious Teuton near Chatham Square who keeps hand-organs in mischief by repairing them. He assumes to replenish them with new tunes, but, of course, that is a fiction, for no hand-organ was ever heard to play any but bald-headed and middle-aged music.

Two courageous New Yorkers follow the useful but unpoetic business of hanging their fellow-citizens. They are not prejudiced in favor of New Yorkers, but are easily persuaded to hang men elsewhere throughout the Union. It is always pretended that no one knows their names and that only the sheriff of this county has their addresses. One is a Hebrew, dubbed "Isaacs," and the other is a German, called "Minzesheimer;" but the city always lumps them both under the one name of Joseph B. Atkinson, and under that name they draw their pay. They rig the gallows and finally cut the rope.

Four prosperous citizens earn their livelihoods as doctors for the lap-dogs of rich women. As a rule the only medicine they use is starvation. They fling the dear pets into barred boxes and deprive them of food for four days, having found out that the usual trouble with pet dogs is that they are fed extravagantly and improperly. Just east of the Bowery in a tenement house resides a man whose business is to rent himself and his Punch and Judy show to children's parties in the brown-stone wards. A person on the Bowery keeps six or eight girls busy framing wreaths and pictures of tombstones, whereon are set forth the virtues of deceased New Yorkers. He follows where the death notices in the papers lead him and works upon the feelings of the grief-stricken families.

Another man is making a fortune by carrying off all the waste and refuse the city will not remove, such as builders' leavings, dirt from cellar diggings and so on. The builders pay him to take it, and then he sells it in the suburbs for filling in sunken lands.

Only one man in town pretends to keep photographs of all the notable persons in the world. There is not room for two in the business. Another citizen sells to public men and corporations clippings from all the newspapers that mention them, at five cents a clipping added to a subscription fee each year.

Yet another citizen hunts up coats-of-arms and pedigrees for all who think theirs have been overlooked, or that they may get them from families of the same, or nearly the same, names as their own. This is quite English and therefore popular. It is said that the carriage-makers are giving away coats-of-arms like chromos.

The trade in painting black eyes with a mixture of six parts white paint and one part red, now boasts several establishments. It is not popularizing the black eye, because it only covers up the scandal without producing forgetfulness.

One New Yorker has posted himself about all the unclaimed estates in Christendom, and thus profits by a weakness more general than most folks imagine.

Another New Yorker searches the streets at night with a lantern for coins and purses dropped during the evening.

A woman near the City Hall takes care of the babies whose widowed mothers have to go out to work, and who check them, like umbrellas, in the morning and call for them in the evening. Many women in the East Side tenements take care of a baby or two for their neighbors, but this down-town one is, I think, the only regular safe baby safe deposit company or storage warehouse in town.

There is no matrimonial agency or husbands' exchange newspaper here just now. There have been many, but all have failed. That scheme is not as profitable as that of a man I met the other day, who told me he trained valuable dogs to come straight back to him as often as he sold them.—*Julian Ralph, in Philadelphia Press.*

DECORATIVE ART.

Designs Which Might Give a Sober Man a Case of Jimjams.

A pair of old castaway boots veneered with gilt make a pretty wall ornament. To add to the effect put patches of cotton wool on the legs, to imitate snow.

An old pair of corsets ornamented with creeping vines and pretty designs in leaf, make a very elegant ornament to hang over a bed-room door.

An old coal scuttle tinted with delicate shades of scarlet and cerulean blue furnishes a unique relief for a dining-room wall. To brighten the effect place several selected vegetables in the scuttle, allowing the tops to be seen at a distance of half way across the room.

As an ornamental design for a front hall take a dozen tomato cans and paint each one a different color. Tie a bow of pretty satin ribbon of various shades about each. Run a gaudy string through the lot and hang them on the wall close to the ceiling. One can hardly imagine the divine effect of this exquisite collection.

An old tin water sprinkler covered with a halo of gilt stars and pulverized glass diamonds and suspended from a parlor chandelier is very attractive. A large pink satin bow arranged over the spout adds very materially to the effect. —*Whitehall Times.*

PERSONAL AND IMPERSONAL.

—Mrs. Mary Pleasants, colored, of San Francisco, is worth $250,000.

—General Nelson A. Miles, the Indian fighter, is said to be the handsomest officer in the United States army.

—The list of New York "society" people who now write for the press or the magazines foots up to thirty-two.—*N. Y. Mail.*

—Senor Terry, probably the richest man in Cuba, who died recently, leaving $50,000,000, began his business life as a peddler, became rich, married a wealthy lady and kept on adding to his fortune.

—Such a crowd of uninvited guests rushed into the cathedral at New Orleans to witness a marriage that the priest ordered the lights extinguished and performed the ceremony at the bride's residence.—*N. O. Picayune.*

—A year ago Thomas Cruse, an old mining millionaire at Montana, who had lived a bachelor, married Miss Galen, a poor dressmaker, giving her a wedding present of $250,000. Recently he died at Helena.—*Chicago Herald.*

—The mother of Rev. Dr. F. S. Norton, once of the Albany (N. Y.) Cathedral, and now rector of St. Stephen's Church, Lynn, Mass., has recently died, leaving her son a large fortune—making him, indeed; one of the wealthiest clergymen in America.—*Albany Journal.*

—Of President Arthur's Cabinet Frelinghuysen and Folger are dead. Hatton is editing the Chicago *Mail.* Lincoln is practicing law in Chicago. Gresham is on the bench. Brewster is taking care of a large law practice in Philadelphia. Teller is in the United States Senate.

—The citizens of Centreville, N. Y., say that there can be no doubt that Jane Colhoun, of that place, is one hundred and six years old. She was born, married and has lived all her days in the district, and her age has been verified beyond question. She frequently walks to Highland, four miles distant.—*Buffalo Express.*

—Miss Adele Palma is the coming star, if theaters can be found where she may cast her light. She is said to be of Roumanian birth, but "is as entirely American in the perfect command of our language as if she were a native-born Knickerbocker." She is but twenty-two years of age, so she may yet master English."—*Boston Budget.*

—Colonel Michael Sheridan says that the report that General Sheridan has purchased a hundred and sixty acres of land in Perry County, Ohio, is untrue. "I only wish it were true," he exclaimed. "It would please us all if the General had money enough to invest in real estate of any sort. The truth of the matter is that the General received eighty acres of land, located in Perry County, as an inheritance."—*Cleveland Leader.*

—Colonel Fred Grant says: "It was at the special request of my father that Logan was gazetted a Brigadier-General. There has been a good deal of talk about Logan's educational deficiencies. Logan was a good Latin scholar, and spoke Spanish as well as he did English. In conversation he had a great fund of anecdote, but never told one that might not have been told to women."—*N. Y. Tribune.*

"A LITTLE NONSENSE."

—If you live in the same house with a parrot you will soon learn why polly wants a crack or two—with a club. Try it.—*Lowell Citizen.*

—Teuton (who has blown out the gas) —"Py chiminy, dot limpurger schmells goot. Dey must be some fellers 'round here heflin' a late lunch."—*Tid-Bits.*

—His Fear was Realized.—

Said George: "On my mind there's a weight;
It is really getting quite leight,
And I fear that your pa——"
He got only thus far,
For he landed outside of the geight.
—*Life.*

—Photographer—Wear a pleased expression, if you can; just imagine that the object of your affections has given you a sealskin sacque. Lady (with a sigh)—He has given me a sack, but it's not sealskin.—*Texas Siftings.*

—"A lately arrived English snob has a valet over six feet high," remarks an exchange. There is nothing startling in this. In this country the Father of Waters has a valley about three thousand miles long.—*Pittsburgh Bulletin.*

—Why don't you try the hot-water cure?" asked Tompkins of a friend who was complaining of indigestion. "Drink a cup of hot water every morning." "I do," was the reply, "I drink our boarding-house tea every morning."

—She—Have you read the article on Henry Clay in the *Century?* He—No, but I would like to very much. She—You admire him, then? He—I have never met him personally, but I have smoked a great many of his cigars.—*N. Y. Sun.*

—Miss Duffy—"I hear that you are engaged to young Solder, the plumber." Miss Puffy—"It is a fact, Jane." "It always struck me that he was a cold, callous creature." "Well, Jane, I confess that he does not do very much cooing, but on billing he can not be surpassed."—*Chicago Tribune.*

—"What was that crash of pottery I heard just now, Sally? What did you break?" "A vase, mum?" "Which one?" "That square one on the lib'ry table, mum!" "Oh, Sally! That was the very oldest and rarest vase in the entire house." "Is that so, mum? An' it's plazed I am to hear ye say that same, intoirely. I was afraid at first it moight be new."—*Detroit Mercury.*

THREE GREAT FAMILIES.

Social Influence of the New York Vanderbilts, Potters and Fields.

I accidentally encountered $200,000,000 in a small jewelry store on Fifth avenue a few days ago. It was more than $200,000,000, now that I think of it, for there were three men in the group; the oldest was Mr. Cornelius Vanderbilt, who was pale, clerical and solemn looking, with a pleasant expression of the eye, and a tendency to lean against posts and show cases. Beside him stood his brother, William K. Vanderbilt, in the most irreproachable of English clothes, with his mutton-chop whiskers brushed back from a weak, but good-natured face. Between the two men chatting amiably with them was Dr. Seward Webb, their brother-in-law. Dr. Webb is the most popular of the men who have married into this family. The three men represented a vast amount of money, and they all entered the shop together to spend exactly twenty-five cents for a new crystal for Cornelius' watch.

What struck me at the time as being most notable was the influence which a great New York family, like the Vanderbilts, possess. Take Dr. Seward Webb, for instance; he was a surgeon in St. Luke's Hospital when old Mrs. Vanderbilt took her daughter there one day on a visit of charity to the sick. The daughter fell in love with the young surgeon, married him, and, on the death of William H., Dr. Webb inherited $10,000,000 and an interest in the main portion of the estate. He became president of one of the largest down-town stock firms, was made director in the wealthiest trust company in the country, and became identified at once with the Lincoln Bank and other great institutions. Now he wanders about, the friend of millionaires, the most welcome of visitors to the boxes in the Opera House, and a pleasant and agreeable man about town. He is thick-set, heavy faced and not at all distinguished in appearance, but evidently a very good fellow.

Another of the great families in New York is just now being talked about through the death of its head, Bishop Potter. The Potter family must feel rather lonely now that it has only one Bishop left in its ranks. Its first Bishop was Alonzo Potter, of Pennsylvania. He was the father of the late Clarkson Potter, Howard Potter, the banker, and Eliphalet Potter, the president of Hobart College. Howard Potter is the father of James Brown Potter, whose wife is studying for the stage.

The second Bishop was Bishop Horatio Potter, of the diocese of New York, who died recently at the advanced age of eighty-five years. He leaves two daughters and one son, who is a professor in a Southern university. A third Bishop is Henry Codman Potter, also a son of Bishop Alonzo Potter, and lately the assistant Bishop of the diocese of New York. The chances are that President Potter will be a Bishop before he dies. He is the handsomest member of the family, has a distinguished presence and is an eloquent speaker. He was made president of Union College when only thirty-one years of age, and the difficulties got into there were probably due to his youth and inexperience. He is doing better as president of Hobart College.

Perhaps the third in importance in the great New York families, outside of the pure commercial aspect, is the Field family. Indeed it may be said that the Fields permeate the intellectual and venturesome fields of American life. They have everywhere pushed themselves to the head in great enterprises, in the law, and in education. Every body knows who David Dudley, Cyrus W., Mr. Justice Field and President Field, of Williams College, are, but besides these four brothers, the sons, nephews and cousins innumerable are quartered in New York and, of course, successful, for the influence of the Field family is enough to build up a man in any walk of life here. For instance, Cyrus W. Field, Jr., went into one of the most successful brokerage houses in this city backed by no other capital than his name.

These are three of New York's great families, and no matter how poor and distant a relation of any one of them may be, he is sure of success if backed by the influence of his kinsmen here. So there is something in family after all.—*Amos J. Cummings and Blakely Hall, in Philadelphia Press.*

EUROPEAN PRINCES.

Hundreds of Able-Bodied Men Who Live at the Expense of Oppressed People.

The ruling houses of Europe number 408 masculine members. The one having the greatest number is the House of Holstein, which counts fifty-three, divided into numerous branches: Russia (Gottorp-Romanof), 25; Augustenburg, 4; Denmark (Glucksburg), 13; Greece, 4, and Oldenburg, 7. The House of Wellin has fifty members, divided as follows: Weimar, 11; Meiningen, 4; Altenburg, 4; Royal Saxony, 6; Coburg, 9; England, 8; Belgium (Coburg), 4; and Portugal (Coburg), 4. The House of Bourbon has 47 Princes; 18 French Bourbons, 11 Sicilian Bourbons, 5 of Parma and 13 of Spain. The House of Lippe has 35 Princes. The House of Hapsburg-Lorraine has no fewer than 33 Archdukes, The House of Wittlesbach (Bavaria), 23 Princes. The House of Hohenzollern 20 Princes; the Reuss and Lichtenstein have the same number. Next in order come Hesse with 10, Mecklenburg 13, Waldeck 12, Savoy 2, Wurtemberg 9, Bernadotte (Sweden(7, Baden 6, Schwarzburg 4, Anhalt 4, Braganza (Brazil) 4, Guelph 4, Petrowics-Njegosch (Montenegro) 3, Orange 43, and finally Obrenowics (Servia) 2. —*Chicago Inter Ocean.*

—An Albany (N. Y.) toboggan chute sends the passengers down at the rate of ninety-three miles an hour.

STYLES IN DANCING.

Profession of the Terpsichorean Art Inventing Intricate Figures.

The only persons who can work at cross purposes succesfully are dancing-masters. They have their own peculiar ideas, which are forever changing, and the result is that their pupils are nearly always in a healpless state of confusion. Each dancing-master, or professor, as he likes to be called, is a great inventor in his own way. A few years ago, when the Saratoga was first introduced, an up-town professor noticed that none of his seventy-five or eighty pupils could dance it nearly so well as a young lady who turned her toes in. He immediately concluded that this was the only to execute this dance. His pupils were shocked at the next lesson to see the elderly and dignified professor walk across the waxed floor with his toes striking against each other and his legs curved like a rainbow. This style was not popular and the efforts of the professor to introduce it nearly ruined him financially. It spoiled the contour of his legs, for he has been a trifle pigeon-toed ever since. In a ball-room a few nights ago four couples were doing the best they could to dance the lanciers. They had never seen each other before, and so they smiled sweetly when they collided, and said: "Excuse me," or "I beg your pardon." Secretly they dubbed each other ignoramuses who did not know any thing more about dancing than a cow. Later in the evening they met again, and, of course, the talk turned upon dancing. To the amazement of all they learned they had been taught to dance by the same teacher. Their classes only lasted a year, but the steps having changed in style as often as the style of a plug hat changed, they found it impossible to dance together with any degree of comfort.

At a meeting of the professors of 1884 several new dances were originated. Among these were the excelsior waltz and the waltz-quadrille (special). It was also determined that the proper way to dance the lanciers was with eight couples instead of with four, and that the german could be vastly improved by the addition of several complicated figures. The professors agreed to frown upon the society waltz, because a number of vulgar persons had exaggerated it so that it was simply a burlesque. It was accordingly frowned upon by him, but in a few weeks it was revived under the various names of redowa, glissade, the knickerbocker, the kick, the scoop, the telephone and a dozen other plebian titles. After a deal of study and patient thought the excelsior was introduced. This was intended to be danced with a moderate slide and the redowa step revolution, with the side step similar to that of the galop. It was thought that this would fill the bill to perfection, but it had hardly been introduced before a lot of professors who didn't belong to the society began teaching it, too, and so made it common and vulgar. The only dance that has held its own despite all the innovations is the waltz-quadrille.

"The lanciers are changed, too," said an old professor. "They were formerly danced in the old Saratoga style, but now it takes eight couples to go through with them properly. The heads chassez from right to left diagonally, not forward and back as in the old style. This keeps all the couples in motion at the same time."

The Columbia is a round dance, something like the American gayot, only livelier and considerably more intricate. A very popular dance is the octagon, and one reason for its popularity is the fact that there is no waltzing in it. There are thousands of pleasure-loving people who are bitterly opposed to waltzing because they deem it improper for a young man to place his arm about a young woman unless she is his wife. Even then they think that any such action as this should be confined to private life.—*N. Y. Star.*

SIKH SOLDIERS.

Finely-Built Men Who Add Considerable Strength to the Bengal Army.

When we conquered the Punjab the Sikhs, who had composed Ranjeet Singh's army, enlisted freely in our newly-raised regiments, and now there is scarcely a regiment in the Bengal army in which there are not one or more companies of these men. They are gifted with all the qualities which go to make a good soldier. Physically they are very fine fellows, averaging in our regiments fully five feet eight inches, with a chest of thirty-six inches. They are brave and wonderfully enduring; very abstemious in their diet, seldom touching meat, and living principally on unleavened bread with a little clarified butter, and occasionally a little coarse sugar or molasses. They are splendid walkers, and when going to their homes on leave will often average thirty or forty miles a day for a week together in the hottest weather. They are very handy, as may be supposed, in the use of the spade, and can throw up entrenchments rapidly and well, and they are also very expert in the loading of baggage animals. I have seen many instances of their bravery. One I may mention. We had advanced up a hill to take a position on an exceedingly hot day in April. One of my officers succumbed to the heat and fell fainting just as we reached the position. His orderly was carrying a bottle of soda water. This he poured over his head, and it had the effect of reviving him. We remained under fire here for some time, and then the object of the advance having been accomplished the force was withdrawn and we were directed to retire. We did so, followed by the enemy. When we had gone back some distance the orderly suddenly remembered that he had left the empty bottle behind and calmly proposed that he should, at the risk of his life, go back for it.—*Macmillan's Magazine.*

NEBUCHADNEZZAR.

You Nebuchadnezzah, whoa, sah!
Whar is you tryin' to go, sah?
I'd hab you for to know, sah,
I's a-holdin' ob de lines.
You better stop dat prancin',
You's pow'ful fond ob dancin',
But I'll bet my yeah's advancin'
Dat I'll cure you ob your shines.

Look heah, mule! Better min' out—
Fus' t'ing you know you'll fin' out
How quick I'll wear dis line out
On your ugly, stubbo'n back.
You needn't try to steal up
An' lif' dat precious heel up;
You's got to plow dis fiel' up,
You has, sah, for a fac'.

Dar, dat's de way to do it!
He's comin' right down to it;
Jes' watch him plowin' troo it!
Dis nigger ain't no fool.
Some folks dey would 'a beat him;
Now dat would only heat him—
I know jes' how to treat him—
You mus' reason wid a mule.

He minds me like a nigger;
If he was only bigger
He'd fetch a mighty figger,
He would, I tell you! Yes, sah!
See how he keeps a-clickin'!
He's as gentle as a chicken,
An' neber thinks o' kickin'—
Whoa dar! Nebuchadnezzah!

* * * * *

Is dis heah me, or not me?
Or is de debbil got me?
Was dat a cannon shot me?
Had I laid heah more'n a week?
Dat mule do kick amazin'!
De beast was sp'iled in raisin'—
By now I 'spect he's grazin'
On de oder side de creek.

IRWIN RUSSELL.

A Surprise.

Farmer—Now, you get off thet air fence, you young scamp, or I'll take th' hide off yer. I don't want no strangers a hangin' around my barn.

Stranger—Don't yer give me much o' yer lip, or I'll walk a hole in yer old farm an' swamp yer crop!—Judge.

The Long and Short Haul.

A few days ago a certain member of congress—his identity is immaterial—took part in the long and short haul discussion. "I feel it my duty," he said, "to vote for this measure." The alert correspondent of a San Francisco paper telegraphed this utterance, adding in parenthesis after the word "measure" the words "long and short haul." But either through the "cussedness" of the wires, or the superior wisdom of the proof-reader, the sentence was printed as follows: "I feel it my duty to vote for this measure. (Long and short howls.)"—New York Tribune.

It Would Remove the Remains.

Agent (selling preparation for removing stains from clothing—I have got here—Servant (who responds to the agent's ring)—Excuse me, please; but we are in great trouble here to-day. The gentleman of the house has been blown up in an explosion. A.—Ha! hurt much? S.—Blown to atoms. Only a grease spot left of him. A.—Ha! Only a grease spot, you say? Well, here's a bottle of my champion eradicator which will remove that grease spot in two minutes.—Charleston (Mass.) Enterprise.

The Wages Were Agreeable.
